JPMorgan Chase Bank, N.A. is one of the principal bank subsidiaries of JPMorgan Chase & Co. JPMorgan Chase Bank, N.A.'s activities are organised and integrated with the businesses of JPMorgan Chase & Co.

4. Status of Securities and of any guarantee

- (i) The Securities are unsecured and unsubordinated obligations of the Issuer. There are no cross default or negative pledge provisions in respect of the Securities.
- (ii) The guarantee of JPMorgan Chase Bank, N.A. is an unsecured and unsubordinated general obligation of JPMorgan Chase Bank, N.A. and not of any of its affiliates. The guarantee: (a) is not a savings account or a deposit of JPMorgan Chase Bank, N.A. or any bank or non-bank subsidiary of JPMorgan Chase Bank, N.A.; and (b) will rank *pari passu* with all other unsecured and unsubordinated indebtedness of JPMorgan Chase Bank, N.A. except obligations, including U.S. domestic deposits of JPMorgan Chase Bank, N.A., that are subject to any priorities or preferences by law.

5. Issue Price, specified denomination and form of the Securities

- (i) The issue price shall be 100 per cent. of the principal amount per Security (being U.S.\$ 1,000).

Warning: The issue price may be more than (a) the market value of the Securities as at the Initial Valuation Date (being 4 October 2010) or the issue date or any other date and (b) the amount, if any, at which J.P. Morgan Securities Ltd. (as dealer) or any other person is willing to purchase the Securities in the secondary market, and may take into account amounts (I) with respect to commissions relating to the issue and sale of the Securities and (II) relating to the hedging of the Issuer's obligations under the Securities. If you are intending to purchase Securities through an intermediary (including by way of introducing broker) you should request details of any such commission or fee payment from such intermediary before making any purchase.

In such case, an early redemption event shall be deemed to have occurred on such Valuation Date, and unless the Securities have previously been redeemed or purchased and cancelled in accordance with the Conditions, the Issuer shall redeem each Security (of the specified denomination of U.S.\$ 1,000) on the early redemption date in respect of such Valuation Date and the redemption amount in respect of each Security (of the specified denomination of U.S.\$ 1,000) shall be U.S.\$ 1,070.

For the avoidance of doubt, determinations made on monthly Valuation Dates shall be in order to determine whether an early redemption event has occurred. There shall be ten Valuation Dates in total.

- (iv) The Securities may be terminated at the option of the Issuer prior to the maturity date for taxation reasons or for reasons of illegality under the Conditions of the Securities. See General Conditions 17 and 18 of the "General Conditions" in the Base Prospectus incorporated by reference in this Prospectus. In such case, the amount payable on early termination shall be, for each Security, an amount determined by the Calculation Agent as the fair market value of the Security taking into account all relevant factors (but ignoring the event which resulted in such termination) less all costs incurred by the Issuer or any affiliate in connection with such early termination, as determined by the Calculation Agent in good faith and in a commercially reasonable manner.

11. Key Risks

The risks described below are provided to highlight certain of the essential categories of risk only, and are by no means comprehensive. You should read "Risk Factors" in this Prospectus for a fuller description of certain risks in relation to the Securities.

Investing in the Securities puts your capital at risk. You may lose some or all of your investment.

(i) *Risk that the Securities are not suitable or appropriate for you*

The Securities are structured products which include embedded derivatives, and before deciding to purchase Securities you must understand their terms including (a) the potential risk of the loss of some or all of your investment and (b) the relationship of the potential payout on the Securities to the performance of the underlying Reference Asset, including the characteristics and risks inherent in the Reference Asset.

You should reach an investment decision only after careful consideration, with your own tax, accounting, legal and other professional advisers, of the suitability of the Securities in the light of your particular financial circumstances and investment objectives and risk profile, and the information set forth in this Prospectus.

You should not invest in the Securities unless you can withstand a loss of all of your investment.

(ii) *Risk that the Issuer and Guarantor may not make all payments under the Securities*

It is possible that the Issuer and Guarantor could go bankrupt or otherwise be unable to make the payments owing under the Securities. If that happens, you will not have the protection of any deposit insurance scheme and will not be secured, and may lose some or all of your money.

(iii) *Risk from having no interest in the Reference Asset*

You should be aware that holders of Securities will have no interest whatsoever in the underlying Reference Asset, and the Issuer may apply your purchase moneys for any corporate purposes. Therefore, if the Issuer and Guarantor fail to make the required payments under the Securities, you will not be able to claim against any assets.

(iv) *Risk as to the market value and payout of the Securities*

Investors in the Securities will be exposed to the performance of the Reference Asset: the past performance of the Reference Asset is not indicative of future performance. The market value of the Securities may be highly volatile and may be adversely affected by a number of factors, such as (a) the credit rating of JPMorgan Chase Bank, N.A. or JPMorgan Chase & Co. (which credit ratings may move independently of each other), (b) the performance of the Reference Asset and (c) various other factors.

(v) *Risk that there will not be a liquid secondary market into which the Securities may be sold*

An active trading market for the Securities is not likely to develop: the Securities may have no liquidity or the market for the Securities may be limited and this may adversely impact their value or the ability of a Holder of the Securities to sell them.

