- The execution and/or any delay in the execution (or non-completion) of the approved proposed transfers of a substantial part of the business activities of RBS N.V. to RBS may have a material adverse effect on the Group and may also negatively impact the value of securities issued by RBS Holdings and RBS N.V..
- Lack of liquidity is a risk to the Group's business and there is a risk that the Group's ability to access sources of liquidity and funding could become constrained.
- The financial performance of the Group has been materially affected by deteriorations in borrower and counterparty credit quality and it may continue to be impacted by any further deteriorations, including as a result of prevailing economic and market conditions, and legal and regulatory developments.
- The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by depressed asset valuations resulting from poor market conditions.
- Changes in interest rates, foreign exchange rates, credit spreads, bond, equity and commodity prices, basis, volatility and correlation risks and other market factors have significantly affected and will continue to affect the Group's business and results of operations.
- The Group's borrowing costs, its access to the debt capital markets and its liquidity depend significantly on its credit ratings.

- The value of certain financial instruments recorded at fair value is determined using financial models incorporating assumptions, judgements and estimates that may change over time or may ultimately not turn out to be accurate.
- The Group operates in markets that are highly competitive and its business and results of operations may be adversely affected.

- Operational risks are inherent in the Group's businesses.
- The Group's operations have inherent reputational risk.
- The recoverability and regulatory capital treatment of certain deferred tax assets recognised by the Group depends on the Group's ability to generate sufficient future taxable profits and there being no adverse changes to tax legislation, regulatory requirements or accounting standards.
- Risks relating to the Asset Protection Scheme and the Contracts.
- The extensive governance, asset management and information requirements under the Scheme Conditions, which the Group is required to comply with, or to ensure that RBS can comply with, pursuant to the Contracts may have an adverse impact on the Group. In addition, any changes or modifications to the Scheme Conditions may have a negative impact on the expected benefits of the Contracts and may have an adverse impact on the Group.
- Any changes to the expected regulatory capital treatment of the Contracts may negatively impact the Group's capital position.
- Fulfilling the disclosure obligations of the Group under the Contracts may give rise to litigation and regulatory risk.
