SUMMARY

This summary must be read as an introduction to this Base Prospectus and any decision to invest in any Securities should be based on a consideration of this Base Prospectus as a whole, including the documents incorporated by reference. No civil liability attaches to the Issuer in respect of this summary, including any translation thereof, unless it is misleading, inaccurate or inconsistent when read together with the other parts of this Base Prospectus. Words and expressions defined elsewhere in this Base Prospectus shall have the same meanings in this summary.

Issuer:

The legal name of the Issuer is ABN AMRO Bank N.V. (formerly known as ABN AMRO II N.V.) and its commercial name is ABN AMRO. The Issuer is a public limited liability company (*naamloze vennootschap*) incorporated under Dutch law on 9 April 2009. The Issuer's corporate seat (*statutaire zetel*) is in Amsterdam, The Netherlands and its registered office is Gustav Mahlerlaan 10, 1082 PP Amsterdam, The Netherlands.

History and Development:

The Issuer was formed for the purpose of the restructuring and the Legal Demerger of the businesses of the former ABN AMRO group acquired by the Dutch State. The businesses now included in the Issuer after the Legal Demerger were part of the former ABN AMRO group headed by ABN AMRO Holding N.V. Furthermore, pursuant to the Legal Merger which became effective on 1 July 2010, the businesses that are now included in the Issuer are a combination of the businesses of the Issuer and the businesses of Fortis Bank (Nederland) N.V. ((FB(N))).

In November 2008 the Dutch Minister of Finance announced the intention of the Dutch State to integrate the businesses of the former ABN AMRO group acquired by the Dutch State with FB(N) into a new bank operating under the name ABN AMRO Bank N.V. The legal integration takes place in two steps: the composition of a single group and the Legal Merger.

On 1 April 2010, following the Legal Separation, the Issuer and FB(N) became direct subsidiaries of a joint parent company, ABN AMRO Group N.V.

Since 1 April the managing boards and the supervisory boards of the Issuer, FB(N) and ABN AMRO Group N.V. have been composed of the same members. In addition, joint senior management for select parts of both the Issuer and FB(N) was appointed, *i.e.* one manager will be responsible for managing comparable teams and activities at

both banks. However, both the Issuer and FB(N) operated as separate and independent banks until the Legal Merger took effect. On 15 April 2010, the managing boards of the Issuer, FB(N) and ABN AMRO Group N.V. filed a merger proposal with the Amsterdam Chamber of Commerce.

On 1 July 2010 the Issuer and FB(N) merged pursuant to a legal merger (*juridische fusie*), in which the Issuer was the surviving entity (*verkrijgende vennootschap*) and FB(N) the disappearing entity (*verdwijnende vennootschap*).

Activities:

The Issuer has a presence in 28 countries and territories including The Netherlands, where various client centers are active with the help of the support centers. In addition to a strong network in The Netherlands, the Issuer has a presence in 17 countries and territories in Europe (including The Netherlands), with a focus on the neighboring countries (Belgium, Germany, France, and the UK) and Switzerland. Outside Europe the Issuer is present in Australia, Botswana, Brazil, China, Hong Kong, India, Japan, the Dutch Antilles, Singapore, United Arab Emirates and the United States.

The Issuer aspires to excel in serving Dutch clients in The Netherlands and abroad, and to capture a leading position in a limited number of global specialist market segments. Over the near term following completion of the Legal Merger, the Issuer's focus will be on strengthening its financial position, realizing significant cost savings and growing revenues, with a long-term strategy of achieving healthy long-term returns while maintaining a moderate risk profile.

Guarantor:

ABN AMRO Group N.V. pursuant to its declaration under Article 2:403 of the Netherlands Civil Code.

Risk Factors:

There are certain factors that may affect the Issuer's ability to fulfil its obligations under the Securities, including the fact that the Issuer's results can be adversely affected by (i) general economic conditions and other business conditions, (ii) competition, (iii) regulatory change and (iv) standard banking risks including changes in interest and foreign exchange rates and operational, credit, market, liquidity and legal risks, see "Risk Factors" in this Base Prospectus. In addition, there are certain factors which are material for the purpose of assessing the market risks associated with the Securities, including (i) the value of the Securities may fluctuate based on the value of the Underlying, (ii) there may not be a secondary market in the Securities, (iii) holders of the Securities have no ownership interest in the Underlying and (iv) there may be limitations on a holder's right to exercise the Securities or there may be delays in effecting settlement. See "Risk Factors" in this Base Prospectus.

Principal Agent, Dealer and Calculation Agent:

Goldman Sachs International or another or further third party appointed by the Issuer, as specified in the relevant Final Terms. The

Issuer may also perform any of these roles itself in respect of any Series of Securities.

Paying Agent:

Citibank International plc or another or further third party appointed by the Issuer, as specified in the relevant Final Terms.

Listing and Admission to Trading:

Application will be made to NYSE Euronext in Amsterdam for Securities to be admitted to trading and listed on Euronext Amsterdam up to the expiry of 12 months from the date of this Base Prospectus. In addition, Securities may be listed or admitted to trading, as the case may be, on any other stock exchange or market specified in the applicable Final Terms. The Issuer may also issue unlisted Securities.

Description of the Securities:

A range of Turbo certificates may be issued under this Base Prospectus. The Conditions applicable to such certificates are contained in the General Conditions which are applicable to all Turbo certificates, the Product Conditions applicable to the particular type of Turbo certificate being issued and the Final Terms applicable to the particular Series being issued.

Turbo Certificates:

Turbo certificates are investment instruments without a fixed maturity or expiration date, which can either be terminated by the Issuer, exercised by the Holder, and may automatically terminate if the Underlying (as defined below) reaches a pre-determined level. Following any such event, the Turbo certificates pay an amount determined by reference to the value of the underlying currency, commodity, index (including in the case of an index, the index and its constituent elements), stock, bond, basket or other product (together, the “**Underlying**”) on one or more specified days, subject to the certificate entitlement. The types of certificates that may be issued under this Base Prospectus are described below.

Turbo certificates track in a linear manner the Underlying. The amount needed to invest in a Turbo certificate to give the same participation rate in the Underlying as a direct investment in the Underlying is considerably less. Therefore the percentage gain if the Underlying rises (in the case of Turbo long certificates) or falls (in the case of Turbo short certificates) and the percentage loss if the Underlying falls or rises, respectively is much higher in Turbo certificates than as a direct investment in the Underlying.

Turbo Long and Short Certificates:

Turbo long certificates enable the investor to profit from rising markets. Turbo long certificates track the Underlying. If the value of the Underlying rises, the value of the Turbo long certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate. The difference between a Turbo long certificate and an ordinary certificate is that in the case of the Turbo long certificate, the amount needed to invest to give the same participation rate in the Underlying is usually considerably less.

Turbo short certificates enable the investor to profit from declining markets. Turbo short certificates track the Underlying in an inverse manner. If the value of the Underlying drops, the value of the Turbo

short certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate. The difference between a Turbo short certificate and an ordinary certificate is that in the case of the Turbo short certificate, the amount needed to invest to give the same inverse participation rate in the Underlying is usually considerably less.

Stop loss:

The maximum loss to an investor in Turbo certificates is the initial amount invested. A feature of Turbo certificates is the Stop loss which, if breached, will result in the early termination of the Turbo certificate.

Commodity Certificates:

Commodity certificates are certificates where the Underlying is a commodity. A wide range of commodities may become the Underlying in relation to a commodity Turbo certificate.

Currency Certificates:

Currency certificates give their Holder exposure to interest rate differences between two currencies. A range of currencies may become the Underlying in relation to a currency Turbo certificate.

Single Stock Certificates:

Single stock certificates are certificates where the Underlying is a share.

Index Certificates:

Index certificates are certificates where the Underlying is an index. A range of indices may become the Underlying in relation to an index Turbo certificate.

Government Bond Certificates:

Government bond certificates are certificates where the Underlying is a futures contract related to a Government bond. A range of Government bond futures contracts may become the Underlying in relation to a Government bond Turbo certificate.

Commodity Forward or Future Certificates:

Commodity forward and future certificates are certificates where the Underlying is a forward or future contract related to a commodity. A range of commodity forward and futures contracts may become the Underlying in relation to a commodity forward or future Turbo certificate.

Fund Turbo Certificates:

Fund Turbo certificates are certificates where the Underlying is a fund. A range of funds may become the Underlying in relation to a fund Turbo certificate.

Rolling Turbo Certificates:

Rolling Turbo certificates observe certain elements to determine whether adjustments need to be made to any of the terms and conditions of the certificates to maintain the leverage within certain limits, these elements include but are not limited to the current leverage factor, the level of the Underlying and the value of the certificates. In addition to such adjustments, the Holder could be entitled to an interim payment.

Index Future Certificates:

Index future certificates are certificates where the Underlying is a future contract related to an index. A range of index future contracts may become the Underlying in relation to an index future Turbo certificate.

Indicative Issue Price:	The Turbo certificates will be sold at a price determined by reference to the level of the Underlying adjusted for the relevant certificate entitlement and any applicable foreign exchange rate(s).
Maturity:	The Turbo certificates do not have any fixed maturity date.
Interest:	The Turbo certificates do not bear interest.
General Conditions	Set out below is a summary of certain significant provisions of the General Conditions applicable to all Turbo certificates issued under this Base Prospectus.
<i>Status of the Securities:</i>	The Securities constitute unsecured and unsubordinated obligations of the Issuer and rank pari passu among themselves and with all other present and future unsecured and unsubordinated obligations of the Issuer save for those preferred by mandatory provisions of law.
<i>Early Termination:</i>	The Issuer may terminate any Securities if it shall have determined in its absolute discretion that for reasons beyond its control its performance thereunder shall have become unlawful in whole or in part as a result of compliance in good faith by the Issuer with any applicable law. In such circumstances the Issuer will, to the extent permitted by law, pay to each Holder in respect of each Security held by such Holder an amount calculated by the Calculation Agent as the fair market value of the Security immediately prior to such termination (ignoring such illegality) less the cost to the Issuer of unwinding any related hedging arrangements.
<i>Hedging Disruption:</i>	If a Hedging Disruption Event (as defined in General Condition 5) occurs, the Issuer may at its discretion determine to or instruct the Calculation Agent to determine to (i) terminate the Securities and pay to each Holder in respect of each Security held by such Holder an amount calculated by it as the fair market value of the Security immediately prior to such termination less the cost to the Issuer of unwinding any related hedging arrangements or (ii) make a good faith adjustment to the relevant reference asset as described in General Condition 5(c) or (iii) make any other adjustment to the Conditions as it considers appropriate in order to maintain the theoretical value of the Securities after adjusting for the relevant Hedging Disruption Event.
<i>Substitution:</i>	The Issuer may at any time, without the consent of the Holders substitute for itself as principal obligor under the Securities any company, being any subsidiary or affiliate of the Issuer, subject to certain conditions including the obligations of the substitute issuer under the Securities being guaranteed by ABN AMRO Group N.V. (unless ABN AMRO Group N.V. is the Substitute). In certain cases, substitution may be required to be effected in accordance with the rules of one or more clearing systems specified in the applicable Final Terms.
<i>Taxation:</i>	The Holder (and not the Issuer) shall be liable for and/or pay any tax,

duty or charge in connection with, the ownership of and/or any transfer, payment or delivery in respect of the Securities held by such Holder. The Issuer shall have the right, but shall not be obliged, to withhold or deduct from any amount payable to any Holder such amount as shall be necessary to account for or to pay any such tax, duty, charge, withholding or other payment.

Adjustments for European Monetary Union:

The Issuer may, without the consent of any Holder, on giving notice to the Holders elect that, with effect from the date specified in such notice, certain terms of the Securities shall be redenominated in euro, see General Condition 11.

Governing Law:

The laws of The Netherlands.

Exclusive Jurisdiction:

The courts of The Netherlands have exclusive jurisdiction to settle any dispute (a “**Dispute**”) arising from or in connection with the Turbo certificates.

Product Conditions:

Set out below is a summary of certain significant provisions of the Product Conditions applicable to the Turbo certificates issued under this Base Prospectus. Although different Product Conditions apply to different types of Turbo certificate, the provisions set out below are generally applicable to all types of Turbo certificate referred to in this Base Prospectus.

Form of Certificates:

Except in the case of Turbo certificates issued in dematerialised form, Turbo certificates will be issued in global form.

Exercise of Certificates:

Turbo certificates may be exercised on any Exercise Date specified in the applicable Final Terms. The Turbo certificates will be exercised automatically upon a Stop Loss Event occurring and may be called by the Issuer at any time. Notification of the occurrence of a Stop Loss Event will be made to Euronext Amsterdam and the Stop Loss Cash Amount of the relevant Turbo certificates will be posted on the Issuer’s website at www.abnamromarkets.nl.

Settlement of Certificates:

The Turbo certificates referred to in this Base Prospectus will be cash settled only. It is possible that in the future physically settled Turbo certificates may be issued and, in that case, a supplement to this Base Prospectus or a new Base Prospectus will be prepared describing the relevant Turbo certificates.

Market Disruption Events:

If a Market Disruption Event occurs Holders of Turbo certificates may experience a delay in settlement and the cash price paid on settlement may be adversely affected. Market Disruption Events are defined in Product Condition 4 for each type of Turbo certificate and vary depending on the type of Turbo certificate.

Emerging Market Disruption Events:

The Emerging Market Disruption Events reflect the substantial risks associated with investing in emerging markets in addition to those risks normally associated with making investments in other countries. Potential investors should note that the securities markets in emerging market jurisdictions are generally substantially smaller and at all times have been more volatile and illiquid than the major

securities markets in more developed countries. If an Emerging Market Disruption Event occurs Holders of the Turbo certificates may experience a delay in settlement or delivery and the cash price paid on settlement may be adversely affected. Emerging Market Disruption Events are defined in Section 1 of the Product Conditions.

Final Terms:

Each Series will be the subject of a Final Terms which will contain the final terms applicable to the Series. The form of the Final Terms applicable to each type of Turbo certificate is set at the end of this Base Prospectus.

RISK FACTORS

The Issuer believes that the following factors may affect its ability to fulfil its obligations under Securities issued. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

In addition, factors which are material for the purpose of assessing the market risks associated with Securities issued are also described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in Securities issued, but the inability of the Issuer to pay any amounts on or in connection with any Securities, or to perform any delivery obligations in relation to the Securities, may occur for other reasons and the Issuer does not represent that the statements below regarding the risks of holding any Securities are exhaustive. Prospective investors should also read the detailed information set out elsewhere in this Base Prospectus and reach their own views prior to making any investment decision.

Before making an investment decision with respect to any Securities, prospective investors should consult their own stockbroker, bank manager, lawyer, accountant or other financial, legal and tax advisers and carefully review the risks entailed by an investment in the Securities and consider such an investment decision in the light of the prospective investor's personal circumstances.

Words and expressions defined elsewhere in this Base Prospectus shall have the same meaning in this section.

RISK FACTORS RELATING TO THE ISSUER

Factors that may affect the Issuer's ability to fulfil its obligations under Securities issued

Conditions in the global financial markets and economy have yet to normalise and may materially adversely affect the Issuer's business and profitability

The outlook for the global economy over the near to medium term remains challenging as the global financial system has yet to fully normalise. Results of operations in the past have been, and in the future may continue to be, materially affected by many factors of a global nature, including political, economic and market conditions; the availability and cost of capital; the liquidity of global markets; the level and volatility of equity prices, commodity prices and interest rates; currency values and other market indices; technological changes and events; the availability and cost of credit; inflation; the stability and solvency of financial institutions and other companies; natural disasters; acts of war or terrorism; investor sentiment and confidence in the financial markets; or a combination of these or other factors. While there are some signs of a recovery in some countries it is not yet certain whether the recovery underway is stable. In addition, the risk exists that major economies may suffer a "double dip" recession in which the improvements seen in a number of important markets reverse. Any of the above factors may materially adversely affect the Issuer's financial condition and results of operations.

Emergency measures designed to stabilise the European Union and the United States financial markets are beginning to wind down

Since mid-2008, a host of government actions have been implemented in response to the financial crisis and the recession. Although the European Central Bank, the European Union and the International Monetary Fund have recently announced a package of measures in response to disruption in the European debt markets, some earlier government programs are beginning to expire and the impact of the wind-down of these programs on

the financial sector and on the nascent economic recovery is unknown. As government support schemes are cancelled, changed or withdrawn, there is a possibility that the Issuer, in common with other financial institutions, may have insufficient access to, or incur higher costs associated with, funding alternatives, which could have a material adverse effect on the Issuer's business, financial condition, results of operations and prospects. In addition, a stall in the economic recovery or continuation or worsening of current financial market conditions could exacerbate these effects.

The financial services industry is subject to intensive regulation, which is undergoing major changes

As a financial services firm, the Issuer is subject to financial services laws, regulations, corporate governance requirements, administrative actions and policies in each location in which it operates. In 2009, as many emergency government programs slowed or wound down, global regulatory and legislative focus generally moved to a second phase of broader reform and a restructuring of financial institution regulation. Legislators and regulators, both in Europe and the United States, are currently considering a wide range of proposals that, if enacted, could result in major changes to the way the Issuer's global operations are regulated. Some of these major changes may take effect as early as 2010, and could materially impact the profitability of the Issuer's businesses, the value of its assets or the collateral available for its loans, require changes to business practices or force the Issuer to discontinue businesses and expose the Issuer to additional costs, taxes, liabilities, enforcement actions and reputational risk.

As a financial company, certain reform proposals under consideration could result in the Issuer becoming subject to stricter capital requirements and could also affect the scope, coverage, or calculation of capital, all of which could require the Issuer to reduce business levels or to raise capital, including in ways that may adversely impact the Issuer's creditors. Regulatory reform proposals could also result in the imposition of additional restrictions on the Issuer's activities if it were to no longer meet certain capital requirements at the level of the financial holding company.

Markets may experience periods of high volatility accompanied by reduced liquidity, which may lead to market risk losses and adversely influence the Issuer's ability to hedge its risks effectively

Market volatility, illiquid market conditions and disruptions in the credit markets remain a risk that can negatively affect the Issuer's business, inter alia through a reduction in demand for products and services, a reduction in the value of assets held by the Issuer, a decline in the profitability of certain assets and a loss of liquidity in certain asset classes. In addition, financial markets are susceptible to severe events evidenced by rapid depreciation in asset values accompanied by a reduction in asset liquidity. High volatility can occur not only as a result of purely economic factors, but also as a result of war, acts of terrorism, natural disasters or other similar events. Volatility and declines in market indices can reduce unrealized gains or increase unrealized losses in the Issuer's various portfolios. Under these extreme conditions, hedging and other risk management strategies may not be as effective at mitigating trading risks as they would be under more normal market conditions. Moreover, under these conditions market participants are particularly exposed to trading strategies employed by many market participants simultaneously and on a large scale, such as crowded trades. The Issuer's risk management and monitoring processes seek to quantify and mitigate risk to more extreme market moves. Severe market events have historically been difficult to predict, however, and the Issuer could realise significant losses if extreme market events were to persist for an extended period of time.

Lack of liquidity is a risk to the Issuer's business and its ability to access sources of liquidity has been, and will continue to be, constrained

Liquidity risk is the risk that a bank will be unable to meet its obligations, including funding commitments, as they fall due. This risk is inherent in banking operations and can be heightened by a number of enterprise specific factors, including an over-reliance on a particular source of funding (including, for example, short-term and overnight funding), changes in credit ratings or market-wide phenomena such as market dislocation and major disasters. In the recent past, credit markets worldwide experienced a severe reduction in supply of liquidity and term-funding. During this time, perception of counterparty risk between banks also increased significantly. This increase in perceived counterparty risk also led to reductions in inter-bank lending,

and hence, in common with many other banking groups, the Issuer's access to traditional sources of liquidity has been, and may continue to be, restricted.

The Issuer's liquidity management focuses on maintaining a diverse and appropriate funding strategy for its assets, controlling the mismatch of maturities and carefully monitoring its undrawn commitments and contingent liabilities. However, the Issuer's ability to access sources of liquidity (for example, through the issue or sale of financial and other instruments or through the use of term loans) during the recent period of liquidity stress has been constrained. In periods of liquidity stress the Issuer, in line with other financial institutions, may need to seek funds from alternative sources, potentially at higher costs of funding than has previously been the case.

In addition, there is also a risk that corporate and institutional counterparties with credit exposures may look to reduce all credit exposures to banks, given current risk aversion trends. It is possible that credit market dislocation becomes so severe that overnight funding from non-government sources ceases to be available.

Like many banking groups, the Issuer relies on customer deposits to meet a considerable portion of its funding. However, such deposits are subject to fluctuation due to certain factors outside the Issuer's control, such as a loss of confidence, increasing competitive pressures or the encouraged or mandated repatriation of deposits by foreign wholesale or central bank depositors, which could result in a significant outflow of deposits within a short period of time. An inability to grow, or any material decrease in, the Issuer's deposits could, particularly if accompanied by one of the other factors described above, have a negative impact on the Issuer's ability to satisfy its liquidity needs unless corresponding actions were taken to improve the liquidity profile of other deposits or to reduce assets. The governments of some of the countries in which the Issuer operates have taken steps to guarantee the liabilities of the banks and branches operating in their respective jurisdiction. Whilst in some instances the operations of the Issuer are covered by government guarantees alongside other local banks, in other countries this may not necessarily always be the case.

There can be no assurance that these measures, alongside other available measures, will succeed in improving the funding and liquidity in the markets in which the Issuer operates, or that these measures, combined with any increased cost of any funding currently available in the market, will not lead to a further increase in the Issuer's overall cost of funding, which could have an adverse impact on the Issuer's financial condition and results of operations. Such adverse impact may be exacerbated by the Issuer's refinancing needs as a result of a considerable volume of outstanding debt instruments issued by the Issuer maturing in the period 2010-2012.

The Issuer's business performance could be adversely affected if its capital is not managed effectively or if there are changes to capital adequacy and liquidity requirements

Effective management of the Issuer's capital is critical to its ability to operate its businesses, to grow organically and to pursue its strategy of returning to standalone strength. The Issuer is required by regulators in The Netherlands and in other jurisdictions in which it undertakes regulated activities, to maintain adequate capital resources. The maintenance of adequate capital is also necessary for the Issuer's financial flexibility in the face of continuing turbulence and uncertainty in the global economy.

The Capital Requirements Directive (CRD) came into force on 1 January 2007 and was introduced as a supervisory framework in the European Union, designed to ensure the financial soundness of credit institutions. The Directive reflects the Basel II rules on capital measurement and capital standards. Due to changes in the market, the European Commission revised the Capital Requirements Directives (CRD II) in several respects. These changes will come into effect with the introduction of CRD II on 1 January 2011 and later in time in the CRD III which is still under negotiation.

On 17 December 2009, the Basel Committee on Banking Supervision (the "**Basel Committee**") proposed a number of fundamental reforms to the regulatory capital framework in its consultative document entitled "Strengthening the resilience of the banking sector". If the proposals made by the Basel Committee are implemented, this could result in the Issuer being subject to significantly higher capital requirements. The proposed reforms are subject to a consultative process and an impact assessment and are not likely to be

implemented before the end of 2012. The Basel Committee will also consider appropriate transition and grandfathering arrangements.

These and other future changes to capital adequacy and liquidity requirements in the jurisdictions in which it operates may require the Issuer to raise additional Tier 1, Core Tier 1 and Tier 2 capital. If the Issuer is unable to raise the requisite Tier 1 and Tier 2 capital, it may be required to further reduce the amount of its risk-weighted assets and engage in the disposition of core and other non-core businesses, which may not occur on a timely basis or achieve prices which would otherwise be attractive to the Issuer.

Any change that limits the Issuer's ability to manage effectively its balance sheet and capital resources going forward (including, for example, reductions in profits and retained earnings as a result of write-downs or otherwise, increases in risk-weighted assets, delays in the disposal of certain assets or the inability to syndicate loans as a result of market conditions, a growth in unfunded pension exposures or otherwise) or to access funding sources, could have a material adverse impact on its financial condition, regulatory capital position and liquidity provision.

Changes in interest rates and foreign exchange rates may adversely affect the Issuer's results

Fluctuations in interest rates and foreign exchange rates influence the Issuer's performance. The results of the Issuer's banking operations are affected by the Issuer's management of interest rate sensitivity. Interest rate sensitivity refers to the relationship between changes in market interest rates and changes in net interest income. If the yield on the Issuer's interest-earning assets does not increase at the same time or to the same extent as its cost of funds, or if its cost of funds does not decline at the same time or to the same extent as the decrease in yield on its interest-earning assets, the Issuer's net interest income and net interest margin may be adversely impacted. This could have a material adverse effect on the financial condition of the Issuer's business or results from operations and cash flows.

In addition, the Issuer publishes the Issuer's consolidated financial statements in euros. Fluctuations in the exchange rates used to translate other currencies into euros affect the Issuer's reported consolidated financial condition, results of operations and cash flows from year to year.

The Issuer has significant counterparty risk exposure and exposure to systemic risks

The Issuer's businesses are subject to general credit and country risks, including credit risks of borrowers and other counterparties. Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Issuer's businesses. Third parties that owe the Issuer money, securities or other assets may not pay or perform under their obligations. These parties include borrowers (under loans), the issuers whose securities the Issuer holds, customers, trading counterparties, counterparties under swaps and credit and other derivative contracts, clearing agents, exchanges, clearing houses and other financial intermediaries. These parties may default on their obligations to the Issuer due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons. In view of the current global economic outlook, the Issuer may continue to see adverse changes in the credit quality of its borrowers and counterparties, for example, as a result of their inability to refinance their indebtedness, with increasing delinquencies, defaults and insolvencies across a range of sectors (such as the personal and banking and financial institution sectors) and in a number of geographies. This trend has led to and may continue to lead to further impairment charges, higher costs, additional write-downs and losses for the Issuer. In addition, in the past, the general credit environment has been at times adversely affected by significant instances of fraud.

Concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions because the commercial soundness of many financial institutions may be closely related as a result of their credit, trading, clearing or other relationships. This risk is sometimes referred to as “**systemic risk**” and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges with whom the Issuer interacts on a daily basis, and could have an adverse effect on the Issuer's business.

The Issuer's borrowing costs, its access to the debt capital markets and its liquidity depend significantly on its credit ratings

Rating agencies assess the creditworthiness of the Issuer and assign a rating to the Issuer and some of the financial instruments it has issued. This information is available to many investors and clients of the Issuer. Any downgrade in the Issuer's ratings may increase its borrowing costs, require the Issuer to replace funding lost due to the downgrade, which may include the loss of customer deposits, and may also limit the Issuer's access to capital and money markets and trigger additional collateral requirements in derivatives contracts and other secured funding arrangements. As a result, any reductions in the Issuer's credit ratings could adversely affect the Issuer's access to liquidity and competitive position, increase its funding costs and have a negative impact on the Issuer's earnings and financial condition. There can be no assurance that a credit rating agency having at any time assigned a credit rating to the Issuer or any Securities will not downgrade any such credit rating or change the outlook on any such credit rating.

Increases in the Issuer's allowances for loan losses may have an adverse effect on the Issuer's results

The Issuer's banking businesses establish provisions for loan losses, which are reflected in the loan impairment and other credit risk provisions on the Issuer's income statement, in order to maintain the Issuer's allowance for loan losses at a level that is deemed to be appropriate by management based upon an assessment of prior loss experiences, the volume and type of lending being conducted by each bank, industry standards, past due loans, economic conditions and other factors related to the collectability of each entity's loan portfolio. Although management uses its best efforts to establish the allowances for loan losses, that determination is subject to significant judgment, and the Issuer's banking businesses may have to increase or decrease their allowances for loan losses in the future as a result of increases or decreases in non-performing assets or for other reasons. Any increase in the allowances for loan losses, any loan losses in excess of the previously determined provisions with respect thereto or changes in the estimate of the risk of loss inherent in the portfolio of non-impaired loans could have an adverse effect on the Issuer's results of operations and financial condition.

The Issuer operates in markets that are highly competitive. If the Issuer is unable to perform effectively, its business and results of operations will be adversely affected

There is substantial competition for the types of banking and other products and services that the Issuer provides in the regions in which the Issuer conducts large portions of its business. Such competition is most pronounced in the Dutch market where the Issuer faces competition from companies such as ING Group and Rabobank. As a result, the Issuer's strategy is to maintain customer loyalty and retention, which can be influenced by a number of factors, including service levels, the prices and attributes of products and services, financial strength and actions taken by competitors. In other international markets, the Issuer faces competition from the leading domestic and international institutions active in the relevant national and international markets. Competitive pressures could result in increased pricing pressures on a number of the Issuer's products and services, particularly as competitors seek to win market share, and may harm the Issuer's ability to maintain or increase profitability.

Furthermore, the intensity of this competition is affected by consumer demand, technological changes, the impact of consolidation, regulatory actions and other factors. In addition, technological advances and the growth of e-commerce have made it possible for non-depository institutions to offer products and services that were traditionally banking products and for financial institutions to compete with technology companies in providing electronic and internet-based financial solutions. If the Issuer is unable to provide attractive product and service offerings that are profitable, the Issuer may lose market share or incur losses on some or all of the Issuer's activities.

In addition, certain competitors may have access to lower cost funding and be able to offer consumer loans on more favourable terms than the Issuer and may have stronger multi-channel and more efficient operations as a result of greater historical investments. Furthermore, the Issuer's competitors may be better able to attract and

retain clients and talent, which may have a negative impact on the Issuer's relative performance and future prospects.

Furthermore, increased government ownership and involvement in banks, including in the Issuer, may have an impact on the competitive landscape in the major markets in which the Issuer operates. Although, at present, it is difficult to predict what the effects of this increased government ownership and involvement will be or how their effects will differ from jurisdiction to jurisdiction, such involvement may cause the Issuer to experience stronger competition for corporate, institutional and retail clients and greater pressure on profit margins. In addition, the European Commission has imposed, and may continue to impose restrictions on operating practices or to require disposals of certain business lines as a result of its investigation into state aid for the banking sector in the European Union. Any such restrictions could have a negative impact on the Issuer's competitive position. Since the markets in which the Issuer operates are expected to remain highly competitive in all areas, these and other changes to the competitive landscape could adversely affect the Issuer's business, margins, profitability and financial condition.

The Issuer's businesses have a dominant concentration in The Netherlands

The Issuer's businesses have a large concentration in The Netherlands and therefore are particularly exposed to the economic conditions in The Netherlands. Any deterioration or merely a long-term persistence of the difficult economic environment in The Netherlands could have a negative effect on the Issuer's operating results and financial condition.

The Issuer is subject to operational risks that could adversely affect its business

The Issuer, like all financial institutions, is exposed to many types of operational risk, including the risk of fraud or other types of misconduct by employees or third parties, unauthorised transactions by employees and operational errors, including clerical or record keeping errors or errors resulting from faulty computer or telecommunications systems. As a consequence of the Legal Demerger, Legal Separation and Legal Merger and the accompanying separation of information technology platforms, the Issuer is subject to heightened operational risk. The Issuer may also be subject to disruptions of the Issuer's operating systems, arising from events that are wholly or partially beyond the Issuer's control (including, for example, computer viruses or electrical or telecommunication outages), which may give rise to losses in service to customers and to loss or liability to the Issuer. The Issuer is further exposed to the risk that external vendors may be unable to fulfil their contractual obligations to the Issuer, and to the risk that their business continuity and data security systems prove to be inadequate. The Issuer also faces the risk that the design of the Issuer's controls and procedures prove to be inadequate or are circumvented. Although the Issuer has implemented risk controls and loss mitigation actions, and substantial resources are devoted to developing efficient procedures, to identify and rectify weaknesses in existing procedures and to train staff, it is not possible to be certain that such actions have been or will be effective in controlling each of the operational risks faced by the Issuer. Any weakness in these systems or controls, or any breaches or alleged breaches of applicable laws or regulations, could have a materially negative impact on the Issuer's business, reputation and results of operations.

The Issuer depends on the accuracy and completeness of information about customers and counterparties

In deciding whether to extend credit or enter into other transactions with customers and counterparties, the Issuer may rely on information furnished to the Issuer by or on behalf of the customers and counterparties, including financial statements and other financial information. The Issuer also may rely on the audit report covering those financial statements. The Issuer's financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with generally accepted accounting principles or that are materially misleading.

The value of certain financial instruments recorded at fair value is determined using financial models incorporating assumptions, judgements and estimates that may change over time or may ultimately not turn out to be accurate

Under IFRS, the Issuer recognises at fair value (i) financial instruments classified as 'held-for-trading' or 'designated as at fair value through income' and (ii) financial assets classified as 'available-for-sale'. Generally, to establish the fair value of these instruments, the Issuer relies on quoted market prices or, where the market for a financial instrument is not sufficiently active, internal valuation models that utilise observable market data. In certain circumstances, the data for individual financial instruments or classes of financial instruments utilised by such valuation models may not be available or may become unavailable due to changes in market conditions, as has been the case during the current financial crisis. In such circumstances, the Issuer's internal valuation models require the Issuer to make assumptions, judgements and estimates to establish fair value. In common with other financial institutions, these internal valuation models are complex, and the assumptions, judgements and estimates the Issuer is required to make often relate to matters that are inherently uncertain, such as expected cash flows, the ability of borrowers to service debt, residential and commercial property price appreciation and depreciation, and relative levels of defaults and deficiencies. Such assumptions, judgements and estimates may need to be updated to reflect changing facts, trends and market conditions. The resulting change in the fair values of the financial instruments has had and could continue to have a material adverse effect on the Issuer's earnings and financial condition.

The Issuer's ability to retain and attract qualified employees is critical to the success of its business and the failure to do so may materially adversely affect the Issuer's performance

Employees are one of the Issuer's most important resources and competition for qualified employees is intense. In order to attract and retain qualified employees, the Issuer seeks to compensate such employees at market levels. Typically, those levels have caused employee compensation to be the Issuer's greatest expense. If the Issuer is unable to continue to attract and retain qualified employees, or do so at rates necessary to maintain its competitive position, or if compensation costs required to attract and retain employees become more expensive, the Issuer's performance, including its competitive position, could be materially adversely affected. The financial industry may experience more stringent regulation of employee compensation, or employee compensation may be made subject to special taxation, which could have an adverse effect on the Issuer's ability to hire or retain the most qualified employees.

The Issuer is subject to legal risk, which may have an adverse impact on the Issuer's results

In the ordinary course of business the Issuer is involved in a number of legal proceedings. The Issuer's business is subject to the risk of litigation by customers, borrowers, employees, shareholders or others through private actions, class actions, administrative proceedings, regulatory actions or other litigation. The outcome of litigation or similar proceedings or actions is difficult to assess or quantify. Furthermore, periods of market dislocation, characterised by sharply deteriorating financial markets, are generally accompanied by an increase in investor litigation against intermediaries such as banks and investment advisors. It is inherently difficult to predict the outcome of many of the litigations, regulatory proceedings and other adversarial proceedings involving the Issuer's businesses, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve novel legal claims. The cost to defend future actions may be significant. There may also be adverse publicity associated with litigation that could decrease customer acceptance of the Issuer's services, regardless of whether the allegations are valid or whether the Issuer is ultimately found liable. As a result, litigation may adversely affect the Issuer's business.

In presenting the consolidated financial statements, management may make estimates regarding the outcome of legal, regulatory and arbitration matters and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Changes in estimates may have an adverse effect on the Issuer's results.

Reputational Risk

Reputational risk exists in many forms in all the Issuer's activities. Examples are the quality and transparency of products sold to clients. The conduct of employees can also result in a reputational risk. Strict compliance procedures are in place to minimize this risk, as well as decision-making procedures for new activities and

products.

In addition the Issuer's reputation could also be harmed as a result of negative publicity regarding the ABN AMRO group and ABN AMRO brand name. This may adversely affect the Issuer's operating results and financial condition.

The Issuer's results of operations can be adversely affected by significant adverse regulatory developments and changes in tax laws

The Issuer conducts its businesses subject to ongoing regulation (including in relation to behavioral requirements) and associated regulatory risks, including the effects of changes in the laws, regulations, policies and interpretations in the European Union and the other regions in which the Issuer does business. The timing and form of future changes in regulation are unpredictable and beyond the Issuer's control, and changes made could materially adversely affect the Issuer's business, the products and services the Issuer offers or the value of its assets or extent of its liabilities. Any changes in the tax laws of jurisdictions in which the Issuer operates which affect its products, could have a material adverse effect on its insurance or other businesses and results of operations and financial condition.

The Issuer operates under the supervision of several regulators in various jurisdictions which may impose restrictions and conditions

The Dutch Central Bank and other regulators in various jurisdictions may impose (further) restrictions and conditions to the Issuer. Some of these restrictions may adversely affect the Issuer's operating results and financial condition.

Securities market volatility or downturns can adversely affect the Issuer's banking activities

The level and volatility in market indices can negatively affect the Issuer's merchant banking, securities trading and brokerage activities. Volatility and declines in market indices can reduce unrealized gains in the Issuer's various portfolios or the demand for some of the Issuer's banking products.

Since July 2007, both the credit and the equity markets have been very volatile. There is no assurance that such volatility will not result in a prolonged market decline, or such market declines for other reasons will not occur in the future. Such market declines, if they did occur, could have a material adverse effect on the Issuer's financial condition and results of operations. Market downturns and high volatility can occur not only as a result of purely economic factors, but also as a result of war, acts of terrorism, natural disasters or other similar events outside the Issuer's control.

The Issuer's risk management methods may leave the Issuer exposed to unidentified, unanticipated or incorrectly quantified risks, which could lead to material losses or material increases in liabilities

The Issuer devotes significant resources to developing risk management policies, procedures and assessment methods for the Issuer's banking businesses. The Issuer uses a value-at-risk ("VaR") model, duration analysis and sensitivity analysis as well as other risk assessment methods. Nonetheless, the Issuer's risk management techniques and strategies may not be fully effective in mitigating the Issuer's risk exposure in all economic market environments or against all types of risk, including risks that the Issuer fails to identify or anticipate. Some of the Issuer's qualitative tools and metrics for managing risk are based upon use of observed historical market behaviour. The Issuer applies statistical and other tools to these observations to arrive at quantifications of risk exposures. These tools and metrics may fail to predict future risk exposures. The Issuer's losses thus could be significantly greater than the Issuer's measures would indicate. In addition, the Issuer's quantified modeling does not take all risks into account. The Issuer's more qualitative approach to managing risks takes into account a broader set of risks, but is less precise than quantified modeling and could prove insufficient. Unanticipated or incorrectly quantified risk exposures could result in material losses in the Issuer's banking businesses.

The Legal Demerger has resulted in a cross liability arrangement that required the Issuer to remain liable to creditors of RBS N.V. for certain monetary obligations of RBS N.V. in the event that RBS N.V. cannot meet such obligations

On 6 February 2010, the Former ABN AMRO Bank N.V. was demerged into two entities, being RBS N.V. (the Former ABN AMRO Bank N.V.) and ABN AMRO Bank Standalone and subsequently on 1 July 2010 ABN AMRO Bank Standalone merged with FB(N) following the Legal Merger. See below under *Issuer Description – History and recent developments* for more information about the restructuring and the Legal Demerger of the businesses of the Former ABN AMRO group.

In principle, following completion of the Legal Demerger, creditors now only have recourse to the entity to which the relevant assets and liabilities have been transferred for payments in respect of the appropriate securities. Under the Dutch Civil Code, however, each entity remains liable to creditors for the monetary obligations of the other entity that existed at the date of the Legal Demerger in the event that the other entity cannot meet its obligations to those creditors. In each case, this liability relates only to obligations existing at the date of the Legal Demerger.

The liability of the Issuer is limited to the amount of equity acquired at the Legal Demerger, which amounts to EUR 1.8 billion. The liability of RBS N.V. is limited to the equity retained at the Legal Demerger, amounting to EUR 4.0 billion.

The Issuer has made arrangements to mitigate the risks of liability to the creditors which transferred to RBS N.V. upon the Legal Demerger. RBS N.V. has also made arrangements to mitigate the risks of liability to the creditors that transferred from RBS N.V. to the Issuer. Both RBS N.V. and the Issuer hold the level of regulatory capital agreed upon with the Dutch Central Bank for purposes of covering any residual risks. There is no assurance that the mitigating arrangements taken by the Issuer are sufficient to satisfy all claims of creditors transferred to RBS N.V.

The 403 Declaration of ABN AMRO Group N.V. may provide limited economic benefit or recourse to investors

The 403 Declaration constitutes a guarantee by ABN AMRO Group N.V. for, *inter alia*, Securities issued by the Issuer. If the Issuer should default, creditors impacted by such default, including holders of the Securities may claim against the Issuer and/or ABN AMRO Group N.V. as the guarantor. The obligation of ABN AMRO Group N.V. under the 403 Declaration is unconditional and is not limited in amount or by the type of the Issuer's transactions.

A legal defence available to the Issuer against a creditor of the Issuer would likewise be available to ABN AMRO Group N.V. as well.

Furthermore, since ABN AMRO Group N.V. is a holding company with no significant activities of its own, it would have to look at its operating subsidiaries to satisfy a claim brought against it by a holder of a Security or any other creditor of the Issuer on the basis of the 403 Declaration. As ABN AMRO Group N.V.'s only direct subsidiary is the Issuer, a holder of a Security issued by the Issuer must realise that a claim under the 403 Declaration would not result in material recourse.

Finally, ABN AMRO Group N.V. may revoke the 403 Declaration at any time.

See below under *Issuer Description – History and recent developments* for more information about the restructuring and the Legal Demerger of the businesses of the Former ABN AMRO group.

The Legal Demerger, Legal Separation (including in relation to the EC Remedy) and Legal Merger process create additional risks for the Issuer's business and stability

The Issuer is going through a period of transition and change as a result of the Legal Demerger, Legal

Separation (including in relation to the EC Remedy) and Legal Merger, which poses additional risks to the Issuer's business, including (i) the Issuer's ability to retain key personnel during the transition and (ii) its exposure to enhanced operational and regulatory risks during this period.

In addition, during this period of transition and change resulting from the Legal Demerger and the Legal Separation, the Issuer and RBS N.V. will remain interdependent with respect to certain business areas, for which they will *inter alia* provide certain services to each other. Furthermore, as a result of the EC Remedy the Issuer has committed itself to continue to provide certain services to Deutsche Bank Nederland N.V. Also, since FB(N) was part of the former Fortis group until late 2008, there are remaining interdependencies between Fortis Bank SA/NV, ASR Nederland (which was also split off from the former Fortis group as a separate business) and the Issuer with respect to certain services.

Also, the integration process of ABN AMRO Bank Standalone with FB(N) following the Legal Merger could be delayed due to *inter alia* delays in the integration of the two entities. Delay in this integration may reduce the anticipated benefits of the integration, impose additional costs or adversely affect the stand alone operation of the Issuer and may therefore adversely affect the Issuer's results and financial condition.

The Issuer may fail to realise the anticipated business growth opportunities, synergies and other benefits anticipated from the Legal Merger, which could result in a material adverse effect on its results of operations, financial condition and prospects.

There is no assurance that the Legal Merger will achieve the anticipated business growth opportunities, synergies and other benefits the Issuer anticipates. The Issuer believes that the integration following the Legal Merger will create business growth opportunities, synergies, revenue benefits, cost savings and other potential benefits. However, these expected business growth opportunities, synergies and other benefits may not develop and other assumptions with respect to the anticipated integration may prove to be incorrect. The integration of ABN AMRO Bank Standalone with FB(N) following the Legal Merger and the realisation of the expected benefits is challenging within the timeframe contemplated. Successful implementation of this plan requires a significant amount of management time and, thus, may affect or impair management's ability to run the business effectively during the period of implementation. In addition, the integration is subject to a number of additional risks, including: difficulties or unexpected costs relating to the integration of technology platforms, financial and accounting systems, risk management systems and management systems of two organizations; difficulties or unexpected costs in realizing synergies from the consolidation of head office and back office functions; higher than expected levels of customer attrition or market share loss arising as a result of the Legal Merger; unexpected losses of key personnel during or following the integration of the two businesses; possible conflict in the culture of the two organizations and decrease in employee morale; and potential damage to the reputation of brands due to the Legal Merger.

The estimated expense savings and revenue synergies contemplated by the Legal Merger are significant. There can be no assurance that the Issuer will realise these benefits in the time expected or at all. In addition, there can be no assurance that the total costs associated with the implementation of the integration currently anticipated by the Issuer will not be exceeded.

If any of these risks should occur, or if there are unexpected challenges in the integration process, the anticipated benefits of the Legal Merger may be delayed, achieved only in part, or not at all or at greater cost, which could have an adverse effect on the Issuer's results of operations or financial condition.

The Standalone Financial Information should be read with caution. A full impact analyses of the financial position and results of the Issuer following the Legal Merger is not possible on the basis thereof

Only the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 reflect the consolidation of ABN AMRO Bank Standalone and FB(N). In order to provide further financial information about the businesses that have become part of the Issuer after the Legal Merger taking effect, the Issuer has also incorporated herein by reference the Standalone Financial Information.

Because of its nature, the audited pro forma financial information 2009 of ABN AMRO Standalone incorporated by reference herein addresses a hypothetical situation and therefore does not represent the actual financial position per 31 December 2009 or ABN AMRO Bank Standalone's income over 2009 and has been incorporated by reference herein for illustrative purposes only.

Investors will need to make their own investigations and financial calculations on the basis of the financial information incorporated by reference herein in order to make an informed assessment of the future assets and liabilities, financial position, profit and losses and prospects of the Issuer.

In reading the Standalone Financial Information 2009/2008, investors should note that differences exist in the application of certain accounting policies, estimates and classification of certain line items in respect of ABN AMRO Bank Standalone and FB(N). Also, investors should note that the Standalone Financial Information 2009/2008 does not take into account the effect of one-off costs of realising any synergies that may result from integration activities.

Furthermore, investors should note that a combined reading of the Standalone Financial Information:

- does not take into account certain items which have been eliminated on the consolidation of ABN AMRO Bank Standalone's and FB(N)'s reported results of operations and financial position following the Legal Merger;
- does not provide an indication of what the Issuer's results of operations or financial position would have been had the Legal Merger occurred as at 1 January 2009;
- does not represent the results of operation or financial position of the Issuer for any future date or period; and
- do not take into account the effect of any synergies that may result from integration activities.

Therefore, a full impact analysis of the financial position and results of the Issuer following the Legal Merger is not possible on the basis of a combined reading of the Standalone Financial Information.

An investor may not be able to effectively compare the Issuer's future consolidated financial statements to the Standalone Financial Information

Following completion of the Legal Separation on 1 April 2010, ABN AMRO Bank Standalone and FB(N) became direct subsidiaries of ABN AMRO Group N.V. Since 1 April 2010, the managing boards and supervisory boards of ABN AMRO Bank Standalone, FB(N) and ABN AMRO Group N.V. have been composed of the same members. However, both ABN AMRO Bank Standalone and FB(N) have operated as separate and independent banks up to the Legal Merger taking effect. The Legal Merger will be a fundamental change to the organisation, business segments, financial position and reporting of ABN AMRO Bank Standalone and FB(N) as compared with periods prior to the Legal Merger. Accordingly, an investor may not be able to effectively compare the Issuer's future consolidated financial statements to the Standalone Financial Information.

An investor may not be able to effectively compare the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 to the Standalone Financial Information and the Standalone Financial Information 2010 to the Standalone Financial Information 2009/2008

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 have been compiled on a different basis than the Standalone Financial Information (which is company only financial information). In respect of the Standalone Financial Information 2009/2008 the differences relate to the harmonisation of accounting policies and principles and the reclassification of certain line items and the elimination of inter-company positions upon consolidation. The latter difference also and only applies to the Standalone Financial Information 2010. Accordingly, an investor may not be able to effectively compare the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual statements 2010 to the Standalone Financial Information 2010, or the Standalone Financial Information 2010 to the Standalone Financial Information 2009/2008.

In addition, FB(N) reported its regulatory capital under Basel II Advanced-IRB. Until Legal Separation on 1

April 2010, ABN AMRO Bank Standalone reported its regulatory capital under Basel I. As of 1 April 2010, ABN AMRO Bank Standalone also reports under Basel II Advanced-IRB. The consolidated and combined capital ratios are not available for the combined bank for the period before 1 April 2010.

The capital requirements of ABN AMRO Bank Standalone and FB(N) were reported to the Dutch Central Bank on a separate basis at the end of June 2010. The application of Basel II policies, methodologies and models in order to calculate the regulatory capital and risk-weighted assets for the merged bank is currently in the process of harmonisation. Until completion of the harmonisation, the reported Basel II capital ratios will be combined pro forma capital ratios based on consolidated IFRS equity and therefore an investor may not be able to determine the consolidated capital position of the combined bank until such harmonisation is completed

RISK FACTORS RELATING TO THE TURBO CERTIFICATES

Factors which are material for the purpose of assessing the market risks associated with Securities issued

The Securities are short or long Turbo certificates which entail particular risks

Turbo certificates are investment instruments without a fixed maturity or expiration date, which can either be terminated by the Issuer, exercised by the Holder, and may automatically terminate if the Underlying (as defined below) reaches a pre-determined level. Following any such event, the Turbo certificates pay an amount determined by reference to the level of the underlying currency, commodity, index (including in the case of an index, the index and its constituent elements), stock, bond or other product (together, the “**Underlying**”), subject to the certificate entitlement. Investors should be aware that their entire investment may be lost if the Underlying is at an unfavourable level.

The price at which a Holder will be able to sell Turbo certificates may be at a potentially substantial discount to the market value of the Turbo certificates at the issue date, if, at such time and in addition to any other factors, the value of the Underlying is at an unfavourable level.

Turbo certificates track in a linear manner the Underlying. The amount needed to invest in a Turbo certificate to give the same participation rate in the Underlying as a direct investment in the Underlying is considerably less. This is because part of the investment is being financed by the Issuer through what is referred to as the Financing Level. Therefore the percentage gain if the Underlying rises (in the case of Turbo long certificates) or falls (in the case of Turbo short certificates) and the percentage loss if the Underlying falls or rises, respectively, is higher in Turbo certificates than in a direct investment in the Underlying. This is the leverage effect. Investors should be aware that the leverage effect from holding Turbo certificates could result in gaining or losing a greater percentage of the investment than would occur through a direct investment in the Underlying. The maximum loss to the investor is the initial amount invested. Investors must expect to suffer a loss if the market price or value of the Underlying falls (in the case of Turbo long certificates) or rises (in the case of Turbo short certificates). A feature of Turbo certificates is the Stop loss which, if breached, will result in the early termination of the turbo certificate.

Turbo short certificates enable the investor to profit from declining markets. Turbo short certificates track the Underlying in an inverse manner. If the value of the Underlying drops, the value of the Turbo short certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate.