(vi) *Risk factors relating to the Issuer and the Guarantor*

Certain factors may affect the ability of the Issuer and Guarantor to fulfil their respective payment or other obligations under the Securities, such as the following:

- JPMorgan Chase's results of operations have been, and may continue to be, adversely affected by U.S. and international financial market and economic conditions
- If JPMorgan Chase does not effectively manage its liquidity, its business could be negatively

affected

- The financial condition of JPMorgan Chase's customers, clients and counterparties, including other financial institutions, could adversely affect JPMorgan Chase
- Concentration of credit and market risk could increase the potential for significant losses
- JPMorgan Chase's framework for managing risks may not be effective in mitigating risk and loss to it
- JPMorgan Chase's operations are subject to risk of loss from unfavourable economic, monetary, political, legal and other developments in the United States and around the world
- JPMorgan Chase's power generation and commodities activities are subject to extensive regulation, potential catastrophic events and environmental risks and regulation that may expose it to significant cost and liability
- JPMorgan Chase relies on its systems, employees and certain counterparties, and certain failures could materially adversely affect JPMorgan Chase's operations
- JPMorgan Chase operates within a highly regulated industry and its business and results are significantly affected by the laws and regulations to which JPMorgan Chase is subject
- JPMorgan Chase faces significant legal risks, both from regulatory investigations and proceedings and from private actions brought against it
- There is increasing competition in the financial services industry which may adversely affect JPMorgan Chase's results of operations
- JPMorgan Chase's acquisitions and the integration of acquired businesses may not result in all of the benefits anticipated
- Damage to JPMorgan Chase's reputation could damage its businesses
- JPMorgan Chase's ability to attract and retain qualified employees is critical to the success of its business and failure to do so may materially adversely affect JPMorgan Chase's performance
- JPMorgan Chase's financial statements are based in part on assumptions and estimates which, if wrong, could cause unexpected losses in the future
- JPMorgan Chase Bank, N.A. is affected by risks affecting its parent company
- The Issuer is partly dependent on other J.P. Morgan affiliates

(vii) ***Conflicts of Interest***

J.P. Morgan affiliates are subject to certain conflicts of interest between their own interests and those of Holders of the Securities. You should read "Conflicts of Interest" below.

12. Calculation Agent

The Calculation Agent shall be J.P. Morgan Securities Ltd. The Calculation Agent has broad discretion in certain circumstances to make certain determinations, including to make adjustments to the terms of the Securities and/or to cause early redemption of the Securities, any of which may be adverse to Holders of the Securities.

13. Listing, admission to trading, clearance and rating

- (i) Application has been made for the Securities to be listed on the Official List of the Luxembourg Stock Exchange and admitted to trading on the Regulated Market of the Luxembourg Stock Exchange (which is regulated by Directive 2004/39/EC on Markets in Financial Instruments).

- (ii) The Securities will be cleared on the issue date through Euroclear and Clearstream, Luxembourg.
- (iii) The Securities will not be rated.

14. Practical Information

- (i) You can find further information on the Issuer and the Guarantor in this Prospectus (including the information incorporated by reference in "Documents Incorporated by Reference" below). The documents incorporated by reference will be available on the Luxembourg Stock Exchange's website (www.bourse.lu).

You can find the SEC filings of JPMorgan Chase & Co. (the parent company of the Guarantor) on the website maintained by the SEC at <http://www.sec.gov> and also on JPMorgan Chase & Co.'s investor relations website at <http://investor.shareholder.com/jpmorganchase/>. Unless specifically incorporated by reference into this Prospectus, JPMorgan Chase & Co.'s filings with the SEC shall not be deemed to be part of this Prospectus.

- (ii) You can find further information on the Reference Asset in this Prospectus (including the information incorporated by reference) and at www.bloomberg.com and http://us.ishares.com/product_info/fund/overview/EEM.htm (the information appearing on such web-sites does not form part of this Prospectus).

RISK FACTORS

Investment in these Securities involves substantial risks: Investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Securities. Investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Guarantor, or the Dealer. Investors should consider the suitability of the Securities as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Investors should consider carefully all the information set forth in this Prospectus along with all the information incorporated by reference into this Prospectus, including, for the avoidance of doubt, the risk factors that may affect the relevant Issuer's and Guarantor's ability to fulfil their respective obligations under the Securities, as specified in the table set out in the "Documents Incorporated by Reference" section.

1. **"Fundamental risks" of the potential loss of investment and potential lack of suitability in relation to an investment in the Securities**

1.1 **Investors in Securities may receive back less than the original invested amount**

Investors in the Securities may lose up to the entire value of their invested amount in the Securities as a result of the occurrence of any one or more of the following events:

- (i) the Issuer and the Guarantor of the Securities are subject to insolvency proceedings or some other event impairing the ability of each to meet its obligations under the Securities;
- (ii) due to the performance of the Reference Asset, the redemption amount payable under the terms and conditions of the Securities is less than the original invested amount;
- (iii) the investor seeks to sell the Securities prior to their scheduled redemption, and the sale price of the Securities in the secondary market is less than the investor's initial invested amount; and
- (iv) the Securities are subject to certain adjustments in accordance with the terms and conditions of such Securities that may result in the scheduled amount to be paid being reduced to or being valued at an amount less than an investor's initial invested amount.

