INTRODUCTION

This document comprises two parts. This document (i) is not intended to provide the basis of any evaluation of the financial condition, creditworthiness or affairs of the Issuer and (ii) should not be considered as a recommendation by the Issuer that any recipient of this Securities Note and Summary or the Registration Document should purchase the Notes. The delivery of this document shall not in any circumstances imply that the information contained herein concerning the Issuer or the Notes is correct at any time subsequent to the date hereof. Potential investors should carefully review and evaluate, inter alia, the most recent financial statements of the Issuer when deciding whether or not to purchase the Notes.

The Issuer does not represent that the Prospectus may be lawfully distributed, or that the Notes may be lawfully offered, in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by the Issuer which would permit a public offering of the Notes or distribution of this document in any jurisdiction where action for that purpose is required. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither the Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction where such offer, sale, distribution and/or publication would be prohibited.

Any representation to the contrary is a criminal offence in the United States.

PART ONE: SUMMARY

The summary is comprised of disclosure requirements known as “Elements”. These Elements are numbered in Sections A – E (A.1 – E.7). This Summary includes all the Elements required to be included for the Notes and the Issuer. As some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in this summary because of the nature of the Notes and the Issuer, it is possible that no relevant information can be given regarding each Element. In this case, a short description of the Element is included in the summary and marked as “Not Applicable”.

Section A – Introduction and warnings		
A.1	Warning:	<p>This Summary must be read as an introduction to the Prospectus and any decision to invest in the Notes should be based on a consideration of the Prospectus as a whole by the investor, including the documents incorporated by reference.</p> <p>Civil liability in respect of this Summary, including any translation thereof, will attach to the Issuer in any Member State of the EEA in which the relevant provisions of the Prospectus Directive have been implemented, but only if this Summary is misleading, inaccurate or inconsistent when read together with the other parts of the Prospectus or it does not provide, when read together with the other parts of the Prospectus, key information in order to aid investors when considering to invest in the Notes.</p> <p>Where a claim relating to the information contained in the Prospectus is brought before a court in such Member State, the plaintiff investor may, under the national legislation of that Member State, have to bear the costs of translating the Prospectus before the legal proceedings are initiated.</p>
A.2	Consent to use the Prospectus for subsequent resales or final placement of the Notes by financial intermediaries	The Issuer has not expressed its consent to the use of the Prospectus for subsequent resales or placements of the Notes.
Section B – Issuer		
B.1	The legal and commercial name of the Issuer:	ING Bank N.V. (the “ Issuer ”)
B.2	The domicile and legal form of the Issuer, the legislation under which the Issuer operates and its country of incorporation:	The Issuer is a public limited company (<i>naamloze vennootschap</i>) incorporated under the laws of the Netherlands on 12 November 1927 with its corporate seat (<i>statutaire zetel</i>) in Amsterdam, The Netherlands. The Issuer is registered at the Chamber of Commerce of Amsterdam under no. 33031431.