Turbo long certificates enable the investor to profit from rising markets. Turbo long certificates track the Underlying. If the value of the Underlying rises, the value of the Turbo long certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate.

The Securities may not be a suitable investment for all investors

Each potential investor in the Securities must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (a) have sufficient knowledge and experience to make a meaningful evaluation of the Securities, the merits and risks of investing in the Securities and the information contained or incorporated by reference in this Base Prospectus or any applicable Final Terms;
- (b) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Securities and the impact the Securities will have on its overall investment portfolio;

- (c) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Securities, including Securities with principal or interest payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (d) understand thoroughly the terms of the Securities and be familiar with the behaviour of any relevant indices and financial markets; and
- (e) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Some Securities are complex financial instruments. Sophisticated institutional investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. A potential investor should not invest in Securities which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Securities will perform under changing conditions, the resulting effects on the value of the Securities and the impact this investment will have on the potential investor's overall investment portfolio.

The value of the Securities may fluctuate

The value of the Securities may move up and down between their date of purchase and their exercise date or maturity date (as the case may be). Holders of Securities may sustain a total loss of their investment (unless the Securities are of a type in which capital is protected). Prospective purchasers should therefore ensure that they understand fully the nature of the Securities before they invest in the Securities.

Several factors, many of which are beyond the Issuer's control, will influence the value of the Securities at any time, including the following:

Prospective purchases should review the Conditions to ascertain whether and how such provisions apply to the Securities.

- (a) *Valuation of the Underlying.* The market price of the Securities at any time is expected to be affected primarily by changes in the level of the Underlying to which such Securities are linked. It is impossible to predict how the level of the relevant Underlying will vary over time. Factors which may have an affect on the value of the Underlying include the rate of return of the Underlying and the financial position and prospects of the issuer of the Underlying or any component thereof. In addition, the level of the Underlying may depend on a number of interrelated factors, including economic, financial and political events and their effect on the capital markets generally and relevant stock exchanges. Potential investors should also note that whilst the market value of the Securities is linked to the relevant Underlying and will be influenced (positively or negatively) by it, any change may not be comparable and may be disproportionate. It is possible that while the Underlying is increasing in value, the value of the Securities may fall. Further, where no market value is available for an Underlying, the Calculation Agent may determine its value to be zero notwithstanding the fact that there may be no Market Disruption Event and/or no Potential Adjustment Events which apply.
- (b) *Interest Rates.* Investments in the Securities may involve interest rate risk with respect to the currency of denomination of the Underlying and/or the Securities. A variety of factors influence interest rates such as macro economic, governmental, speculative and market sentiment factors. Such fluctuations may have an impact on the value of the Securities at any time prior to valuation of the Underlying relating to the Securities.
- (c) *Volatility.* The term “volatility” refers to the actual and anticipated frequency and magnitude of changes of the market price with respect to an Underlying. Volatility is affected by a number of factors such as macro economic factors, speculative trading and supply and demand in the options,

futures and other derivatives markets. Volatility of an Underlying will move up and down over time (sometimes more sharply than others) and different Underlyings will most likely have separate volatilities at any particular time.

- (d) *Exchange Rates.* Even where payments in respect of the Securities are not expressly linked to a rate or rates of exchange between currencies, the value of the Securities could, in certain circumstances, be affected by such factors as fluctuations in the rates of exchange between any currency in which any payment in respect of the Securities is to be made and any currency in which the Underlying is traded, appreciation or depreciation of any such currencies and any existing or future or governmental or other restrictions on the exchangeability of such currencies. There can be no assurance that rates of exchange between any relevant currencies which are current rates at the date of issue of any Securities will be representative of the relevant rates of exchange used in computing the value of the relevant Securities at any time thereafter. Where Securities are described as being “quantoed”, the value of the Underlying will be converted from one currency (the “**Original Currency**”) into a new currency (the “**New Currency**”) on the date and in the manner specified in, or implied by, the Conditions using a fixed exchange rate. The cost to the Issuer of maintaining such a fixing between the Original Currency and the New Currency will have an implication on the value of the Securities. The implication will vary during the term of the Securities. No assurance can be given as to whether or not, taking into account relative exchange rate and interest rate fluctuations between the Original Currency and the New Currency, a quanto feature in a Security would at any time enhance the return on the Security over a level of a similar security issued without such a quanto feature.
- (e) *Disruption.* If so indicated in the Conditions, the Calculation Agent may determine that a Market Disruption Event (which includes Emerging Market Disruption Events) has occurred or exists at a relevant time. Any such determination may affect the value of the Securities and/or may delay settlement in respect of the Securities.

Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities.

- (f) *Creditworthiness.* Any person who purchases the Securities is relying upon the creditworthiness of the Issuer and has no rights against any other person. The Securities constitute general, unsecured, contractual obligations of the Issuer and of no other person. The Securities rank pari passu among themselves.

Risks relating to the Issuer Call Right

Investors should be aware that the Issuer is entitled to call the Securities on any Business Day with the effectiveness on the same day. Therefore, investors may not be able to sell their Securities in time.

Risks relating to early termination

Investors should be aware that the Issuer has the right to terminate the Securities if it shall have determined in its absolute discretion that the performance under the Securities shall have become unlawful in whole or in part as a result of compliance in good faith by the Issuer with any applicable present or future law, rule, regulation, judgement, order or directive of any governmental, administrative, legislative or judicial authority or power.

Furthermore, it should be noted that the Issuer is also entitled to terminate the Securities in the event of a Hedging Disruption Event that may include, but is not limited to

- any material illiquidity in the market for the relevant instruments which from time to time are included in the reference asset to which the Securities relate; or
- a change in Applicable Law (including, without limitation, any tax law) or the promulgation of, or

change in, the interpretation of any court, tribunal or regulatory authority with competent jurisdiction of any applicable law (including any action taken by a taxing authority); or

- a material decline in the creditworthiness of a party with whom the Issuer has entered into any such Relevant Hedging Transaction; or
- the general unavailability of: (A) market participants who will agree to enter into a Relevant Hedging Transaction; or (B) market participants who will so enter into a Relevant Hedging Transaction on commercially reasonable terms.

If the Issuer terminates early the Securities, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Security an amount determined by the Calculation Agent to be its fair market value less the cost to the Issuer of unwinding any underlying related hedging arrangements. Following any such early termination of Securities, the Holders may not be able to reinvest the redemption proceeds at any effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate.

The Stop Loss mechanism entails particular risks

The Securities may expire and become worthless during their term in case a Stop Loss Event occurs.

A Stop Loss Event occurs if the market price or value of the Underlying is less than or equal to (in case of Turbo long certificates) or is greater than or equal to (in case of Turbo short certificates) the Stop Loss Price. In case of the occurrence of such a Stop Loss Event the Securities are automatically terminated, the right to receive payment of an Exercise Cash Amount terminates automatically and the Securities expire worthlessly, subject to a potential Stop Loss Cash Amount which will be calculated by the Calculation Agent on the basis of the Stop Loss Termination Reference Price which is determined by the Calculation Agent in its sole and absolute discretion to be the fair value price for the Underlying.

Potential investors should be aware that in case of Turbo long certificates the likelihood that a Stop Loss Event occurs is increased by the repeated adjustment of the Stop Loss Price even if the market price or value of the Underlying remains constant. In case of Turbo short certificates the likelihood that a Stop Loss Event occurs is increased by the repeated adjustments of the Stop Loss Price even if the market price or value of the Underlying remains constant if the Prevailing Rate falls short off the Current Spread. The longer an investor holds the Securities in these cases, the higher is the risk of a loss of the capital invested. In case of Securities on currency exchange rates the risk of the occurrence of a Stop Loss Event increases if the spread between the Prevailing Rate for the Financing Level Currency and the Prevailing Rate of the Settlement Currency or the Underlying Currency, as applicable, increases (in case of Turbo long certificates) or decreases (in case of Turbo short certificates). In case of Securities on future contracts the special situation might occur that a Stop Loss Event occurs just because of a Rollover (as defined below).

The Stop Loss Price depends on the Current Stop Loss Premium. The Current Stop Loss Premium means an amount in the Financing Level Currency as determined by the Calculation Agent on each Reset Date, whereby the Current Stop Loss Premium shall not be less than the Minimum Premium nor greater than the Maximum Premium. An adjustment may take place in particular if the volatility of the Underlying of the Securities changes considerably. Investors should note that in case of an increase of the Current Stop Loss Premium the likelihood of the occurrence of a Stop Loss Event increases because in this case the spread between the Stop Loss Price and the market price or value of the Underlying decreases. It cannot be excluded that a Stop Loss Event may be triggered on a Stop Loss Reset Date just because of an adjustment of the Current Stop Loss Premium.

Furthermore, it should be noted that the Calculation Agent will not continuously quote bid and offer prices for the Securities in the secondary market at the time when a Stop Loss Event occurs and in the phase of determining the Stop Loss Termination Reference Price. In addition, the Calculation Agent will not

continuously quote bid and offer prices for the Securities in the secondary market outside of trading hours of the Underlying if the Calculation Agent expects, based on other indications than the official market price or value of the Underlying, the occurrence of a Stop Loss Event. It should be noted that the Calculation Agent does not assume any legal obligation against the Holders of the Securities to quote bid and offer prices for the Securities and Holders should therefore not rely on the fact that the Securities can be sold at a specific time or at a specific price during their term.

Furthermore, investors may suffer a total loss of the capital invested if the Calculation Agent is unsuccessful in unwinding the Issuer's hedging position at a level of the Underlying exceeding the current Underlying (in case of Turbo long certificates) and, respectively, below the current Underlying (in case of Turbo short certificates). This risk exists especially in situations when the market price or value of the Underlying decreases considerably (in case of Turbo long certificates) or increases considerably (in case of Turbo short certificates) between close of the trading session on one trading day and beginning of the trading session on the following trading day.

Investors may not rely on being able to exercise their Securities at all times prior to the occurrence of a Stop Loss Event. Even if all other conditions precedent for effective exercise are being fulfilled the exercise is excluded on the day when a Stop Loss Event occurs. All exercise notices that have been delivered but not yet executed are automatically void upon occurrence of the Stop Loss event.

Risk factors related to Securities with shares as Underlying

In case of shares as Underlying the performance of the share is decisive for the development of the value of the Securities. The performance of the share cannot be predicted and is determined by macroeconomic factors, e.g. the interest and price level on the capital markets, currency developments, political circumstances as well as entity specific factors such as profitability, market position, risk situation, shareholder structure and dividend policy.

Risk factors related to Securities with future contracts as Underlying

In case of future contracts as Underlying the following risk factors apply:

General

Future contracts are standardised forward transactions relating to financial instruments (e.g. shares, indices, interest rates or currencies) – so-called financial future contracts – or to commodities (e.g. precious metals, wheat or sugar) – so-called commodities future contracts.

A future contract represents a contractual obligation to buy or sell a fixed amount of the underlying of the commodity or financial instrument on a fixed date at an agreed price. Future contracts are traded on futures exchanges and are, consequently, standardised in terms of contract amount, type, and quality of the Underlying, as well as delivery locations and dates where applicable. There is normally a close correlation between the price movement of the underlying of the futures contract on the spot market and prices quoted on the future contract on the corresponding futures markets. However, future contracts are generally traded at a discount or premium to the spot price of the financial instrument or commodity underlying of the future contract. This difference between the spot and futures prices, called the "basis" in future exchange terminology is resulting on the one hand from the costs customarily arising in connection with spot transactions (warehousing, delivery, insurance, etc.) and/or the income customarily arising in connection with spot transactions (interest, dividends, etc.) and on the other hand from the different methods used to evaluate general factors affecting the spot and futures markets. Furthermore, depending on the relevant Underlying, there can be significant differences in the liquidity of the futures and the spot markets.

As the value of the Securities depends on the market price of the future contracts it is recommended that investors understand how future transactions work and are valued in addition to knowing about the market in

the respective futures contract, since only then the investor can properly assess the risks inherent in purchasing the Securities.

Rollover

Since future contracts as Underlying of the Securities always have a fixed expiry date the Calculation Agent will, at a date or period specified in the applicable Final Terms (the “**Rollover Date**”), replace the underlying future contract with a financially equivalent reference asset selected by the Calculation Agent (“**Rollover**”). On the Rollover Date the Issuer, or the Calculation Agent on the Issuer's behalf, will, therefore, unwind the hedges that it had entered into to cover the positions created by the original futures contracts, which are due to expire, and create corresponding positions in futures contracts with identical features but expiring at a later date.

Once the Rollover has been completed the Current Financing Level and the Stop Loss Price shall be adjusted on the basis of the prices for the new future contract. If the price of the next futures contract being rolled into is higher than the price of the expiring futures contract (referred to as a "contango" market), only a correspondingly smaller share in the new futures contract can be purchased with the proceeds of the terminated position. Accordingly, this is disadvantageous for Holders of Turbo long certificates. If the price of the next futures contract being rolled into is lower than the price of the expiring futures contract (referred to as a "backwardation" market), a correspondingly greater share of the new futures contract can be purchased. Accordingly, this is disadvantageous for Holders of Turbo short certificates.

Risk factors related to Securities with currency exchange rates as Underlying

Currency exchange rates indicate the relationship between one specified currency and another currency. In foreign exchange markets, in which one particular currency is traded against another, the currency being traded is called the "Base Currency" and the currency indicating the price for the Base Currency is called the "Counter Currency". Important currencies traded in international exchange rate markets are the US dollar (USD), the euro (EUR), the Japanese yen (JPY), the Swiss franc (CHF) and the British pound (GBP). For example, the currency exchange rate "EUR/USD 1.34" indicates that USD 1.34 shall be paid for the purchase of one euro. An increase in this currency exchange rate therefore means an increase in the value of the euro against the US dollar. The currency exchange rate "USD/EUR 0.74", on the other hand, indicates that EUR 0.74 shall be paid for the purchase of one US dollar. An increase in this currency exchange rate therefore means an increase in the value of the US dollar against the euro.

Currency exchange rates are influenced by a wide variety of factors, including components such as the inflation rate in the countries concerned, interest rate differences compared to foreign countries, economic forecasts, the global political situation, currency convertibility and the safety of making financial investments in the currency concerned. Apart from these assessable factors there may be factors that are almost impossible to be evaluated, for instance factors of psychological nature, e.g. a loss of faith in the political leadership of a country which can also have a major impact on the value of the currency exchange rate concerned.

Various sources can be used in determining the reference price of the Underlying. On the one hand, there are currency exchange rates used for interbank trading, given that most international currency trading takes place between major banks. These rates are published on the pages of business information services (such as Reuters or Bloomberg). On the other hand, certain official currency exchange rates determined by central banks (such as the European Central Bank) can also be used as reference price.

Risk factors related to Securities with Commodities as Underlying

Commodities are generally divided into three main categories: mineral commodities (such as oil, gas, aluminium and copper), agricultural products (such as wheat and corn) and precious metals (such as gold and silver). The majority of commodities are traded globally on specialised exchanges or directly between market participants (interbank trading) over-the-counter by means of standardised contracts.

The price risks involved in commodities are often complex. Commodity prices are more volatile than other investment categories and, in particular, commodity markets are less liquid than bond, currency or stock markets. Therefore, changes in supply and demand have a more dramatic impact on prices and volatility, making commodities investments riskier and more complex than other.

The factors that influence commodity prices are both numerous and complex. The following are examples of some typical factors affecting commodities prices.

Supply and demand

The planning and management of commodities supplies is very time-consuming. Therefore, the scope for supply for commodities is limited and it is not always possible to adjust production swiftly to changes in demand. Demand can also vary on a regional basis. Transport costs for commodities in regions where these are needed also affect prices. The fact that some commodities follow a cyclical pattern, such as agricultural products which are only produced at certain times of the year, can also result in major price fluctuations.

Direct investment costs

Direct investment in commodities involve costs related to storage, insurance and tax. Moreover, no interest or dividends are paid on commodities. The total returns from commodities investments are therefore influenced by these factors.

Liquidity

Not all commodities markets are liquid and able to react quickly and adequately to changes in supply and demand situations. The fact that there are only a few market participants on the commodities market means that speculative investments can have negative consequences and may distort prices.

Weather conditions and natural disasters

Unfavourable weather conditions can influence the supply of certain commodities for the entire year. This kind of supply crisis can lead to severe and unpredictable price fluctuations. Diseases and epidemics can also influence the prices of agricultural commodities.

Political risks

Commodities are often produced in emerging market countries, with demand coming principally from industrialised nations. However, the political and economic situation of emerging markets is often far less stable than in industrialised nations. They are generally much more susceptible to the risks of rapid political change and economic setbacks. Political crises can affect investor confidence, which can as a consequence influence commodity prices. Armed conflicts can affect the supply and demand for certain commodities. It is also possible for industrialised nations to impose embargos on imports and exports of goods and services. This can directly and indirectly affect commodity prices. Furthermore, numerous commodity producers have joined forces to establish organisations or cartels in order to regulate supply and influence prices.

Taxation

Changes in tax rates and customs duties may have a positive or negative impact on the profitability margins for commodities producers. When these costs are passed on to purchasers, these changes will affect prices of the relevant commodities.

There may not be a secondary market in the Securities

Potential investors should be willing to hold the Securities through their life. The nature and extent of any secondary market in the Securities cannot be predicted. As a consequence any person intending to hold the

Securities should consider liquidity in the Securities as a risk. If the Securities are listed or quoted on Euronext Amsterdam or any other exchange or quotation system this does not imply greater or lesser liquidity than if equivalent Securities were not so listed or quoted. However, if Securities are not listed or quoted there may be a lack of transparency with regard to pricing information. The Issuer or any relevant third party acting as a market-maker may provide quotations or prices for the Securities which may be suspended by the Issuer or such third party at any time, subject to all applicable rules and regulations. Liquidity may also be affected by legal restrictions on offers for sale in certain jurisdictions. The Issuer may affect the liquidity of the Securities by purchasing and holding the Securities for its own account during trading in the secondary market. Any such Securities may be resold at any time into the market.

Purchasing the Securities as a hedge may not be effective

Any person intending to use the Securities as a hedge instrument should recognise the correlation risk. The Securities may not be a perfect hedge to an Underlying or portfolio of which the Underlying forms a part. In addition, it may not be possible to liquidate the Securities at a level which directly reflects the price of the Underlying or portfolio of which the Underlying forms a part.

Actions taken by the Issuer or any hedging counterparty may affect the value of the Securities

The Issuer, any hedging counterparty and/or any of their affiliates may carry out activities that minimise its and/or their risks related to the Securities, including effecting transactions for their own account or for the account of their customers and hold long or short positions in the Underlying whether for risk reduction purposes or otherwise. In addition, in connection with the offering of any Securities, the Issuer, any hedging counterparty and/or any of their affiliates may enter into one or more hedging transactions with respect to the Underlying. In connection with such hedging or market-making activities or with respect to proprietary or other trading activities by the Issuer, any hedging counterparty and/or any of their affiliates, the Issuer, any hedging counterparty and/or any of their affiliates may enter into transactions in the Underlying which may affect the market price, liquidity or value of the Underlying and/or the Securities and which could be deemed to be adverse to the interests of the Holders (see also section “Potential conflicts of interest may arise that may affect the value of the Securities - Conflicts of interest relating to the Underlying” below). The Issuer, any hedging counterparty and/or their affiliates are likely to modify their hedging positions throughout the life of the Securities whether by effecting transactions in the Underlying or in derivatives linked to the Underlying. Further, it is possible that the advisory services which the Issuer, any hedging counterparty and/or their affiliates provide in the ordinary course of its/their business could lead to an adverse impact on the value of the Underlying. In addition, hedging counterparties of the Issuer may not perform their obligations under the relevant agreements, which may result in the Issuer not being able to meet its obligations under the Securities.

Holders have no ownership interest in the Underlying

The Securities convey no interest in the Underlying. The Issuer may choose not to hold the Underlying or any derivatives contracts linked to the Underlying. There is no restriction through the issue of the Securities on the ability of the Issuer and/or its affiliates to sell, pledge or otherwise convey all right, title and interest in any Underlying or any derivatives contracts linked to the Underlying.

Actions taken by the Calculation Agent may affect the Underlying

The Calculation Agent is the agent of the Issuer and not the agent of the Holders or any of them. The Issuer may itself act as the Calculation Agent. The Calculation Agent will make such adjustments as it considers appropriate as a consequence of certain corporate actions affecting the Underlying. In making these adjustments the Calculation Agent is entitled to exercise substantial discretion and may be subject to conflicts of interest in exercising this discretion (see also section “Potential conflicts of interest may arise that may affect the value of the Securities - Conflicts of interest relating to the Underlying” below). The Calculation Agent is not required to make adjustments with respect to each and every corporate action.

There may be delays in effecting settlement

If the Securities are subject to provisions relating to exercise, then upon their exercise, there will be a time lag between the time a holder of the Securities gives instructions to exercise and the time the applicable Cash Amount (if the Securities are Cash Settled Securities) relating to such exercise is determined. If the Securities are Physical Delivery Securities there will be a time lag following exercise of the Securities until the Share Amount is delivered to the relevant Holder's account. Any such delay between the time of exercise and the determination of the Cash Amount or delivery of the Share Amount will be specified in the Conditions. However, such delay could be significantly longer, particularly in the case of a delay in exercise of such Securities arising from, as described above, any daily maximum exercise limitation or, as described above, upon the determination by the Calculation Agent that a Market Disruption Event (which includes Emerging Market Disruption Events) occurred at any relevant time. The applicable Cash Amount or Share Amount could decrease or increase from what it would have been but for such delay.

Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities.

If the Securities are subject to provisions concerning delivery of a Notice and such notice is received by the Paying Agent after the latest time specified in the Conditions, it will be deemed to be duly delivered on the next following Business Day. Such deemed delay may in the case of Cash Settled Securities increase or decrease the Cash Amount from what it would have been but for such deemed delivery. In the case of Securities which are exercisable on one day only or only during an exercise period any Notice, if not delivered by the latest time specified in the Conditions, shall be void.

The failure to deliver any certifications required by the Conditions could result in the loss or inability to receive amounts or deliveries otherwise due under the Securities.

Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities.

Securities not exercised in accordance with the Conditions will (where exercise is required) expire worthless.

Taxes may be payable by investors

Potential purchasers and sellers of the Securities should be aware that they may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Securities are transferred. Holders are subject to the provisions of General Condition 8 and payment and/or delivery of any amount due in respect of the Securities will be conditional upon the payment of any Expenses as provided in the Product Conditions.

Potential purchasers who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

Risks associated with Securities held in global form

The Securities will initially be held by or on behalf of one or more clearing systems specified in the applicable Final Terms (each a “**Relevant Clearing System**”), either in the form of a global Security which will be exchangeable for Definitive Securities only in the event of the closure of all Relevant Clearing Systems or in dematerialised form depending on the rules of the Relevant Clearing System. For as long as any Securities are held by or on behalf of a Relevant Clearing System, payments of principal and any other amounts will be made through the Relevant Clearing System, where required, against presentation or surrender (as the case may be)

of the relevant global Security and, in the case of a temporary global Security, certification as to non-U.S. beneficial ownership. The risk is that the bearer of the relevant global Security, typically a depositary for the Relevant Clearing System, or, in the case of Securities in dematerialised form, the Relevant Clearing System, not the Holder itself, shall be treated by the Issuer and any Paying Agent as the sole holder of the relevant Securities with respect to the payment of principal, interest (if any) and any other amounts payable in respect of the Securities or any securities deliverable in respect of the Securities.

Securities which are held by or on behalf of a Relevant Clearing System will be transferable only in accordance with the rules and procedures for the time being of the Relevant Clearing System.

Risk associated with nominee arrangements

Where a nominee service provider is used by an investor to hold Securities or such investor holds interests in any Security through accounts with a Relevant Clearing System, such investor will receive payments in respect of principal, interest, (if any) or any other amounts due, or securities deliverable, as applicable, solely on the basis of the arrangements entered into by the investor with the relevant nominee service provider or Relevant Clearing System, as the case may be. Furthermore, such investor must rely on the relevant nominee service provider or Relevant Clearing System to distribute all payments or securities attributable to the relevant Securities which are received from the Issuer. Accordingly, such an investor will be exposed to the credit risk of, and default risk in respect of, the relevant nominee service provider or Relevant Clearing System, as well as the Issuer.

In addition, such a Holder will only be able to sell any Securities held by it prior to their stated maturity date with the assistance of the relevant nominee service provider.

None of the Issuer or any Paying Agent shall be responsible for the acts or omissions of any relevant nominee service provider or Relevant Clearing System nor makes any representation or warranty, express or implied, as to the service provided by any relevant nominee service provider or Relevant Clearing System.

The return on an investment in Securities will be affected by charges incurred by investors

An investor's total return on an investment in any Securities will be affected by the level of fees charged by the nominee service provider and/or Relevant Clearing System used by the investor. Such a person or institution may charge fees for the opening and operation of an investment account, transfers of Securities, custody services and on payments of interest, principal and other amounts or delivery of securities. Potential investors are therefore advised to investigate the basis on which any such fees will be charged on the relevant Securities.

There may be a change of law which may affect the value of the Security

The Conditions are based on the laws of the Netherlands in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible change to the laws of the Netherlands or administrative practice after the date of this Base Prospectus.

Credit ratings may not reflect all risks

One or more independent credit rating agencies may assign credit ratings to the Issuer or the Securities. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Securities. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

The expected ratings of the Securities (if any) are set out in the applicable Final Terms. Any rating agency may lower or withdraw its rating if, in the sole judgement of that rating agency, the credit quality of the Securities has declined or is in question. If any rating assigned to the Securities is lowered or withdrawn, the market value of such Securities may be reduced.

