(as Issuer)

BNP Paribas

(incorporated in France)

(as Issuer and Guarantor)

WARRANT AND CERTIFICATE PROGRAMME

This fourth supplement (the **Supplement**) constitutes a supplement within the meaning of Article 16 of Directive 2003/71/EC.

This Supplement is supplemental to, and should be read in conjunction with the base prospectus of the Warrant and Certificate Programme dated 1 June 2012 (the **Base Prospectus**) as approved by the *Autoriteit Financiële Markten* (Authority for the Financial Market-AFM), the first supplement dated 9 August 2012 (the **First Supplement**), the second supplement dated 12 September 2012 (the **Second Supplement**) and the third supplement dated 23 November 2012 (the **Third Supplement**), in relation to the programme for the issuance of Warrants and Certificates of BNP Paribas Arbitrage Issuance B.V. (**BNPP B.V.**) and BNP Paribas (**BNPP**) (the **Programme**). Terms defined in the Base Prospectus have the same meaning when used in this Supplement.

Each of BNPP B.V. (in respect of itself) and BNPP accepts responsibility for the information contained in this Supplement. To the best of the knowledge of each of BNPP B.V. and BNPP (who have taken all reasonable care to ensure that such is the case), the information contained herein is in accordance with the facts and does not omit anything likely to affect the import of such information.

This Supplement has been produced for the purposes of:

(i) including the press release and its slides published by BNP Paribas on 14 February 2013 with respect to its results as at 31 December 2012;

(ii) updating the ITALIAN TAXATION section starting on page 538 of the Base Prospectus by inserting the following new paragraph: “**Financial Transaction Tax**”

The Board of Directors of BNP Paribas met on 13 February 2013. The meeting was chaired by Baudouin Prot and the Board examined the Group's results for the fourth quarter and approved the 2012 financial statements.

ADAPTATION PLAN COMPLETED AND SOLID RESULTS IN A CHALLENGING ECONOMIC ENVIRONMENT

This year, the Group completed its plan to adapt to new regulations ahead of the schedule announced: CIB's funding needs in US dollars were reduced by 65 billion dollars by April 2012 and the Group surpassed its goal of increasing the fully-loaded Basel 3 common equity Tier 1 ratio¹ by 100 basis points by the end of September 2012. The ratio was 9.9% as at 31 December 2012, illustrating the Group's high level of solvency. The risk-weighted assets were cut by 62 billion euros since 31 December 2011.

BNP Paribas achieved this year solid results in a challenging economic environment: the eurozone slid back into recession (GDP: -0.4%) and the crisis in the capital markets carried on throughout most of the year. Against this backdrop, revenues totalled 39,072 million euros, down 7.8% compared to 2011. It includes this year the impact of four significant exceptional items, which total -1,513 million euros: losses from the sale of sovereign bonds (-232 million euros), losses from the sale of loans (-91 million euros), own credit adjustment (-1,617 million euros) and a one-off amortisation of a part of Fortis PPA due to early redemptions (+427 million euros). The revenues of the operating divisions edged up 0.8%, showing their good resilience, with a rise of 0.4% for Retail Banking², 4.8% for Investment Solutions and a 1.8% drop for CIB.

Operating expenses, which totalled 26,550 million euros, were under control, up slightly 1.7%. They were down 0.1% in Retail Banking², up 1.4% in Investment Solutions and 2.4% at CIB (-1.1% at constant scope and exchange rates).

Gross operating income was thus down 23.0% during the period to 12,522 million euros. It was up however 0.8% in the operating divisions.

The Group's cost of risk, which came to 3,941 million euros or 58 basis points of outstanding customer loans, was down 42.0% compared to 2011 which included the 3,241 million euro impact due to the Greek assistance programme. Excluding the impact of provisions set aside for Greek bonds, the cost of risk was up moderately 9.2%.

Non operating items came to 1,791 million euros. They include the impact of two exceptional items to the tune of 1,445 million euros: the 1,790 million euro capital gain booked in connection with the sale of a 28.7% stake in Klépierre S.A. and 345 million euros in impairments, of which 298 million euros was an impairment of BNL bc's goodwill due to the expected increase in the Bank of Italy's capital requirements (local common equity Tier 1 ratio increased from 7% to 8%).