The obligations of the Issuer and the Guarantor of the Securities are not secured. Notwithstanding that the Securities are linked to the performance of the Reference Asset, investors in the Securities do not have and shall not receive any rights in respect of the Reference Asset and shall have no right to call for the Reference Asset to be delivered to them. Neither the Issuer nor the Guarantor of the Securities shall be required to hold the Reference Asset.

1.2 **The Securities may not be a suitable investment for all investors**

Each investor in the Securities must determine the suitability of such investment in light of the investor's own circumstances. In particular, each investor should:

- (i) have sufficient knowledge and experience (if necessary, in consultation with the investor's own legal, tax, accountancy, regulatory, investment or other professional advisers) to evaluate the Securities, the merits and risks of investing in the Securities, all information contained or incorporated by reference into this Prospectus;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of the investor's particular financial situation, an investment in the Securities and the impact the Securities will have on the investor's overall investment portfolio;

- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Securities, including where the settlement currency is different from the currency in which such investor's principal financial activities are principally denominated;
- (iv) understand thoroughly (if necessary, in consultation with the investor's own legal, tax, accountancy, regulatory, investment or other professional advisers) the terms of the Securities and be familiar with any relevant financial markets;
- (v) understand thoroughly (if necessary, in consultation with the investor's own legal, tax, accountancy, regulatory, investment or other professional advisers) the nature of the Reference Asset and how the performance thereof may affect the pay-out and value of the Securities; and
- (vi) be able to evaluate (either alone or with the help of a financial adviser and/or other professional adviser) possible scenarios for economic, interest rate and other factors that may affect the investment and the investor's ability to bear the applicable risks.

The Securities are complex financial instruments and may include embedded derivatives. An investor should not invest in Securities unless it has the expertise (either alone or with a financial adviser) to evaluate how such Securities will perform under changing conditions, the resulting effects on the value of those Securities and the impact that such Securities will have on the investor's overall investment portfolio.

None of the Issuer, Guarantor, Dealer or any J.P. Morgan affiliate has given, and none of them will give, to any investor in Securities (either directly or indirectly) any assurance or guarantee as to the merits, performance or suitability of such Securities, and the investor should be aware that the Issuer is acting as an arm's-length contractual counterparty and not as an advisor or fiduciary.

2. Risk factors that are generic to Securities to be issued under the Programme

2.1 The Issue Price of the Securities may be more than the market value of such Securities as at the Issue Date and the price of the Securities in secondary market transactions

The Issue Price in respect of the Securities may be more than the market value of the Securities as at the Issue Date, and more than the price, if any, at which the Dealer or any other person is willing to purchase such Securities in secondary market transactions. In particular, the Issue Price in respect of the Securities may take into account amounts with respect to commissions relating to the issue and sale of such Securities and amounts relating to the hedging of the Issuer's obligations under such Securities.

2.2 The market value and the amount payable on redemption of the Securities may be adversely affected by a number of factors, and the price at which a Holder of such Securities may be able to sell such Securities prior to redemption may be at a substantial discount to the market value of such Securities on the Issue Date, and a Holder of the Securities may suffer a loss of some or up to all of the entire invested amount of the Securities on redemption

- (i) *The amount payable on redemption of the Securities, and the market value of the Securities at any time, may be less than the original invested amount*

The return on the Securities is linked to the value of the Reference Asset. The Securities are not principal protected instruments. The Securities do not pay interest and the investor may lose some or substantially all of the invested amount to purchase the Securities. The price at which an investor will be able to sell Securities to the Issuer or its affiliates prior to the maturity date, if at all, may be at a substantial discount from the invested amount to purchase the Securities, even in cases where value of the Reference Asset has appreciated since the Issue Date.

INVESTORS MUST REVIEW THIS PROSPECTUS TO ASCERTAIN HOW THE PERFORMANCE OF THE REFERENCE ASSET WILL AFFECT THE AMOUNT PAYABLE ON THE SECURITIES.

- (ii) ***The market value of the Securities is expected to be affected, in part, by the credit rating of JPMorgan Chase Bank, N.A. or JPMorgan Chase & Co.***

The value of the Securities is expected to be affected, in part, by investors' general appraisal of the creditworthiness of JPMorgan Chase Bank, N.A. or JPMorgan Chase & Co. Such perceptions may be influenced by the ratings accorded to outstanding securities of JPMorgan Chase Bank, N.A. or JPMorgan Chase & Co. by well-recognised rating agencies, such as Moody's Investors Service Inc. and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. A reduction in the rating, if any, accorded to outstanding securities of JPMorgan Chase Bank, N.A. or JPMorgan Chase & Co., by one of these rating agencies could result in a reduction in the trading value of the Securities.

