GERMAN PUBLIC SECTOR FINANCE B.V.

Management Report

The Management herewith submits its annual accounts of German Public Sector Finance B.V. (hereinafter “the Company”) for the financial period ended 30 June 2010.

General information

The Company is a limited liability company incorporated under the laws of The Netherlands and has its corporate seat in Rotterdam and business seat in Amsterdam.

The principal activities of the Company consist of acquiring funds on behalf of institutions belonging to the public sector in Germany.

Activities for the period

The Company's activities remain unchanged from last year. It continues to hold a bond liability, from which the funds were on-lent to a third party. These items are the most significant items in the balance sheet.

With respect to the profit and loss account, the interest rates on the bond liability and the long-term receivable are identical so the net interest income remains at nil (2009: nil). The Company receives management fees from a related party to ensure its profit is positive and at least equal to the taxable profit as agreed with the Dutch tax authorities in 1986.

Financial risk management

The Company's activities are primarily exposed to market risks. Market risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Group's Corporate Risk function provides services to manage the financial risk relating to the Company's operations. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on risk. The Company manages market risk by stratifying the portfolio and imposing limits.

Currency risk

Currency risk is the risk that fluctuations in the prevailing foreign currency exchange rates will affect the Company's financial position and cash flows. The Company does not run any currency risk, as the Company does not use any currency other than euros.

Interest risk

Interest rate risk is the risk that fluctuations in the prevailing levels of market interest rates will affect the Company's financial position and cash flows. Interest rate exposure on the debt is fully mitigated by the on-lending of these amounts to Deutsche Telekom A.G. with matching terms.

Management Report

Credit risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due. The Company's credit risk is predominantly with Deutsche Telekom AG, the largest telecommunication company in Germany. The Company has not entered into any other transactions that might generate credit risk.

Future outlook

It is the intention of Royal Bank of Scotland N.V. (Amsterdam, The Netherlands) to sell all of its shares in the Company in the near future.

Audit Committee

On 25 May 2009, the shareholders of the Company, Deutsche Bank A.G. and Royal Bank of Scotland N.V. (formerly ABN AMRO Bank N.V.) have approved the Board Resolution to establish an Audit Committee for the Company, following the Royal Decree of 26 July 2008 implementing article 41 of the EU Directive 2006/43/EG. The Audit Committee of the Company consists of the following members: Jan Rijkenberg (independent member), Corwin Sier (accounting expert) and Johan Smit (accounting expert).

Notes to the Accounts as at 30 June 2010

1. General

The Company, a corporation with limited liability, having its statutory seat in Rotterdam, The Netherlands and its business seat in Amsterdam, The Netherlands, was incorporated on 22 May 1986.

The principal activities of the Company consist of acquiring funds on behalf of institutions belonging to the public sector in Germany. The Company's ultimate parent companies are Royal Bank of Scotland N.V. (formerly ABN AMRO Bank N.V. Amsterdam, The Netherlands) and Deutsche Bank A.G. (Frankfurt, Germany) each for 50%.

2. Summary of principal accounting policies

(a) General

The accompanying accounts have been prepared in accordance with the provisions of Part 9, Book 2 of The Netherlands Civil Code.

(b) Assets and liabilities

All assets and liabilities are stated at face value, unless otherwise stated in the notes thereon.

(c) Foreign currencies

Any assets and liabilities expressed in currencies other than euros are translated into euros at the rates of exchange prevailing at the balance sheet date. Any transactions in foreign currencies are translated into euros at rates of exchange approximating to those ruling at the date of the transactions. Resulting exchange differences, if any, are recognised in the profit and loss account.

(d) Determination of income

All income and expenses are calculated on an accrual basis.

(e) Cash Flow Statement

The cash flow statement has been prepared using the direct method. Cash flows denominated in foreign currencies, if any, are translated at average exchange rates. Exchange differences affecting cash items, if any, are shown separately in the cash flow statement. Interest paid and received, dividends received and income taxes are included in net cash from operating activities. Dividends paid, if any, are included in net cash used in financing activities.

GERMAN PUBLIC SECTOR FINANCE B.V.

Notes to the Accounts as at 30 June 2010

(g) Use of estimates and judgements

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

(h) Financial instruments and changes in accounting policies

Financial instruments include loans payable and loans receivable. As of 1 January 2010 financial instruments are initially recognized at fair value, including directly attributable transactions costs. After initial recognition, financial instruments are carried at amortized cost using the effective interest method, less impairment losses.

Receivables are valued at nominal value less a bad debt provision if necessary. Due to the fact that there are no impairment losses or transaction costs recorded in the financial instruments of the Company the amortized cost equals the nominal value.