Pre-tax income totalled 10,372 million euros, up 7.5% compared to last year with a negligible net impact of exceptional items: -68 million euros. The operating divisions posted 11,574 million euros in pre-tax income, up 0.8% compared to 2011.

¹ Common equity Tier 1 ratio, taking into account all the rules of the CRD4 directives with no transitory provisions, which will only enter into force on 1 January 2019, and as anticipated by BNP Paribas

² Including 100% of Private Banking of the domestic markets, excluding PEL/CEL effects

BNP PARIBAS

In a still unfavourable environment, BNP Paribas generated this year 6,553 million euros in net income, up from the 2011 level (6,050 million euros), thanks to the broad diversification of its businesses. At 8.9%, return on equity was virtually flat compared to last year when it was 8.8%.

Net earnings per share was €5.16 compared to €4.82 in 2011. The net book value per share¹ was €60.8, up 4.5% compared to last year and its compounded annualised growth rate was 6.5% since 31 December 2008, demonstrating BNP Paribas' ability to continue to grow the net asset value per share throughout the cycle.

The Board of Directors will propose to shareholders at the Shareholder Meeting to pay out a dividend of €1.50 per share, which equates to a 29.7% pay-out ratio, to be paid out in cash. This allocation of earnings will enable the Group to reinvest over two-thirds of its profits in business development initiatives and in efforts to support its clients.

In the fourth quarter 2012, the Group's revenues totalled 9,395 million euros, down 3.0% compared to the fourth quarter 2011. It includes this quarter the negative impact of own credit adjustment (-286 million euros compared to +390 million in the fourth quarter 2011) and the net balance of loans sold in connection with CIB's adaptation plan (-27 million euros compared to -148 million euros in the fourth quarter 2011). The operating divisions posted good performance with 7.3% growth in revenues compared to the fourth quarter 2011, which was marked by the sovereign debt crisis.

Operating expenses rose 1.9% to 6,802 million euros and gross operating income came to 2,593 million euros, down 13.8% compared to the fourth quarter 2011. It rose sharply (32.3%) in the operating divisions.

The cost of risk, at 1,199 million euros or 72 basis points of outstanding customer loans, was down by 21.0% compared to the same period a year earlier which included a 567 million euro impact due to the Greek assistance programme. In an unfavourable economic environment, it was up by 17 basis points compared to the third quarter 2012. This increase is due, in particular, to a provision set aside for one specific loan at CIB (6 basis points) and one-off increases in provisions at Personal Finance (2 basis points).

Given 345 million euros in one-off impairments (see above), the Group's net income attributable to equity holders was 514 million euros in the fourth quarter 2012, down 32.8% compared to the same period a year earlier. Excluding one-off items, the Group's net income attributable to equity holders was 1,051 million euros.

*
* *

RETAIL BANKING

DOMESTIC MARKETS

For the whole of 2012, the strong sales and marketing drive in Domestic Markets translated into growth in deposits in all the networks. With 275 billion euros, Domestic Markets' deposits grew 4.7% compared to 2011. Outstanding loans rose 1.2% even if a gradual slowdown in demand for loans was observed during the course of the year.

¹ Not revaluated

At 15,730 million euros, revenues¹ were virtually flat (-0.1%²) compared to 2011 despite a persistently low interest rate environment and a slowdown in volumes of activity during the year. Operating expenses¹ were down 1.5%² compared to 2011, reflecting very good cost control across all the business units and helped improve the cost/income ratio² in each of the four domestic markets.

Gross operating income therefore came to 5,749 million euros, up 2.5%² compared to 2011.

With a moderate overall cost of risk and after allocating one-third of Private Banking's net income from Domestic Markets to the Investment Solutions division, pre-tax income³ came to 4,006 million euros, down 1.0%² compared to 2011. Thanks to improved operating efficiency, Domestic Markets delivered solid results at a high level.