- (iii) ***The credit rating of JPMorgan Chase Bank, N.A. and JPMorgan Chase & Co. may move independently of each other***

JPMorgan Chase & Co. is the holding company of JPMorgan Chase. As such, JPMorgan Chase & Co. and its subsidiaries (other than JPMorgan Chase Bank, N.A.) are generally permitted to undertake a wider range of activities than JPMorgan Chase Bank, N.A. and its subsidiaries. As a result, while the credit rating of JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. are closely related, those credit ratings are usually different and, in the event of any change in those credit ratings, those ratings may move independently of each other. JPMorgan Chase Bank, N.A. is likely to be rated more highly than JPMorgan Chase & Co. but investors should check the relevant rating at the time of considering any investment in the Securities.

The creditworthiness of JPMorgan Chase Bank, N.A. is more likely to affect the trading value of Securities issued by JPMSP, which are guaranteed by JPMorgan Chase Bank, N.A.

- (iv) ***The market value of the Securities at any time is dependent on other matters in addition to the credit risk of the Issuer and the Guarantor and the performance of the Reference Asset***

The market value of the Securities at any time will be affected by a number of factors independent of the creditworthiness of the Issuer, the Guarantor and the performance of the Reference Asset, including:

- (a) market interest and yield rates;
- (b) the time remaining to the maturity date; and
- (c) numerous other economic, political and other factors.

The amount payable in respect of Securities at any time prior to redemption is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and such amount will reflect, among other things, a "time value" for the Securities. The "time value" of the Securities will depend partly upon the length of the period remaining to final redemption and expectations concerning the value of the Reference Asset.

Before selling the Securities, Holders of the Securities should carefully consider, among other things, (a) the trading price of the Securities, (b) the value and volatility of the Reference Asset, (c) the time remaining to the maturity date of the Securities, (d) the probable range of amounts payable on the Securities, (e) any changes in interim interest rates, (f) any changes in currency

exchange rates, (g) the depth of the market or liquidity of the Reference Asset and (h) any related transaction costs.

(v) ***The market value of Securities may be highly volatile***

Holders of the Securities are exposed to the performance of the Reference Asset. The price, performance or investment return of the Reference Asset may be subject to sudden and large unpredictable changes over time and this degree of change is known as "volatility". The volatility of the Reference Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of the Securities.

(vi) ***The amount payable on redemption of the Securities may be less than the purchase price***

The pay-out formula of the Securities does not provide for full "principal protection". Investors in the Securities may risk losing virtually their entire investment if the value of the Reference Asset does not move in the anticipated direction and may still be subject to loss of some or all of their investment in the circumstances described in Risk Factor 1.1 (*Investors in Securities may receive back less than the original invested amount*) above and may not receive any value for the time for which their money is invested.

2.3 An active trading market for the Securities is not likely to develop

Unless otherwise communicated by the Issuer or any J.P. Morgan affiliate to the investor in the Securities, or to the extent that the rules of any stock exchange on which the Securities are listed and admitted to trading require the Issuer or any J.P. Morgan affiliate to provide liquidity in respect of such Securities, the Securities may have no liquidity or the market for such Securities may be limited and this may adversely impact their value or the ability of the investor in Securities to dispose of them. Subject to the rules of any relevant stock exchange, the Issuer or the Guarantor may seek in its sole discretion the delisting of any Securities without notice to the Holders of such Securities.

A secondary market is unlikely to develop and, even if a secondary market does develop, it is not possible to predict the price at which Securities will trade in such secondary market. Neither the Issuer nor any J.P. Morgan affiliate is under any obligation, and none of the Issuer, the Guarantor or any J.P. Morgan affiliate makes any commitment, to make a market in or to repurchase the Securities. If the Issuer, the Guarantor or any J.P. Morgan affiliate does make a market for the Securities, it may cease to do so at any time without notice.

2.4 There may be price discrepancies with respect to the Securities as between various dealers or other investors in the secondary market

If at any time a third party dealer quotes a price to purchase the Securities or otherwise values the Securities, that price may be significantly different (higher or lower) from any price quoted by any J.P. Morgan affiliate. Furthermore, if any Holder of the Securities sells its Securities, it will likely be charged a commission for secondary market transactions, or the price may reflect a dealer discount.

2.5 The Securities may be redeemed prior to their maturity date

In certain circumstances, the Early Payment Amount payable on the redemption of a Security prior to its maturity date may be less than its original purchase price and could be as low as zero.

Following early redemption of Securities, the Holders of such Securities may not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate or yield on the Securities

being redeemed and may only be able to do so at a significantly lower rate. Investors in the Securities should consider such reinvestment risk in light of other investments available at that time.

Securities may be redeemed prior to the maturity date for any of the following reasons:

- (i) the occurrence of a mandatory early redemption event (e.g., the price of the Reference Asset rises above or falls below a pre-determined barrier level), if specified in the terms and conditions of the Securities, may result in redemption of the Securities prior to the maturity date;
- (ii) the Issuer determines that its performance under any Security has become unlawful in whole or in part for any reason (see General Condition 17.1);
- (iii) the occurrence of certain taxation events (see General Condition 17.2); or
- (iv) following an Event of Default (see General Condition 16).