B.4b	A description of any known trends affecting the Issuer and the industries in which it operates:	<p>The information provided under this item which refers to ING (as defined under item B.5) applies equally to the Issuer.</p> <p>The results of operations of the Issuer are affected by demographics and by a variety of market conditions, including economic cycles, banking industry cycles and fluctuations in stock markets, interest and foreign exchange rates.</p> <p>In 2012 the external environment continued to have an impact on the Issuer as the euro sovereign debt crisis in the Eurozone maintained a challenging economic and financial market environment for a major part of the year. This led to international capital and money markets not functioning in the manner they would in more normal circumstances. This had repercussions (for the Issuer, its industry and the broader economy) especially in Europe where funding for governments and financial institutions continues to be difficult in certain markets.</p> <p>The operations of the Issuer are exposed to fluctuations in equity markets. The Issuer maintains an internationally diversified and mainly client-related trading portfolio. Accordingly, market downturns are likely to lead to declines in securities trading and brokerage activities which it executes for customers and therefore to a decline in related commissions and trading results. In addition to this, the Issuer also maintains equity investments in its own non-trading books. Fluctuations in equity markets may affect the value of these investments.</p> <p>The operations of the Issuer are exposed to fluctuations in interest rates. The Issuer's management of interest rate sensitivity affects the results of its operations. Interest rate sensitivity refers to the relationship between changes in market interest rates on the one hand and future interest earnings and economic value of its underlying banking portfolios on the other hand. Both the composition of the Issuer's assets and liabilities and the fact that interest rate changes may affect client behaviour in a different way than assumed in the Issuer's internal models may result in a mismatch which causes the banking longer term operations' net interest income and trading results to be affected by changes in interest rates.</p> <p>The Issuer is exposed to fluctuations in exchange rates. The Issuer's management of exchange rate sensitivity affects the results of its operations through the trading activities for its own account and because ING prepares and publishes its consolidated financial statements in euros. Because a substantial portion of the Issuer's income and expenses is denominated in currencies other than euros, fluctuations in the exchange rates used to translate foreign currencies into euros will impact its reported results of operations and cash flows from year to year. This exposure is mitigated by the fact that realised results in non-euro currencies are translated into euros by monthly hedging.</p>
B.5	Description of the Group and the Issuer's position within the Group:	<p>The Issuer is part of ING Groep N.V. ("ING Group"). ING Group is the holding company for a broad spectrum of companies (together, "ING"), offering banking, investments, life insurance and retirement services to meet the needs of a broad customer base. The Issuer is a wholly-owned, non-listed subsidiary of ING Group and is a large international player with an extensive global network in over 40 countries. Since 2011, the Issuer has been operating as a stand-alone business under the umbrella of ING Group.</p>
B.9	Profit forecast or estimate:	<p>Not Applicable; no profit forecasts or estimates have been made by the Issuer.</p>
B.10	Qualifications in the auditors' report:	<p>Not Applicable; Ernst & Young Accountants LLP has issued an unqualified auditors' report on the financial statements for each of the financial years ended 31 December 2012, 31 December 2011 and 31 December 2010.</p>

- Initial FX Rate of: 6.5 (i.e. 6.5 Swedish Krona for 1 United States Dollar)
- Final FX Rate of: 7.5 (i.e. 7.5 Swedish Krona for 1 United States Dollar)

The final redemption will be: (a) the initial invested amount of SEK 10,000 plus (b) SEK 10,000 multiplied by (i) 130% multiplied by (ii) (x) maximum of (1) zero or (2) USD 62.- divided by USD 65.- minus 1 (= 0) multiplied by (y) 7.5 divided by 6.5 (= 1.1538 rounded), is **SEK 10,000**.

D. Negative Scenario

If the Final Share Price is lower than the Barrier Level, and taking into account the following assumptions, based on a Specified Denomination of SEK 10,000 and a **negative Share performance** (lower than zero) and:

- Final Share Price of: USD 35.-
- Initial Share Price of: USD 65.-

The final redemption will be: (a) SEK 10,000 plus (b) USD 55.- divided by USD 65 (= 0.538461 rounded), is **SEK 5,384.61**.

The examples set out in this paragraph C.18 are no indication, prediction or guarantee of future performance of the Notes. No rights may be derived from these examples.