Legal investment considerations may restrict certain investments

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) Securities are legal investments for it, (ii) Securities can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Securities. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Securities under any applicable risk-based capital or similar rules.

Any consequential postponement of, or any alternative provisions for, valuation following a Market Disruption Event may have an adverse effect on the value of the Securities

If an issue of Securities includes provisions dealing with the occurrence of a Market Disruption Event, and the Calculation Agent determines that a Market Disruption Event has occurred or exists, any consequential postponement of, or any alternative provisions for, valuation provided in such Security may have an adverse effect on its value.

Potential conflicts of interest may arise that may affect the value of the Securities

Conflicts of interest relating to the Underlying

The Issuer, its affiliates and the Calculation Agent (if such calculation agent is a third party) and its affiliates trade during the ordinary course of business in Underlyings, its constituents and in option or futures contracts related thereto, respectively, and may participate, from time to time, in transactions related to the Securities in some way for their own account or for the account of a third party. Such activities may have a negative impact on the market price or value of the Underlying and consequently upon the price of the Securities and the Cash Amount. In addition, the Issuer, its affiliates and the Calculation Agent (if such calculation agent is a third party) and its affiliates may hold participations in individual Underlyings or in companies contained therein, which may result in conflicts of interest in connection with the Securities.

Furthermore, the Issuer, its affiliates and the Calculation Agent (if such calculation agent is a third party) and its affiliates may additionally act in other capacities in relation to the Underlying or its constituents, as the case may be, such as issuing agent, calculation agent, paying agent, administrative agent and/or Index-Sponsor. Therefore, in relation to the obligations when determining the prices of the Securities and other determinations related thereto, conflicts of interest may arise among the respective entities as well as between such entities and investors, even though the Issuer, its affiliates and the Calculation Agent (if such calculation agent is a third party) and its affiliates will fulfil their obligations in an economically reasonable manner. In addition, the Issuer, its affiliates and the Calculation Agent (if such Calculation Agent is a third party) and its affiliates may act as underwriter, financial advisor or commercial bank in connection with future offerings of the Underlying or its constituents; such activities could present certain conflicts of interest and may affect the price of the Securities.

Conflicts of interest relating to the issue price of the Securities and selling commissions

The issue price charged for the Securities can, in addition to loading charges, management or other fees charged, comprise a premium on the original mathematical ("fair") value of the Securities (the "Margin") which is not visible to investors. Such a Margin is determined by the market-maker in its discretion and can differ from margins charged by other market-makers or issuers for comparable securities.

It should be noted that the issue price of the Securities may contain commissions charged by the market-maker for issues or which the market-maker may pass on to distribution partners as remuneration. Therefore, there may be a deviation between the fair value of the Securities and the bid and offer prices of the Securities provided by the market-maker, which generally is higher at the beginning of trading and shall be reduced during the course of time. Potential commissions affect the profit of the investor. It should further be noted that

the payment of such commission to distribution partners may result in conflicts of interest to the disadvantage of the investor, since the commission may be an incentive for the distribution partner to distribute products with a higher commission. Investors should obtain information on conflicts of interests from their house bank or financial advisor.

Conflicts of interest relating to the market-making

It is intended that under normal market conditions, the market-maker will continuously quote bid and offer prices for each issue of Securities. The market-maker, however, assumes no legal obligation with respect to the amount or the manner of making such quotations. Investors should therefore not rely on the fact that the Securities can be sold at a specific time or at a specific price during their term. Investors should be aware that the quotation of bid and offer prices may occasionally be subject to certain delays that, for instance, may result from market disruptions or system malfunctions. Immediately after the transaction, the market-maker will assume the immediately opposite position towards the investor and either set-off, hedge or hold that position. This may, for instance, also take place by entering into short-positions.

The course of action in detail is as follows: If a transaction is contracted at a bid or offer price provided by the market-maker, in general immediately after the transactions a risk position arises with the market-maker that is immediately opposing the position the investor has taken in the trading transaction. The market-maker will bundle the risk positions arising from this trading transaction and – as the case may be – set-off such trading position that balance each other. As to exceeding positions the market-maker will either hedge itself by way of suitable countertrades in the market of the Underlying of the Turbo certificate or other markets or decide to sustain the risk position. Investors should note that the market-maker may also assume positions in the Underlying of the Turbo certificates and that this may cause movements in the markets.

Furthermore, it should be noted that the bid and offer prices provided by the market-maker are based on price calculation models usually used in the market, which are applied by the market-maker and other market participants and which calculate the fair value of the Securities in due consideration of several factors that affect the value of the Securities. Circumstances taken into account by the market-maker when setting the quoted bid and offer prices in the secondary market notably include the Securities' fair value, which, among other things, depends on the market price or value of the Underlying, as well as a certain bid-offer spread targeted by the market-maker. The market-maker will in addition regularly take into account an agio originally raised for the Securities and any fees or costs which at maturity of the Securities are to be deducted from the cash amount. Furthermore, the prices quoted in the secondary market will be influenced, for example, by a Margin on the Securities included in their issue price, and by dividends paid or expected to be paid under the Underlying or its constituents, or other proceeds which, due to the Securities' design, are economically attributable to the Issuer. The bid-offer spread for the Securities will be set by the market-maker based on supply and demand for the Securities and certain revenue considerations. Certain costs, like for example management fees, are in many cases not taken into account in the quoted prices on a consistent basis over the term of the Securities (pro rata temporis), but are deducted from the Securities' fair value completely at an earlier point in time, as determined by the market-maker in its discretion. The same applies for a Margin contained in the issue price and for dividends and other proceeds of the Underlying which, due to the Securities' design, are economically attributable to the Issuer, which often are not deducted when the Underlying or its constituents, are traded "ex dividend", but at an early stage of the Securities' term based on expected dividends for the entire term or a certain time span. The rate at which such costs are deducted depends, inter alia, on the net return of money under the Securities to the market-maker. Subsequently, the prices quoted by the market-maker can substantially differ from the fair value of the Securities, or the value to be expected economically on the basis of the factors mentioned above, at the relevant time. In addition, the market-maker can at any time alter the methodology used to determine the quoted prices, e. g. increase or decrease the bid-offer spread. Such difference from the fair price of the Securities may result in a significant deviation between the bid and offer prices of other distributors of securities (both downward and upward) and the bid and offer prices provided by the market-maker.

Conflicts of interest relating to the different functions of the Calculation Agent

If a third party acts as Calculation Agent, such party may perform other roles in connection with the issue of the Securities. It may, for instance, act as hedging counterparty for the Issuer, act as dealer for the Securities or act as market-maker for the Securities. Due to the different roles and obligations thereof, conflicts of interest may arise, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent. The Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to a series of Securities have occurred, and (ii) to determine any resulting adjustments and calculations as described in such conditions. Prospective purchasers should be aware that any determination made by the Calculation Agent may have an impact on the value and financial return of the Securities. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest or proven error) shall be binding on the relevant Issuer and all purchasers of the Securities (see also section “Actions taken by the Calculation Agent may affect the Underlying” above).

The Issuer is registered in the Commercial Register of the Amsterdam Chamber of Commerce (*Handelsregister van de Kamer van Koophandel en Fabrieken voor Amsterdam*) under number 34334259.

Corporate objectives

The Issuer's objectives are (according to its articles of association (*statuten*)):

- (a) to be a financial institution, to render investment services and to engage in investment activities, to administer the assets of third parties, to act as trustee, administrator and executor of wills and as a member of the managing or supervisory boards or liquidator of companies or other organisations, to act as an intermediary in respect of insurances, as well as to engage in all transactions, activities and services which may relate or be conducive thereto, all in the widest sense;

- (c) to foster the direct and indirect interests of all involved in the company, in whatever way, and to safeguard the continuity of the company and of the enterprise(s) associated therewith.

History and recent developments

Pursuant to the Legal Merger which became effective on 1 July 2010, the businesses that are now included in the Issuer are a combination of the businesses of ABN AMRO Bank Standalone (which was previously part of the Former ABN AMRO group headed by ABN AMRO Holding N.V.) and the businesses of FB(N).

1. History of ABN AMRO Bank Standalone

Acquisition of Former ABN AMRO group

On 17 October 2007 ABN AMRO Holding N.V. and its subsidiaries were acquired by a consortium of banks through RFS Holdings B.V. The consortium consisted of The Royal Bank of Scotland Group plc (38%), Fortis N.V. and Fortis SA/NV (34%) and Banco Santander SA (28%).

On 3 October 2008 the Dutch State acquired FB(N) (at that time named Fortis Bank Nederland (Holding) N.V.). The acquisition included the interest of FB(N) in RFS Holdings B.V. that represents the acquired businesses of the Former ABN AMRO group.

On 24 December 2008 the stake of FB(N) in RFS Holdings B.V. was transferred to the Dutch State. The ABN AMRO businesses acquired by the Dutch State from the Former ABN AMRO group comprised Dutch commercial clients (SMEs and corporates), Dutch consumer clients, and Dutch and international private clients, including the international diamonds and jewelry business.

Separation of ABN AMRO businesses acquired by the Dutch State from Former ABN AMRO group

The legal separation of assets and liabilities of the Former ABN AMRO group acquired by the Dutch State from the assets and liabilities acquired by the other consortium members was effected in two steps: the Legal Demerger (*juridische splitsing*) and the Legal Separation.

See the diagram included in the pro forma financial information (on page 61 of the Annual Review 2009) incorporated by reference herein detailing the Legal Demerger and Legal Separation process in steps.

The Legal Demerger

On 30 September 2009 the Former ABN AMRO group filed a proposal for the Legal Demerger with the Amsterdam Chamber of Commerce. Following confirmation by the Amsterdam District Court that no creditor objections to the Legal Demerger were filed, the Former ABN AMRO group was able to proceed with the restructuring process of transferring the businesses acquired by the Dutch State into a newly formed entity, ABN AMRO II N.V., which was renamed ABN AMRO Bank N.V. following completion of the Legal Demerger.

On 6 February 2010 the deed of demerger was executed in accordance with the demerger proposal filed with the Amsterdam Chamber of Commerce on 30 September 2009. As a result of the Legal Demerger, the majority of the Dutch State acquired businesses of the Former ABN AMRO group was transferred from Former ABN AMRO Bank N.V. to ABN AMRO Bank Standalone.

Additionally, as part of the overall separation process, some subsidiaries and assets and liabilities forming part of the Dutch State acquired businesses of the Former ABN AMRO group were separately transferred from the Former ABN AMRO Bank N.V. to ABN AMRO Bank Standalone ahead of the execution of the Legal Demerger. Furthermore, certain additional assets and liabilities were separately transferred to ABN AMRO Bank Standalone around the same time or shortly after completion of the Legal Demerger.

Effective at the same date, the Former ABN AMRO Bank N.V. (from which the Dutch State acquired businesses of the Former ABN AMRO group were demerged) was renamed The Royal Bank of Scotland N.V. (RBS N.V.). ABN AMRO Bank Standalone was also renamed, from ABN AMRO II N.V. to ABN AMRO Bank N.V..

Until the Legal Separation both The Royal Bank of Scotland N.V. and ABN AMRO Bank Standalone were wholly-owned by ABN AMRO Holding N.V.

The Legal Separation

On 1 April 2010 the Legal Separation was effected through a transfer of the shares in the share capital of ABN AMRO Standalone by ABN AMRO Holding N.V. to ABN AMRO Group N.V., a new holding company wholly-owned by the Dutch State, established on 18 December 2009 and independent of ABN AMRO Holding N.V.

After the Legal Separation the former parent company of ABN AMRO Bank Standalone, ABN AMRO Holding N.V., was renamed RBS Holdings N.V. and currently forms part of the RBS Group.

After the Legal Separation ABN AMRO Bank Standalone was no longer governed by ABN AMRO Holding N.V.'s managing board and supervisory board and was no longer regulated on a consolidated basis with ABN AMRO Holding N.V. Instead, ABN AMRO Bank Standalone operated as an independent bank with its own

corporate governance and is regulated independently with separate capital adequacy, liquidity measures and exposure, which were reported to and regulated by the Dutch Central Bank (*De Nederlandsche Bank*).

ABN AMRO Bank Standalone went through a period of transition and change as a result of the Legal Demerger and Legal Separation. During this period, ABN AMRO Bank Standalone and RBS N.V. remained interdependent with respect to certain business areas, for which they *inter alia* provided certain services to each other including, for instance, IT related services.

2. History of FB(N)

Separation of FB(N) from the former Fortis group, ASR Nederland and Fortis Corporate Insurance

On 3 October 2008 the Dutch State acquired FB(N) from Fortis Bank SA/NV.

Due to its cross border organisation, the split between the FB(N) and Fortis Bank SA/NV has lead to a number of separation projects, particularly within Global Markets, client & deal administration, website & online banking, securities handling and finance & risk systems. The intentions are that by the end of the third quarter of 2010, both entities will be fully separated. As a result of the separation, the Dutch State granted FB(N) long term debt funding, which as at 30 June 2010 amounts to EUR 7,575,000,000.

On 21 November 2008, the Dutch State communicated that FB(N) insurance business will not be part of the bank in the future. At the time of communication, ASR Nederland and FB(N) were equally dependent on each other for information technology, human resources and facilities related services due to the fact that the former Fortis group had set up a cross-border structure to service its business from a central organisation. A separation plan has been constructed and signing is pending due to finalisation of financial negotiations. All cross services are expected to be terminated by the end of the third quarter of 2010.

On 20 May 2009, a separation agreement with Fortis Corporate Insurance ("FCI") was signed. The scope of the separation from FCI is limited to nine projects and is in progress as of the date of this Base Prospectus. This separation is expected to be completed by the third quarter of 2010. A joint cross-border governance structure between Ageas SA/NV, Ageas N.V. and FB(N) has been set up to execute the separation and address upcoming issues. Furthermore a tailored governance structure has been set up within FB(N) to steer its domestic and international separation activities. A similar structure has been set up for the separation of ASR Nederland.

Simplification of the legal structure of FB(N)

FB(N) simplified its legal structure on 1 September 2009. By way of a legal merger in accordance with the Dutch Civil Code, Fortis Bank (Nederland) N.V. (the "**Disappearing Company**") (a 100% subsidiary of Fortis Bank Nederland (Holding) N.V. under the old legal structure) merged with Fortis Bank Nederland (Holding) N.V. (the "**Acquiring Company**"). As a result, the Acquiring Company acquired all assets and liabilities of the Disappearing Company by universal succession; the Disappearing Company has ceased to exist; and on the effective date of the merger, the Acquiring Company changed its statutory name into Fortis Bank (Nederland) N.V.

3. Integration of ABN AMRO Bank Standalone and FB(N)

On 21 November 2008 the Dutch Minister of Finance announced the intention of the Dutch State to integrate the businesses of the Former ABN AMRO group acquired by the Dutch State with FB(N) into a new bank operating under the name ABN AMRO Bank N.V. The legal integration took place in two steps: the composition of a single group and the Legal Merger.

The integration of ABN AMRO Bank Standalone with FB(N) was subject to approval of the Dutch State, the relevant (inter)national supervisory authorities (including the Dutch Central Bank) and successful completion of the legal merger process.

Composition of a single group

On 1 April 2010, following the Legal Separation, ABN AMRO Bank Standalone and FB(N) became direct subsidiaries of a joint parent company, ABN AMRO Group N.V.

As from 1 April the managing boards and the supervisory boards of ABN AMRO Bank Standalone, FB(N) and ABN AMRO Group N.V. consisted of the same members. In addition, joint senior management for select parts of both ABN AMRO Bank Standalone and FB(N) was appointed, *i.e.* one manager was responsible for managing comparable teams and activities at both banks. However, both ABN AMRO Bank Standalone and FB(N) operated as separate and independent banks until the Legal Merger took effect.

The Legal Merger

On 1 July 2010, ABN AMRO Bank Standalone and FB(N) merged pursuant to a legal merger (*juridische fusie*), following which ABN AMRO Bank Standalone was the surviving entity (*verkrijgende vennootschap*) and FB(N) was the disappearing entity (*verdwijnde vennootschap*). As a result of the Legal Merger ABN AMRO Bank Standalone assumed all of the rights and obligations of FB(N) by operation of law under universal title (*onder algemene titel*). This also meant that all branches and subsidiaries of FB(N) became branches and subsidiaries of the Issuer.

EC Remedy

The integration of ABN AMRO Bank Standalone with FB(N) was subject to completion of the transaction concluded between ABN AMRO Bank Standalone and Deutsche Bank AG in order to satisfy the conditions for integration imposed by the European Commission (the "**EC Remedy**").

On 23 December 2009, ABN AMRO Bank Standalone and Deutsche Bank AG signed the Share Purchase Agreement (SPA) confirming the agreements reached for the sale of NEW HBU II N.V. and IFN Finance B.V. (the "**Divestment Businesses**"). The sale price agreed for NEW HBU II N.V. (which was renamed Deutsche Bank Nederland N.V.) and IFN Finance B.V., and which included a guarantee by ABN AMRO Bank Standalone to provide for 75% of the credit losses associated with these assets (the 'credit umbrella') and an amount for certain other liabilities and costs, was EUR 700 million.

On 1 April 2010 the sale of NEW HBU II N.V. and IFN Finance B.V. to Deutsche Bank AG was completed, however, as a result of the EC Remedy the Issuer has committed itself to continue to provide certain services to Deutsche Bank Nederland N.V.

The Issuer has considered the impact of the EC Remedy on its capital ratios. The Issuer believes that the capital injections of the Dutch State as presented in November 2009 are sufficient to also cover the sale's negative impact on capital.

The audited pro forma financial information of ABN AMRO Bank Standalone for the year ending 31 December 2009 has not been adjusted for the effect of the sale of the Divestment Businesses pursuant to the EC Remedy.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 include the operating results and the transaction result upon sale of the Divestment Business pursuant to the EC Remedy until the moment of completion of the sale.

403 Statement

On 1 April 2010 ABN AMRO Group N.V. issued a statement of joint and several liability within the meaning of Article 403, subsection 1, paragraph f, Book 2 of the Dutch Civil Code (*Burgerlijk Wetboek*), (the "**403 Declaration**"). Pursuant to the 403 Declaration, ABN AMRO Group N.V. is jointly and severally liable with the Issuer for debts resulting from legal acts of the Issuer.

The 403 Declaration is part of the Dutch company law provisions designed to enable subsidiaries of parent companies which publish consolidated annual accounts to obtain an exemption from the requirements to separately publish their own annual accounts. One of the conditions for obtaining such exemption is that a 403

Declaration is issued by the parent company and deposited with the Commercial Register of the Chamber of Commerce in the place where the subsidiary is established. The statutory provisions relating to 403 Declarations are contained in Article 2:403 and following of the Dutch Civil Code.

The 403 Declaration may provide limited economic benefit or recourse to investors. The 403 Declaration constitutes a guarantee by ABN AMRO Group N.V. for Notes issued by the Issuer. If the Issuer should default, creditors impacted by such default, including holders of the Notes, may claim against the Issuer and/or ABN AMRO Group N.V. as the guarantor. The obligation of ABN AMRO Group N.V. under the 403 Declaration is unconditional and is not limited in amount or by the type of Issuer obligation resulting from its legal acts. However, a legal defence available to the Issuer against a creditor of the Issuer would likewise be available to ABN AMRO Group N.V. as well. Furthermore, since ABN AMRO Group N.V. is a holding company with no significant activities of its own, it would have to look at its operating subsidiaries to satisfy a claim brought against it by a holder of a Note or any other creditor of the Issuer on the basis of the 403 Declaration. Finally, ABN AMRO Group N.V. may revoke the 403 Declaration at any time.

Legal and arbitration proceedings

On Thursday, 25 June 2009, the court in Amsterdam delivered judgement in the summary hearing brought by Fortis Capital Company Ltd. ("FCC"), a wholly-owned subsidiary of FB(N), against Fortis Holdings. At this summary hearing it was questioned who should pay the cash settlement of a large portion (valued at EUR 362,511,000.00) of the preference shares issued by FCC in 1999. The court ruled in favour of FCC and ordered the Fortis Holdings to pay EUR 362,511,000 by 29 June 2009 at the latest. The court rejected the Fortis Holdings' counterclaim for compensation, as well as their claim for compensation against FB(N). The Fortis Holdings have initiated court proceedings against FCC and FB(N) claiming compensation for the amount paid on 29 June 2009. These proceedings are pending. FCC and the Issuer continue to hold the opinion that the Fortis Holdings are not entitled to any compensation.

Great Wheel Beteiligungs GmbH & Co. KG (Global VIEW Fund) raised EUR 208 million capital from approximately 10.000 private investors in 2006/2007. The arranger of the fund is DBM Fonds Invest GmbH, which is an indirect subsidiary of the Issuer. Currently all equity raised has been invested in three projects (Beijing, Berlin, Orlando). The investors in this fund have taken a substantial entrepreneurial project development risk which has materialized now and as a consequence they will have to write off most of their investment. The Managing Board of ABN AMRO Bank Standalone decided in March 2010 to make an offering to the investors to sell their participations to an SPV fully owned by the Issuer. The offer expired 23 April 2010, with 90% of the investors accepting the offer. ABN AMRO Bank Standalone has taken a provision of EUR 50 million in the fourth quarter of 2009, and has raised this provision by EUR 45 million to EUR 95 million in the first quarter of 2010 to cover for potential losses as a result hereof. The provision decreased significantly in the second quarter of 2010 due to payments made to investors that have accepted the offer.

In addition, the Issuer is involved in a number of governmental, legal and arbitration proceedings in the ordinary course of its business in a number of jurisdictions. However, on the basis of information currently available, and having taken legal counsel with advisors, the Issuer is of the opinion that it is not, nor has it been, involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the Issuer is aware) during the 12 months preceding the date of this Base Prospectus which may have, or have had in the recent past, significant effects on the consolidated financial position or consolidated profitability of the Issuer and/or its subsidiaries other than as set out above in this section.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010

The figures reported in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 are impacted by several items which are related to the separation of ABN AMRO Bank Standalone from RBS N.V. and FB(N) from the former Fortis Group and the integration of ABN AMRO Bank Standalone and FB(N). As the reported results do not give a good indication of the underlying trends, the 2009 and 2010 figures have been adjusted for these items. In the analysis presented below, the underlying figures are the reported figures excluding these items.

These items are the transaction result on the closing of the EC Remedy, an exceptional result following a settlement on Fortis Capital Company Ltd. ("FCC"), a restructuring provision, and integration and separation costs.

ABN AMRO Group N.V. posted a net loss for the period of EUR 968 million over the first half year of 2010.

The restructuring provision was incurred for the planned reduction in personnel and housing resulting from the integration of ABN AMRO Bank Standalone and FB(N). The restructuring provision is in addition to the separation and integration costs which are recorded as current costs in all segments until completion of the integration in 2012. The total transaction result of the closing of the EC Remedy amounted to a loss of EUR 812 million. The negative result is mainly due to a loss on the book value, a guarantee provided for the potential losses on the assets sold (the Credit Umbrella), the cost of indemnification for cross-liability exposure and separation and migration costs.

The total impact of these items is stated below. Unless otherwise indicated, these items are recorded in the segment 'Other'.

The transaction results upon sale of the divested activities, i.e. the EC Remedy (sale completed on 1 April 2010) and Intertrust (sale completed on 29 December 2009), (together the 'divestments'), and the operating results of these divestments have been included until the moment of completion.

The underlying profit for the period of ABN AMRO Group N.V. improved by 57% to EUR 325 million. The underlying profit for the period rose due to a sharp increase in the profit of Retail & Private Banking, which was partly offset by a decline in the result of C&MB (due to start-up costs and several large additions to the legal provision) and a decline in Other results (due to higher funding costs, credit protection costs and the operating results of the divested activities of the EC Remedy and Intertrust).

Underlying operating income was 5% higher year-on-year, as a 12% increase in net interest income was partly offset by a 7% decrease in non-interest income.

Net interest income increased primarily in Retail & Private Banking due to further growth in the small-sized enterprises loan portfolio and in savings deposits. Margins on savings deposits started to recover as of the end

of 2009 as low-margin fixed-rate deposits matured and were replaced by short-term variable-rate deposits which have a higher margin. Mortgage volumes were relatively stable, despite declining new mortgage production. C&MB benefited from growth of the loan portfolio. Other recorded a decline in net interest income mainly due to divestments and interest costs for EUR 2.6 billion Mandatory Convertible Securities (MCS) issued to the Dutch State over the first three months of 2010.

Underlying non-interest income was lower mainly due to divestments and fees paid for the credit protection bought from the Dutch State on a EUR 34.5 billion portfolio of own originated residential mortgages; both are recorded in Other. Retail & Private Banking and C&MB saw non-interest income rise as a result of higher net fees and commissions on the back of a recovery of capital markets and the acquisition of the US clearing activities.

Underlying operating expenses increased by 11% due to several large additions to the legal provision totalling EUR 265 million. These additions relate to international activities conducted in the past. Excluding these, underlying operating expenses would have remained almost unchanged.

The underlying cost/income ratio went up from 71% to 75% due to the abovementioned additions to the legal provision. Excluding these, costs remained almost unchanged and the underlying cost/income ratio would have improved to 68%.

Loan impairments decreased by 55%. This trend reflects the early improvements seen in the Dutch economy which translated into a lower number of corporate defaults in the Commercial Banking and the Large Corporates portfolios. In addition, there were no specific provisions in the Private Banking portfolio. Loan impairments were also lower due to divestments.

