Jos Blejje, CEO of ICT Group N.V.: *"In the past six months we have prioritized the integration of the acquisitions of the past year to safeguard a proper basis to consolidate future potential, without losing focus on driving organic growth. Nozhup, that is now fully integrated, contributes positively to the Group's results. With our latest acquisition HTS, that will primarily service Smart Industries, we passed the milestone of 1,000 employees. With this increased group of dedicated professionals, we are fully committed to further executing the company strategy, making the world a little smarter every day. We also continued our investments in the organization, companywide, to ensure a stronger foundation on which we can further build our company. We are confident about the second half of the year and therefore expect further growth in revenue and EBITDA in the second half compared to the first half of 2017.*

Strategy update

In June 2017 ICT acquired High Tech Solutions B.V. (“HTS”), a Dutch based well-respected industrial automation project and services provider. HTS employs 25 professionals on an HBO / academic level. HTS delivers consultancy services in various markets within the domain of Smarter Industries.

During the first six months of 2017 we continued our investments in new platforms and start-ups. Developments at ICT Mobile are promising and a new platform was launched together with start-up company Valuemaat.

By the end of the first half of 2017, ICT passed the mark of 1,000 employees.

Notes to the results

In the first half year of 2017 ICT Group’s revenue came in at € 50.7 million, up 20% compared to € 42.1 million reported in H1 2016. The revenue growth showed a consistent trend. Organically, excluding the contribution of Nozhup and HTS, revenue increased by 6%. This was driven by an increased number of staff and productivity in line with last year.

Revenue at ICT Netherlands increased 22% to € 39.3 million in H1 2017 from € 32.3 million in the same period last year. The increase is mainly attributable to Nozhup that was acquired in September 2016, and fully integrated within ICT Netherlands in the first half of 2017. Organically, revenue was up approximately 5%. Main contributor to this organic growth was the business unit Automotive. Productivity levels were in line with last year. The average tariff increase was in line with the average salary increase. EBITDA came in at € 3.6 million in H1 2017 (H1 2016: € 2.6 million). Licences and materials sales were in line with last year.

Strypes Bulgaria (“ICT Nearshoring”) reported a 46% increase in revenue from € 3.2 million in H1 2016 to € 4.6 million in the first six months of 2017. In 2016 Strypes started to upgrade the organizational effectiveness to safeguard continued and sustainable strong growth of the nearshoring activities. In the first six months of 2017 these investments, in among others quality controls, continued and will continue in the second half. EBITDA amounted to € 0.9 million in H1 2017 (H1 2016: € 0.6 million).

The segment ‘Other’ recorded revenues of € 7.4 million (H1 2016: € 7.1 million). Improve had a slow start to the year, due to postponement of assignments. Recovery is expected in the second half of 2017. After a good 2016, in 2017 Raster experienced margin pressure as a result of more difficult market circumstances. BMA performed in line with last year.

Strategic themes

ICT’s growth strategy focuses on the themes Smarter Industries, Smarter Cities and Smarter Health. Within these themes, ICT delivers added value to its customers.

Due to the acquisitions of Nozhup and HTS growth in the themes Smarter Industries and especially Smarter Cities was higher than in the Smarter Health theme.

Revenue split per theme (in € millions)	H1 2017	H1 2016	Δ
Smarter Industries	34.7	29.7	16.8%
Smarter Cities	7.9	4.9	60.2%
Smarter Health	5.1	5.0	2.3%
Other	3.0	2.4	24.0%
Total revenue	50.7	42.1	20.6%

Personnel costs increased significantly to € 31.0 million (H1 2016: € 24.9 million), primarily because of an increase in number of employees and salary increases.

Other operating expenses also increased, mainly because of the recent acquisitions. In the first half of 2017 the investment levels were similar to those in 2016. The investments focused primarily on housing and further operational effectiveness of the organisation. In addition, ICT continued investing more heavily in recruitment. The costs related to strategic initiatives and the realisation of acquisitions and partnerships amounted to € 0.1 million (H1 2016: € 0.3 million).

EBITDA for the first six months of 2017 increased by 28% to € 5.3 million, compared to € 4.2 million in the comparable period in 2016. The EBITDA margin increased from 9.9% in H1 2016 to 10.5% in H1 2017. The increased scale, following the acquisitions, leads to a more effective use of the indirect cost base.

