Independent auditors' review report

To the Shareholders and Management of
Banco BTG Pactual S.A. and subsidiaries

We have reviewed the interim consolidated financial statements of Banco BTG Pactual and its subsidiaries ("Bank") for the quarter ended September 30, 2015, which comprise the consolidated balance sheet as of September 30, 2015 and the related consolidated statements of income for the three and nine-month period then ended, and changes in shareholders' equity and cash flows for the nine-month period then ended, and a summary of significant accounting practices and other explanatory notes.

Management is responsible for the preparation and fair presentation of these interim consolidated financial statements in accordance with accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil. Our responsibility is to express a conclusion on these interim consolidated financial statement based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Review Engagements (NBC TR 2410 - *Revisão de Informações Intermediárias Executada pelo Auditor da Entidade* and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim consolidated financial statement referred above have not been prepared, in all material respects, in accordance with the accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil.

Emphasis of matter

As of September 30, 2015, the jointly controlled subsidiary Banco Pan S.A. has deferred tax assets recorded on its balance sheet amounting to R\$ 3.1 billion, recognized based on long-term deferred tax realization projection. This deferred tax realization projection was reviewed by Banco Pan S.A.'s management based on current and future scenarios analysis and approved by its Board of Directors on August 3, 2015, which main assumptions used were the macroeconomics indexes for production and funding costs. The realization of these tax credits, within the estimated realization period, depends on delivery of these projections and business plan as approved by the management bodies of Banco Pan S.A. Our conclusion is not qualified in respect to this matter.

Other matters

Consolidated Statement of value added

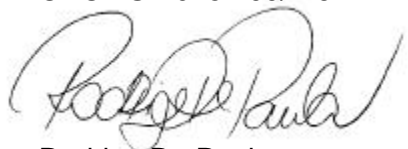

We have also reviewed the consolidated statement of value added (SVA), for the nine-month period ended September 30, 2015, prepared under the responsibility of Bank's management, which financial statement presentation mentioned above is required by Brazilian Corporate Law, as supplementary information under the accounting practices applicable to institutions accredited by the Central Bank of Brazil. This statement has been subject to the same review procedures previously described, and based on our review nothing has come to our attention that causes us to believe that the statement of value added is not fairly presented, in all material respects, in relation to the overall interim financial statement.

Separate financial statements

The Bank has prepared a full set of separate financial statements for the nine-month period ended September 30, 2015 in accordance with accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil for which we issued an unqualified separate independent auditors' review report dated at November 4, 2015.

1. Operations

Banco BTG Pactual S.A. ("Bank" or "BTG Pactual") is incorporated as a multiple Bank, operating jointly with its subsidiaries ("the Group"), offering financial products and services relating to commercial, including exchange, and investment portfolios, credit, financing and investment, leasing and real estate loans.

The transactions are conducted as part of a group of institutions fully participating in the financial market, and certain transactions are intermediated by other institutions of the BTG Pactual Group.

The Bank and BTGP have units listing on NYSE Euronext in Amsterdam and BM&F BOVESPA in São Paulo. Each unit issued, corresponds to 1 common share and 2 preferred shares, class A, of Bank and 1 common share and 2 preferred shares, class B of BTG Pactual Participations Ltd. All units listed and traded in Amsterdam remained wholly interchangeable with the units in Brazil.

The consolidated financial statements were approved by Bank's Management in November 4, 2015 and they contain a true and fair view of the development and results of the Bank and subsidiaries.

2. Corporate reorganization and acquisitions

Corporate events

As at September 2015, ENEVA SA bankruptcy process was complete. As a result, part of the loans held by the Bank was converted into interest in the Company and the Bank has also contributed new assets in the Company. As at September 30, 2015, the Bank has a stake equivalent to 49.7% of the total capital of ENEVA. Such interest is accounted as "Other assets" until the conversion process of shares is complete.

Banco Pan S.A. ("Banco Pan"), Bank and Caixa Participações S.A. - CAIXAPAR ("Caixapar"), on August 21, 2014, executed a purchase and sale agreements through which Banco Pan sold (i) its 100% interest in Pan Seguros S.A. to BTG Pactual Seguradora S.A. ("BTGP Seguradora"), a Bank's subsidiary, as well as (ii) its 100% interest in Pan Corretora S.A. to BTG Pactual and Caixapar, for the total combined amount of R\$580,000, which will be adjusted by the 100% positive variation of DI (interbank deposit) rate until the closing of the transactions. This transaction generated a goodwill of R\$ 393,668. Caixapar, within the scope of the transactions, protected its right to maintain, after the closing of the transactions, its current condition as co-controlling shareholder of Pan Seguros S.A. The Bank concluded and liquidated the transaction on December 29, 2014. After the acquisition were made the merger of the BTGP Seguradora by Pan Seguros S.A. In May 2015, the transfer of 49% of interest on Pan Seguros S.A. to the Caixapar was concluded.

On June 13, 2014, Banco Pan approved a R\$3.0 billion capital increase through the issuance of: (i) up to R\$1.5 billion of 443,786,982 new nominative and non-par shares, of which up to 242,566,348 are common shares and up to 201,220,634 preferred shares, at the issuance price of R\$ 3.38 per common or preferred share, for private subscription by Banco Pan's shareholders; and (ii) up to R\$1.5 billion of redeemable preferred shares with a term of five years, which will receive annual, fixed, cumulative priority dividends of 104% of the CDI over the issue price and which will not be traded on the BM&FBOVESPA. The issuance of the redeemable preference shares was cancelled on December 5, 2014.

The Bank and Caixapar exercised their respective pre-emptive rights in connection with the capital issuance described in (i) and made a total capital contribution of R\$651 million and R\$576 million respectively, which generated negative goodwill of R\$22 million, maintaining the condition of joint holders of all voting shares and 80.7% of Banco Pan's total capital stock. The creation and issuance of the new class of shares described above were reconsidered by the shareholder's.