C.19	The exercise price or the final reference price of the underlying:	The Notes do not contain an exercise option. The final value of the Share is determined by (a) looking at the price of the share at the relevant time on the Expiration Date; or (b) in case of an averaging the arrhythmic mean of the price of the share at the relevant time across the averaging dates.
C.20	A description of the type of the underlying and where the information on the underlying can be found:	<p>The return on the Notes is linked to the performance of the iShares DJ U.S. Real Estate Index Fund (Bloomberg: IYR UP <Equity>) (the “Share”). Details of the past and further performance of the Share and the volatility can be obtained from Bloomberg (IYR UP <Equity>) and the website: http://us.ishares.com/product_info/fund/overview/IYR.html.</p> <p>The return on the Notes in case of a positive scenario may be impacted (positively or negatively) by the FX Rate. Section D – Risks		
D.2	Key information on the key risks that are specific to the issuer:	<ul style="list-style-type: none"> • Because the Issuer is part of a financial services company conducting business on a global basis, the revenues and earnings of the Issuer are affected by the volatility and strength of the economic, business and capital markets environments specific to the geographic regions in which it conducts business. The ongoing turbulence and volatility of such factors have adversely affected, and may continue to adversely affect the profitability and solvency of the Issuer. • Adverse capital and credit market conditions may impact the Issuer’s ability to access liquidity and capital, as well as the cost of credit and capital. • The default of a major market participant could disrupt the markets. • Because the Issuer’s businesses are subject to losses from unforeseeable and/or catastrophic events, which are inherently unpredictable, the Issuer may experience an abrupt interruption of activities, which could have an adverse effect on its financial condition. • The Issuer operates in highly regulated industries. There could be an adverse change or increase in the financial services laws and/or regulations governing the Issuer’s business. • Continued turbulence and volatility in the financial markets and the economy generally have adversely affected the Issuer, and may continue to affect its business and results of operations. • Because the Issuer operates in highly competitive markets, including its home market, it may not be able to increase or maintain its market share, which may have an adverse effect on its results of operations. • Because the Issuer does business with many counterparties, the inability of these counterparties to meet their financial obligations could have a material adverse effect on the Issuer’s results of operations. • Market conditions observed over the past few years may increase the risk of loans being impaired. The Issuer is exposed to declining property values on the collateral supporting residential and commercial real estate lending. • Interest rate volatility and other interest rate changes may adversely affect the Issuer’s profitability. • The Issuer may incur losses due to failures of banks falling under the scope of state compensation schemes. • The Issuer may be unable to manage its risks successfully through derivatives.

		<ul style="list-style-type: none"> • The Issuer may be unable to retain key personnel. • The Issuer may not be able to protect its intellectual property and may be subject to infringement claims. • Because the Issuer uses assumptions to model client behaviour for the purpose of its market risk calculations, the difference between the realisation and the assumptions may have an adverse impact on the risk figures and future results. • The Issuer may incur further liabilities in respect of its defined benefit retirement plans if the value of plan assets is not sufficient to cover potential obligations, including as a result of differences between results and underlying actuarial assumptions and models. • The Issuer's risk management policies and guidelines may prove inadequate for the risks its faces. • The Issuer is subject to a variety of regulatory risks as a result of its operations in certain countries. • Because the Issuer is continually developing new financial products, it might be faced with claims that could have an adverse effect on its operations and net results if clients' expectations are not met. • Ratings are important to the Issuers' businesses for a number of reasons. A downgrade or a potential downgrade in the Issuer's credit ratings could have an adverse impact on its operations and net result. • The Issuer's business may be negatively affected by a sustained increase in inflation. • Operational risks are inherent in the Issuer's business. • The Issuer's business may be negatively affected by adverse publicity, regulatory actions or litigation with respect to such businesses, other well-known companies or the financial services industry in general. • The implementation of ING's restructuring plan and the divestments anticipated in connection with the Restructuring Plan have and will significantly alter the size and structure of ING and involve significant costs and uncertainties that could materially impact the Issuer. • The limitations required by the European Commission on ING's ability to compete and to make acquisitions or call certain debt instruments could materially impact the Issuer. • Upon the implementation of its restructuring plan, ING will be less diversified and the Issuer may experience competitive and other disadvantages. • ING's Restructuring Plan may not yield intended reductions in costs, risk and leverage. • ING's agreements with the Dutch State impose certain restrictions regarding the issuance or repurchase of its shares and the compensation of certain senior management positions. • Whenever the overall return on the (remaining) Core Tier 1 Securities issued to the Dutch State is expected to be lower than 10 per cent. per annum, and/or in the event that ING does not repay the remaining Core Tier 1 Securities in accordance with the repayment schedule that was submitted to the European Commission as part of the Amended Restructuring Plan, the European Commission may consider the imposition of additional behavioural constraints.