With regard to early redemption due to any of the above events, including due to illegality or tax, the Early Payment Amount in respect of each Security shall (unless otherwise specified in this Prospectus) be an amount determined by the Calculation Agent as representing the fair market value of such Securities immediately prior (and ignoring the circumstances leading) to such early redemption, less all costs incurred by the Issuer or any affiliate in connection with such early redemption, including any costs to the Issuer associated with unwinding any funding relating to the Securities, any costs associated with unwinding any underlying related hedging arrangements, and all other expenses related thereto. An investor in Securities should be aware that this Early Payment Amount may be less than the investor's initial investment, and in such case see Risk Factor 1.1 (*Investors in Securities may receive back less than the original invested amount*).

2.6 JPMorgan Chase is subject to various potential conflicts of interest in respect of the Securities, which could have an adverse effect on the Securities

See "Conflicts of Interest" below.

2.7 Any consequential postponement of, or any alternative provisions for, valuation following a Market Disruption Event may have an adverse effect on the value of the Securities

If an issue of Securities includes provisions dealing with the occurrence of a Market Disruption Event on a valuation date in respect of the Reference Assets), and the Calculation Agent determines that a Market Disruption Event has occurred or exists on such date, any consequential postponement of, or any alternative provisions for, valuation provided in the Securities may have an adverse effect on its value.

2.8 It may not be possible to use the Securities as a perfect hedge against the market risk associated with investing in the Reference Assets

Investors intending to invest in Securities to hedge against the market risk associated with investing in the Reference Assets should recognise the complexities of utilising Securities in this manner. For example, the value of the Securities may not exactly match the value of the Reference Assets. Due to fluctuating supply and demand for the Securities, there is no assurance that their value will match movements in the value of the Reference Assets. For these reasons, among others, it may not be possible to purchase or liquidate Securities in a portfolio at the prices used to calculate the value of any Reference Asset.

2.9 Securities may be amended without the consent of the Holders of the Securities or with the consent of only some of the Holders binding all of the Holders of the Securities

Subject as provided below, the terms and conditions of the Securities may be amended by the Issuer with the approval of the Calculation Agent but without the consent of the Holders of the Securities if the amendment:

- (i) is of a formal, minor or technical nature; or
- (ii) is made to cure a manifest or proven error; or
- (iii) is made to cure any ambiguity or is made to correct or supplement any defective provisions of the Securities or the Agency Agreement (as applicable); or
- (iv) is made to correct an error or omission such that, in the absence of such correction, the terms of the Securities would not otherwise represent the intended terms of the Securities on which the Securities were sold and have since traded; or
- (v) will not materially and adversely affect the interests of the Holders of the Securities.

In addition, other changes may be made to the terms and conditions with the consent of the Holders of the Securities. In order to make such changes, the Issuer requires the consent of up to 75 per cent. of Holders of the Securities. Any dissenting Holders of the Securities will be bound by such changes. Therefore the Issuer may be able to make a change which certain Holders of the Securities have voted against if up to 75 per cent. of the Holders of the entire series of Securities have approved the change.

2.10 There may be regulatory consequences of ownership to the Holder of Securities linked to the Reference Asset

There may be regulatory and other consequences associated with the ownership by certain investors in the Securities. Each investor in Securities must conduct its own investigation into its regulatory position with respect to the investment in the Securities, and none of the Issuer, the Guarantor or the Dealer assumes any obligation or liability whatsoever to such investor in such regard.

2.11 The Issuer or the Guarantor of Securities may be substituted without the consent of the Holders of the Securities

The Issuer or the Guarantor of Securities may be substituted (subject to the Issuer or the Guarantor having become obliged (due to a change in law) to pay Additional Amounts in accordance with General Condition 18 (*Taxation*)) as obligor under such Securities in favour of any company from JPMorgan Chase & Co. and its consolidated subsidiaries. Whilst the new issuer will provide an indemnity in favour of the Holders of such Securities in relation to any additional tax or duties that become payable solely as a result of such substitution, Holders of the Securities will not have the right to object to such substitution. A notice of any substitution in accordance with General Condition 27 (*Substitution*) will be published in accordance with General Condition 26 (*Notices*).

3. Risk factors that are generic to Securities that are linked to the Reference Asset

3.1 No rights of ownership in the Reference Asset

Investors in Securities should be aware that the Reference Asset will not be held by the Issuer for the benefit of the investors in such Securities, and as such, investors will not obtain any rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to the Reference Asset referenced by such Securities. For the avoidance of doubt, no J.P. Morgan affiliate is under any obligation whatsoever to acquire and hold the Reference Asset.

3.2 **The performance of the Securities is linked to the performance of the Reference Asset**

As the Securities reference the Reference Asset, the investors in such Securities are exposed to the performance of the Reference Asset.

3.3 **The past performance of the Reference Asset is not indicative of future performance**

Any information about the past performance of the Reference Asset at the time of the issuance of the Securities should not be regarded as indicative of the range of, or trends in, fluctuations in the Reference Asset that may occur in the future.