On April 15, 2014, SUSEP approved BTG Pactual PV Holding LTDA. (subsequently had changed the name for BTG Pactual Vida e Previdência S.A.) to operate pension plan products.

On January 24, 2014 Banco BTG Pactual received licenses from the Luxembourg Ministry of Finance to the Bank's new offshore branch as well as its local subsidiary. Further infrastructure and operational processes were implemented initiate the business activities in 2014.

On April 22, 2013 the Central Bank of Brazil approved the formation of Banco BTG Pactual Chile in Santiago (Chile), with initial capital of US\$50 million. This transaction was approved by Chilean authorities on December 17, 2014.

Acquisitions and disposals

In April, the Bank through one of its subsidiaries, converted debentures in the amount of R\$985,978, issued by Rede D'Or, and received shares equivalent to 21.1% of its equity, which generated a goodwill in the amount of R\$649,807. In May, Rede D'Or received a capital increase which diluted the Bank interest to 19.4% and generated an equity pickup gain of R\$269,174, net of proportional goodwill amortization. Additionally, in June, July and September, BTG Pactual sold 10.4% of its interest in Rede D'Or and recognized a gain of R\$1,499,142. Also, the capital increase and sale contracts contain terms that might reduce the Bank remaining interest, in case Rede D'Or do not reach a determined EBITDA in 2015. As of September 30, 2015, the Bank estimated that the value of a potential dilution is zero.

BTG Pactual Group has entered into a joint venture to establish a reinsurance business operating through a number of regulated reinsurance entities. As part of the growth strategy of the joint venture, as at July 10, 2014, the Bank acquired 100% of the shares of Ariel Re (Holdings) Limited's operations ("Ariel"), a non-life international reinsurance group, based in London and Bermuda, that specializes in property catastrophe reinsurance. On January 12, 2015, the acquisition of Ariel was approved by the Brazilian Central Bank and on February 3, 2015, it was settled. In April 2015, the transfer of 50% of interest on Ariel to the joint venture was concluded.

On July 14, 2014, Banco BTG Pactual entered into a definitive share purchase agreement of BSI, providing for its acquisition, directly or indirectly, of 100% of its capital shares, a Swiss financial institution subsidiary of Generali Group. Banco BTG Pactual believes the business of BSI has complementary geographic and client coverage to its existing client portfolio with limited overlap. On September 30, 2015, the acquisition was concluded and the aggregate consideration paid by Banco BTG Pactual was CHF1,248 million (R\$4,935 million) as per the exchange rate on the date of acquisition, and it consisted of: (i) CHF1,048 (R\$4,162 million) in cash totally paid in September 2015, and (ii) shares in the amount of CHF200 million (R\$773 million). The transaction generated a negative goodwill of CHF27 million (R\$109 million).

In addition, Generali NV used part of the cash proceeds CHF50 million (R\$203 million) to fund the acquisition of a corresponding number of equity interests of BTG Pactual Participations needed to form units of the BTG Pactual Group. The shares issuance, mentioned above, was approved by the Brazilian Central Bank on November 3, 2015. Generali NV and BTG Pactual Group are currently in the administrative process of delivering effectively the share and forming the Units.

Notes to the consolidated financial statements

September 30, 2015

(In thousands of reais)

The preparation of the financial statements in accordance with the accounting practices adopted in Brazil requires Management to use its judgment to determine and record accounting estimates. Assets and liabilities subject to these estimates and assumptions primarily relate to deferred income tax assets and liabilities, to the allowance for loan losses and other receivables, the provision for taxes and contributions with suspended eligibility, the provision for contingent liabilities and the fair value measurement of financial instruments. The settlement of transactions involving these estimates may result in amounts that differ from those estimated due to inaccuracies inherent to its determination. The Bank and its subsidiaries periodically review these estimates and assumptions.

a. Consolidated financial statements

In the consolidated financial statements all intercompany balances of assets and liabilities, revenues, expenses and unrealized profit were eliminated, and were included the portions of net income (loss) and shareholders' equity relating to non-controlling interest.

Goodwill calculated on the acquisition of investment in subsidiaries is recognized in intangible assets, whereas negative goodwill of investments in subsidiaries is recognized as deferred income. Goodwill and negative goodwill calculated on the acquisition of jointly controlled entities is recognized in investments.

b. Functional currency

The items included in the Bank's financial statements are measured using the currency of the main economic environment in which the Bank operates (functional currency). The consolidated financial statements are presented in Reais (R\$), which is the functional currency of the controller, the Bank. Assets and liabilities were translated into reais using the closing rate at the reporting period, while income and expense accounts were translated at the monthly average rate.

The financial statements of the companies abroad, originally stated in their functional currencies, were translated into reais at the foreign exchange rates on the reporting dates.

The effects of foreign exchange variations on investments abroad are distributed in the income statement accounts according to their respective nature.

Reclassification of financial statements

The Bank has revised its previously issued statement of cash flows as for the period ended September 30, 2014 resulting in a decrease in financing activities of R\$1,145,734, and an increase in the same amount in adjusts to net income. This review was in order to apply accounting practices consistent with those applied as at September 30, 2015.

4. Significant accounting practices

The most significant accounting practices adopted by the Bank and its direct and indirect subsidiaries are the following:

a. Cash and cash equivalents

For the purposes of statements of cash flows, cash and cash equivalents include, pursuant to CMN Resolution 3604/08, cash, bank deposits and highly-liquid short-term investments with original maturities up to 90 days, subject to an insignificant risk of change in value.

b. Short-term interbank investments, remunerated deposits at the Central Bank of Brazil, time and interbank deposits, open market funding, funds from securities issued and accepted, loans and onlending, subordinated debts and other asset and liability transactions

The transactions with clauses of adjustment for inflation/exchange rate adjustment and transactions with fixed interest rates are recorded at present value, net of transaction costs, calculated on a "*pro rata die* basis", based on the effective rate of the transactions.

c. Securities

Measured and classified in accordance with the criteria established by BACEN Circular Letter 3068/01 of November 8, 2001, under the following categories:

i. Trading securities

Acquired with the purpose of being actively and frequently traded. Trading securities are initially recognized at cost plus income earned, and adjusted to fair value, recognized to the income of the period.

ii. Available for sale securities

These are securities that are neither classified as trading securities nor as held-to-maturity securities. They are stated at cost, with interest recorded on profit or loss, and subsequently adjusted to fair value, with that amount recorded in a separate account under shareholders' equity, net of tax effects, which will only be recognized in income (loss) after the effective realization.

iii. Held-to-maturity securities

These are securities that the Bank has intention and ability to hold to maturity. They are stated at cost, plus income earned, with a corresponding entry to income (loss). Decreases in the fair value of available-for-sale and held-to-maturity securities below their respective restated costs, related to non-temporary reasons, will be recorded in income (loss) as realized losses.