PART TWO: SECURITIES NOTE

RISK FACTORS

Investing in the Notes involves risks. The Notes are not principal protected and investors may lose their entire investment (see paragraph below “No principal protection”) and the market value of the Notes may fluctuate during their term. Prospective investors risk losing their entire investment or part of it. See Parts 1 and 2 of the “Risk Factors” section of Chapter 1 of the Base Prospectus (incorporated by reference into this Securities Note) and, in addition, the risk factors below for information on the risk factors to be taken into account when considering an investment in the Notes. Potential investors are strongly recommended to consult with their independent financial advisers before making any investment decision.

Risk Factor in relation to Share Linkage

Terms used but not defined below are as defined in the Terms and Conditions of the Single Share Linked Notes, as set out in Chapter 2, Part 1 and Chapter 3, Part 1(A) of the Base Prospectus.

The return on the Notes is linked to the performance of the iShares DJ U.S. Real Estate Index Fund (the “Share”). The price of the Share may go down as well as up throughout the life of the Notes. Fluctuations in the price of the Share will affect the value of the Notes. The Final Redemption Amount of the Notes will depend on predetermined criteria. If the Final Share Price is lower than the Barrier Level the return on the Notes will fully depend on the performance of the underlying Share and may be zero.

The return of the Notes may be linked to the average share price

In case the Final Share Price is equal to or higher than the Barrier Level, the return on the Notes is based on the Average Share Price instead of the Final Share Price, divided by the Initial Share Price. The Average Share Price may be higher or lower than the Final Share Price. If the Average Share Price is lower than the Final Share Price, the return on the Notes will also be lower. Investors are thus exposed to the risk that the Average Share Price is lower than the Final Share Price. On the other hand, if the Average Share Price is higher than the Final Share Price, investors will participate in the higher average Price instead of the Final Share Price.

Currency exchange risk

Any positive performance of the Notes is exposed to the currency exchange rate for converting United States Dollars into Swedish Krona. A decreasing USD/SEK exchange rate has a negative impact on the final redemption amount of the Notes.

A credit rating reduction may result in a reduction in the trading value of the Notes

The value of the Notes may be expected to be affected, in part, by Noteholders’ general appraisal of the creditworthiness of the Issuer and/or the ING Group. Such perceptions are generally influenced by the ratings accorded to the outstanding securities of the Issuer by standard statistical rating services, such as Moody’s, Standard & Poor’s and Fitch. A reduction in the rating, if any, accorded to outstanding debt securities of the Issuer by one of these or other rating agencies could result in a reduction in the trading value of the Notes.

No principal protection

The Notes are not capital protected and investors may therefore lose up to 100 per cent. of their investment in the Notes.

Conflicts of Interest

The Issuer and its affiliates may engage in trading activities (including hedging activities) related to securities composing the underlying Share the Notes (the “Securities”) and other instruments or derivative products based on or related to the Securities for their proprietary accounts or for other accounts under their management. The Issuer and its affiliates may also issue other derivative instruments in respect of the Securities. The Issuer and its affiliates

may also act as underwriter in connection with future offerings of the Securities or may act as financial adviser to companies whose Securities impact the return on Notes. Such activities could present certain conflicts of interest, could influence the prices of such Securities and could adversely affect the value of such Notes.

The Issuer and its affiliates may have acquired, or during the term of Notes may acquire, non-public information with respect to Securities (or their issuers) which will not be provided to holders of such Notes. The Issuer makes no representation or warranty about, give no guarantee of, the performance of the Share underlying the Notes. Past performance of the Share cannot be considered to be a guarantee of, or guide to, future performance.

Limited Liquidity and Restrictions on Transfer

Though Application will be made for the Notes to be admitted to trading on NASDAQ OMX and to be listed on the Official List of NASDAQ OMX, there may not be any market for the Notes and, as a result, a purchaser must be prepared to hold such Notes for an indefinite period of time or until the maturity thereof. It is unlikely that an active secondary market for the Notes will develop and purchasers of the Notes may find it difficult or uneconomic to liquidate their investment at any particular time. The Notes may be subject to certain transfer restrictions and may only be transferable to certain transferees and in limited circumstances. Such transfer restrictions may further limit the liquidity of the Notes.