French Retail Banking (FRB)

For the whole of 2012, FRB's active efforts to support its clients resulted in a good sales and marketing drive in deposits (up 4.7% compared to 2011), in particular thanks to strong growth in savings accounts (+9.6%). Despite a deceleration in demand for loans at the end of the year, outstanding loans rose on average by 1.5% compared to 2011. The continued support of VSEs & SMEs and the success of the Small Business Centres were reflected in particular by increased outstanding loans in this customer segment (+2.7%⁴). The sales and marketing drive is also illustrated by 10.5% growth in the number of protection insurance policies during the year as well as the number of mobile service users, which increased 42% to over 630,000 monthly users.

Revenues⁵ were 6,939 million euros (-1.4% compared to 2011). In an environment with persistently low interest rates and given the slowdown in demand for loans, net interest income declined by 0.9%. Fees were down 2.1% in line with unfavourable financial markets.

Thanks to continued effort to improve operating efficiency, operating expenses⁵ contracted by 1.7% compared to 2011 and the cost/income ratio⁵ improved by 0.2 points to 64.8%.

Gross operating income⁵ thereby came to 2,443 million euros, down 0.9% compared to last year.

The cost of risk⁵, at 315 million euros, or 21 basis points of outstanding customer loans, remained at a low level.

After allocating one-third of French Private Banking's net income to the Investment Solutions division, FRB posted 2,010 million euros in pre-tax income³, down 0.9% compared to 2011, a good performance in a context of economic slowdown.

In the fourth quarter 2012, revenues⁵ were down 3.1% compared to the fourth quarter 2011. The 6.0% decline in net interest income, driven by a persistently low interest rate environment and the slowdown in demand for loans, was not entirely offset by the 1.2% rise in fees due in particular to protection insurance growth. With the 2.5% drop in operating expenses⁵, gross operating income⁵ decreased by 4.5% to 484 million euros. Maintaining the cost of risk⁵ at a low level despite a more

¹ Including 100% of Private Banking of the domestic markets in France (excluding PEL/CEL effects), Italy, Belgium and Luxembourg

² At constant scope and exchange rates

³ Excluding PEL/CEL effects

⁴ Source: *Banque de France* (independent VSEs & SMEs) on a sliding annual basis

⁵ Excluding PEL/CEL effects, with 100% of French Private Banking

challenging environment helped FRB generate, after allocating one-third of French Private Banking's net income to the Investment Solutions division, 377 million euros in pre-tax income¹, down 4.6% compared to the same period a year earlier.

BNL banca commerciale (BNL bc)

For the whole of 2012, in an unfavourable economic environment, BNL bc's business activity was reflected by 4.3% growth in deposits, driven by loans to corporates and local public entities. Outstanding loans grew on average by 0.7% despite a deceleration during the year in line with the market.

At 3,273 million euros, revenues² rose 2.2% compared to 2011. Net interest income was up, in particular for loans to small businesses and corporates and margins held up well. Fees decreased driven by a decline in new loan production and the impact of new regulations.

Thanks to cost-cutting measures, in particular in IT and real estate, operating expenses² were down 1.4% compared to 2011, at 1,804 million euros, helping BNL bc achieve a further 2 point improvement in its cost/income ratio² at 55.1%. Gross operating income² thereby came to 1,469 million euros, up 7.0% compared to last year.

The cost of risk², which was 116 basis points of outstanding customer loans, was up 18 basis points compared to last year due to the economic environment. After allocating one-third of Italian Private Banking's net income to the Investment Solutions division, BNL bc's pre-tax income was 491 million euros, down 12.9% compared to 2011. BNL bc thus achieved good operating performance in a challenging risk environment.

In the fourth quarter 2012, the 2.8% growth in revenues² compared to the fourth quarter 2011 was driven by a rise in net interest income, in particular loans to small business and corporates due to margins holding up well, whilst fees declined due to lower new loan production. Operating expenses² were down 1.6% compared to the fourth quarter 2011 thanks to cost-cutting measures, producing a positive 4.4 point jaws effect. Given the 39.4% increase in the cost of risk² compared to the same quarter a year earlier, pre-tax income, after allocating one-third of Italian Private Banking's net income to the Investment Solutions division, declined 41.9% to 68 million euros.