According to BACEN Circular Letter 3068/01, trading securities are recorded in the balance sheet, in current assets, regardless of their maturity.

d. Derivative financial instruments

These are classified according to Management's intention, on the transaction date, considering whether such transactions are for hedge or not.

The transactions using financial instruments of own portfolio, or that does not comply with hedge criteria (mainly derivatives used to manage the overall risk exposure), are accounted for at fair value, with gains and losses, realized or unrealized, recorded directly in income (loss).

Derivative financial instruments used to mitigate the risks arising from exposures to changes in the fair value of financial assets and financial liabilities and that are highly correlated in relation to changes in their fair value in relation to the fair value of the hedged item, both in the beginning and throughout the agreement, and deemed as effective in the reduction of risk associated to the exposure to be hedged, are deemed as hedge and are classified according to their nature:

Fair value hedge: financial instruments included in this category, as well as their related hedged financial assets and liabilities, are measured at fair value, and their realized or unrealized related gains or losses are recorded in income (loss); and

Cash flow hedge: the instruments classified in this category are measured at fair value, and the effective portion of the appreciation or depreciation is recorded in a separate account under shareholders' equity, net of tax effects. The non-effective portion of the respective hedge is directly recorded in the statement of income.

e. Fair value of securities, derivative financial instruments and other rights and obligations

The fair value of securities, derivative financial instruments and other rights and obligations, whenever applicable, are calculated based on market price, price evaluation models, or based on the price determined for other financial instruments with similar characteristics. The daily adjustments of transactions performed in the futures market are recorded as effective income and expense when generated or incurred. The premium paid or received upon performance of transactions in the stock option market, other financial assets and commodities are recorded in the respective assets accounts for amounts paid or received, adjusted at market price against their results.

The transactions performed in the forward market of financial assets and commodities are registered by the final retained value, adjusted for the difference between this amount and the price of the good or right adjusted at market prices, at the appropriate assets or liabilities account. The income and expenses are recorded according to the maturity of their agreements.

Assets and liabilities resulting from swap and currency forward transactions of non-delivery forward agreements (NDF) are recognized in assets and liabilities at their carrying amount, with adjustments to fair value, recorded in income (loss).

The notional amount of the agreements recorded in memorandum accounts.

f. Financial instruments – net presentation

Financial assets and liabilities are stated at their net amounts in the balance sheet if, and only if, there is a current legally enforceable right to offset the amounts recognized and if there is an intention to simultaneously realize the asset and settle the liability.

g. Sale or transfer of financial assets with substantial retention of risks and benefits

Financial assets remain on the transferor's balance sheet when the transferor sells or transfers a financial asset and retains all or substantially all of the risks and benefits of the asset. In such case, a financial liability is recognized for the consideration received for such asset.

h. Loans and other receivables (operations with credit characteristics)

Recorded at present value, calculated on a "*pro rata die*" basis on the index variation and on the agreed interest rate, updated up to 59th day of default, provided the expected receipt. As from the 60th day, the recognition in income (loss) occurs at the time of the effective receipts of installments. Renegotiated transactions are maintained at least in the same level in which they were classified before the renegotiation and, if they had already been written off, they are fully provisioned and gains are recorded in the results when actually received.

i. Allowance for loan losses

Recognized based on an analysis of loan risk losses at an amount deemed as sufficient to cover probable losses, pursuant to CMN Resolution 2682, of December 21, 1999, among which:

Allowances are recorded for loans, based on the classification of the client's risk, based on the periodical analysis of client quality and of activity industries and not only upon default.

Considering exclusively the default, written of loans against losses are carried after 360 days from the credit due date or after 540 days, for transactions with maturity over 36 months.

The allowance for loan losses and other receivables is estimated based on the analysis of transactions and specific risks presented in each portfolio, in accordance with the criteria established by CMN Resolution 2682/99.

j. Investment property

Investment properties held by subsidiaries, which their main activity is real estate, are initially measured at cost including transactions costs. After initial recognition, investment properties are stated at fair value, reflecting the market conditions at each balance sheet date. Adjustments to fair value are determined considering the fair value of the property, minus the attributed costs of the property, and recognized in net income.

The fair value of investment properties are determined at least on an annual basis, or when the Company deems it necessary, and may involve an independent valuation.

(In thousands of reais)

Investment properties are derecognized when disposed of or when they cease to be used permanently and no further economics benefit are expected from their disposal.

k. Investments

Jointly controlled and associates are accounted for under the equity method. Other investments in permanent assets are stated at cost, less allowance for losses, when applicable.

l. Goodwill and negative goodwill

Goodwill and negative goodwill are calculated based on the difference between the acquisition amount paid and the net carrying amount of the net assets acquired.

Goodwill and negative goodwill, recorded according to the basis of expected future results of the acquired subsidiaries, are amortized according to cashflow projections underlying the transaction or, when the investment is written off, by disposal or impairment, before projections are achieved.