3.4 **The Calculation Agent has broad discretion to make certain determinations and adjustments, to replace the original Reference Asset with another and/or to cause early redemption of the Securities, any of which may be adverse to Holders of the Securities**

The Calculation Agent may in certain circumstances adjust the terms and conditions of the Securities (without the consent of the Holders of the Securities) and/or replace any original Reference Asset with an alternative tracker fund or an index or a basket of indices where particular adjustment events specified to be applicable to such Securities occur in accordance with such terms and conditions. This may have a considerable impact on the value and amount payable in respect of the Securities.

3.5 **There are significant risks in purchasing Securities which reference an emerging market Reference Asset**

As the terms and conditions of the Securities reference an emerging market Reference Asset, investors in such Securities should be aware that the political and economic situation in countries with emerging economies or stock markets may be undergoing significant evolution and rapid development, and such countries may lack the social, political and economic stability characteristics of more developed countries, including a significant risk of currency value fluctuation. Such instability may result from, among other things, authoritarian governments, or military involvement in political and economic decision-making, including changes or attempted changes in governments through extra-constitutional means; popular unrest associated with demands for improved political, economic or social conditions; internal insurgencies; hostile relations with neighbouring countries; and ethnic, religious and racial disaffections or conflict. Certain of such countries may have in the past failed to recognise private property rights and have at times nationalised or expropriated the assets of private companies. As a result, the risks from investing in those countries, including the risks of nationalisation or expropriation of assets, may be heightened. In addition, unanticipated political or social developments may affect the values of the Reference Asset representing an investment in those countries. The small size and inexperience of the securities markets in certain countries and the limited volume of trading in securities may make the Reference Asset illiquid and more volatile than investments in more established markets. There may be little financial or accounting information available with respect to local issuers, and it may be difficult as a result to assess the value or prospects of the Reference Asset.

4. **Risk factors associated with Securities that are linked to the Reference Asset**

4.1 **Risks associated with a Tracker Fund as Reference Asset**

An investment in Securities linked to a Tracker Fund such as the Securities entails significant risks in addition to those associated with investments in a conventional debt security. Capitalised terms used in this Risk Factor 4 and not defined herein shall have the respective meaning ascribed to each in the Contractual Terms below, or, if not defined in the Contractual Terms, the meaning ascribed to each in the Conditions.

(i) ***Factors affecting the performance of Tracker Funds may adversely affect the value of the Securities***

No J.P. Morgan affiliate is affiliated with the Management Company of the Original Tracker Fund (being the iShares® MSCI Emerging Markets Index Fund) or any of the other companies whose stock is represented in the Fund Underlying Index of the Original Tracker Fund. As a result, no J.P. Morgan affiliate has the ability to control the actions of such companies, including actions that could affect the value of the stocks underlying such Fund Underlying Index, the value of the Original Tracker Fund and the value of the Securities. None of the investor's investment in the Securities will go to the Management Company or any of the companies included in the Original Tracker Fund and none of those companies will be involved in the offering of the Securities in any way. Neither they nor the Issuer nor any J.P. Morgan affiliate will have any obligation to consider the investor's interests as a holder of the Securities in taking any corporate actions that might affect the value of the Securities. Additionally, the Management Company may adjust a Tracker Fund in a variety of ways which may affect its price adversely to investors' interests.

(ii) ***No claim against the Tracker Fund or recourse to the Shares***

The Securities do not represent a claim against or an investment in any Tracker Fund and Holders will not have any right of recourse under the Securities to any such entity, the Management Company or the Shares of a Tracker Fund. The Securities are not in any way sponsored, endorsed or promoted by any Tracker Fund or Management Company and such companies have no obligation to take into account the consequences of their actions for any Holders. Accordingly, the Management Company or trustee of a Tracker Fund may take any actions in respect of any Shares of a Tracker Fund without regard to the interests of the investors in the Securities, and any of these actions could adversely affect the market value of the Securities.

(iii) ***Determinations made by the Calculation Agent in respect of any Tracker Fund Potential Adjustment Event, Insolvency, Merger Event, Tracker Fund Delisting, Tracker Fund Trust Termination or changes to Fund Underlying Index of a Tracker Fund may have an adverse effect on the value of the Securities***

The Calculation Agent may in certain circumstances, for example following the occurrence of any Tracker Fund Potential Adjustment Event, Tracker Fund Merger Event, Tracker Fund Delisting or Tracker Fund Trust Termination in respect of the Tracker Fund or Insolvency in respect of the Tracker Fund, its Management Company or any custodian or other service provider to the Tracker Fund, adjust the terms and conditions of the Securities in its sole and absolute discretion, which may have an adverse effect on the value of the Securities.

Upon determining that a Fund Underlying Index of a Tracker Fund is calculated and announced by a successor or is replaced by a successor index or is not in existence, the Calculation Agent has broad discretion to make certain determinations to account for such event including deeming that the Fund Underlying Index will be the index calculated and announced by the successor or the successor index (and the Tracker Fund will be linked to such index or will be a successor exchange traded fund), or if the Fund Underlying Index is not in existence, replacing the Tracker Fund with another fund or another exchange traded fund linked to an alternative index.