Amortisation and depreciation

ICT has attributed a value to and is amortising several intangible assets, including order backlog, software and customer relations of its recent acquisitions. Amortisation in the first half of 2017 included Nozhup and amounted to € 1.2 million (H1 2016: € 0.9 million). Depreciation for the first half of 2017 amounted to € 0.5 million (H1 2016: € 0.3 million).

The operating profit amounted to € 3.7 million in H1 2017 (H1 2016: € 3.0 million). As a result of the higher amortization, the operating margin was 7.2%, at the same level as H1 2016 (7.1%).

Results from joint ventures and associates

The results from InTraffic were in line with last year and contributed € 0.1 million to the results (H1 2016: € 0.1 million). The total result from joint ventures and associates amounted to a loss of € 0.2 million (H1 2016: € 0.1 million loss).

Interest expenses increased to € 0.3 million in H1 2017, from € 0.2 million in the first six months of 2016, as a result of increased financing for the recent acquisitions.

Taxes in the first half of 2017 amounted to € 0.7 million compared with € 0.7 million in the first half of 2016.

Net profit for the first six months of 2017 increased to € 2.6 million, compared with € 2.1 million in H1 2016. An amount of € 2.5 million is attributable to the shareholders of ICT Group N.V. (H1 2016: € 2.1 million). This translates into earnings per share of € 0.27 (H1 2016: € 0.24). The number of outstanding ordinary shares increased during the first half year 2017 to 9,411,301 (31 December 2016: 9,288,309) due to stock dividend and to the employee share participation plan.

Cash flow movement

In the first half of the year, net operational cash flow amounted to € 0.5 million negative in H1 2017 (H1 2016: € 0.3 million negative). The net cash position per 30 June 2017 decreased to € 1.0 million negative (31 December 2016: € 5.6 million positive). This was mainly due to the purchase price cash consideration of the acquisition of HTS, the payment of dividend, the repayments of existing acquisition financing and investments in housing facilities.

Balance sheet structure

In the first half of 2017, shareholders' equity increased to € 44.5 million (31 December 2016: € 43.7 million) as a result of the net effect of dividend paid of € 2.1 million, net profit of € 2.6 million, and an equity increase of € 0.3 million as a result of issuing new shares (for the share participation plan for personnel and stock dividend). The balance sheet total increased from € 79.2 million at year-end 2016 to € 84.7 million at 30 June 2017, as a result of the acquisitions in the last six months. Solvency (shareholders' equity/total assets) stood at 53% at the end of June 2017 (55% at year-end 2016).

Personnel

At 30 June 2017, ICT Group has 1,014 employees (971 FTEs), around 6% higher than at year-end 2016. The acquisition of HTS, a low attrition in the first half of the year as well as increased recruitment efforts contributed to this increase.

Outlook

ICT will continue to further leverage the strategic platform it has successfully built over the past years, aimed at organic growth combined with acquisitions. The aim of the acquisition strategy is to achieve strong positions in each of ICT's three main themes. ICT continues its focus on the smarter themes by further deploying its solutions in Internet of Things enabling a digital transformation for its customers. Overall ICT has benefited from favourable economic circumstances. The markets in which ICT operates are expected to continue this favourable trend in the second half of the year. Some markets, such as Oil and Gas are more challenging than others.

Based on the above, ICT expects further growth in revenue and EBITDA in the second half of 2017 compared to the first half of 2017.

Accounting policies

General basis of accounting

These interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance since the last annual consolidated financial statements as at and for the year ended 31 December 2016. For a full explanation of the accounting policies, we refer you to the Annual Report for the financial year 2016 (see the Annual Report ICT Group N.V. 2016 or go to www.ict.eu.)

As of 1 January 2017, there are no new IFRS standards that have been effective or endorsed by the European Union that are relevant to the Company.

With respect to IFRS 15, Revenue from Contracts with Customers, an impact assessment covering all group entities and their revenue streams is continuing and contract reviews are currently being performed and we expect to provide further quantitative and qualitative information with the release of the 2017 results.

Seasonal influences

As a company whose revenue is largely dependent on work carried out by professionals, ICT is subject to seasonal influences, a large part of which is determined by holiday periods.

