The Company assesses the credit quality of its related parties by taking into account their financial standing, past experience and other factors.

Cash at bank is placed with reliable financial institutions.

#### Currency risk

Foreign currency transactions arise when the Company avails or provides services whose price is denominated in a foreign currency, borrows or lends funds when the amounts payable or receivable are denominated in a foreign currency or acquires or disposes of assets, or incurs or settles liabilities, denominated in a foreign currency. The Company is not exposed to foreign currency exchange rate risk, as both the financial asset and financial liability are denominated in Euros.

#### Interest rate risk

The terms of the notes and the Preference Shares are such that the income from the notes matches, or exceeds the dividends payable on the Preference Shares. The Company is not therefore exposed to interest rate risk.

#### Liquidity risk

The Company monitors and manages its risk to a shortage of funds by maintaining sufficient cash and by monitoring the availability of raising funds to meet commitments associated with financial instruments and by maintaining adequate banking facilities.