(iv) ***Exposure to the risk that returns on the Securities do not reflect direct investment in underlying shares or other asset comprising the Tracker Fund***

Holders may receive a lower payment on the maturity date than they would have received if they had invested in an asset directly linked to the component stocks of the Tracker Fund or Fund

Underlying Index or contracts related to the Tracker Fund or Fund Underlying Index. Holders will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the shares comprised in the Tracker Fund or Fund Underlying Index would have. The Final Redemption Amount payable on the maturity date for the Securities is linked to the closing share price of the Tracker Fund on the Final Valuation Date. The price of the Tracker Fund at various times during the term of the Securities could be higher than the closing share price of the Tracker Fund on the Final Valuation Date. This difference could be particularly large if there is a significant decrease in the price of the Tracker Fund during the latter portion of the term of the Securities or if there is significant volatility in the price of the Tracker Fund during the term of the Securities.

5. Risk factors that may affect the Issuer's and Guarantor's ability to fulfil their respective obligations under the Securities

Investors are advised to review the information contained in the Base Prospectus Risk Factor 6 (*Risk Factors that may affect the Issuer's and Guarantor's (if any) ability to fulfil their respective obligations under the Securities*) that has been incorporated by reference into this Prospectus, together with the information in relation to the Issuer and the Guarantor incorporated by reference below. Investors are exposed to the credit risk of the Issuer and the Guarantor.

6. Risks relating to JPMSP

JPMSP is a non banking subsidiary of J.P. Morgan International Finance Limited, which is a subsidiary of JPMorgan Chase Bank, N.A., which is in turn a subsidiary of JPMorgan Chase & Co. The primary activity of JPMSP is the issuance to third parties of securitised derivatives, comprising notes, warrants and certificated including equity linked, reverse convertible and market participation notes, with the proceeds of securities being used to enter into hedging arrangements with other JPMorgan Chase & Co. companies. JPMSP's liability to perform its obligations may therefore be affected by any inability or failure to perform obligations owed to JPMSP by other JPMorgan Chase & Co. companies or third parties.

IMPORTANT NOTICES

Investing in the Securities puts your capital at risk. You may lose some or all of your investment.

Each of JPMSP and JPMorgan Chase Bank, N.A. (together, the "**Responsible Persons**") accepts responsibility for the information given in this Prospectus and confirms that, having taken all reasonable care to ensure that such is the case, the information contained in this Prospectus is, to the best of its knowledge, in accordance with the facts and does not omit anything likely to affect its import.

Notwithstanding the above paragraph or anything else in this Prospectus, neither the Issuer nor the Guarantor will accept responsibility for the information given in this Prospectus or the Contractual Terms in relation to offers of Securities made by an offeror not authorised by the Issuer and Guarantor to make such offers. Generally, each person named as "Dealer" or "Manager" and any party named as a "Distributor" (if any) or other "placer" (if any) in the Contractual Terms will be so authorised, but any other party generally will not. Investors should therefore enquire whether the relevant offeror is so authorised by the Issuer and Guarantor and, if it is not, the investor should be aware that neither the Issuer nor the Guarantor will be responsible for this Prospectus or the Contractual Terms for the purposes of the relevant securities laws. Further, whether or not the relevant offeror has been so authorised, no person is authorised to give any information or to make any representation not contained in, or not consistent with, this Prospectus and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer and the Guarantor. If an investor is in any doubt about whether it can rely on this Prospectus and the Contractual Terms and/or who is responsible for the contents thereof it should take legal advice.

An investment in Securities is subject to a very high degree of complex risks which may arise without warning. Securities may at times be volatile and losses may occur quickly and in unanticipated magnitude. Securities are extremely speculative and investors bear the risk that they could lose all of their investment. No person should acquire the Securities unless that person understands the nature of the relevant transaction and the extent of that person's exposure to potential loss and any investment in the Securities is consistent with such person's overall investment strategy. Each investor in the Securities should consider carefully whether the Securities it considers acquiring are suitable for it in the light of such investor's investment objectives, financial capabilities and expertise. Investors in the Securities should consult their own business, financial, investment, legal, accounting, regulatory, tax and other professional advisers to assist them in determining the suitability of the Securities for them as an investment. See the section entitled "Risk Factors".

No person has been authorised to give any information or to make any representation other than as contained in this Prospectus in connection with the issue or sale of the Securities and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer, JPMorgan Chase Bank, N.A., as a Guarantor or J.P. Morgan Securities Ltd. as dealer (the "Dealer"). Neither the delivery of this Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of the Issuer or the Guarantor since the date hereof or the date upon which this Prospectus has been most recently supplemented or that there has been no adverse change in the financial position of the Issuer or the Guarantor, since the date hereof or the date upon which this Prospectus has been most recently supplemented or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

The distribution of this Prospectus and the offering or sale of the Securities in certain jurisdictions may be restricted by law. Persons into whose possession this Prospectus comes are required by the Issuer, the Guarantor and the Dealer to inform themselves about and to observe any such restriction. The publication of this Prospectus is not intended as an offer or solicitation for the purchase or sale of any financial instrument in any jurisdiction where such offer or solicitation would violate the laws of such jurisdiction.