Early Redemption

The Notes may redeem prior to their Maturity Date due to certain events set forth in the conditions applicable to the Notes, which events include events of default in respect of the Issuer. In such instances, amounts payable to the Noteholders will be dependent, among other factors, the prevailing fair market value of the notes, taking into account (without limitation) the cost or gain to the Issuer in amending or liquidating any related hedging or trading position(s) and any additional costs, fees or taxes relating thereto. It should be understood that in such circumstances, it is likely that the amount due to holders of the Notes may be less than the outstanding principal amount of the Notes.

Taxation and no gross-up

Each investor in the Notes will assume and be solely responsible for any and all taxes of any jurisdiction or governmental or regulatory authority including, without limitation, any state or local taxes or other similar assessment or charges that may be applicable to any payment to such holder in respect of the Notes.

In the event that any withholding tax or deduction for tax is imposed on payments on the Notes by the Issuer to the Noteholders, it should be understood that such Noteholders will not be entitled to receive amounts to compensate for such withholding tax.

All payments made by the Issuer in respect of the Notes shall be made subject to any tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted. Noteholders will not be entitled to receive grossed-up amounts to compensate for any such tax, duty, withholding or other payment.

EXAMPLES

A. Positive Scenario

If the Final Share Price is equal to or higher than the Barrier Level, and taking into account the following assumptions, based on a Specified Denomination of SEK 10,000, an **increasing FX Rate** (the Final FX Rate is higher than the Initial FX Rate) and a **positive Share performance** (higher than zero) and;

Average Share Price of: USD 75.-

Initial Share Price of: USD 65.-

Participation of: 130%

Initial FX Rate of: 6.5 (i.e. 6.5 Swedish Krona for 1 United States Dollar)

10 SWEDISH TAXATION

The following summary of certain tax issues that may arise as a result of holding Notes is based on current Swedish tax legislation and is intended only as general information for holders of Notes who are resident in Sweden for tax purposes, unless otherwise indicated. This description does not deal comprehensively with all tax consequences that may occur for holders of Notes, nor does it cover the specific rules where Notes are held by a partnership or as current assets in a business operation.

Special tax consequences that are not described below may also apply for certain categories of taxpayers, including investment companies and mutual funds. Prospective applicants for Notes should consult their own tax advisers for information with respect to the special tax consequences that may arise as a result of holding Notes, including the applicability and effect of foreign income tax rules, provisions contained in double taxation treaties and other rules which may be applicable.

Taxation of Individuals Resident in Sweden

Capital Gains and Losses

Individuals who sell their Notes, or have their Notes redeemed or bought back, are subject to capital gains tax. The tax rate is 30 per cent.

The capital gain or loss is calculated as the difference between the sales (or redemption) proceeds, after deduction of sales costs, and the Notes' acquisition cost for tax purposes. The acquisition cost is determined according to the "average method". This means that the costs of acquiring all Notes of the same type and class as the sold Notes are added together and the average acquisition cost is calculated collectively, with respect to changes to the holding.

Gains or losses on currency exchange rate fluctuations may arise in relation to Notes where the sales proceeds received are in a foreign currency. However, no special calculations are required if the sales proceeds are exchanged into SEK within 30 days from the time of disposal. In such case, the exchange rate on the date of exchange shall be used when calculating the value of the sales proceeds. The exchange rate on the date of acquisition is generally used when determining the acquisition cost for tax purposes.

The Notes could be defined as;

- (a) receivables (*Sw. fordringsrätt*);
- (b) listed shares and other listed securities that are taxed in the same manner as shares (*Sw. delägar rätt*); or
- (c) non-financial items (*Sw. andra tillgångar*).

As a general rule, 70 per cent. of a capital loss is deductible against any other taxable income from capital. However, capital losses on listed Swedish receivables are fully deductible in the income from capital category. According to Swedish case law, full deductibility also applies to capital losses on listed foreign receivables.