Risks

ICT has implemented internal risk management and control systems, the aim of which is to minimise the operational and financial risks of the company and to limit as much as possible the influence of events on the company's balance sheet ratios and its results. The most significant operational and financial risks, outlined on pages 26-31 of our 2016 Annual Report, were unchanged in the first half of this year. The 2016 Annual Report is available at www.ict.eu.

For further information, we refer you to section 6 of the 2016 Annual Report, page 77 onwards.

Business combinations and acquisition of subsidiaries (note 2)

Acquisition of High Tech Solutions

On 2 June 2017, the Group acquired 100% of the shares and voting interests in High Tech Solutions B.V. ("HTS"), a Dutch based high technology automation services provider. HTS is an industrial automation project and services provider. The company is located in Apeldoorn and delivers consultancy services in different markets like Telecom, Healthcare, Defence Security and High Tech Manufacturing. HTS realises profitable revenues of around EUR 2.5 million per annum. The acquisition supports ICT's growth ambitions.

Consideration transferred

	<u>x € 1,000</u>
Consideration transferred in cash	1,200
Total consideration transferred	<u>1,200</u>

Deferred acquisition consideration

The purchase consideration for 100% of the shares amounts to € 1,200 thousand transferred in cash. The amount of € 1,200 thousand represents the fair value as at the acquisition date.

Acquisition-related costs

The Company incurred acquisition-related costs including legal fees and due diligence costs. These costs were included in 2017 under "other operating expenses".

Identifiable assets acquired and liabilities assumed

The following table summarises the recognised amounts of assets acquired and liabilities assumed at the acquisition date.

	Carrying amount	Fair value adjustments	Recognised values
Intangible assets: Customer relationships	-	611	611
Intangible assets: Order Backlog	-	134	134
Property, plant and equipment	12	-	12
Cash and cash equivalents	73	-	73
Other current assets	549	-	549
Current liabilities	(360)	-	(360)
Deferred tax liabilities	-	(186)	(186)
Total identifiable net assets acquired	274	559	833

Measurement of fair values

The valuation techniques used for measuring the fair value of material assets acquired were as follows.

Assets acquired	Valuation technique
Intangible assets	Income approach: The income approach determines the fair value from the future cash flows the subject asset will generate over its remaining useful life. The application of this approach involves projecting the cash flows which the subject asset is generating, based on current expectations and assumptions about future states. The cash flows generated by the subject asset have to be converted to present value by discounting them with the appropriate discount rate. The discount rate reflects the time value of money and the relevant risk associated with the cash flows of the asset.

The trade receivables and revenue to be invoiced comprise gross contractual amounts due of € 544 thousand, all of which was considered to be collectible at the acquisition date.

Fair values measured on a provisional basis

The fair value of the assets acquired and liabilities assumed at the acquisition date have been determined on a provisional basis. If new information obtained within one year from the acquisition date about facts and circumstances that existed at the acquisition date identifies adjustments to the above amounts, or any additional provisions that existed at the acquisition date, then the accounting for the acquisition will be revised.

Goodwill

Goodwill arising from the acquisition has been recognised as follows:

	<u>x € 1,000</u>
Consideration transferred	1,200
Fair value of identifiable net assets	833
	<u>367</u>

The goodwill is attributable mainly to the skills and technical talent of HTS's workforce and the synergies the Company expects to achieve from integrating HTS in the Company's existing business. None of the goodwill recognised is expected to be deductible for tax purposes.

Amortisation

Customer relations and order backlog have been identified and valued as a part of a (preliminary) Purchase Price Allocation exercise. Customer relations have been valued for € 611 thousand to be amortised over a period of 5 years as from acquisition date. Order backlog has been valued at € 134 thousand to be amortised over a period of 4 months in 2017. As a result, the total amortisation amounts to € 44 thousand in the first half of 2017 (€ 10 thousand on Customer relations, € 34 thousand on order backlog). The amortisation is not expected to be tax deductible. In the valuation analysis, a deferred tax liability is included which will be released during the amortisation period. The net effect on net result after deferred taxes amounts to € 33 thousand. The amortisation in the second half of 2017 will amount to € 162 thousand.