This Prospectus has been prepared on the basis that, except to the extent sub-paragraph (ii) below may apply, any offer of Securities in any Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State") will be made pursuant to an

exemption under the Prospectus Directive, as implemented in that Relevant Member State, from the requirement to publish a prospectus for offers of Securities. Accordingly any person making or intending to make an offer in that Relevant Member State of Securities may only do so (i) in circumstances in which no obligation arises for the Issuer or the Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer, or (ii) if a prospectus for such offer has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State and (in either case) published, all in accordance with the Prospectus Directive. Neither the Issuer nor the Dealer has authorised, nor do they authorise, the making of any offer of Securities in circumstances in which an obligation arises for the Issuer or the Dealer to publish or supplement a prospectus for such offer. See also "Subscription and Sale" in the Base Prospectus (defined below) incorporated by reference into this Prospectus.

The Dealer has not separately verified the information contained in this Prospectus. The Dealer does not make any representation, express or implied, or accept any responsibility, with respect to the accuracy or completeness of any of the information in this Prospectus. This Prospectus is not intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by the Issuer, the Guarantor or the Dealer that any recipient of this Prospectus should invest in the Securities. Each investor in the Securities should determine for himself or herself the relevance of the information contained in this Prospectus and any investment in the Securities should be based upon such investigation as such investor deems necessary. The Dealer expressly does not undertake to review the financial condition or affairs of any of the Issuer or the Guarantor during the life of the arrangements contemplated by this Prospectus nor to advise any purchaser or investor in the Securities of any information coming to the attention of the Dealer.

Investors in the Securities are advised to consult their own legal, tax, accountancy and other professional advisers to assist them in determining the suitability of Securities for them as an investment. Each investor in the Securities should be fully aware of and understand the complexity and risks inherent in Securities before it makes its investment decision in accordance with the objectives of its business.

Neither the U.S. Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the Securities or determined that this Prospectus is accurate or complete. Any representation to the contrary is a criminal offence.

The Jersey Financial Services Commission (the "Commission") has given, and has not withdrawn, its consent under Article 8 of the Control of Borrowing Order to the circulation in Jersey of an offer for subscription, sale or exchange of Securities by the Issuer. The Commission is protected by the Control of Borrowing (Jersey) Law 1947, as amended, against liability arising from the discharge of its functions under that law.

It must be distinctly understood that, in giving these consents, the Commission does not take any responsibility for the financial soundness of the Issuer or for the correctness of any statements made, or opinions expressed, with regard to them.

Capitalised terms used herein shall be as defined in "Contractual Terms" unless otherwise specified.

CONFLICTS OF INTEREST

J.P. Morgan is subject to various potential conflicts of interest in respect of the Securities, which could have an adverse effect on the Securities

J.P. Morgan affiliates may take positions in or deal with the Reference Asset

The Calculation Agent of the Securities, which is a J.P. Morgan affiliate, has broad discretionary powers which may not take into account the interests of the Holders

As the Calculation Agent is a J.P. Morgan affiliate, potential conflicts of interest may exist between the Calculation Agent and the Holders of the Securities, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent. For example, the Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to a series of Securities have occurred and (ii) to determine any resulting adjustments and calculations or substitutions as described in such conditions. Investors should be aware that any determination made by the Calculation Agent may have an impact on the value and financial return of the Securities. Any such discretion exercised by, or any calculation made by, the Calculation Agent (in the absence of manifest or proven error) shall be binding on the Issuer and all Holders of the Securities.

J.P. Morgan affiliates may have confidential information relating to the Reference Asset and the Securities

Morgan affiliates may from time to time, by virtue of their status as underwriter, advisor or otherwise, possess or have access to information relating to the Securities, the Reference Asset and any derivative securities referencing them. - (1) an alternative tracker fund which is denominated in the same currency and, in the reasonable opinion of the Calculation Agent, has a similar investment objective as the Affected Tracker Fund to replace the Affected Tracker Fund (such replacement tracker fund being the "**Replacement Tracker Fund**" in respect of such Affected Tracker Fund); and

which resulted in the substitution, including, without limitation, on or prior to the Issue Date), and the Calculation Agent shall notify the Issuer and the Principal Programme Agent who shall promptly notify the Holders.

- (iv) Following any such selection pursuant to paragraph 5(iii) (*Substitution of a Tracker Fund*), the Replacement Index or Replacement Index Basket, as the case may be, shall replace the Affected Tracker Fund on the Index Substitution Date and the Calculation Agent shall, in its sole and absolute discretion, make such adjustment(s), modification(s), substitution(s), calculation(s), determination(s) and/or cancellation(s) that it determines in its discretion to be appropriate, if any, to any variable, calculation methodology, valuation, settlement, payment terms, redemption amount, disruption mechanism or any other terms in respect of the Securities to account for such replacement (including, for the avoidance of doubt, the manner in which the Securities shall be redeemed, any amount payable on redemption and/or whether any asset is to be delivered (and, if so, the amount thereof) on redemption).