Belgian Retail Banking (BRB)

For the whole of 2012, BRB maintained a good sales and marketing drive. Deposits grew by 3.5% compared to last year due in particular to growth in current accounts and savings accounts. Loans grew 3.4%³ due in part by the growth in loans to individual customers (+5.5%) and to the fact that loans to SMEs held up well. The sales and marketing drive was also reflected in the successful launch of the Easy Banking offering for the iPhone, iPad and Android and in the good growth of cross-selling with CIB.

¹ Excluding PEL/CEL effects

² With 100% of Italian Private Banking

³ At constant scope

Revenues¹ totalled 3,328 million euros, up 2.1%² compared to 2011 due to higher net interest income as a result of growth in volumes, despite a deceleration at the end of the year. For their part, fees were flat.

Operating expenses¹, which came to 2,412 million euros, were down 0.3%², helping BRB continue to improve its cost/income ratio, down 1.7 points² to 72.5%. Gross operating income¹ thereby came to 916 million euros, up 9.0%² compared to 2011.

The cost of risk¹, which was 18 basis points of outstanding customer loans, remained at a moderate level. Therefore, after allocating one-third of Belgian Private Banking's net income to the Investment Solutions division, BRB's pre-tax income was 711 million euros, up 8.4%² compared to 2011.

In the fourth quarter 2012, revenues¹ were down 0.4% compared to the fourth quarter 2011 due to a slight decline in net interest income as a result of a persistently low interest rate environment and despite stable fees. Operating expenses¹ declined 1.5% thanks to the positive impact of measures to foster operating efficiency, which helped generate a positive 1.1 point jaws effect. Gross operating income¹ thus rose by 2.9%¹ compared to the fourth quarter 2011. The cost of risk grew by 15 million euros compared to the fourth quarter 2011 which had benefited from provision write-backs, but remained at a moderate level. After allocating one-third of Belgian Private Banking's net income to the Investment Solutions division, pre-tax income came to 144 million euros, down 8.3% compared to the same period a year earlier.

Luxembourg Retail Banking: for the whole of 2012, outstanding loans grew by 2.4% compared to 2011, thanks to a rise in volumes in the corporate and individual customer segments with good growth in mortgages. There was also strong growth in deposits (+10.5%) due in particular to very good asset inflows from corporate clients. Off balance sheet savings were up significantly, driven by increased demand for life insurance products. LRB's revenues grew in line with volumes, the good control of operating expenses helping to significantly improve the cost/income ratio. The trend in the fourth quarter 2012 was in line with this pattern.

Personal Investors: for the whole of 2012, assets under management grew by 10.7% compared to 2011, driven by positive volume and performance effects. Deposits grew sharply during the year, to 9.1 billion euros (+13.3%). Revenues were, however, down due to a contraction in the brokerage business as a result of clients' cautious stance in an uncertain environment. The trend in the fourth quarter 2012 was in line with this pattern.

Arval: for the whole of 2012, the financed fleet grew by 1.6% compared to last year, to 689,000 vehicles. At constant scope and exchange rates (in particular excluding the impact of the sale of the fuel card business in the UK in December 2011), Arval's revenues were up slightly compared to last year due to the fact that margins held up well. The trend in the fourth quarter 2012 was in line with this pattern.

Leasing Solutions: for the whole of 2012, outstandings declined by 9.5% compared to last year, in line with the adaptation plan regarding the noncore portfolio. The impact on revenues was, however, further limited due to the selective policy in terms of profitability of transactions. In the fourth quarter 2012, revenues were up slightly compared to the same period a year earlier.

¹ With 100% of Belgian Private Banking

² At constant scope

On the whole, the contribution by these four business units to Domestic Markets' pre-tax income, after allocating one-third of Luxembourg Private Banking's net income to the Investment Solutions division, was virtually flat compared to last year, at 794 million euros (+0.1%¹). In the fourth quarter 2012, the contribution was 172 million euros, up 22.4%¹ compared to the same period a year earlier due, in particular, to the operating efficiency measures.