The underlying tax rate of 42% was high due to the non-tax deductibility of additions to the legal provision and funding costs of several Tier 1 capital instruments.

Total assets rose by EUR 18.2 billion to EUR 404.8 billion at 30 June 2010 despite the divestment of the EC Remedy. Adjusted for the EC Remedy, total assets increased by EUR 29.8 billion.

Cash and cash equivalents at central banks increased by EUR 18.1 billion. This is due mainly to the liquidity buffer.

Financial assets held for trading increased by EUR 1.7 billion as a result of the Markets activities of C&MB, partly offset by the divestment of the EC Remedy.

Financial investments decreased by EUR 1.2 billion due mainly to the sale of government bonds for asset and liability management purposes.

Loans and receivables banks declined by EUR 2.6 billion. This net decrease is due mainly to a settlement of EUR 16.4 billion with RBS N.V. following the legal separation, an increase of EUR 7.7 billion in C&MB activities, an increase of EUR 2.1 billion in mandatory reserve deposits with central banks and an increase of EUR 4.4 billion in interest bearing deposits.

Loans and receivables customers remained unchanged. Adjusted for the divestment of the EC Remedy activities, Loans and receivables customers grew by EUR 10.5 billion, mainly as a result of an increase in the commercial loan portfolio. The majority of Loans and Receivables customers are Dutch residential mortgages, amounting to EUR 161.4 billion at the end of June 2010.

Other increased by EUR 2.3 billion, due predominantly to an increase in derivatives used for hedging purposes.

Total liabilities increased by EUR 15.8 billion. Adjusted for the EC Remedy, total liabilities increased by EUR 26.6 billion.

Financial liabilities held for trading increased by EUR 0.4 billion.

Due to banks rose by EUR 3.6 billion. Excluding the EC Remedy, Due to banks increased by EUR 5.3 billion mainly as a result of an increase in total deposits of EUR 10.0 billion, offset by a decrease in repurchase agreements and security lending transactions of EUR 5.4 billion.

Due to customers increased by EUR 6.6 billion. Excluding the EC Remedy, Due to customers increased by EUR 14.8 billion mainly due to an increase in total deposits of EUR 6.7 billion and repurchase agreements of EUR 8.0 billion.

Issued debt shows a net increase of EUR 8.6 billion. This increase relates to financing initiatives in short and long-term maturities and prudent liquidity management.

Subordinated liabilities decreased by EUR 2.6 billion, as a result of the conversions of EUR 2.6 billion of MCS issued to the Dutch State into Equity. These conversions were part of the capital actions of the Dutch State announced in November 2009.

Other decreased by EUR 0.8 billion.

Equity increased by EUR 2.4 billion to EUR 11.4 billion. This was primarily the result of the conversion of EUR 2.6 billion of MCS into Equity, the remaining capital injection by the Dutch State (part of the 2009 capital actions by the Dutch State) and the interim result over the first half of 2010 of EUR 1.0 billion negative.

Capital and Solvency

FB(N) reported its regulatory capital under Basel II Advanced-IRB. Until Legal Separation on 1 April 2010, ABN AMRO Bank Standalone reported its regulatory capital under Basel I. As of 1 April 2010, ABN AMRO

Bank Standalone also reports under Basel II Advanced-IRB. Consolidated capital ratios are not available for the combined bank for the period before 1 April 2010.

The capital requirements of the two banks were reported to the Dutch Central Bank on a separate basis at the end of June 2010. The application of Basel II policies, methodologies and models in order to calculate the regulatory capital and risk-weighted assets for the merged bank is currently in the process of harmonisation. Until completion of the harmonisation, the reported Basel II capital ratios will be combined pro forma capital ratios based on consolidated IFRS equity.

On 30 June 2010, the combined pro forma Tier 1 capital under Basel II amounted to EUR 14.8 billion and the combined pro forma total capital amounted to EUR 20.4 billion. Combined pro forma risk-weighted assets under Basel II were EUR 120.1 billion, leading to a combined pro forma combined Tier 1 ratio of 12.3% and a pro forma combined total capital ratio of 17.0%.

European Commission State Aid investigation

On 8 April 2009, the European Commission notified the Dutch State to initiate a procedure concerning potential state aid in connection with (i) the acquisition of FB(N) by the Dutch State on 3 October 2008 and (ii) the transfer of the 33.8% stake in RFS Holdings by FB(N) to the Dutch State on 24 December 2008.

On 8 February 2010, the European Commission preliminary approved the recapitalisations executed by the Dutch State until 31 July 2010. The European Commission also incorporated this capital rebalancing in the inquiry into state support measures it started in April 2009. Until this inquiry is completed, the European Commission ensures to prevent to use the measures for an aggressive pricing in retail deposits and retail mortgages or takeover policy.

On 30 July 2010, the European Commission announced it 'prolonged the temporary authorisation of the state support. The temporary approval is prolonged until the Commission will have completed its investigations and adopted a final decision on the compatibility of the notified and non-notified measures in favour of these companies with EU state aid rules'.

Operational Separation and Integration

FB(N)

At the end of June 2010, most of the services and separation projects of FB(N) with the former Fortis group were completed. Based on service level monitoring, the quality of the services provided was not negatively impacted by the separation. The separation agreement of FB(N) with ASR Nederland was signed on 18 June 2010. On 30 June 2010, most of the projects were completed. In the third quarter the focus will be on finalising all projects and services outstanding. The separation of FB(N) from Amlin Corporate Insurance is on track: most of all projects have been completed.

ABN AMRO Standalone

Prior to the Legal Separation the vast majority of the operational separation was effectuated between ABN AMRO Standalone and RBS N.V. For a number of remaining operational dependencies Service Level Agreements (SLA's) were engaged into by both banks. Furthermore, both banks agreed on a ramp down scenario for all SLA's. The execution of this ramp down is on schedule.

Integration

On 1 July 2010, the effective day of the Legal Merger, a major rebranding exercise took place where the Fortis Bank Nederland name was rebranded to ABN AMRO. Unlike the other businesses, Retail Banking will continue to use the Fortis Bank Nederland trade name for now, until the systems have been integrated. MeesPierson will operate under the name ABN AMRO MeesPierson. From 1 October 2010, the Fortis Bank

brand will no longer be used in The Netherlands, as the brand belongs to BNP Paribas Fortis.

On 6 July 2010, ABN AMRO Bank merged the last of the 150 branches of the retail network in The Netherlands. This concluded a period of three months in which the Issuer merged and closed down 150 of the 650 branches that originated after the merger. To secure a smooth transition for FB(N) customers, branches will remain twinned temporarily until the technical migration is complete. In this manner, FB(N) customers will have access to their trusted bank employees during the migration process. The technical migration of the 1.6 million FB(N) retail customers is scheduled to be finalised by year-end 2010, after which Private Banking and SME customers will follow. As a result of the integration, the Issuer plans to close thirty ABN AMRO Bank Standalone and former FB(N) head and regional offices between 2010 and 2013.

Changes in prospects or financial position

There has been no material adverse change in the Issuer's prospects since 31 December 2009. There have been no significant changes in the financial position of the Issuer and its subsidiaries since 30 June 2010.

Capital Measures

In June 2009 and July 2009, two capital actions were executed by the Dutch State acquired businesses of the Former ABN AMRO group: a EUR 800 million Mandatory Convertible Tier-1 Security with a coupon of 10% was issued to the Dutch State and a Credit Default Swap, also known as a capital relief instrument, was executed with the Dutch State through which ABN AMRO Bank Standalone purchased credit protection on a specific portfolio of self originated high-quality Dutch residential mortgages amounting to EUR 34.5 billion.

In December 2009, two additional capital actions were executed with the Dutch State: the issue of two further Mandatory Convertible Securities totalling EUR 1.8 billion. On 1 April 2010, all three Mandatory Convertible Securities amounting in the aggregate to EUR 2.6 billion automatically converted into equity upon Legal Separation.

Furthermore, FB(N) executed a debt to equity swap amounting to EUR 1.35 billion with the Dutch State in December 2009. The swap comprised of two subordinated loans maturing in 2017 that were converted into equity.

Finally, ABN AMRO Group N.V. received a contribution on its shares held by the Dutch State in cash in the amount of EUR 490 million as a non-stipulated share premium (*niet-bedongen agio*) contribution without the issue of shares. With this capital contribution the capitalisation of the Issuer, as laid down in the letter to parliament of 19 November 2009, was completed.

CEBS stress test

On Friday 23 July 2010, the Issuer published a press release: 'ABN AMRO Bank successfully passes European stress test', confirming that the Issuer had successfully passed the European stress test to which it was subject in the context of the 2010 EU-wide stress testing exercise conducted under the mandate from the EU Council of Ministers of Finance (ECOFIN) and coordinated by Committee of European Banking Supervisors ("**CEBS**") in cooperation with the European Central Bank ("**ECB**"), national supervisory authorities and the European Commission.

The objective of the stress test exercise was to assess the overall resilience of the EU banking sector and the banks' ability to absorb further possible shocks on credit and market risks, including sovereign risks.

In its press release, the Issuer acknowledged the outcome of the EU-wide stress test for the Issuer and confirmed that the estimated stressed Tier 1 capital ratio of 10.3% in 2011 comfortably exceeded the minimum Tier 1 capital ratio of 6% as set by the CEBS under the scenario developed for the purpose of this EU-wide exercise. An additional sovereign risk scenario would have a further impact of 40 basis points on the estimated

Tier 1 capital ratio, bringing it to 9.9% at the end of 2011.

The results of the stress test suggested a buffer of EUR 5,531 million of Tier 1 capital against the threshold of 6% of Tier 1 capital adequacy ratio for the Issuer agreed exclusively for the purposes of this exercise. This threshold should by no means be interpreted as a regulatory minimum (the regulatory minimum Bank for International Settlements ("**BIS**") ratio for the Tier 1 capital is set at 4%), nor as a capital target reflecting the risk profile of the Issuer determined as a result of the supervisory review process in pillar 2 of the EU Capital Requirements Directive.

The aggregated RWA and capital figures used for the stress test are based on the aggregation of the RWA and capital components of ABN AMRO Bank Standalone and FB(N) and therefore do not reflect the impact of the harmonisation of the determination of the RWA and capital components.

The results of the stress test were extensively discussed with and endorsed by the Dutch Central Bank. Given that the stress test was carried out under a number of key common simplifying assumptions (e.g. constant balance sheet) and the information on the benchmark scenario is provided only for comparison purposes, the results of the stress test should in no way be construed as a forecast.

In the interpretation of the outcome of the exercise, it is imperative to differentiate between the results obtained under the different scenarios developed for the purposes of the EU-wide exercise. The results of the adverse scenario should not be considered as representative of the current situation or possible present capital needs. A stress testing exercise does not provide forecasts of expected outcomes since the adverse scenarios are designed as 'what-if' scenarios including plausible but extreme assumptions, which are therefore not likely to materialise. Different stresses may produce different outcomes depending on the circumstances of each institution.

European Commission decision on call option to early redeem a subordinated note (FCC)

On 16 August 2010, it was announced that the European Commission had as a matter of exception approved the call of the remaining EUR 87,489,000 6.25 per cent. Non-cumulative non-voting perpetual class A Series 1 preference shares issued by FCC (the "**FCC Securities**"). Due to the existence of a dividend pusher clause in the documentation of the FCC Securities linked to dividend payments made by Ageas N.V. and Ageas SA/NV, entities outside the control of the Issuer, the Dutch Central Bank (*De Nederlandsche Bank N.V.*) had taken the view that from a regulatory perspective the FCC Securities should be reclassified from Tier 1 capital to Tier 2 capital as of 1 July 2010. In order to prevent the FCC Securities from being reclassified to Tier 2, the Issuer decided to call for redemption of all outstanding FCC Securities on the next dividend payment date of 29 September 2010.

As the Issuer is a bank subject to state aid investigation, the Issuer and its subsidiaries are required to consult the European Commission in order to redeem capital instruments prior to legal maturity or to pay coupons. The European Commission had as a matter of exception determined that the request for early redemption of the FCC Securities could be reconciled with state aid rules, as it prevents the loss of Tier 1 capital.

The European Commission also stated that existing hybrid Tier 1 and Tier 2 instruments issued by ABN AMRO Group N.V. and its wholly owned subsidiaries are subject to a ban on payments of coupons, as well as a call restriction, unless there is a legal obligation to make such payments or exercise such call option, similar to other financial institutions involved in state aid proceedings. This ban is for a limited period up to and including 13 March 2013.

Government and government-guaranteed debt exposures

The Issuer has debt exposures to European governments and government-related entities. These exposures include debt issued by central governments and local governments and debt which is guaranteed by a central government. The exposures reported are part of the loan, trading and investment books. The table below details the major government and government-guaranteed debt exposures of ABN AMRO Group N.V. and/or its subsidiaries as at 30 June 2010:

Presentation of financial information

Financial statements of ABN AMRO Bank Standalone

The businesses of the Former ABN AMRO group acquired by the Dutch State were transferred (in majority) from the Former ABN AMRO Bank N.V. (now named RBS N.V.) to ABN AMRO Bank Standalone on 6 February 2010 and the EC Remedy transaction was completed on 1 April 2010. Consequently, ABN AMRO Bank Standalone's audited annual financial statements for the financial year started 9 April 2009 and ended 31 December 2009 do not reflect the assets and liabilities and the financial results of the Dutch State acquired businesses nor the EC Remedy transaction.

To allow debt investors to assess the impact of the legal separation from the Former ABN AMRO group, ABN AMRO Bank Standalone, apart from its audited annual financial statements for the financial year started 9 April 2009 and ended 31 December 2009 and its unaudited semi-annual financial statements 2010, also prepared and incorporated by reference, for illustrative purposes only, pro forma financial information for the financial year ending 31 December 2009 reflecting the businesses of the Former ABN AMRO group that were acquired by the Dutch State and that were substantially transferred to ABN AMRO Bank Standalone in the Legal Demerger. The pro forma financial information was prepared on the basis as if the Dutch State acquired businesses of the Former ABN AMRO group had already been transferred to ABN AMRO Bank Standalone or its consolidated subsidiaries as from 1 January 2009 and contains pro forma financial information on the financial years ending 31 December 2009 and 31 December 2008. The 2009 figures included in the pro forma financial information have been audited. The unaudited comparative figures 2008 have been derived from the audited ABN AMRO Holding N.V. Financial Statements 2008 and are consistent with the accounting policies as applied in ABN AMRO Holding N.V. Financial Statements 2008. Because of its nature, the audited pro forma financial information incorporated by reference herein addresses a hypothetical situation and therefore does not represent the actual financial position per 31 December 2009 or ABN AMRO Bank Standalone's income over 2009.

The pro forma consolidated financial information includes the assets and liabilities that have been sold to Deutsche Bank AG as part of the EC Remedy transaction that took place after the Legal Separation on 1 April 2010 and does not take into account the impact of this transaction on the results of ABN AMRO Bank Standalone. The impact on the results for ABN AMRO Bank Standalone have been accounted for in the second quarter of 2010.

The pro forma financial information excludes the assets and liabilities that have not yet been settled between the consortium shareholders, the so-called "**Shared Assets**", in which each of the consortium shareholders has a joint and indirect interest. The net value of the assets and liabilities constituting the Shared Assets are currently expected to remain for an interim period in RBS Holdings N.V.

The pro forma financial information and the annual financial statements for the financial year started 9 April 2009 and ended 31 December 2009 together comprise the Annual Review 2009 and are incorporated by reference herein.

Unless otherwise indicated therein, the financial information contained in the Annual Review 2009 has been prepared in accordance with International Financial Reporting Standards ("**IFRS**") as adopted by the European Union and IFRS as issued by the International Accounting Standards Board ("**IASB**").

The pro forma financial information has been prepared in conformity with Annex II of Commission Regulation (EC) 809/2004 of 29 April 2004 (as amended) (the "**Prospectus Regulation**"). ABN AMRO Bank Standalone's auditors have issued a report stating that in their opinion (a) the pro forma financial information has been properly compiled on the basis stated and (b) that basis is consistent with the accounting policies of ABN AMRO Bank Standalone.

Financial statements of FB(N)

In order to provide historical financial information about the business that has become part of the Issuer upon the Legal Merger taking effect, the Issuer has incorporated herein by reference the audited consolidated annual financial statements of FB(N) for the financial years ending 31 December 2009 and 31 December 2008 and the unaudited semi-annual financial statements 2010.

Semi-annual financial statements 2010 of ABN AMRO Group N.V.

The condensed interim financial statements are the first consolidated interim financial statements prepared by ABN AMRO Group N.V. consolidating the businesses of ABN AMRO Bank Standalone and FB(N) for the six-month period ended 30 June 2010.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the audited financial statements as part of the ABN AMRO Bank N.V. Annual Review as at 31 December 2009 and as part of the FB(N) Annual Report as at 31 December 2009.

The legal and economic creation of the new ABN AMRO group headed by ABN AMRO Group N.V. took place in various different phases over the past period, ultimately resulting in the Legal Merger between ABN AMRO Bank Standalone and FB(N) as a subsidiary of ABN AMRO Group N.V. at 1 July 2010. The different steps leading to the creation of the new ABN AMRO Group have been accounted for in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010.

The combination of ABN AMRO Group N.V. and ABN AMRO Bank Standalone can be regarded as a continuation of the financial history of the Dutch State-acquired businesses of the Former ABN AMRO group, because ABN AMRO Group N.V. did not constitute a business as of the date ABN AMRO Bank Standalone was acquired. As a result, the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 include the results of ABN AMRO Bank Standalone for the full six-month period ended 30 June 2010, as if the combination of ABN AMRO Group N.V. and ABN AMRO Bank Standalone has existed in its current form since 1 January 2010. Comparative information has been included for 2009 in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010.

The subsequent acquisition by ABN AMRO Group N.V. of FB(N) qualifies as a transaction under common control and has therefore been accounted for without application of IFRS 3 Business Combinations. As a result, the assets, liabilities and contingent liabilities of ABN AMRO Bank Standalone and FB(N) have been

recognised by ABN AMRO Group N.V. at their existing book values at the moment of acquisition and no goodwill has been recognised by ABN AMRO Group N.V. Therefore, the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 include the financial results of FB(N) for the full six months ended 30 June 2010, as if the two banks have been together since 1 January 2010. Comparative information has been included for 2009 in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010.

A common set of accounting policies and principles has been defined for the new ABN AMRO group headed by ABN AMRO Group N.V. To that end, the accounting policies and principles of ABN AMRO Bank Standalone and FB(N) have been harmonised. Any adjustment as a result of a change in accounting policies for one of the two banks has been adjusted in the opening equity as at 1 January 2009. The net impact of the harmonisation has remained insignificant to the opening equity as at 1 January 2009 and the income statement. More details of the effect of the accounting policy harmonisation are provided in the section 'Accounting policy harmonisation' in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010.

To align with the classification of line items as defined for the new ABN AMRO group headed by ABN AMRO Group N.V., certain line items of ABN AMRO Bank Standalone and FB(N) have been reclassified.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 are prepared on a mixed model valuation basis as follows:

- fair value is used for: derivative financial instruments, financial assets and liabilities held for trading or designated as measured at fair value through income, and available-for-sale financial assets;
- other financial assets (including 'loans and receivables') and liabilities are valued at amortised cost less any impairment if applicable;
- the carrying value of assets and liabilities measured at amortised cost included in a fair value hedge relationship is adjusted with respect to fair value changes resulting from the hedged risk;
- non-financial assets and liabilities are generally stated at historical cost.

The financial information contained in the ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 has been prepared in accordance with IFRS as adopted by the European Union.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 discloses more details than strictly needed by IFRS to be able to present the consolidated figures of ABN AMRO Group N.V. for the first time. Future interim financial reports may not be as extensive.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 include the operating results and the transaction result upon sale of the Divestment Business pursuant to the EC Remedy until the moment of completion of the sale. In these financial statements the activities disposed of under the EC Remedy have not been classified as discontinued operations.

The ABN AMRO Group N.V. reviewed condensed consolidated semi-annual financial statements 2010 exclude the Shared Assets, in which each of the consortium shareholders has a joint and indirect interest. The net value of the assets and liabilities constituting the Shared Assets are currently expected to remain for an interim period in RBS Holdings N.V.

The sale of Intertrust was completed at the end of 2009 and therefore the results of Intertrust are included in the 2009 results and balance sheet. Prime Fund Solutions is included in the financials up to the pending completion of the announced sale.

General

Investors will need to make their own investigations and financial calculations on the basis of the financial information incorporated by reference herein in order to make an informed assessment of the future assets and

liabilities, financial position, profit and losses and prospects of the Issuer.

In reading the Standalone Financial Information 2009/2008, investors should note that differences exist in the application of certain accounting policies, estimates and classification of certain line items in respect of ABN AMRO Bank Standalone and FB(N). Also, investors should note that the Standalone Financial Information 2009/2008 does not take into account the effect of one-off costs of realising any synergies that may result from integration activities.

Furthermore, investors should note that a combined reading of the Standalone Financial Information:

- does not take into account certain items which have been eliminated on the consolidation of ABN AMRO Bank Standalone's and FB(N)'s reported results of operations and financial position following the Legal Merger;
- does not provide an indication of what the Issuer's results of operations or financial position would have been had the Legal Merger occurred as at 1 January 2009;
- does not represent the results of operation or financial position of the Issuer for any future date or period; and
- do not take into account the effect of any synergies that may result from integration activities.

Therefore, a full impact analysis of the financial position and results of the Issuer following the Legal Merger is not possible on the basis of a combined reading of the Standalone Financial Information.

The following paragraph, which is intended as a general guide only, is based on current law and practice in The Netherlands. For a short period prior to the Issue Date specified in the applicable Final Terms, the Securities of the relevant Series may be offered by the Issuer, or a dealer who has first purchased such Securities from the Issuer, for subscription to prospective investors but the Issuer reserves the right to close subscription early. The Issuer anticipates that it will deliver the Final Terms in respect of each Series of the Securities which are either (i) to be admitted to trading and listed on Euronext Amsterdam or (ii) offered to the public in The Netherlands in circumstances which require the publication of a prospectus to Euronext Amsterdam prior to the Issue Date specified in the Final Terms. On or about the Issue Date the Issuer, or a dealer who has first purchased such Securities from the Issuer, will, pursuant to its agreement with Euronext Amsterdam, offer to buy or sell the Securities of any Series to be admitted to trading and listed on Euronext Amsterdam. The Issuer expects that each such Series of the Securities will be admitted to trading on Euronext Amsterdam with effect from the Issue Date stated in the applicable Final Terms. Except in the case of dematerialised Securities, the Securities will be in global form and all trades will be settled in the applicable clearing systems on their usual basis for secondary market transactions.

manner in which payment should be made to the Selling Agent. Each Selling Agent may impose different arrangements relating to the purchase of Securities and prospective investors should contact the Selling Agents directly for information concerning such arrangements. (l) Description of the Securities

Turbo certificates are investment instruments without a fixed maturity or expiration date, which can either be terminated by the Issuer, exercised by the Holder, and may automatically terminate if the Underlying (as defined above) reaches a pre-determined level. Following any such event, the Turbo certificates pay an amount determined by reference to the value of the underlying currency, commodity, index (including in the case of an index, the index and its constituent elements), stock, bond, basket or other product on one or more specified days, subject to the certificate entitlement. The types of certificates that may be issued under this Base Prospectus are described below.

Turbo certificates track in a linear manner the Underlying. The amount needed to invest in a Turbo certificate to give the same participation rate in the Underlying as a direct investment in the Underlying is considerably less. Therefore the percentage gain if the Underlying rises (in the case of Turbo long certificates) or falls (in the case of Turbo short certificates) and the percentage loss if the Underlying falls or rises, respectively is much higher in Turbo certificates than as a direct investment in the Underlying.

Turbo long certificates enable the investor to profit from rising markets. Turbo long certificates track the Underlying. If the value of the Underlying rises, the value of the Turbo long certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate. The difference between a Turbo long certificate and an ordinary certificate is that in the case of the Turbo long

certificate, the amount needed to invest to give the same participation rate in the Underlying is usually considerably less.

Turbo short certificates enable the investor to profit from declining markets. Turbo short certificates track the Underlying in an inverse manner. If the value of the Underlying drops, the value of the Turbo short certificate will rise by an equivalent amount, taking into account any applicable foreign exchange rate. The difference between a Turbo short certificate and an ordinary certificate is that in the case of the Turbo short certificate, the amount needed to invest to give the same inverse participation rate in the Underlying is usually considerably less.

The maximum loss to an investor in Turbo certificates is the initial amount invested. A feature of Turbo certificates is the Stop loss which, if breached, will result in the early termination of the Turbo certificate.

Commodity certificates are certificates where the Underlying is a commodity. A wide range of commodities may become the Underlying in relation to a commodity Turbo certificate.

Currency certificates give their Holder exposure to interest rate differences between two currencies. A range of currencies may become the Underlying in relation to a currency Turbo certificate.

Single stock certificates are certificates where the Underlying is a share.

Index certificates are certificates where the Underlying is an index. A range of indices may become the Underlying in relation to an index Turbo certificate.

Government bond certificates are certificates where the Underlying is a futures contract related to a Government bond. A range of Government bond futures contracts may become the Underlying in relation to a Government bond Turbo certificate.

Commodity forward and future certificates are certificates where the Underlying is a forward or future contract related to a commodity. A range of commodity forward and futures contracts may become the Underlying in relation to a commodity forward or future Turbo certificate.