Negative goodwill is recognized in investments for jointly controlled entities, and in deferred income to subsidiaries, until the investment is realized.

m. Property and equipment in use and deferred charges

These are stated at cost. Depreciation is calculated on a straight-line basis based on the economic useful lives of the assets. Deferred charges correspond mainly to leasehold improvements. Amortization is calculated using the straight-line basis over the estimated period of usage and/or disposal.

n. Intangible assets

Corresponds to acquired rights that have as their subject intangible assets destined to the entities' maintenance or used for such purpose, in accordance with CMN Resolution 3642, of November 26, 2008. Comprised by (i) goodwill paid in acquisition transferred to intangible asset due to incorporation of acquirer's equity by the acquired, or consolidation of the company, (ii) for acquired rights of assets management contracts, and (iii) softwares and improvements in third part property. Amortization is calculated using the straight-line basis over the period in which the rights generate benefits.

o. Impairment on non-financial assets

Whenever there is clear evidence that the assets are measured at an unrecoverable amount, it is recorded as loss in the income or loss. This procedure is performed at least at the end of each fiscal year.

Assets subject to impairment are deducted, when applicable, of provision for losses that is calculated according to the lower of value in use and fair value less costs to sell the assets. The main estimates used in determining the provision are: expectation of future cash flows, discount rates, illiquidity, among others.

p. Income tax and social contribution

The provisions for income tax and social contribution are recorded based on book income adjusted by additions and deductions provided by the tax legislation. Deferred income tax and social contribution are calculated on temporary differences, whenever the realization of these amounts is considered as probable, at the rate of 20% for income tax, plus a 10% surtax on the annual taxable income exceeding R\$240, and 20% for social contribution of financial institutions and 9% for non-financial institutions.

q. Contingent assets and liabilities, and legal, tax and social security obligations

Recognized according to the criteria described below:

i. Contingent assets

Contingent assets are not recognized in the financial statements, except when there is evidence ensuring their realization and when they are no longer subject to appeals.

ii. Contingent liabilities

Contingent liabilities are recognized in the financial statements when, based on the opinion of the legal counsel and management, the risk of loss in legal or administrative proceeding is considered probable, and whenever the amounts involved can be measured reliably. Contingent liabilities assessed by the legal advisors as possible losses are only disclosed in the notes to the financial statements, while those classified as remote losses do not require the recording of provisions or disclosure.

iii. Legal obligation – tax and social security

Legal liabilities refer to lawsuits challenging the legality or constitutionality of certain taxes and contributions. The amount under dispute is measured and recorded.

r. Earnings per share

Calculated based on weighted average shares outstanding for the period.

s. Revenue recognition

Revenues and expenses are recorded under the accrual method.

5. Risk management

The Bank's committee structure allows for the inputs from the entire organization and ensures that the decisions are implemented effectively. The main committees involved in risk management activities are: (i) Management Committee, which approves policies, defines overall limits and is ultimately responsible for managing risks, (ii) New Business Committee, which assesses the feasibility and supervises the implementation of proposals for new businesses and products, (iii) Credit Risk Committee, which is responsible for approving new loans according to the guidelines set forth by the Bank's Risk

Committee, (iv) Market Risk Committee, which is responsible for monitoring market risk, including the use of our risk limits (Value at Risk - VaR), and approving exceptions, (v) Operational Risk Committee, which assesses the main operational risks for the internal policies and regulatory risks established, (vi) AML (Anti Money Laundering) Compliance Committee, which is responsible for establishing policy rules and reporting potential problems related to money laundering, (vii) CFO Committee, which is responsible for monitoring liquidity risk, including cash and cash equivalents and capital structure, (viii) Audit Committee, which is responsible for independent verification of compliance with internal controls and assessment of maintenance of the accounting records.

The Bank monitors and controls risk exposure through several and different supplemental internal systems, including credit, financial, operational, compliance, tax and legal systems. The Bank believes that the involvement of the Committees (including their subcommittees) with management and continuous risk control promotes a strict risk control culture in the organization as a whole. The Bank's commissions comprise senior members of the business units and senior members of the control departments, which do not depend on the business areas.

b. Market risk

VaR is the potential loss of value of the trading positions due to adverse movements in the market during a defined period within a specific level of confidence. Together with the Stress Test, VaR is used to measure the exposure of the Bank's positions at market risk. The Bank uses a historical simulation for calculation of VaR, applying real distributions and correlation amongst assets, not using Greek approximations and standard distributions. VaR may be measured in accordance with different periods, historical data and reliable levels. The accuracy of the market risk methodology is tested through daily back testing that compares the compliance between VaR estimates and gains and losses realized.

The VaR presented below was calculated for a one day period, with level of confidence of 95.0% and one year historical data. Reliable level of 95.0% means that there is one within twenty chances that the day trade net income remains below estimated VaR. Therefore, insufficiencies arising from net income expected from trade in a single day of trading exceeding the reported VaR would be expected to occur, on average, around once a month. Insufficiencies in a single day may exceed the VaR reported in material amounts. Insufficiencies may also occur more frequently or accrue during a longer period, such as the number of consecutive trading days. As it is backed up by historical data, VaR's accuracy is limited to its capacity to predict unprecedented market changes, as historical distributions in market risk factors may not produce accurate prognostics of future market risk. VaR methodologies and assumptions on different distributions may produce a materially different VaR. In addition, VaR calculated for a one-day period does not consider the market risk of positions that may not be settled or offset with hedges within the term of one day. As previously mentioned, the Bank uses stress test models as a complement to VaR method for its daily risk activities.

The table below contains the Bank's and its subsidiaries' daily average VaR for the periods ended:

In millions of R\$	September 2015	December 2014	September 2014
Daily average VaR	130,7	64,4	65,8

c. Credit risk

All of the Bank's and its subsidiaries' counterparties are subject to credit risk analyses focusing mainly on an assessment of their paying ability, based on simulations of cash flows, debt leverage and schedule, asset quality, interest coverage and working capital. Qualitative aspects, such as strategic guidance, business sector, expert areas, efficiency, regulatory environment and market share, are regularly assessed and used to supplement the credit analysis process. The Bank's counterparties credit limits and its subsidiaries are established by the Credit Committee and are regularly reviewed. The measurement and monitoring of the total risk to which the Bank and its subsidiaries are exposed cover all the financial instruments that may generate counterparty risks, such as private equity, derivatives, guarantees given and possible settlement risks.

d. Liquidity risk

The Bank and its subsidiaries manage liquidity risk by concentrating their portfolio in high-level credit and highly-liquid assets, using funds obtained from prime counterparties at extremely competitive rates. The Bank and its subsidiaries maintain a solid capital structure and a low level of leverage. Additionally, any mismatching between assets and liabilities is carefully monitored, considering the impact of extreme market conditions in order to assess their ability to realize assets or to reduce leverage.

e. Operating risk

In line with the BACEN guidelines and the Basel Committee concepts, an operating risk management policy applicable to the Bank and to its local and foreign subsidiaries was defined.

