In March 2007 the articles of association are revised and the statutory seat of the company is now Rotterdam (formerly: Amersfoort).

Basis of preparation

(a) Statement of compliance

The financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union and with Part 9 of Book 2 of the Netherlands Civil Code.

(b) Basis of preparation

The financial statements are presented in euro. They are prepared on the historical cost basis unless indicated otherwise hereafter.

(c) Use of estimates and judgements

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. There are no substantial judgements, estimates and assumptions in the financial statements 2010 and 2009.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Significant accounting policies

(a) Foreign currency

Foreign currency transactions

Transactions in foreign currency are translated to euro at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to euro at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the income statement. Exchange rates applicable as at 30 June 2010 are as follows:

1 CHF = EUR 0.7528 (31 December 2009: EUR 0.674)

1 JPY = EUR 0.0092 (31 December 2009: EUR 0.0075)

(b) Other investments

These investments are recognised/derecognised on the day they are transferred to/by the company. These assets are stated at amortised cost, taken into account the effective yield on these assets per inception date.

(c) Other receivables

Other receivables are stated at their cost less impairment losses if any.

(d) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits.

(e) Interest-bearing loans and borrowings

Interest-bearing loans and borrowings are recognised initially at cost, less attributable transaction costs. Subsequent to initial recognition, interest-bearing loans and borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the income statement over the period of the loans and borrowings on an effective interest basis as per inception date.

(f) Other payables

Other payables are stated at cost.

(g) Expenses

Net financing costs comprise interest payable on borrowings calculated using the effective interest rate method and interest receivable on funds invested, taking into account the effective yield on these assets and liabilities as per inception date.

(h) Income tax

Income tax on the profit or loss for the year comprises current tax.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

The taxable profit of the company is based on the Advance Pricing Agreements. As a result of this the taxable result can deviate substantially from the commercial result.

Determination of fair values

The fair value of the long-term interest-bearing loans and borrowings is based on their listed market price. Facing the fact that the net proceeds from each issue of these loans and borrowings by EnBW International Finance B.V. only is applied towards the purposes of on lending to EnBW AG and that the interest rates and other interest conditions on these loans and borrowings are equal to these on the long-term loans to EnBW AG, the fair value of these non-current assets is equal to the fair value of the long-term interest-bearing loans and borrowings. The fair value of the other assets and liabilities as at June 30, 2010 and December 31, 2009 is equal to the valuation in the balance sheet.

Financial risk management

Overview

The company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the company's exposure to each of the above risks, the company's objectives, policies and processes for measuring and managing risk, and the company's management of capital.

The Board of Directors has overall responsibility for the establishment and oversight of the company's risk management framework.

The company's risk management policies are established to identify and analyse the risks faced by the company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the company's activities.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables from customers and investment securities.

The company's exposure to credit risk is influenced mainly by the individual characteristics of EnBW AG. The net proceeds from each issue of interest-bearing loans and borrowings by EnBW International Finance B.V. only will be applied towards the purposes of on lending to EnBW AG. The interest rates and other interest conditions on the interest-bearing loans and borrowings are equal to these on the loans to EnBW AG. EnBW AG has provided no securities, but has taken over the irrevocable and unconditional guarantee (towards the Deutsche Bank AG) for the benefit of all bondholders with respect to the prescribed and punctual payment of capital and interest of the bond notes issued by EnBW International Finance B.V.

The long-term credit ratings of EnBW AG are A2 (Moody's), A- (Standard & Poor's) and A (Fitch). Given these credit ratings, management does not expect that EnBW AG will fail to meet its obligations.

Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation.

There is only a small liquidity risk facing the equal terms of the non-current assets and the long-term debts.

EnBW AG has taken over the irrevocable and unconditional guarantee (towards the Deutsche Bank AG) for the benefit of all bondholders with respect to the prescribed and punctual payment of capital and interest of the bond notes issued by EnBW International Finance B.V.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The net proceeds from each issue of interest-bearing loans and borrowings by the company only will be applied towards the purposes of on lending to EnBW AG (for equal currency). Therefore the company is not exposed to currency risk on investments and borrowings that are denominated in a currency other than the functional currency of the EnBW group.

EnBW International Finance B.V.

The currencies in which these transactions primarily are denominated are Euro, Swiss Francs (CHF) and Japanese yen (JPY).

Interest rate risk

The interest rates and other interest conditions on the interest-bearing loans and borrowings are equal to these on the loans to EnBW AG.

Capital management

The policy of EnBW AG is to maintain a strong capital base and satisfactory long-term credit ratings so as to maintain investor, creditor and market confidence and to sustain future development of the business.

There were no changes in the company's approach to capital management during the year.

The company is no subject to externally imposed capital requirements.