Fund certificates are certificates where the Underlying is a fund. A range of funds may become the Underlying in relation to a fund Turbo certificate.

Rolling Turbo certificates observe certain elements to determine whether adjustments need to be made to any of the terms and conditions of the certificates to maintain the leverage within certain limits, these elements include but are not limited to the current leverage factor, the level of the Underlying and the value of the certificates. In addition to such adjustments, the Holder could be entitled to an interim payment.

Index future certificates are certificates where the Underlying is a future contract related to an index. A range of index future contracts may become the Underlying in relation to an index future Turbo certificate.

CONDITIONS: GENERAL CONDITIONS

The General Conditions which follow relate to the Securities and must be read in conjunction with, and are subject to, the Product Conditions and the Final Terms. The Final Terms, the Product Conditions and the General Conditions together constitute the Conditions of the Securities and will be printed on any Definitive Securities and attached to any Global Security representing the Securities.

1. DEFINITIONS

Terms in capitals which are not defined in these General Conditions shall have the meanings ascribed to them in the Product Conditions or the applicable Final Terms. References in these General Conditions to interest and Coupons (and related expressions) shall be ignored in the case of Securities which do not bear interest. References in these General Conditions to the Conditions shall mean these General Conditions and, in relation to any Securities, the Product Conditions applicable to those Securities.

2. STATUS

The Securities constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* among themselves and with all other present and future unsecured and unsubordinated obligations of the Issuer save for those preferred by mandatory provisions of law.

3. TERMINATION

The Issuer shall have the right to terminate the Securities if it shall have determined in its absolute discretion that its performance thereunder shall have become unlawful in whole or in part as a result of compliance in good faith by the Issuer with any applicable present or future law, rule, regulation, judgement, order or directive of any governmental, administrative, legislative or judicial authority or power (“**Applicable Law**”). In such circumstances the Issuer will, however, if and to the extent permitted by the Applicable Law, pay to each Holder in respect of each Security held by such Holder an amount calculated by the Calculation Agent as the fair market value of the Security immediately prior to such termination (ignoring such illegality) less the cost to the Issuer of unwinding any related hedging arrangements. Payment will be made to the Holder in such manner as shall be notified to the Holder in accordance with General Condition 4.

4. NOTICES

- (a) **Validity.** Unless otherwise specified in the applicable Final Terms, announcements to Holders will be valid if delivered by the Issuer to the Clearing Agent(s) with an instruction from the Issuer to the Clearing Agent(s) to communicate such announcement to the Holders.
- (b) **Delivery.** Unless otherwise specified in the relevant Product Conditions, any such announcement issued pursuant to General Condition 4(a) shall be deemed to be effective on the day following its delivery to the Clearing Agent (and if delivered to more than one Clearing Agent on the day following the date first delivered to a Clearing Agent) or, if published as specified in the applicable Final Terms, on the date of such publication (and if published in more than one country then on the date first published).

5. HEDGING DISRUPTION

- (a) Notification. The Issuer shall as soon as reasonably practicable notify the Holders in accordance with General Condition 4(a): (i) if the Issuer, or the Calculation Agent on its behalf, determines that a Hedging Disruption Event has occurred; and (ii) of the consequence of such Hedging Disruption Event as determined by the Issuer or the Calculation Agent pursuant to General Condition 5(c).
- (b) Hedging Disruption Event. A “**Hedging Disruption Event**” shall occur if the Issuer, or the Calculation Agent on its behalf, determines that it is or has become not reasonably practicable or it has otherwise become undesirable, for any reason, for the Issuer wholly or partially to establish, re-establish, substitute or maintain a relevant hedging transaction (a “**Relevant Hedging Transaction**”) which it deems necessary or desirable in order to hedge the Issuer's obligations in respect of the Securities. The reasons for such determination by the Issuer, or the Calculation Agent on its behalf, may include, but are not limited to, the following:
 - (i) any material illiquidity in the market for the relevant instruments (the “**Disrupted Instrument**”) which from time to time are included in the reference asset to which the Securities relate; or
 - (ii) a change in Applicable Law (including, without limitation, any tax law) or the promulgation of, or change in, the interpretation of any court, tribunal or regulatory authority with competent jurisdiction of any applicable law (including any action taken by a taxing authority); or
 - (iii) a material decline in the creditworthiness of a party with whom the Issuer has entered into any such Relevant Hedging Transaction; or
 - (iv) the general unavailability of: (A) market participants who will agree to enter into a Relevant Hedging Transaction; or (B) market participants who will so enter into a Relevant Hedging Transaction on commercially reasonable terms.
- (c) Consequences. The Issuer, in the event of a Hedging Disruption Event, may, in its sole discretion, determine to or instruct the Calculation Agent to determine to:
 - (i) terminate the Securities. In such circumstances the Issuer will, however, if and to the extent permitted by the Applicable Law, pay to each Holder in respect of each Security held by such Holder an amount calculated by the Calculation Agent as the fair market value of the Security immediately prior to the occurrence of such Hedging Disruption Event less the costs (direct or indirect) to the Issuer of unwinding any related hedging arrangements. Where the Securities contain provisions which provide a minimum assured return of principal, howsoever expressed, on the Settlement Date or Maturity Date as applicable, or a minimum assured return of interest or coupons, howsoever expressed, on a relevant Interest Payment Date (if applicable), any such amount to be paid under this General Condition shall not be less than the present value of such minimum assured return of principal and/or interest or coupons, such present value being determined by the Calculation Agent. Payment will be made to the Holder in such manner as shall be notified to the Holder in accordance with General Condition 4;
 - (ii) make an adjustment in good faith to the relevant reference asset by removing the Disrupted Instrument at its fair market value (which may be zero). Upon any such removal the Issuer may: (A) hold any notional proceeds (if any) arising as a

consequence thereof and adjust the terms of payment and/or delivery in respect of the Securities; or (B) notionally reinvest such proceeds in other reference asset(s) if so permitted under the Conditions (including the reference asset(s) to which the Securities relate);

- (iii) make any other adjustment to the Conditions as it considers appropriate in order to maintain the theoretical value of the Securities after adjusting for the relevant Hedging Disruption Event. Where the Securities contain provisions which provide a minimum assured return of principal, howsoever expressed, on the Settlement Date or Maturity Date as applicable, or a minimum assured return of interest or coupons, howsoever expressed, on a relevant Interest Payment Date, any such adjustment will in no way affect the Issuer's obligations to make payment to the Holders not less than the minimum assured return of principal and/or interest or coupons on the relevant Settlement Date or Maturity Date, or Interest Payment Date, as applicable.

6. PURCHASES, FURTHER ISSUES BY THE ISSUER AND PRESCRIPTION

- (a) Purchases. The Issuer or any Affiliate may purchase Securities at any price in the open market or by tender or private treaty. Any Securities so purchased may be held, surrendered for cancellation or reissued or resold, and Securities so reissued or resold shall for all purposes be deemed to form part of the original Series of Securities.

In this General Condition 6(a) “**Affiliate**” means any entity controlled directly or indirectly, by the Issuer, any entity that controls, directly or indirectly, the Issuer, or any entity under common control with the Issuer. As used herein “**control**” means the ownership of a majority of the voting power of the entity and “**controlled by**” and “**controls**” shall be construed accordingly.

- (b) Further Issues. The Issuer shall be at liberty from time to time without the consent of the Holders or any of them to create and issue further securities so as to be consolidated with and form a single Series with the Securities.
- (c) Prescription. Any Security or Coupon which is capable of presentation and is not so presented by its due date for presentation shall be void, and its value reduced to zero, if not so presented within five years of such due date. For the avoidance of doubt, any Securities which are subject to provisions relating to their exercise shall be void, and their value shall be zero, if not exercised in accordance with their provisions.

7. DETERMINATIONS AND MODIFICATIONS

- (a) Determinations. Any determination made by or on behalf of the Issuer shall (save in the case of manifest error) be final, conclusive and binding on the Holders.
- (b) Modifications. The Issuer may, without the consent of the Holders or any of them, modify any provision of the Conditions which is: (i) of a formal, minor or technical nature; (ii) made to correct a manifest error; or (iii) in its absolute discretion, not materially prejudicial to the interests of the Holders. Notice of any such modification will be given to the Holders in accordance with General Condition 4 but failure to give, or non-receipt of, such notice will not affect the validity of any such modification.

8. SUBSTITUTION

- (a) Substitution of Issuer. The Issuer may at any time, without the consent of the Holders substitute for itself as principal obligor under the Securities any company (the “**Substitute**”),

being any subsidiary, affiliate or legal successor(s) of the Issuer, subject to: (i) the obligation of the Substitute under the Securities being guaranteed by ABN AMRO Group N.V. (unless ABN AMRO Group N.V. is the Substitute); (ii) all actions, conditions and things required to be taken, fulfilled and done (including the obtaining of any necessary consents) to ensure that the Securities represent legal, valid and binding obligations of the Substitute having been taken, fulfilled and done and being in full force and effect; and (iii) the Issuer having given at least 30 days' prior notice of the date of such substitution to the Holders in accordance with General Condition 4. In the event of any substitution of the Issuer, any reference in the Conditions to the Issuer shall from such time be construed as a reference to the Substitute.

- (b) Substitution of Office. The Issuer shall have the right upon notice to the Holders in accordance with General Condition 4 to change the office through which it is acting and shall specify the date of such change in such notice.

9. TAXATION

The Issuer shall not be liable for or otherwise obliged to pay any tax, duty, withholding or other similar payment which may arise as a result of the ownership, transfer or exercise of any Securities. In relation to each Security the relevant Holder shall pay all Expenses as provided in the Product Conditions. All payments or, as the case may be, deliveries in respect of the Securities will be subject in all cases to all applicable fiscal and other laws and regulations (including, where applicable, laws requiring the deduction or withholding for, or on account of, any tax duty or other charge whatsoever). The Holder shall be liable for and/or pay any tax, duty or charge in connection with the ownership of and/or any transfer, payment or delivery in respect of the Securities held by such Holder. The Issuer shall have the right, but shall not be obliged, to withhold or deduct from any amount payable such amount, as shall be necessary to account for or to pay any such tax, duty, charge, withholding or other payment.

10. REPLACEMENT OF SECURITIES AND COUPONS

If any Security or Coupon is lost, stolen, mutilated, defaced or destroyed it may be replaced at the specified office of the Principal Agent (or such other place of which notice shall have been given to Holders in accordance with General Condition 4) upon payment by the claimant of the expenses incurred in connection therewith and on such terms as to evidence and indemnity as the Issuer may reasonably require. Mutilated or defaced Securities and Coupons must be surrendered before replacements will be issued. This General Condition will not apply to Securities issued in dematerialised form.

4. ADJUSTMENTS

- (a) **Market Disruption.** The Issuer shall as soon as reasonably practicable under the circumstances notify the Holders in accordance with General Condition 4 if the Calculation Agent determines that a Market Disruption Event has occurred.

“**Market Disruption Event**” means:

- (i) the occurrence or existence on any Trading Day during the one hour period that ends at the official close of trading on the Exchange or any Related Exchange of any suspension of or limitation imposed on trading or the disruption or impairment in the ability of market participants in general to effect transactions in (by reason of movements in price reaching or exceeding limits permitted by the relevant exchange or otherwise): (A) the Shares on the Exchange or any other exchange on which the Shares are listed; or (B) any options contracts or futures contracts or other derivatives contracts relating to the Share on any Related Exchange, if, in the determination of the Calculation Agent, such suspension or limitation is material; or
- (ii) a general moratorium is declared in respect of banking activities in the country in which the Exchange or any Related Exchange is located.

For the purposes of this definition, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Exchange or any Related Exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the Exchange or any Related Exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) **Potential Adjustment Events.** Following a declaration by the Share Company of the terms of any Potential Adjustment Event, the Calculation Agent will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the Share and, if so, will:
 - (i) make the corresponding adjustment, if any, to any one or more of the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and
 - (ii) determine the effective date of that adjustment.

The Calculation Agent may, but need not, determine the adjustment by reference to the adjustment in respect of such Potential Adjustment Event made by an options exchange to options on the Shares traded on that options exchange. Upon making any such adjustment, the Calculation Agent shall notify the Holders in accordance with General Condition 4, stating the adjustment to be made to the Conditions and giving brief details of the Potential Adjustment Event.

“**Potential Adjustment Event**” means any of the following: (i) a subdivision, consolidation or reclassification of relevant Shares (unless a Merger Event) or a free distribution or dividend

of such Shares to existing holders by way of bonus, capitalisation, recapitalisation or similar issue; (ii) a distribution or dividend to existing holders of the relevant Shares of (A) such Shares, or (B) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the Share Company equally or proportionately with such payments to holders of such Shares, or (C) any other type of securities, rights or warrants or other assets, in any case for payment (cash or other) at less than the prevailing market price as determined by the Calculation Agent; (iii) an extraordinary dividend; (iv) a distribution of cash dividends on the Shares equal to or greater than 8 per cent. per annum of the then current market value of the Shares; (v) a call by the Share Company in respect of relevant Shares that are not fully paid; (vi) a repurchase by the Share Company of relevant Shares whether out of profits or capital and whether the consideration for such repurchase is cash, securities or otherwise; or (vii) any other similar event that may have a diluting or concentrative effect on the theoretical value of the relevant Shares.

- (c) De-listing, Merger Event, Nationalisation and Insolvency. If a De-listing, Merger Event, Nationalisation or Insolvency occurs in relation to the Share Company, the Issuer in its sole and absolute discretion may take the action described in (i), (ii) or (iii) below:
- (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any of the other terms of these Conditions to account for the De-listing, Merger Event, Nationalisation or Insolvency, as the case may be, and determine the effective date of that adjustment. The Calculation Agent may (but is under no obligation to) determine the appropriate adjustment by reference to the adjustment in respect of the De-listing, Merger Event, Nationalisation or Insolvency made by any Related Exchange to options contracts or futures contracts or other derivatives contracts on the Shares traded on such Related Exchange; or
 - (ii) cancel the Securities by giving notice to Holders in accordance with General Condition 4. If the Securities are to be cancelled the Issuer will pay an amount to each Holder in respect of each Security held by him which amount shall be the fair market value of a Security (taking into account the De-listing, Merger Event, Nationalisation or Insolvency (as the case may be)) on the day selected for cancellation as shall be selected by the Issuer in its sole and absolute discretion adjusted to fully account for any losses, expenses and costs to the Issuer and/or any affiliate of the Issuer of unwinding or adjusting any underlying or related hedging arrangements (including but not limited to any equity options or selling or otherwise realising any Shares or other instruments of any type whatsoever which the Issuer and/or any of its affiliates may hold as part of such hedging arrangements), all as determined by the Calculation Agent in its sole and absolute discretion. Payment will be made in such manner as shall be notified to the Holders in accordance with General Condition 4; or
 - (iii) following any adjustment to the settlement terms of options contracts or futures contracts or any other derivatives contracts on the Shares traded on any Related Exchange, require the Calculation Agent to make a corresponding adjustment to any of the other terms of these Conditions, which adjustment will be effective as of the date determined by the Calculation Agent to be the effective date of the corresponding adjustment made by the Related Exchange. If options contracts or futures contracts or other derivatives contracts on the Shares are not traded on the Related Exchange, the Calculation Agent will make such adjustment, if any, to any of the other terms of these Conditions as the Calculation Agent in its sole and absolute discretion determines appropriate, with reference to the rules and precedents (if any) set by the Related Exchange to account for the De-listing, Merger Event, Nationalisation or Insolvency (as the case may be) that in the determination of the Calculation Agent

would have given rise to an adjustment by the Related Exchange if such options contracts or futures contracts or other derivatives contracts were so traded.

Upon the occurrence of a De-listing, Merger Event, Nationalisation or Insolvency, the Issuer shall notify the Holders in accordance with General Condition 4, stating the occurrence of such De-listing, Merger Event, Nationalisation or Insolvency (as the case may be) and action proposed to be taken in relation thereto.

“De-listing” means a Share for any reason ceases to be listed or is suspended from listing on the Exchange or any other exchanges on which the Shares are listed (and such cessation or suspension is continuing and such Share is not subsequently listed or quoted on another stock exchange or quotation system acceptable to the Issuer).

“Merger Date” means the date upon which all holders of the Shares of a Share Company (other than, in the case of a take-over offer, Shares owned or controlled by the offeror) have agreed or have irrevocably become obliged to transfer their Shares.

“Merger Event” means any (i) reclassification or change to the Shares of a Share Company that results in a transfer of or an irrevocable commitment to transfer all outstanding Shares of such Share Company; (ii) consolidation, amalgamation or merger of a Share Company with or into another entity (other than a consolidation, amalgamation or merger in which such Share Company is the continuing entity and which does not result in any such reclassification or change to all the outstanding Shares of a Share Company); or (iii) other take-over offer for the Shares of a Share Company that results in a transfer of or an irrevocable commitment to transfer the Shares of a Share Company (other than any such Shares owned or controlled by the offeror), in each case if the Merger Date is on or before the Valuation Date, Issuer Call Date or before or during the Stop Loss Termination Valuation Period.

“Nationalisation” means that all the Shares of a Share Company or all the assets or substantially all the assets of a Share Company are nationalised, expropriated or are otherwise required to be transferred to any governmental agency, authority or entity.

“Insolvency” means that by reason of the voluntary or involuntary liquidation, bankruptcy or insolvency of or any analogous proceeding affecting a Share Company, (i) all the Shares are required to be transferred to a receiver, trustee, liquidator or other similar official or (ii) holders of the Shares of that Share Company become legally prohibited from transferring them.

The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

3. RIGHTS AND PROCEDURES

- (a) **Exercise.** Provided no Stop Loss Event has occurred, and notwithstanding notice of an Issuer Call, the Securities are exercisable on any Exercise Date by delivery of a Notice to the Paying Agent by the Holder (or its bank on behalf of the Holder) prior to the Exercise Time on an Exercise Date. If such Notice is received by the Paying Agent before the Exercise Time on any Business Day, the Exercise shall be deemed to have taken place on such Business Day. If such Notice is received by the Paying Agent after the Exercise Time, the Exercise shall be deemed to have taken place on the following Business Day. Any Exercise will be subject to the consequences of a Hedging Disruption Event which occurs prior to or on a Valuation Date.
- (b) **Stop Loss Event.** Following a Stop Loss Event, the Securities will terminate automatically. A Stop Loss Event will override an Issuer Call and/or due Exercise if the Stop Loss Event occurs prior to or on an Issuer Call Date or Valuation Date as the case may be.
- (c) **Issuer Call.** Provided no Stop Loss Event has occurred, the Issuer may terminate the Securities, in whole but not in part, on any Business Day by giving Holders notice of its intention to terminate the Securities. If such notice is given to the Clearing Agent(s) before the Exercise Time on any Business Day, such Business Day shall be the Issuer Call Date. If such notice is given to the Clearing Agent(s) after the Exercise Time on any Business Day, the following Business Day shall be the Issuer Call Date. Any such notice shall be given in accordance with the provisions of General Condition 4, and shall specify the Issuer Call Date.
- (d) **Cash Settlement.** Each Security upon due Exercise, termination pursuant to an Issuer Call or following a Stop Loss Event entitles its Holder to receive from the Issuer on the Settlement Date either:
 - (i) the Exercise Cash Amount, following a valid Exercise; or
 - (ii) the Issuer Call Cash Amount, following a valid Issuer Call; or
 - (iii) the Stop Loss Cash Amount, following a Stop Loss Event.
- (e) **Payment Day.** If the date for payment of any amount in respect of the Securities is not a Payment Day, the Holder shall not be entitled to payment until the next following Payment Day and shall not be entitled to any interest or other payment in respect of such delay.

- (f) General. In the absence of gross negligence or wilful misconduct on its part, none of the Issuer, the Calculation Agent or any Agent shall have any responsibility for any errors or omissions in the calculation of any Cash Amount.

The purchase of Securities does not confer on any holder of such Securities any rights (whether in respect of voting, distributions or otherwise) attached to the Shares.

- (g) Notice. All payments following due Exercise (as referred to in Product Condition 3(a) above) shall be subject to the delivery of a notice (a “**Notice**”) to the Paying Agent. The form of the Notice may be obtained from www.abnamromarkets.nl. The form of Notice should be completed by the Holder's account bank or custodian bank.

A Notice shall:

- (i) specify the number of Securities to which it relates;
 - (ii) specify the number of the account with the Clearing Agent to be debited with the Securities to which it relates; and
 - (iii) specify the number of the account with the Clearing Agent to be credited with the Cash Amount (if any) for such Securities.
- (h) Settlement. The Issuer shall pay or cause to be paid the Cash Amount (if any) for each Security with respect to which a Notice has been delivered to the account specified in the relevant Notice (if applicable) for value on the Settlement Date.
- (i) Determinations. Failure properly to complete and deliver a Notice may result in such notice being treated as null and void. Any determination as to whether a Notice has been properly completed and delivered shall be made by the Paying Agent and shall be conclusive and binding on the Issuer and the relevant Holder. Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

If such Notice is subsequently corrected to the satisfaction of the Paying Agent, it shall be deemed to be a new Notice submitted at the time such correction is delivered to the Paying Agent.

Any Security with respect to which a Notice has not been delivered in the manner set out above by the time specified in this Product Condition 3 shall become void.

The Paying Agent shall use its best efforts promptly to notify the relevant Holder (via its account bank or custodian bank) if it has determined that a Notice is incomplete or not in proper form. In the absence of gross negligence or wilful misconduct on its part, neither the Issuer nor the Paying Agent shall be liable to any person with respect to any action taken or omitted to be taken by it in connection with such determination or the notification of such determination to a Holder.

- (j) Delivery of a Notice. Delivery of a Notice by or on behalf of a Holder shall be irrevocable with respect to the Securities specified and no Notice may be withdrawn after receipt by the Paying Agent as provided above. After the delivery of a Notice, the Securities which are the subject of such notice may not be transferred.
- (k) Exercise and Settlement Risk. Exercise and settlement of the Securities is subject to all applicable laws, regulations and practices in force at the relevant time and neither the Issuer

nor any Agent shall incur any liability whatsoever if it is unable to effect the transactions contemplated, after using all reasonable efforts, as a result of any such laws, regulations or practices. Neither the Issuer nor the Agents shall under any circumstances be liable for any acts or defaults of any Clearing Agent in relation to the performance of its duties in relation to the Securities.

4. ADJUSTMENTS

- (a) **Market Disruption.** The Issuer shall as soon as reasonably practicable under the circumstances notify the Holders in accordance with General Condition 4 if the Calculation Agent determines that a Market Disruption Event has occurred.

“**Market Disruption Event**” means:

- (i) the occurrence or existence on any Trading Day during the one hour period that ends at the official close of trading on the Exchange or any Related Exchange of any suspension of or limitation imposed on trading or the disruption or impairment in the ability of market participants in general to effect transactions in (by reason of movements in price reaching or exceeding limits permitted by the relevant exchange or otherwise): (A) the Shares on the Exchange or any other exchange on which the Shares are listed; or (B) any options contracts or futures contracts or other derivatives contracts relating to the Share on any Related Exchange, if, in the determination of the Calculation Agent, such suspension or limitation is material; or
- (ii) a general moratorium is declared in respect of banking activities in the country in which the Exchange or any Related Exchange is located.

For the purposes of this definition, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Exchange or any Related Exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the Exchange or any Related Exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) **Potential Adjustment Events.** Following a declaration by the Share Company of the terms of any Potential Adjustment Event, the Calculation Agent will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the Share and, if so, will:
 - (i) make the corresponding adjustment, if any, to any one or more of the Conditions as the Calculation Agent determines appropriate to account for that diluting or concentrative effect; and
 - (ii) determine the effective date of that adjustment.

The Calculation Agent may, but need not, determine the adjustment by reference to the adjustment in respect of such Potential Adjustment Event made by an options exchange to options on the Shares traded on that options exchange. Upon making any such adjustment, the Calculation Agent shall notify the Holders in accordance with General Condition 4, stating the adjustment to be made to the Conditions and giving brief details of the Potential Adjustment Event.

“Potential Adjustment Event” means any of the following: (i) a subdivision, consolidation or reclassification of relevant Shares (unless a Merger Event) or a free distribution or dividend of such Shares to existing holders by way of bonus, capitalisation, recapitalisation or similar issue; (ii) a distribution or dividend to existing holders of the relevant Shares of (A) such Shares, or (B) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the Share Company equally or proportionately with such payments to holders of such Shares, or (C) any other type of securities, rights or warrants or other assets, in any case for payment (cash or other) at less than the prevailing market price as determined by the Calculation Agent; (iii) an extraordinary dividend; (iv) a distribution of cash dividends on the Shares equal to or greater than 8 per cent. per annum of the then current market value of the Shares; (v) a call by the Share Company in respect of relevant Shares that are not fully paid; (vi) a repurchase by the Share Company of relevant Shares whether out of profits or capital and whether the consideration for such repurchase is cash, securities or otherwise; or (vii) any other similar event that may have a diluting or concentrative effect on the theoretical value of the relevant Shares.