The policy establishes a set of principles, procedures and tools that enable risk management to be permanently adjusted to the nature and complexity of products, services, activities, processes and systems.

The Bank and its subsidiaries have a culture in managing operational risk, which takes into account the assessment, monitoring, simulation and validation of risks, based on consistent internal controls. The mechanisms for managing and controlling operational risks are continually improved with a view to comply with the requirements of regulatory agencies, rapidly adjusting to changes and anticipating future trends, among which the New Basel Capital Accord propositions are to be highlighted.

If measured at fair value, held-to-maturity securities would be reported as at the period ended September 30, 2015 with a negative adjustment of R\$226,942 (December 31, 2014 – R\$1,832 positive).

The Bank has intention and financial capacity to maintain such assets to maturity.

e. Reclassification of securities

Management classifies the securities according to its trading intention. No reclassifications or changes in intention were made by Management during the period ended in September 30, 2015. During the year ended December 31, 2014 the Bank's Management reclassified R\$10,502,528 from the category trading securities for available for sale securities, with no effect on current gain or loss.

9. Derivative financial instruments

The Bank actively engages in risk intermediation transactions involving derivative financial instruments, providing necessary hedging for its own needs and its clients aiming to reduce market, currency and interest rate risk exposures. Certain derivatives may be associated with operations involving securities or rights and obligations.

The risk underlying these operations is managed through strict control policies, the establishment of strategies, definitions of limits, among other monitoring techniques. The limits of risk exposure are determined by the Risk Committee and by type of instrument and counterparty concentration, among others.

Transactions conducted in Brazil are traded, registered or held in custody by BM&F Bovespa and CETIP S.A. – Balcão Organizado de Ativos e Derivativos; transactions conducted abroad are traded and registered with prime brokers. The Bank uses different financial instruments to achieve economical hedge such as options, forwards, futures and swaps with periodic adjustment. The use of these instruments is to hedge positions in the cash markets, aiming to improve the risk level in the portfolio, where the risk monitoring committees deemed necessary.

As at the period ended September 30, 2015 and year ended December 31, 2014, the Bank does not have derivative financial instruments classified as hedge accounting. However, it has the policy to economically hedge its exposures to foreign currencies, including exposures in subsidiaries or to associates, using derivatives or other financial instruments. The policy aims to mitigate any effect from changes in foreign currency on assets and liabilities, other than those ones for trading purpose.

a. Recognized in memorandum and balance sheet accounts

The notional amounts of transactions with financial instruments are recorded in memorandum accounts and the adjustment/premium in balance sheet accounts. The assumed positions arising from transactions with derivative financial instruments, demonstrated below, considers the provisions of BACEN Circular Letter 3641/13, which determines the exclusion of agreements in currency, gold and other assets linked to foreign exchange exposure, with maturity in the first business day following the date the exchange exposure is verified. The receivable leg and payable leg are presented separately for Swap, Non-Deliverable Forward ("NDF") and Deliverable Forward ("DF") derivatives in the table below.

e. Guarantee margins

Guarantee margins in transactions traded on BM&FBovespa and other stock exchanges with derivatives comprises federal government and foreign government bonds totaling R\$1,380,630 (December 31, 2014 – R\$2,644,645) and shares in the amount of R\$164,260 (December 31, 2014 – R\$112,832).

f. Fair value of financial instruments

The fair values of financial instruments are calculated as follows:

- Swaps: cash flows are discounted to present value based on yield curves reflecting the proper risk factors. These yield curves are mainly based on the prices traded on BM&F Bovespa, Brazilian government bonds traded on the secondary or derivative market and securities traded abroad. These yield curves may be used to obtain the fair value of currency swaps, interest rate swaps and swaps based on other risk factors (energy commodities, stock market indexes, etc.).
- Futures and Forward: using stock exchange quotations or criteria identical to those described for swaps above.
- Options: the fair value of these instruments are calculated based on mathematical models (such as Black & Scholes) that use data containing implied volatility, interest rate yield curve and the fair value of the underlying asset. These data are obtained from different sources (normally prices from brokers and brokerage firms, Bloomberg and Reuters).
- Credit derivatives: the fair value of these instruments is calculated based on mathematical models largely adopted in the market that uses data relating to the issuer's credit spread and interest rate yield curve. These data are obtained from different sources (normally market prices, Bloomberg and Reuters).
- Securities and short selling: the fair value of government bonds are calculated based on prices disclosed by the Brazilian Association of Financial and Capital Market Entities (ANBIMA). The fair value of corporate bonds is calculated based on prices traded on the secondary market, prices of similar assets and market visibility of the Company's commercial departments. Shares are calculated based on the prices informed by BM&F Bovespa. Fund quotas are valued based on quota prices disclosed by the custodian.
- Financial assets at fair value through profit (loss): The Bank estimates the fair values of the financial instruments by discounting cash flows to present value based on yield curves reflecting the proper risk factors.

10. Loans

Loans are classified in risk levels in accordance with the criteria established by CMN Resolution 2682/99. This classification takes into consideration, among others, a periodic analysis of the transaction, defaults, client history and guarantee, when applicable.

The allowance for loan losses is calculated based on classification of clients in the risk levels, as defined by the same Resolution.