Capital losses on listed shares and other listed securities that are taxed in the same manner as shares (except for listed shares in mutual funds containing only Swedish receivables), are fully deductible against taxable gains on such assets and on non-listed shares in Swedish limited liability companies and foreign legal entities. On non-listed shares in Swedish limited liability companies and foreign legal entities only five sixths of capital losses are deductible. If capital losses pertain to both listed and non-listed shares, the losses pertaining to the listed shares are deductible prior to the losses on the non-listed shares. 70 per cent. of any excess amount is deductible according to the general rule or five sixths of 70 per cent. is deductible if the capital loss relates to non-listed shares. Capital losses on listed shares in mutual funds containing only Swedish receivables are fully deductible in the income from capital category.

If a deductible deficit arises in the income from capital category, a reduction of the tax on income from employment and from business operations, as well as the tax on real estate and the municipal real estate fee, is allowed. The tax reduction is 30 per cent. of any part of the deficit not exceeding SEK 100,000

and 21 per cent. of any part of the deficit in excess of SEK 100,000. Deficits may not be carried forward to a subsequent fiscal year.

Interest/Dividends

Any interest income received by an individual holder during the life of a financial instrument is subject to Swedish tax at a tax rate of 30 per cent. in the income from capital category. Interest is taxable when the income can be disposed of. The same applies to dividends.

There are no specific Swedish tax rules defining what constitutes debt or equity, nor is there a definition of interest. However, where a payment during the life of the instrument is made at the discretion of the Issuer, such payment should generally be considered a dividend. It is further generally held, that where the terms and conditions of the instrument provide for payments to be made under predetermined circumstances established by the terms and conditions and no shareholder meeting is required to determine the payment, such payment should be considered interest.

Taxation of Swedish Legal Entities

Limited liability companies and other legal entities (except partnerships and estates of deceased persons) are normally taxed on all income (including income from the sale, redemption or repayment of the Notes) as income from business operations at a flat rate of 22 per cent. (the tax rate is 26.3 per cent. for fiscal years commencing prior to 1 January 2013).

Regarding the calculation of capital gains or losses, see section “Taxation of Individuals Resident in Sweden” above. However, for legal entities, interest income and currency exchange fluctuations are normally taxable, or deductible, as the case may be, on an accrual basis. Note that capital losses on non-financial items (*Sw. annan tillgång*) are fully deductible for tax purposes when the holder is a legal entity.

Tax deductible capital losses on receivables incurred by a limited liability companies and certain other legal entities are normally fully deductible against any taxable income.

Specific rules may apply to Notes held as a hedge for foreign currency exposure.

Taxation of holders of Notes residing outside of Sweden

Payments of any principal amount or any amount that is considered to be interest or dividends for Swedish tax purposes to holders of Notes who are not fiscally resident in Sweden and who are not engaged in trade or business in Sweden through permanent establishments are not subject to Swedish income tax. A person is resident in Sweden for Swedish tax purposes if it (a) is domiciled in Sweden; (b) has its habitual abode in Sweden; or (c) has been domiciled earlier in Sweden and, after having moved abroad, continues to have an essential connection with Sweden.

Swedish withholding tax, or Swedish tax deduction, is not imposed on payments of any principal amount or any amount that is considered to be interest for Swedish tax purposes to a non-resident holder of Notes.

Unless an exemption applies, Swedish dividend withholding tax (*Sw. kupongskatt*) at a rate of 30 per cent. is payable on dividends paid by companies incorporated and duly registered in Sweden under the Swedish Companies Act to non-resident shareholders who are entitled to receive the dividends. Depending on the shareholder’s circumstances and residency, it may be possible to reduce the withholding tax rate or exempt dividends from withholding tax under Swedish domestic law or the applicable tax treaty.

Holders of Notes who are not fiscally resident in Sweden and who are not carrying on business operations from a permanent establishment in Sweden are generally not liable for Swedish capital gains taxation on the disposal of Notes. The holders may be subject to tax in their country of residence.

As far as non-resident individuals are concerned, capital gains on the sale of certain securities may in some cases be subject to Swedish tax if the individual has been resident or permanently lived in Sweden at any time during the calendar year of the sale or any of the ten preceding calendar years. The application of this tax rule is, in many cases, limited by tax treaties for the avoidance of double taxation, which Sweden has concluded with other countries.

Other

Sweden does not levy any net wealth tax and there are no transfer taxes on transfers of financial instruments.