- (c) De-listing, Merger Event, Nationalisation and Insolvency. If a De-listing, Merger Event, Nationalisation or Insolvency occurs in relation to the Share Company, the Issuer in its sole and absolute discretion may take the action described in (i), (ii) or (iii) below:
 - (i) require the Calculation Agent to determine in its sole and absolute discretion the appropriate adjustment, if any, to be made to any of the other terms of these Conditions to account for the De-listing, Merger Event, Nationalisation or Insolvency, as the case may be, and determine the effective date of that adjustment. The Calculation Agent may (but is under no obligation to) determine the appropriate adjustment by reference to the adjustment in respect of the De-listing, Merger Event, Nationalisation or Insolvency made by any Related Exchange to options contracts or futures contracts or other derivatives contracts on the Shares traded on such Related Exchange; or
 - (ii) cancel the Securities by giving notice to Holders in accordance with General Condition 4. If the Securities are to be cancelled the Issuer will pay an amount to each Holder in respect of each Security held by him which amount shall be the fair market value of a Security (taking into account the De-listing, Merger Event, Nationalisation or Insolvency (as the case may be)) on the day selected for cancellation as shall be selected by the Issuer in its sole and absolute discretion adjusted to fully account for any losses, expenses and costs to the Issuer and/or any affiliate of the Issuer of unwinding or adjusting any underlying or related hedging arrangements (including but not limited to any equity options or selling or otherwise realising any Shares or other instruments of any type whatsoever which the Issuer and/or any of its affiliates may hold as part of such hedging arrangements), all as determined by the Calculation Agent in its sole and absolute discretion. Payment will be made in such manner as shall be notified to the Holders in accordance with General Condition 4; or
 - (iii) following any adjustment to the settlement terms of options contracts or futures contracts or any other derivatives contracts on the Shares traded on any Related Exchange, require the Calculation Agent to make a corresponding adjustment to any of the other terms of these Conditions, which adjustment will be effective as of the date determined by the Calculation Agent to be the effective date of the corresponding adjustment made by the Related Exchange. If options contracts or futures contracts or other derivatives contracts on the Shares are not traded on the Related Exchange, the Calculation Agent will make such adjustment, if any, to any of the other terms of these Conditions as the Calculation Agent in its sole and absolute discretion determines appropriate, with reference to the rules and precedents (if any) set by the

Related Exchange to account for the De-listing, Merger Event, Nationalisation or Insolvency (as the case may be) that in the determination of the Calculation Agent would have given rise to an adjustment by the Related Exchange if such options contracts or futures contracts or other derivatives contracts were so traded.

Upon the occurrence of a De-listing, Merger Event, Nationalisation or Insolvency, the Issuer shall notify the Holders in accordance with General Condition 4, stating the occurrence of such De-listing, Merger Event, Nationalisation or Insolvency (as the case may be) and action proposed to be taken in relation thereto.

“De-listing” means a Share for any reason ceases to be listed or is suspended from listing on the Exchange or any other exchanges on which the Shares are listed (and such cessation or suspension is continuing and such Share is not subsequently listed or quoted on another stock exchange or quotation system acceptable to the Issuer).

“Merger Date” means the date upon which all holders of the Shares of a Share Company (other than, in the case of a take-over offer, Shares owned or controlled by the offeror) have agreed or have irrevocably become obliged to transfer their Shares.

“Merger Event” means any (i) reclassification or change to the Shares of a Share Company that results in a transfer of or an irrevocable commitment to transfer all outstanding Shares of such Share Company; (ii) consolidation, amalgamation or merger of a Share Company with or into another entity (other than a consolidation, amalgamation or merger in which such Share Company is the continuing entity and which does not result in any such reclassification or change to all the outstanding Shares of a Share Company); or (iii) other take-over offer for the Shares of a Share Company that results in a transfer of or an irrevocable commitment to transfer the Shares of a Share Company (other than any such Shares owned or controlled by the offeror), in each case if the Merger Date is on or before the Valuation Date, Issuer Call Date or before or during the Stop Loss Termination Valuation Period.

“Nationalisation” means that all the Shares of a Share Company or all the assets or substantially all the assets of a Share Company are nationalised, expropriated or are otherwise required to be transferred to any governmental agency, authority or entity.

“Insolvency” means that by reason of the voluntary or involuntary liquidation, bankruptcy or insolvency of or any analogous proceeding affecting a Share Company, (i) all the Shares are required to be transferred to a receiver, trustee, liquidator or other similar official or (ii) holders of the Shares of that Share Company become legally prohibited from transferring them.

The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

3. RIGHTS AND PROCEDURES

- (a) **Exercise.** Provided no Stop Loss Event has occurred, and notwithstanding notice of an Issuer Call, the Securities are exercisable on any Exercise Date by delivery of a Notice to the Paying Agent by the Holder (or its bank on behalf of the Holder) prior to the Exercise Time on an Exercise Date. If such Notice is received by the Paying Agent before the Exercise Time on any Business Day, the Exercise shall be deemed to have taken place on such Business Day. If such Notice is received by the Paying Agent after the Exercise Time, the Exercise shall be deemed to have taken place on the following Business Day. Any Exercise will be subject to the consequences of a Hedging Disruption Event which occurs prior to or on a Valuation Date.
- (b) **Stop Loss Event.** Following a Stop Loss Event, the Securities will terminate automatically. A Stop Loss Event will override an Issuer Call and/or due Exercise if the Stop Loss Event occurs prior to or on an Issuer Call Date or Valuation Date as the case may be.
- (c) **Issuer Call.** Provided no Stop Loss Event has occurred, the Issuer may terminate the Securities, in whole but not in part, on any Business Day by giving Holders notice of its intention to terminate the Securities. - (iii) the Stop Loss Cash Amount, following a Stop Loss Event.

Any determination as to whether a Notice has been properly completed and delivered shall be made by the Paying Agent and shall be conclusive and binding on the Issuer and the relevant Holder. Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

The Paying Agent shall use its best efforts promptly to notify the relevant Holder (via its account bank or custodian bank) if it has determined that a Notice is incomplete or not in proper form. For the purpose of determining whether such suspension or limitation is material, if trading in a security included in the Index is suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that security relative to (y) the overall level of the Index, in each case immediately before that suspension or limitation; or (B) on any Related Exchange in any options contracts or futures contracts or other derivatives contracts relating to the relevant Index. In any event, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the relevant exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) **Adjustments to Index.** The Issuer shall give notice as soon as practicable to the Holders in accordance with General Condition 4 of any determination made by the Calculation Agent pursuant to paragraphs (i), (ii), (iii) or (iv) below.
 - (i) If the Index is: (A) not calculated and announced by the Index sponsor but is calculated and announced by a successor to the Index Sponsor (the “**Successor Sponsor**”) acceptable to the Calculation Agent; or (B) replaced by a successor index using in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index, then (in either case) the Index will be deemed to be the index so calculated and announced by such Successor Sponsor or that successor index, as the case may be.
 - (ii) If: (A) on or prior to the Valuation Date, during or prior to the Stop Loss Termination Valuation Period or on or prior to the Issuer Call Date, as the case may be, the Index Sponsor or, if applicable, the Successor Sponsor makes a material change in the

formula for or the method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in constituent securities and other routine events); or (B) on the Valuation Date, during the Stop Loss Termination Valuation Period or on the Issuer Call Date the Index Sponsor or, if applicable, the Successor Sponsor fails to calculate and/or publish the Index; then (in either case) the Calculation Agent shall determine the Final Reference Price, the Stop Loss Termination Reference Price or the Termination Reference Price using, in lieu of a published level for the Index on the Valuation Date, the Issuer Call Date or during the Stop Loss Termination Valuation Period as the case may be, the level for the Index as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to the change or failure, but using only those securities that comprised the Index immediately prior to the change or failure (other than those securities that have since ceased to be listed on the Exchange or any other exchange on which the Shares are listed) or in the case of a material modification of the Index only, the Calculation Agent shall deem such modified Index to be the Index so calculated and announced or shall terminate the Securities by giving notice in accordance with General Condition 4.

- (iii) If, at any time, any of the events specified in (A) to (H) below occurs and the Index Sponsor or, if applicable, the Successor Sponsor has not in the opinion of the Calculation Agent made an appropriate adjustment to the level of the Index in order to account fully for such event, notwithstanding that the rules published or applied by the Index Sponsor or, if applicable, the Successor Sponsor pertaining to the Index have been applied, the Calculation Agent shall make such adjustment to the level of the Index as it considers appropriate in order to so account. (A) a distribution or dividend to existing holders of the Shares of: (i) Shares; or (ii) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the issuer of the Shares equally or proportionately with such payments to holders of Shares or (iii) any other type of securities, rights or warrants or other assets, in any case for payment (in cash or otherwise) at less than the prevailing market price; (B) a free distribution or dividend of any Shares to existing holders by way of bonus, capitalisation or similar issue; (C) an extraordinary dividend; (D) any cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (E) any non-cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (F) any other extraordinary cash or non-cash dividend on, or distribution with respect to, the Shares which is, by its terms or declared intent, declared and paid outside the normal operations or normal dividend procedures of the relevant issuer, provided that, in all cases, the related ex-dividend date occurs during the period from but including the Issue Date up to and excluding the Valuation Date; (G) a distribution of cash dividends on the Shares equal to or greater than 8 per cent. per annum of the then current market value of the Shares; (H) any other similar event having a dilutive or concentrative effect on the theoretical value of the Shares.
- (iv) The Issuer reserves the right to issue further Securities, make adjustments or to distribute to the Holders any rights in connection with the Securities as it reasonably believes are appropriate in circumstances where an event or events occur which the Issuer (in its absolute discretion and notwithstanding any adjustments previously made to the Securities) believes should in the context of the issue of Securities and its obligations hereunder, give rise to such adjustment or distribution, provided that such adjustment is considered by the Calculation Agent to be appropriate generally (without considering the individual circumstances of any Holder or the tax or other

consequences of such adjustment in any particular jurisdiction) or is required to take account of provisions of the laws of the relevant jurisdiction or the practices of the Exchange.

The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

- (b) Dematerialised Form. Certain Securities will, where required or permitted by the rules and procedures of the Clearing Agent, be issued in dematerialised form and will be registered in the book-entry system of the Clearing Agent. Title to the Securities will pass by transfer between accountholders at the Clearing Agent perfected in accordance with the legislation, rules and regulations applicable to and/or issued by the Clearing Agent that are in force and effect from time to time (the “**Rules**”). Accordingly, in these Conditions, the term “**Holder**” means (i) a person in whose name a Security is registered in the book-entry settlement system of the relevant Clearing Agent (other than Euroclear Netherlands) or, (ii) in the case Euroclear Netherlands is the relevant Clearing Agent, any person who according to the records of an Admitted Institution is a co-owner (*deelgenoot*), as defined in the Wge, of the relevant collective deposit (*verzameldepot*) of Securities, or (iii) any other person recognised as a holder of Securities pursuant to the Rules.

The Intermediated Securities will be created (i) by deposit of a Global Security with the Clearing Agent, acting as custodian as defined in article 4 FISA (the “**Custodian**”), or registration of Dematerialised Securities in the main register of the Clearing Agent, acting as Custodian, and (ii) the Clearing Agent, acting as Custodian, crediting the respective rights to securities accounts of one or more of its participants with the Clearing Agent in accordance with articles 4 and 6 FISA. 3. RIGHTS AND PROCEDURES

- (a) Exercise. Provided no Stop Loss Event has occurred, and notwithstanding notice of an Issuer Call, the Securities are exercisable on any Exercise Date by delivery of a Notice to the Paying Agent by the Holder (or its bank on behalf of the Holder) prior to the Exercise Time on an Exercise Date. If such Notice is received by the Paying Agent before the Exercise Time on any Business Day, the Exercise shall be deemed to have taken place on such Business Day. If such Notice is received by the Paying Agent after the Exercise Time, the Exercise shall be deemed to have taken place on the following Business Day. Any Exercise will be subject to the consequences of a Hedging Disruption Event which occurs prior to or on a Valuation Date.
- (b) Stop Loss Event. Following a Stop Loss Event, the Securities will terminate automatically. A Stop Loss Event will override an Issuer Call and/or due Exercise if the Stop Loss Event occurs prior to or on an Issuer Call Date or Valuation Date as the case may be.
- (c) Issuer Call. Provided no Stop Loss Event has occurred, the Issuer may terminate the Securities, in whole but not in part, on any Business Day by giving Holders notice of its intention to terminate the Securities.  - (iii) the Stop Loss Cash Amount, following a Stop Loss Event.
- (e) Payment Day. If the date for payment of any amount in respect of the Securities is not a Payment Day, the Holder shall not be entitled to payment until the next following Payment Day and shall not be entitled to any interest or other payment in respect of such delay.
- (f) General. In the absence of gross negligence or wilful misconduct on its part, none of the Issuer, the Calculation Agent nor any Agent shall have any responsibility for any errors or omissions in the calculation of any Cash Amount.
- (g) Notice. All payments following due Exercise (as referred to in Product Condition 3(a) above) shall be subject to the delivery of a notice (a “**Notice**”) to the Paying Agent. The form of the Notice may be obtained from www.abnamromarkets.nl. The form of Notice should be completed by the Holder's account bank or custodian bank.

A Notice shall:

- (i) specify the number of Securities to which it relates;

 - (iii) specify the number of the account with the Clearing Agent to be credited with the Cash Amount (if any) for such Securities.
- (h) Settlement. The Issuer shall pay or cause to be paid the Cash Amount (if any) for each Security with respect to which a Notice has been delivered to the account specified in the relevant Notice (if applicable) for value on the Settlement Date.
 - (i) Determinations. Failure properly to complete and deliver a Notice may result in such notice being treated as null and void. Any determination as to whether a Notice has been properly completed and delivered shall be made by the Paying Agent and shall be conclusive and binding on the Issuer and the relevant Holder. Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

If such Notice is subsequently corrected to the satisfaction of the Paying Agent, it shall be deemed to be a new Notice submitted at the time such correction is delivered to the Paying Agent.

Any Security with respect to which a Notice has not been duly completed and delivered in the manner set out above by the time specified in this Product Condition 3 shall become void.

The Paying Agent shall use its best efforts promptly to notify the relevant Holder (via its account bank or custodian bank) if it has determined that a Notice is incomplete or not in proper form. In the absence of gross negligence or wilful misconduct on its part, neither the Issuer nor the Paying Agent shall be liable to any person with respect to any action taken or

omitted to be taken by it in connection with such determination or the notification of such determination to a Holder.

- (j) **Delivery of a Notice.** Delivery of a Notice by or on behalf of a Holder shall be irrevocable with respect to the Securities specified and no Notice may be withdrawn after receipt by the Paying Agent as provided above. After the delivery of a Notice, the Securities which are the subject of such notice may not be transferred.
- (k) **Exercise and Settlement Risk.** Exercise and settlement of the Securities is subject to all applicable laws, regulations and practices in force at the relevant time and neither the Issuer nor any Agent shall incur any liability whatsoever if it is unable to effect the transactions contemplated, after using all reasonable efforts, as a result of any such laws, regulations or practices. For the purpose of determining whether such suspension or limitation is material, if trading in a security included in the Index is suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that security relative to (y) the overall level of the Index, in each case immediately before that suspension or limitation; or (B) on any Related Exchange in any options contracts or futures contracts or other derivatives contracts relating to the relevant Index. In any event, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the relevant exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) **Adjustments to Index.** The Issuer shall give notice as soon as practicable to the Holders in accordance with General Condition 4 of any determination made by the Calculation Agent pursuant to paragraphs (i), (ii), (iii) or (iv) below.
 - (i) If the Index is: (A) not calculated and announced by the Index Sponsor but is calculated and announced by a successor to the Index Sponsor (the “**Successor Sponsor**”) acceptable to the Calculation Agent; or (B) replaced by a successor index using in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index,

then (in either case) the Index will be deemed to be the index so calculated and announced by such Successor Sponsor or that successor index, as the case may be.

- (ii) If: (A) on or prior to the Valuation Date, during or prior to the Stop Loss Termination Valuation Period or on or prior to the Issuer Call Date, as the case may be, the Index Sponsor or, if applicable, the Successor Sponsor makes a material change in the formula for or the method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in constituent securities and other routine events); or (B) on the Valuation Date, during the Stop Loss Termination Valuation Period or on the Issuer Call Date the Index Sponsor or, if applicable, the Successor Sponsor fails to calculate and/or publish the Index; then (in either case) the Calculation Agent shall determine the Final Reference Price, the Stop Loss Termination Reference Price or the Termination Reference Price using, in lieu of a published level for the Index on the Valuation Date, the Issuer Call Date or during the Stop Loss Termination Valuation Period, as the case may be, the level for the Index as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to the change or failure, but using only those securities that comprised the Index immediately prior to the change or failure (other than those securities that have since ceased to be listed on the Exchange or any other exchange on which the Shares are listed) or in the case of a material modification of the Index only, the Calculation Agent shall deem such modified Index to be the Index so calculated and announced or shall terminate the Securities by giving notice in accordance with General Condition 4.
- (iii) If, at any time, any of the events specified in (A) to (H) below occurs and the Index Sponsor or, if applicable, the Successor Sponsor has not in the opinion of the Calculation Agent made an appropriate adjustment to the level of the Index in order to account fully for such event, notwithstanding that the rules published or applied by the Index Sponsor or, if applicable, the Successor Sponsor pertaining to the Index have been applied, the Calculation Agent shall make such adjustment to the level of the Index as it considers appropriate in order to so account. (A) a distribution or dividend to existing holders of the Shares of: (i) Shares; or (ii) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the issuer of the Shares equally or proportionately with such payments to holders of Shares or (iii) any other type of securities, rights or warrants or other assets, in any case for payment (in cash or otherwise) at less than the prevailing market price; (B) a free distribution or dividend of any Shares to existing holders by way of bonus, capitalisation or similar issue; (C) an extraordinary dividend; (D) any cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (E) any non-cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (F) any other extraordinary cash or non-cash dividend on, or distribution with respect to, the Shares which is, by its terms or declared intent, declared and paid outside the normal operations or normal dividend procedures of the relevant issuer, provided that, in all cases, the related ex-dividend date occurs during the period from but including the Issue Date up to and excluding the Valuation Date; (G) a distribution of cash dividends on the Shares equal to or greater than 8 per cent. per annum of the then current market value of the Shares; (H) any other similar event having a dilutive or concentrative effect on the theoretical value of the Shares.
- (iv) The Issuer reserves the right to issue further Securities, make adjustments or to distribute to the Holders any rights in connection with the Securities as it reasonably

believes are appropriate in circumstances where an event or events occur which the Issuer (in its absolute discretion and notwithstanding any adjustments previously made to the Securities) believes should in the context of the issue of Securities and its obligations hereunder, give rise to such adjustment or distribution, provided that such adjustment is considered by the Calculation Agent to be appropriate generally (without considering the individual circumstances of any Holder or the tax or other consequences of such adjustment in any particular jurisdiction) or is required to take account of provisions of the laws of the relevant jurisdiction or the practices of the Exchange.

The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

5. EFFECT OF FINAL TERMS

The Final Terms applicable to any Series of Securities may specify amendments to these Product Conditions in so far as they apply to that Series. Notwithstanding the foregoing, consideration will be given as to whether such amendments constitute "significant new factors" and consequently trigger the need for a supplement to the Base Prospectus (as defined in the Final Terms) under Article 16 of Directive 2003/71/EC.

- (b) Dematerialised Form. Certain Securities will, where required or permitted by the rules and procedures of the Clearing Agent, be issued in dematerialised form and will be registered in the book-entry system of the Clearing Agent. Title to the Securities will pass by transfer between accountholders at the Clearing Agent perfected in accordance with the legislation, rules and regulations applicable to and/or issued by the Clearing Agent that are in force and effect from time to time (the “**Rules**”). Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

For the purpose of determining whether such suspension or limitation is material, if trading in a security included in the Index is suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that security relative to (y) the overall level of the Index, in each case immediately before that suspension or limitation; or (B) on any Related Exchange in any options contracts or futures contracts or other derivatives contracts relating to the relevant Index. In any event, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the relevant exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) Adjustments to Index. The Issuer shall give notice as soon as practicable to the Holders in accordance with General Condition 4 of any determination made by the Calculation Agent pursuant to paragraphs (i), (ii), (iii) or (iv) below.
- (i) If the Index is: (A) not calculated and announced by the Index sponsor but is calculated and published by a successor to the Index Sponsor (the “**Successor Sponsor**”) acceptable to the Calculation Agent; or (B) replaced by a successor index using in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index, then (in either case) the Index will be deemed to be the index so calculated and announced by such Successor Sponsor or that successor index, as the case may be.

- (iii) If, at any time, any of the events specified in (A) to (H) below occurs and the Index Sponsor or, if applicable, the Successor Sponsor, has not in the opinion of the Calculation Agent made an appropriate adjustment to the level of the Index in order to account fully for such event, notwithstanding that the rules published or applied by the Index Sponsor or, if applicable, the Successor Sponsor, pertaining to the Index have been applied, the Calculation Agent shall make such adjustment to the level of the Index as it considers appropriate in order to so account. (A) a distribution or dividend to existing holders of the shares comprising the Index (the “**Shares**”) of: (aa) Shares; or (bb) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the issuer of the Shares equally or proportionately with such payments to holders of Shares or (cc) any other type of securities, rights or warrants or other assets, in any case for payment (in cash or otherwise) at less than the prevailing market price; (B) a free distribution or dividend of any Shares to existing holders by way of bonus, capitalisation or similar issue; (C) an extraordinary dividend; (D) any cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (E) any non-cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (F) any other extraordinary cash or

- (iv) The Issuer reserves the right to make adjustments or to distribute to the Holders any rights in connection with the Securities as it reasonably believes are appropriate in circumstances where an event or events occur which the Issuer (in its absolute discretion and notwithstanding any adjustments previously made to the Securities) believes should in the context of the issue of Securities and its obligations hereunder, give rise to such adjustment or distribution, provided that such adjustment is considered by the Calculation Agent to be appropriate generally (without considering the individual circumstances of any Holder or the tax or other consequences of such adjustment in any particular jurisdiction) or is required to take account of provisions of the laws of the relevant jurisdiction or the practices of the Exchange.
- (c) The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

Each person (other than another Clearing Agent) who is for the time being shown in the records of the relevant Clearing Agent or of a participant of such Clearing Agent, as applicable, as the owner of a particular unit quantity of the Securities (in which regard any certificate or other document issued by the relevant Clearing Agent as to the unit quantity of the Securities standing to the credit of the account of any person shall be conclusive and binding for all purposes except in the case of manifest error) shall be treated by the Issuer and each Agent as the holder of such unit quantity of the Securities (and the term “Holder” shall be construed accordingly) for all purposes, other than with respect to any payment and / or delivery obligations, the right to which shall be vested as regards the Issuer and the Agents, solely in the bearer of the Global Security.
- (b) **Dematerialised Form.** Certain Securities will, where required or permitted by the rules and procedures of the Clearing Agent, be issued in dematerialised form and will be registered in the book-entry system of the Clearing Agent. Title to the Securities will pass by transfer between accountholders at the Clearing Agent perfected in accordance with the legislation, rules and regulations applicable to and/or issued by the Clearing Agent that are in force and effect from time to time (the “**Rules**”). Accordingly, in these Conditions, the term “**Holder**” means (i) a person in whose name a Security is registered in the book-entry settlement system of the relevant Clearing Agent (other than Euroclear Netherlands) or, (ii) in the case Euroclear Netherlands is the relevant Clearing Agent, any person who according to the records of an Admitted Institution is a co-owner (*deelgenoot*), as defined in the Wge, of the relevant collective deposit (*verzameldepot*) of Securities, or (iii) any other person recognised as a holder of Securities pursuant to the Rules.

The Intermediated Securities will be created (i) by deposit of a Global Security with the Clearing Agent, acting as custodian as defined in article 4 FISA (the “**Custodian**”), or registration of Dematerialised Securities in the main register of the Clearing Agent, acting as Custodian, and (ii) the Clearing Agent, acting as Custodian, crediting the respective rights to securities accounts of one or more of its participants with the Clearing Agent in accordance with articles 4 and 6 FISA. For each issuance of Securities in the form of Dematerialised Securities, the Clearing Agent, acting as Custodian, will maintain the main register as defined in article 6 para. 2 FISA which is available to the public under <https://www.sec.sisclear.com/sec/cm/index/custody-settlement/mainregister.htm>.

Title to the Intermediated Securities is construed and will pass in accordance with the legislation, in particular the FISA, rules and regulations applicable to and/or issued by the Clearing Agent, acting as Custodian, and any other custodian, if any, that are in force and effect from time to time (the “**Rules**”). Accordingly, in these Conditions, the term “**Holder**” means any person recognised as a holder of the Intermediated Securities pursuant to the Rules.

The Holders shall at no time have the right to effect or demand (i) the retransformation of the Intermediated Securities into, and the delivery of, Dematerialised Securities in the case of Dematerialised Securities being the basis for the creation of Intermediated Securities, or (ii) the conversion of the Dematerialised Securities or the Global Security into definitive Securities.