17. Contingent assets and liabilities and legal obligations

The Bank's and its subsidiaries' Management evaluate existing contingencies in relation to legal proceedings filed against these entities and recognizes a provision to cover probable losses on such proceedings. Management's judgment is based on the opinion of its internal and external legal counsel regarding the expected outcome for each proceeding.

a. Contingent assets

As at the period ended September 30, 2015 and year ended December 31, 2014 the Bank did not record contingent assets.

b. Contingent liabilities classified as probable losses and legal obligations

i. Labor provisions

Comprise lawsuits filed by former employees, mostly claiming overtime and salary parity. The contingencies are recorded based on an analysis of the potential loss amounts, considering the current stage of the lawsuit and the opinion of external and internal legal counsel.

BANCO BTG PACTUAL S.A. and subsidiaries

Notes to the consolidated financial statements

(In thousands of reais)

ii. Civil provisions

For civil lawsuits with chances of unfavourable outcome (pain and suffering and pecuniary injury, among others), contingency amounts are recorded based on estimate of probable losses based on the opinion of internal and external legal counsel.

iii. Tax and social security provisions

Tax and social security provisions are represented by legal and administrative proceedings of federal, state and municipal taxes, regarding legal obligations and contingent liabilities. The provisions are recognized based on the opinion of internal and external legal counselors and the court level to which each proceeding was submitted.

c. Breakdown and changes in provisions

The Bank's Management is challenging the constitutionality of certain procedures regarding federal taxes, in addition to being party to other legal, tax and civil proceedings. Based on the opinion of its legal counsel, Management considers that the provisions recorded for such proceedings as at September 30, 2015 are appropriate to cover probable losses arising therefrom.

The provisions recognized and their changes in the periods are as follows:

The nature of the main provisions is presented below:

i. Suspended payment taxes and other taxes liabilities (Note 16(b))

The Bank's and its subsidiaries have been challenging in court the legal nature of some taxes and contributions. The amounts relating to legal obligations and contingencies assessed a possible loss by internal and external counsel are fully recorded in provision. The main legal disputes are the following:

COFINS ("Social security financing tax") - Challenge of the legal grounds for the levy of COFINS under rules established by Law 9718/98.

PIS ("Social integration program tax") - Challenge of the levy of PIS established by Constitutional Amendments 10 of 1996 and 17 of 1997.

CSL ("Social contribution tax") - Challenge of CSL payment required from financial institutions in the period from 1996 to 1998 at rates higher than those applied to legal entities in general, opposing the constitutional principle of equality.

(In thousands of reais)

As at September 30, 2015, Banco BTG Pactual and its subsidiaries were parties to taxes lawsuits with a possible outcome, which were not recorded in provision. The descriptions of the main lawsuits are as follows:

- Lawsuits relating to the payment of profit sharing, challenging the payment of social security contribution on the amounts and non-deductibility of income tax and social contribution tax base. The amount claimed is R\$823 million. Part of this amount is security by indemnity clause, as it refers to the period before the acquisition of the Bank by the current controllers.
- Lawsuits relating to the demutualization and IPO of BM&F Bovespa, challenging the taxation of PIS and Cofins on revenues earned from the sale of shares of the companies previously mentioned. The amount claimed is R\$18 million. Part of this amount is security by indemnity clause, as it refers to the period before the acquisition of the Bank by the current controllers.
- In October 2012, we received a tax assessment, which in September 30, 2015 totalled R\$2,109 million alleging that our use of the amortization of certain goodwill to reduce the amount of the IRPJ and CSLL taxes payable by us was inappropriate. Such goodwill was originated in connection with the acquisition of us by UBS in 2006. The amortization of such goodwill occurred from February 2007 to January 2012, although the tax assessment solely relates to the IRPJ and CSLL tax returns for the calendar years 2007, 2008 and 2009. We have filed an appeal of this tax assessment. In February 2013 a preliminary administrative decision was issued, providing for a partial reduction of the tax assessment. On June 03, 2015, a second instance decision was issued, which cancel the isolated fine in the amount of R\$329,9 million. Based on our analysis of applicable case law, including in recent similar cases, we believe that the tax assessment is without merit and that we will ultimately prevail in its appeal. As a result, we do not expect to incur any losses (other than the costs of the appeal) in connection with this matter, and have not established (and do not expect to establish) any related reserves on our financial statements. In addition to our assessment as to the validity of this tax assessment, in the event that we incur losses in connection with this matter, we believe we are entitled to be indemnified by third parties for part of these losses. Accordingly, in no event do we do not to incur any material losses in connection with this matter.

ii. Provision for other contingent liabilities

As at September 30, 2015, BTG Pactual and its subsidiaries were part to several civil, labor, lawsuits and other contingences with a possible outcome, which were not recorded in provisions.

c. Pension plan

BSI contributes to pension plan entities which provide post-employment benefits to current and retires employees. The most relevant pension schemes related to the Swiss employees whereas BSI's employees, through these entities, are enrolled in these mandatory occupational pension schemes in accordance with the Swiss Federal Law. These pension entities have their assets and obligations segregated from BSI and they are jointly managed by employees and BSI's representatives.

The pension benefits provided by these entities changed significantly on January 2015; and from that date onwards are considered defined contribution rather than defined benefit under Swiss GAAP. Under the old plan, pension benefits were calculated substantially based on a percentage of the last salaries; and under the new plan, pension benefits are calculated by applying the conversion rate to the assets accumulated by the insured person at the date of retirement.

AS of December 31, 2014, the last date of audited information from these entities, and taking into account the changes applicable from January 2015 onwards, BSI's management and its actuarial specialist estimated that there were no actuarial deficit under Swiss GAAP.

26. Subsequent event

As of November 3, 2015, the capital increase approval process described on note 19 was concluded.

Independent auditors' review report

To the Shareholders and Management of
BTG Pactual Participations Ltd.

We have reviewed the interim condensed consolidated financial statements of BTG Pactual Participations Ltd. ("Company") for the quarter ended September 30, 2015, which comprise the interim condensed consolidated balance sheet as of September 30, 2015 and the related interim condensed consolidated statements of income and comprehensive income for the three and nine-month period then ended, and changes in shareholders' equity and cash flows for the nine-month period then ended, and a summary of significant accounting practices and other explanatory notes.

Management is responsible for the preparation and fair presentation of this interim condensed consolidated financial statement in accordance with the international accounting standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board – IASB. Our responsibility is to express a conclusion on this interim condensed consolidated financial statement based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Review Engagements (NBC TR 2410 - Revisão de Informações Intermediárias Executada pelo Auditor da Entidade and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed consolidated financial statements referred above have not been prepared, in all material respects, in accordance with the international accounting standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board – IASB.

Notes to the interim condensed financial statements

As of September 30, 2015 and December 31, 2014

(In thousands of reais)

1. Operations

BTG Pactual Participations Ltd ("BTGP" or "Company") was incorporated as a tax exempted Limited Liability Company under the laws of Bermuda on March 26, 2010. On December 29, 2010, the Bermuda monetary authority approved the incorporation of the Company. The Company headquarters is located on Clarendon House, 2 Church Street, HM 11, Hamilton, Bermudas.

The Company has applied for and has been granted exemption from all forms of taxation in Bermuda until March 31, 2035, including income, capital gains and withholding taxes. In jurisdictions other than Bermuda, some foreign taxes will be withheld at source on dividends and certain interest received by the Company.

The Company is the sole owner of BTG Bermuda LP Holdco Ltd ("BTG Holdco") which, on December 29, 2010, received a Class C common share from BTG Pactual Management Ltd and thus became general partner of BTG Investments LP ("BTGI"). As a consequence of this transaction, the Company obtained the right to control the financial and operating policies of BTGI.

BTGI was formed in 2008 and makes proprietary capital investments in a wide range of financial instruments, including merchant banking investments in Brazil and overseas, and a variety of financial investments in global markets.

Banco BTG Pactual's asset management area manages BTGI's assets, which do not have their own management, and receives fees at arm's length.

The interim financial statements were approved by Management on November 4, 2015 and they contain a true and fair view of the financial position and results of the Company.

2. Presentation of financial statements

The Company's interim financial statements were prepared and are being presented in accordance with International Accounting Standard (IAS 34) – Interim Financial Reporting, issued by International Accounting Standards Board (IASB).

These interim financial statements do not include all information and disclosures required in the annual financial statements and should be read in conjunction with the Company's financial statements for the year ended December 31, 2014.

The preparation of the financial statements in accordance with IFRS requires Management to make estimates and assumptions that may affect the reported balances of assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the year. Their judgments are particularly relevant in the determination of fair values of financial assets and liabilities, allowance for loan losses and other receivables, impairment of non-financial assets, realization of deferred income taxes, assets and liabilities and the assessment of the need for provisions for contingent liabilities. Estimates are based on historical experience and various other factors that Management believes to be reasonable under the circumstances. Actual results may differ from those estimates.

a. IFRS 10 Consolidated Financial Statements – Investment Entities (Amendment)

In September 30, 2015, the Company reassessed the application of the investment entities guidance from IFRS 10, Consolidated Financial Statements, and concluded that it became an investment entity as a result of the restructuring of the vehicles, through which certain of our global capital markets investment activities had been carried out, and change in the way Management conducts the business. The change in status to investment entity caused significant changes, mainly to the presentation of the financial statements, and we believe it provides enhanced transparency in its investments to the ultimate shareholders, and users of its financial statements.

The objective of the restructuring, initiated in early 2015, was to reduce the operational costs and regulatory burden of maintaining similar trading strategies in the funds in which we invest directly, BTG Pactual Absolute Return II LP ("ARF II") and BTG Pactual Absolute Return LP ("ARF"), and the fund in which Banco BTG Pactual's other clients invest with similar strategies, BTG Pactual Global Emerging Markets and Macro Fund Limited ("GEMM"). Accordingly, BTGI reduced the positions in ARF and ARF II; funds consolidated in our financial statements, and reallocated substantial portions of such proprietary capital to GEMM, an unconsolidated fund. While the restructuring caused a significant reduction in BTGI's total assets, its economic exposure to the corresponding trading strategies remains substantially similar. Further, it became substantially a vehicle through which investment are made for returns from capital appreciation and investment income and which measures and evaluate the performance of substantially all its portfolio on a fair value basis.

Under IFRS 10, the criteria which define an investment entity are currently as follows:

- a. An entity that obtains funds from one or more investors for the purpose of providing those investors with investment services;
- b. An entity that commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income or both; and
- c. An entity that measures and evaluates the performance of substantially all of its investments on a fair value basis.

In accordance with IFRS10.30 and IFRS10.B101, we have therefore ceased to consolidated our subsidiaries at the date of the change in status, which we have evaluated as being September 30, 2015. We have no subsidiaries that provides services that relate to our investment activities that would continue to be consolidated under IFRS10.32.

The Company's investments in controlled entities, as well as investments in associates and joint ventures, are now accounted for at fair value through profit or loss, as shown in Note 8. We have derecognized the assets and liabilities of our subsidiaries from our balance sheet and recognized a gain or loss associated with the move to fair value accounting of these subsidiaries.

The major impacts due to the change in investment entity status are: (i) transfer of foreign exchange differences on translation of subsidiaries that had been recognized in other comprehensive income to the income statement in the amount of R\$818,337; (ii) recognition of positive fair value in the amount of R\$28,660 in the income statement related to the net position of granted and contracted loans; (iii) transfer to retained earnings fair value adjustment that had been recognized in other comprehensive income in the amount of R\$225,672; (iv) significant change in

presentation of the balance sheet due to several reclassifications to the investment entity portfolio line; and (v) no longer presentation of non-controlling interest on the balance sheet; statements of changes in shareholders' equity and cash flows.