3. RIGHTS AND PROCEDURES.

- (a) **Exercise.** Provided no Knock Out Event has occurred, and notwithstanding notice of an Issuer Call, the Securities are exercisable by delivery of a Notice to the Paying Agent by the Holder (or its bank on behalf of the Holder) prior to the Exercise Time on an Exercise Date. If such Notice is received by the Paying Agent before the Exercise Time on any Business Day, the Exercise shall be deemed to have taken place on such Business Day. If such Notice is received by the Paying Agent after the Exercise Time, the Exercise shall be deemed to have taken place on the following Business Day. Any Exercise will be subject to the consequences of a Hedging Disruption Event which occurs prior to or on a Valuation Date.
- (b) **Stop Loss Event.** Following the occurrence of a Stop Loss Event, the Issuer shall determine the Stop Loss Termination Reference Price and shall notionally re-invest the Stop Loss Termination Reference Price in the Index on the basis of a Re-Financing Event having occurred contemporaneously therewith.
- (c) **Issuer Call.** The Issuer may terminate, subject to a valid Exercise or the occurrence of a Knock Out Event, the Securities, in whole but not in part on any Business Day by giving Holders notice of its intention to terminate the Securities. If such notice is given to the Clearing Agent(s) before the Exercise Time on any Business Day, such Business Day shall be the Issuer Call Date. If such notice is given to the Clearing Agent(s) after the Exercise Time on any Business Day, the following Business Day shall be the Issuer Call Date. Any such notice shall be given in accordance with the provisions of General Condition 4, and shall specify the Issuer Call Date.
- (d) **Interim Settlement Event.** Following the occurrence of an Interim Settlement Event, the Calculation Agent shall determine and pay the Interim Settlement Amount to the account of the relevant Holder via the Clearing Agent on the Settlement Date and adjust the Security Value on the basis of a Re-Financing Event having occurred contemporaneously therewith. Any amounts not paid via the Clearing Agent shall be retained by the Issuer for payment to the relevant Holder against evidence satisfactory to the Issuer of the Holder’s entitlement to such amount.

- (e) Knock Out Event. Following the occurrence of a Knock Out Event, the Securities will terminate automatically and the Issuer will give notice to the Holders in accordance with General Condition 4. A Knock Out Event will override an Issuer Call and/or due Exercise if the Knock Out Event occurs prior to or on an Issuer Call Date or Valuation Date as the case may be.
- (f) Re-Financing Event. On or promptly following a Re-Financing Event the Calculation Agent shall adjust the Current Financing Level and the Current Participation Factor as set out in Product Condition 1.
- (g) Cash Settlement. Each Security upon due Exercise, termination pursuant to an Issuer Call, determination of an Interim Settlement Event or following a Knock Out Event entitles its Holder to receive, from the Issuer on the Settlement Date either:
 - (i) The Exercise Cash Amount, following a valid Exercise; or
 - (ii) The Issuer Call Cash Amount, following a valid Issuer Call; or
 - (iii) The Interim Settlement Amount, following an Interim Settlement Event; or
 - (iv) The Knock Out Cash Amount, following a Knock Out Event.

- (i) General. In the absence of gross negligence or wilful misconduct on its part, none of the Issuer, the Calculation Agent nor any Agent shall have any responsibility for any errors or omissions in the calculation of any Cash Amount.
- (j) Notice. All payments following due Exercise (as referred to in Product Condition 3(a) above) shall be subject to the delivery of a notice (a “**Notice**”) to the Paying Agent. The form of the Notice may be obtained from www.abnamromarkets.nl. The form of Notice should be completed by the Holder's account bank or custodian bank.

A Notice shall:

- (iii) specify the number of the account with the Clearing Agent to be credited with the Cash Amount (if any) for such Securities.
- (k) Settlement. The Issuer shall pay or cause to be paid the Cash Amount (if any) for each Security with respect to which a Notice has been delivered to the account specified in the relevant Notice (if applicable) for value on the Settlement Date.
- (l) Determinations. Failure properly to complete and deliver a Notice may result in such notice being treated as null and void. Any determination as to whether a Notice has been properly completed and delivered shall be made by the Paying Agent and shall be conclusive and binding on the Issuer and the relevant Holder. Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

If such Notice is subsequently corrected to the satisfaction of the Paying Agent, it shall be deemed to be a new Notice submitted at the time such correction is delivered to the Paying Agent.

Any Security with respect to which a Notice has not been duly completed and delivered in the manner set out above by the time specified in Product Condition 3 shall become void.

The Paying Agent shall use its best efforts promptly to notify the relevant Holder (via its account bank or custodian bank) if it has determined that a Notice is incomplete or not in proper form. In the absence of gross negligence or wilful misconduct on its part, neither the Issuer nor the Paying Agent shall be liable to any person with respect to any action taken or omitted to be taken by it in connection with such determination or the notification of such determination to a Holder.

- (m) **Delivery of a Notice.** Delivery of a Notice by or on behalf of a Holder shall be irrevocable with respect to the Securities specified and no Notice may be withdrawn after receipt by the Paying Agent as provided above. After the delivery of a Notice, the Securities which are the subject of such notice may not be transferred.
- (n) **Exercise and Settlement Risk.** Exercise and settlement of the Securities is subject to all applicable laws, regulations and practices in force at the relevant time and neither the Issuer nor any Agent shall incur any liability whatsoever if it is unable to effect the transactions contemplated, after using all reasonable efforts, as a result of any such laws, regulations or practices. Neither the Issuer nor the Agents shall under any circumstances be liable for any acts or defaults of any Clearing Agent in relation to the performance of its duties in relation to the Securities.

4. ADJUSTMENTS

“Market Disruption Event” means: (i) a general moratorium is declared in respect of banking activities in the country in which any Exchange or any Related Exchange is located or (ii) the occurrence or existence on any Trading Day during the one hour period that ends at the official close of trading on an Exchange or any Related Exchange of any suspension of or limitation imposed on trading or the disruption or impairment in the ability of market participants in general to effect transactions (by reason of movements in price reaching or exceeding limits permitted by the relevant exchange or otherwise), (A) on any Exchange(s) in securities that comprise 20 per cent or more of the level of the relevant Index, if in the determination of the Calculation Agent, such suspension or limitation is material. For the purpose of determining whether such suspension or limitation is material, if trading in a security included in the Index is suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that security relative to (y) the overall level of the Index, in each case immediately before that suspension or limitation; or (B) on any Related Exchange in any options contracts or futures contracts or other derivatives contracts relating to the relevant Index. In any event, a limitation on the hours and number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange, but a limitation on trading imposed during the course of the day by reason of movements in price otherwise exceeding levels permitted by the relevant exchange may, if so determined by the Calculation Agent, constitute a Market Disruption Event.

- (b) Adjustments to Index. The Issuer shall give notice as soon as practicable to the Holders in accordance with General Condition 4 of any determination made by the Calculation Agent pursuant to paragraphs (i), (ii), (iii) or (iv) below.
- (i) If the Index is: (A) not calculated and announced by the Index sponsor but is calculated and published by a successor to the Index Sponsor (the “**Successor Sponsor**”) acceptable to the Calculation Agent; or (B) replaced by a successor index using in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index, then (in either case) the Index will be deemed to be the index so calculated and announced by such Successor Sponsor or that successor index, as the case may be.
- (ii) If: (A) on or prior to the Valuation Date, the occurrence of a Stop Loss Event, Issuer Call Date, or the occurrence of a Re-Financing Event or occurrence of the Knock Out Event as the case may be, the Index Sponsor or, if applicable, the Successor Sponsor, makes a material change in the formula for or the method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in constituent securities and other routine events); or (B) on the Valuation Date, the occurrence of a Stop Loss Event, Issuer Call Date, or the occurrence of a Re-Financing Event or occurrence of the Knock Out Event the Index Sponsor or, if applicable the Successor Sponsor, fails to calculate and/or publish the Index; then (in either case) the Calculation Agent shall determine the Final Reference Price, the Stop Loss Termination Reference Price, or the Termination Reference Price, the Reference Price or the Knock Out Reference Price using, in lieu of a published level for the Index on the Valuation Date, the Issuer Call Date or during the Execution Valuation Period as the case may be, the level for the Index as determined by the Calculation Agent in accordance with the formula for and method of calculating the Index last in effect prior to the change or failure, but using only those securities that comprised the Index immediately prior to the change or failure (other than those securities that have since ceased to be listed on the Exchange or any other exchange on which the Shares are listed) or in the case of a material modification of the Index only, the Calculation Agent shall deem such modified Index to be the Index so calculated and announced or to terminate the Securities by giving notice in accordance with General Condition 4.
- (iii) If, at any time, any of the events specified in (A) to (H) below occurs and the Index Sponsor or, if applicable, the Successor Sponsor, has not in the opinion of the Calculation Agent made an appropriate adjustment to the level of the Index in order to account fully for such event, notwithstanding that the rules published or applied by the Index Sponsor or, if applicable, the Successor Sponsor, pertaining to the Index have been applied, the Calculation Agent shall make such adjustment to the level of the Index as it considers appropriate in order to so account. (A) a distribution or dividend to existing holders of the shares comprising the Index (the “**Shares**”) of: (aa) Shares; or (bb) other share capital or securities granting the right to payment of dividends and/or the proceeds of liquidation of the issuer of the Shares equally or proportionately with such payments to holders of Shares or (cc) any other type of securities, rights or warrants or other assets, in any case for payment (in cash or otherwise) at less than the prevailing market price; (B) a free distribution or dividend of any Shares to existing holders by way of bonus, capitalisation or similar issue; (C) an extraordinary dividend; (D) any cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (E) any non-cash dividends declared on the Shares at a time when the relevant issuer has not previously declared or paid dividends on such Shares for the prior four quarterly periods; (F) any other extraordinary cash or

non-cash dividend on, or distribution with respect to, the Shares which is, by its terms or declared intent, declared and paid outside the normal operations or normal dividend procedures of the relevant issuer, provided that, in all cases, the related ex-dividend date occurs during the period from and including the Issue Date up to but excluding the Valuation Date, Issuer Call Date or the Knock Out Event as the case may be; (G) a distribution of cash dividends on the Shares equal to or greater than 8 per cent. per annum of the then current market value of the Shares; (H) any other similar event having dilutive or concentrative effect on the theoretical value of the Shares.

- (iv) The Issuer reserves the right to make adjustments or to distribute to the Holders any rights in connection with the Securities as it reasonably believes are appropriate in circumstances where an event or events occur which the Issuer (in its absolute discretion and notwithstanding any adjustments previously made to the Securities) believes should in the context of the issue of Securities and its obligations hereunder, give rise to such adjustment or distribution, provided that such adjustment is considered by the Calculation Agent to be appropriate generally (without considering the individual circumstances of any Holder or the tax or other consequences of such adjustment in any particular jurisdiction) or is required to take account of provisions of the laws of the relevant jurisdiction or the practices of the Exchange.
- (c) The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

“Standard Currency” means unless otherwise specified in the definition of the relevant Series in the applicable Final Terms, the lawful currency of Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Luxembourg, Malta, the Netherlands, New Zealand, Norway, Portugal, Singapore, Slovenia, Spain, Sweden, Switzerland, Taiwan, the United Kingdom and the United States, or such other currency as determined by the Calculation Agent at its sole and absolute discretion from time to time;

“Stop Loss Event” occurs if, unless otherwise specified in the definition of the relevant Series in the applicable Final Terms, the high ask Reference Asset Price (which shall be deemed to be a monetary value in the Financing Level Currency) at any time on any Trading Day, from (and including) the Issue Date, and other than at the Stop Loss Reset Time or a time at which there is, in the determination of the Calculation Agent, a Market Disruption Event, is greater than or equal to the Stop Loss Price. If no such price is available the price will be determined by the Calculation Agent in its absolute discretion;

“Stop Loss Price” means an amount calculated on each Stop Loss Reset Date at the Stop Loss Reset Time (which shall be deemed to be a monetary value in the Financing Level Currency), subject to adjustment in accordance with Product Condition 4, determined by the Calculation Agent in its sole and absolute discretion, as:

- (a) the Current Financing Level as determined on the current Stop Loss Reset Date; minus

(b) the Current Stop Loss Premium on the current Stop Loss Reset Date.

The Stop Loss Price shall be rounded up in the manner specified in the applicable Final Terms. The Stop Loss Price on the Issue Date shall be the amount specified as such in the definition of the relevant Series in the applicable Final Terms;

“Stop Loss Reset Date” means, unless otherwise specified in the applicable Final Terms, (a) the day of each calendar month specified as such in the definition of the relevant Series in the applicable Final Terms, provided that if such day is not a Business Day and a Securities Trading Day, the Stop Loss Reset Date will be the next following Business Day which is also a Securities Trading Day or (b) any ex-dividend day of the underlying components, at the determination of the Calculation Agent;

“Stop Loss Reset Time” means the regular weekday opening time of the Securities Exchange;

“Stop Loss Termination Date” means the first Trading Day on which the Stop Loss Event occurs;

The Stop Loss Termination Reference Price will be at most the highest level of the Reference Asset Price during the Stop Loss Termination Valuation Period;

“Stop Loss Termination Valuation Period” means the Stop Loss Termination Date and the following Trading Day or, if in the sole and absolute discretion of the Calculation Agent the Stop Loss Event occurs at the Valuation Time on the Stop Loss Termination Date, the two Trading Days immediately following the Stop Loss Termination Date, in either case excluding for this purpose any day on which a Market Disruption Event occurs;

“Termination Reference Price” means an amount (which shall be deemed to be a monetary value in the Financing Level Currency) equal to the Reference Asset Price on the Exchange at the Valuation Time, adjusted for any reasonable market-making spreads, on the Issuer Call Date as determined by or on behalf of the Calculation Agent without regard to any subsequently published correction;

“Trading Day” means any day that is (or, but for the occurrence of a Market Disruption Event, would have been) a trading day on each Exchange and/or Related Exchange other than a day on which trading on the Exchange or Related Exchange is scheduled to close prior to the regular weekday closing time, in each case, as determined by the Calculation Agent;

“Trading Hours” means as regards each Exchange its regular scheduled opening hours on the Rollover Date;

In that case (a) the last day of the Relevant Number of Trading Days shall be deemed to be the Valuation Date (regardless of the Market Disruption Event); and (b) the Calculation Agent shall determine the Final Reference Price having regard to the then prevailing market conditions, the last reported Reference Asset Price on the Exchange and such other factors as the Calculation Agent determines to be relevant;

“**Valuation Time**” means the time specified as such in the definition of the relevant Series in the applicable Final Terms, or such other time as the Calculation Agent may determine in its absolute discretion and which the Issuer will notify to Holders in accordance with General Condition 4; and

“**Wge**” means the Dutch Securities Giro Transfer Act (*Wet giraal effectenverkeer*).

Terms in capitals which are not defined in these Product Conditions shall have the meanings ascribed to them in the General Conditions.

2. FORM

- (a) **Global Form.** Except in the case of Securities issued in dematerialised form, the Securities are represented by a global security (the “**Global Security**”) which will be deposited with the Clearing Agent and will be transferable only in accordance with the applicable law and the rules and procedures of the relevant Clearing Agent through whose systems the Securities are transferred. Each person (other than another Clearing Agent) who is for the time being shown in the records of the relevant Clearing Agent or of a participant of such Clearing Agent, as applicable, as the owner of a particular unit quantity of the Securities (in which regard any certificate or other document issued by the relevant Clearing Agent as to the unit quantity of the Securities standing to the credit of the account of any person shall be conclusive and binding for all purposes except in the case of manifest error) shall be treated by the Issuer and each Agent as the holder of such unit quantity of the Securities (and the term “**Holder**” shall be construed accordingly) for all purposes, other than with respect to any payment and / or delivery obligations, the right to which shall be vested as regards the Issuer and the Agents, solely in the bearer of the Global Security.
- (b) **Dematerialised Form.** Certain Securities will, where required or permitted by the rules and procedures of the Clearing Agent, be issued in dematerialised form and will be registered in the book-entry system of the Clearing Agent. Title to the Securities will pass by transfer between accountholders at the Clearing Agent perfected in accordance with the legislation, rules and regulations applicable to and/or issued by the Clearing Agent that are in force and effect from time to time (the “**Rules**”). Accordingly, in these Conditions, the term “**Holder**” means (i) a person in whose name a Security is registered in the book-entry settlement system of the relevant Clearing Agent (other than Euroclear Netherlands) or, (ii) in the case Euroclear Netherlands is the relevant Clearing Agent, any person who according to the records of an Admitted Institution is a co-owner (*deelgenoot*), as defined in the Wge, of the relevant collective deposit (*verzameldepot*) of Securities, or (iii) any other person recognised as a holder of Securities pursuant to the Rules.
- (c) **SIX SIS Ltd as Clearing Agent.** If SIX SIS Ltd is specified as the Clearing Agent, Securities will, as specified in the applicable Final Terms, be issued in the form of (i) dematerialised securities (the “**Dematerialised Securities**”) or (ii) a bearer permanent Global Security and, in either case, will be transformed into intermediated securities (the “**Intermediated Securities**”) in accordance with article 6 of the Swiss Federal Intermediated Securities Act (the “**FISA**”).

The Intermediated Securities will be created (i) by deposit of a Global Security with the Clearing Agent, acting as custodian as defined in article 4 FISA (the “**Custodian**”), or registration of Dematerialised Securities in the main register of the Clearing Agent, acting as Custodian, and (ii) the Clearing Agent, acting as Custodian, crediting the respective rights to securities accounts of one or more of its participants with the Clearing Agent in accordance with articles 4 and 6 FISA. For each issuance of Securities in the form of Dematerialised Securities, the Clearing Agent, acting as Custodian, will maintain the main register as defined

in article 6 para. 2 FISA which is available to the public under <https://www.sec.sisclear.com/sec/cm/index/custody-settlement/mainregister.htm>.

Title to the Intermediated Securities is construed and will pass in accordance with the legislation, in particular the FISA, rules and regulations applicable to and/or issued by the Clearing Agent, acting as Custodian, and any other custodian, if any, that are in force and effect from time to time (the “**Rules**”). Accordingly, in these Conditions, the term “**Holder**” means any person recognised as a holder of the Intermediated Securities pursuant to the Rules.

The Holders shall at no time have the right to effect or demand (i) the retransformation of the Intermediated Securities into, and the delivery of, Dematerialised Securities in the case of Dematerialised Securities being the basis for the creation of Intermediated Securities, or (ii) the conversion of the Dematerialised Securities or the Global Security into definitive Securities.

3. RIGHTS AND PROCEDURES.

- (a) **Exercise.** Provided no Stop Loss Event has occurred, and notwithstanding notice of an Issuer Call, the Securities are exercisable on any Exercise Date by delivery of a Notice to the Paying Agent by the Holder (or its bank on behalf of the Holder) prior to the Exercise Time on an Exercise Date. If such Notice is received by the Paying Agent before the Exercise Time on any Business Day, the Exercise shall be deemed to have taken place on such Business Day. If such Notice is received by the Paying Agent after the Exercise Time, the Exercise shall be deemed to have taken place on the following Business Day. Any Exercise will be subject to the consequences of a Hedging Disruption Event which occurs prior to or on a Valuation Date.
- (b) **Stop Loss Event.** Following a Stop Loss Event, the Securities will terminate automatically. A Stop Loss Event will override an Issuer Call and/or due Exercise if the Stop Loss Event occurs prior to or on an Issuer Call Date or Valuation Date as the case may be.
- (c) **Issuer Call.** Provided no Stop Loss Event has occurred, the Issuer may terminate the Securities, in whole but not in part, on any Business Day by giving Holders notice of its intention to terminate the Securities. If such notice is given to the Clearing Agent(s) before the Exercise Time on any Business Day, such Business Day shall be the Issuer Call Date. If such notice is given to the Clearing Agent(s) after the Exercise Time on any Business Day, the following Business Day shall be the Issuer Call Date. Any such notice shall be given in accordance with the provisions of General Condition 4, and shall specify the Issuer Call Date.
- (d) **Cash Settlement.** Each Security upon due Exercise, termination pursuant to an Issuer Call or following a Stop Loss Event entitles its Holder to receive, from the Issuer on the Settlement Date either:
 - (i) the Exercise Cash Amount, following a valid Exercise; or
 - (ii) the Issuer Call Cash Amount, following a valid Issuer Call; or
 - (iii) the Stop Loss Cash Amount, following a Stop Loss Event.
- (e) **Payment Day.** If the date for payment of any amount in respect of the Securities is not a Payment Day, the Holder shall not be entitled to payment until the next following Payment Day and shall not be entitled to any interest or other payment in respect of such delay.

- (f) General. In the absence of gross negligence or wilful misconduct on its part, none of the Issuer, the Calculation Agent nor any Agent shall have any responsibility for any errors or omissions in the calculation of any Cash Amount.
- (g) Notice. All payments following due Exercise (as referred to in Product Condition 3(a) above) shall be subject to the delivery of a notice (a “**Notice**”) to the Paying Agent. The form of the Notice may be obtained from www.abnamromarkets.nl. The form of Notice should be completed by the Holder's account bank or custodian bank.

A Notice shall:

- (i) specify the number of Securities to which it relates;
 - (ii) specify the number of the account with the Clearing Agent to be debited with the Securities to which it relates; and
 - (iii) specify the number of the account with the Clearing Agent to be credited with the Cash Amount (if any) for such Securities.
- (h) Settlement. The Issuer shall pay or cause to be paid the Cash Amount (if any) for each Security with respect to which a Notice has been delivered to the account specified in the relevant Notice (if applicable) for value on the Settlement Date.
 - (i) Determinations. Failure properly to complete and deliver a Notice may result in such notice being treated as null and void. Any determination as to whether a Notice has been properly completed and delivered shall be made by the Paying Agent and shall be conclusive and binding on the Issuer and the relevant Holder. Subject as set out below, any Notice so determined to be incomplete or not in proper form, or which is not sent to the Paying Agent, shall be void.

If such Notice is subsequently corrected to the satisfaction of the Paying Agent, it shall be deemed to be a new Notice submitted at the time such correction is delivered to the Paying Agent.

Any Security with respect to which a Notice has not been duly completed and delivered in the manner set out above by the time specified in this Product Condition 3 shall become void.

The Paying Agent shall use its best efforts promptly to notify the relevant Holder (via its account bank or custodian bank) if it has determined that a Notice is incomplete or not in proper form. In the absence of gross negligence or wilful misconduct on its part, neither the Issuer nor the Paying Agent shall be liable to any person with respect to any action taken or omitted to be taken by it in connection with such determination or the notification of such determination to a Holder.

- (j) Delivery of a Notice. Delivery of a Notice by or on behalf of a Holder shall be irrevocable with respect to the Securities specified and no Notice may be withdrawn after receipt by the Paying Agent as provided above. After the delivery of a Notice, the Securities which are the subject of such notice may not be transferred.
- (k) Exercise and Settlement Risk. Exercise and settlement of the Securities is subject to all applicable laws, regulations and practices in force at the relevant time and neither the Issuer nor any Agent shall incur any liability whatsoever if it is unable to effect the transactions contemplated, after using all reasonable efforts, as a result of any such laws, regulations or practices. Neither the Issuer nor the Agents shall under any circumstances be liable for any

acts or defaults of any Clearing Agent in relation to the performance of its duties in relation to the Securities.

4. ADJUSTMENTS

Market Disruption. The Issuer shall as soon as reasonably practicable under the circumstances notify the Holders in accordance with General Condition 4 if the Calculation Agent determines that a Market Disruption Event has occurred. A “**Market Disruption Event**” means:

- (a) **Price Source Disruption.** The failure by the Exchange to announce or publish the Reference Asset Price (or the information necessary for determining such price), or the temporary or permanent discontinuance or unavailability of such price by the Exchange on the Valuation Date, the Issuer Call Date or on any other relevant date following the occurrence of a Stop Loss Event; or
- (b) **Trading Suspension.** The material suspension of trading on the Exchange or any Related Exchange; or
- (c) **Disappearance of Price.** The failure of trading to commence, or the permanent discontinuation of trading of the Reference Asset on the Exchange; or
- (d) **Material Change in Formula.** The occurrence, since the Issue Date, of a material change in the basis for (including but not limited to the quantity, quality or currency), or method of, calculating the Reference Asset Price; or
- (e) **Material Change in Content.** The occurrence, since the Issue Date, of a material change in the content or composition of the Reference Asset Price; or
- (f) **De Minimis Trading.** The number of contracts traded on the Exchange with respect to the Reference Asset is such that the Issuer declares that its ability to enter into hedging transactions with respect to the Reference Asset has been impaired due to a lack of, or a material reduction in, trading in the Reference Asset on the Exchange; or
- (g) **Tax Disruption.** The imposition of, change in, or removal of, an excise, severance, sales, use, value-added, transfer, stamp, documentary, recording or similar tax on, or measured by reference to, the Reference Asset (other than a tax on, or measured by reference to, overall gross or net income) by any government or taxation authority after the Issue Date, if the direct effect of such imposition, change or removal is to raise or lower the Reference Asset Price on the Valuation Date and/or on each of the three Trading Days following the Valuation Date and/or the Issuer Call Date and/or on any other relevant date following the occurrence of a Stop Loss Event, from what it would have been without that imposition, change or removal; or
- (h) **Trading Limitation.** The material limitation imposed on trading in the Reference Asset with respect to it or any contract with respect to it on any exchange or principal trading market; or
- (i) **Moratorium.** A general moratorium is declared in respect of banking activities in the country in which the Exchange or Related Exchange is located; or
- (j) **Other Events.** Any other event similar to any of the above, which could make it impracticable or impossible for the Issuer to perform its obligations in relation to the Securities.

The Issuer may make adjustments to the Conditions in order to account for any such event if it considers it appropriate to do so. The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Holder of any determination made by it pursuant to this Product Condition 4 on or before the date of receipt of such request. The Calculation Agent shall make available for inspection by Holders copies of any such determinations. In making any such determinations and calculations in respect of the Securities, the Calculation Agent shall act at all times in good faith and a commercially reasonable manner.

5. EFFECT OF FINAL TERMS

The Final Terms applicable to any Series of Securities may specify amendments to these Product Conditions in so far as they apply to that Series. Notwithstanding the foregoing, consideration will be given as to whether such amendments constitute "significant new factors" and consequently trigger the need for a supplement to the Base Prospectus (as defined in the Final Terms) under Article 16 of Directive 2003/71/EC.