Prospective application of the amended standard resulted in the following changes to the balance sheet as of September 30, 2015:

Although the Company no longer consolidates any subsidiary, information relating to non-controlling interest has been provided in the statement of income and comprehensive income as it presents its results until September 30, 2015. Further, the Company has decided to present consolidated statement of income and comprehensive income for the periods and quarters ended September 30, 2015 because it understands the derecognition of subsidiaries should solely be recorded prospectively.

b. Application and significant judgments

The majority of the Company's investment entity portfolio is held through intermediate holding companies which invest in BTGI. These entities are now fair valued. When it is impractical or there is reasonable effort to measure the fair value of the entity, IFRS 10 allows an investment entity to use the previous carrying amount of the subsidiary.

Notes to the interim condensed financial statements

As of September 30, 2015 and December 31, 2014

(In thousands of reais)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The accounting policies set out in Note 3 have been applied consistently to all periods presented in these interim financial statements, except for the period affected by the adoption of IFRS 10 Consolidated Financial Statements – Investment Entities (Amendment), as stated in Note 2(a).

Except for the effects of the change in investment entity status, the accounting policies have been consistently applied across all entities for the purposes of producing these financial statements.

c. Revised IFRS pronouncements

The accounting policies adopted on these financial statements are consistent with those of the previous year.

The following standards were issued but are not yet effective for 2015:

• Annual improvements

The “Annual Improvements to IFRSs” for the 2012-14 annual improvement cycles were issued September 25, 2014 and their adoption is required from July 1, 2016.

The Company does not believe that the amendments will have a material impact on its interim financial statements except for additional disclosures that will be provided.

• IFRS 9 – Financial Instruments

The IFRS 9 is being issued in chapters. In November 2009 and October 2010, chapters containing new measurement and classification rules for financial assets and financial liabilities were issued. In addition, in November 2013 the chapter containing the hedge accounting rules was issued.

The finalized version of IFRS 9 was issued on July 24, 2014 and contains changes in the previous chapters related to measurement and classification as well as in hedge accounting. The finalized version also introduces new rules for impairment of financial instruments and derecognition.

The Company does not believe that the amendments will have a material impact on its interim financial statements except for additional disclosures that will be provided.

• IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

“Sale or Contribution of Assets between an Investor and its Associate or Joint Venture” amends IFRS 10 and IAS 28, to clarify the treatment of the sale or contribution of assets from an investor to its associate or joint venture, as follows: (i) require full recognition in the investor's financial statements of gains and losses arising on the sale or contribution of assets that constitute a business (as defined in IFRS 3 Business Combinations), (ii) require the partial recognition of gains and losses where the assets do not constitute a business.

These requirements apply regardless of the legal form of the transaction, e.g. whether the sale or contribution of assets occurs by an investor transferring shares in any subsidiary that holds the assets (resulting in loss of control of the subsidiary), or by the direct sale of the assets themselves.

The change is applicable for years beginning January 1, 2016.

d. Seasonality of transactions

Considering the activities that the Company and its subsidiaries are subjected, the nature of these transactions is neither cyclic nor seasonal. Consequently, the Company does not provide disclosures about seasonality in these notes to the interim financial statements for the nine-month period ended on September 30, 2015.

3. Main accounting practices

The accounting practices adopted by the Company in the preparation of its interim financial statements are consistent with those adopted for the consolidated financial statements for the year ended on December 31, 2014, except for the effects on the change to investment entity status described below:

a. Valuation of Investment entity portfolio

Investment entity portfolio is held at fair value with movements in fair value going through the profit and loss account. The investments held by BTG Holdco (through BTGI) are defined as underlying investments. These underlying investments correspond substantially to an investment in GEMM and merchant banking investments which are generally made directly or through ownership in limited partnership funds. The merchant banking investments are comprised of equity ownerships, loans and convertible instruments which most of the risk and return are dependent on the fair value and characteristics of underlying equity. The Company may adjust these values if, in its view, the values do not reflect the price which would be paid in an open and unrestricted market between informed and prudent parties, acting at arm's length and under no compulsion to act.

Investment entity portfolio are measured according to the fair value measurement hierarchy described below:

Level 1: Price quotations observed in active markets for the same instrument;

Level 2: Price quotations observed in active markets for instruments with similar characteristics or based on pricing model in which the relevant parameters are based on observable active market data;

Level 3: Pricing models in which current market transactions or observable data are not available and require a high degree of judgment and estimation. Instruments in this category have been valued using a valuation technique where at least one input which could have a significant effect on the instrument's valuation, is not based on observable market data. Where inputs can be observed from market data without undue cost and effort, the observed input is used. Otherwise, the Company determines a reasonable level for the input. Investment entity portfolio primarily include certain limited partnership interests in private equity funds mainly derived from our merchant banking activities and OTC derivatives which valuation depends upon unobservable inputs. No gain or loss is recognized on the initial recognition of a investment entity portfolio valued using a technique incorporating significant unobservable data.

(i) The investee equity is divided into ordinary and preferred shares. The Company has the majority of the ordinary shares and voting rights.

As described in note 1, as from December 29, 2010, the Company became the general partner of BTGI with powers to control BTGI's financial and operating policies through the interest held in that Company.

As described in note 12, the Company received a capital contribution as part of the BSI S.A. transaction, and subsequently contributed the same amount in BTGI. Due to this capital increase, as of September 30, 2015 the Company holds 27.74% of economic interest in BTGI (December 31, 2014 – 25.05%).

4. Risk management

The Company's underlying investments activities expose it to a variety of financial risks, namely market risk, liquidity risk and credit risk.

The table below contains daily average VaR for the quarters ended as follows:

	September 30, 2015	December 31, 2014	September 30, 2014
In millions of R\$			
Daily average VaR	40.2	42.6	41.2

There were no significant changes in the risk management structure compared to that reported on December 31, 2014. The Company used to and continue to measure and evaluate the performance of substantially all of its investments entity portfolio on a fair value basis and therefore there was no significant change in the risk management framework.

Certain of the information provided in this note correspond to the underlying investments, instead of the investment entity BTG HoldCo, because the Company considers it more meaningful.

Further, it has not been possible to present detailed risk information relating to Global Markets Investment, and Company's management rely on VaR provided by its manager, which is Banco BTG Pactual.