*
* *

Europe-Mediterranean

For the whole of 2012, Europe-Mediterranean enjoyed a very strong sales and marketing drive. Deposits rose by 12.8%¹ compared to 2011 and were growing in most countries, especially in Turkey (+34.3%¹). Loans grew by 3.5%¹ with good performances in Turkey (+17.1%¹) and a continued decline in Ukraine (-29.0%¹).

Revenues rose 7.0%¹ to 1,796 million euros, due in part to a fast-paced growth in Turkey (+35%¹) and declined in Ukraine in line with outstandings. Excluding Ukraine, revenues grew 14.8%¹.

Operating expenses were up 2.1%¹ compared to 2011 due, in particular, to the bolstering of the commercial set up in the Mediterranean during the year with the opening of 30 branches, in particular in Morocco. In Turkey, TEB significantly improved its cost/income ratio which was down 18 points in 2012, at 64.6%¹, thanks to the streamlining of the network carried out in 2011.

The cost of risk, which was 290 million euros, or 117 basis points of outstanding customer loans, was up slightly compared to 2011. Europe-Mediterranean thus posted 254 million euros in pre-tax income, up sharply compared to 2011 (+52.7%¹).

In the fourth quarter 2012, revenues grew by 10.6%¹, thanks in particular to the good performance in Turkey. Operating expenses edged up 2.0%¹ due in particular to the bolstering of the commercial set up in the Mediterranean. Gross operating income thus totalled 136 million euros, up sharply compared to the same period a year earlier (+40.5%¹). Despite a still significant cost of risk, which was 142 basis points of outstanding customer loans, pre-tax income significantly increased compared to the fourth quarter 2011, to 65 million euros (+85.0%¹).

BancWest

For the whole of 2012, BancWest had a good sales and marketing drive in a more favourable environment. Deposits grew by 8.3%¹ compared to 2011, driven by the strong growth of current accounts and savings accounts. Loans were up 3.5%¹ due to good growth in corporate loans (+14.7%¹) and the success of business investments in the SME segment. The sales and marketing drive was also reflected in the revving up of the Private Banking expansion, the modernisation of the branch network and an expanded Mobile Banking offering.

¹ At constant scope and exchange rates

Revenues edged down 0.6%¹ compared to 2011 as a result of the negative impact of regulatory changes on fees. Excluding this impact, revenues were up 0.8%¹, the effect of higher volumes being offset by lower interest rates.

Operating expenses rose by 4.5%¹ compared to 2011, due to the strengthening of the corporate and small business as well as Private Banking set up.

The cost of risk was down at 35 basis points of outstanding customer loans, which equates to a 47.8%¹ decline compared to 2011.

With 859 million euros in pre-tax income, up 7.1%¹ compared to 2011, BancWest demonstrated its strong profit-generation capacity, whilst expanding the product offering.

In the fourth quarter 2012, revenues were flat¹, the impact of the decline in interest rates offsetting the rise in volumes. Operating expenses rose by 5.9%¹ due to costs to restructure the branch network and expand the Private Banking, corporate and small business set up. Given a cost of risk down sharply compared to the same quarter a year earlier (-43.3%¹), pre-tax income came to 180 million euros, up 1.9%¹ compared to the fourth quarter 2011, thus making a significant contribution to the Group's results.

Personal Finance

For the whole of 2012, Personal Finance continued to develop engines of growth with, in particular, the successful joint venture with Commerzbank in Germany, the implementation of the agreement with Sberbank in Russia, and the signing of new partnership agreements (for instance, with the Cora hypermarkets in France and with Sony in Germany in e-commerce). Outstanding loans were down 0.5% compared to 2011, at 89.9 billion euros. Outstanding consumer loans rose by 0.5% with, in particular, a good sales and marketing drive in Germany and Belgium. As for mortgages, the implementation of the adaptation plan under Basel 3 has resulted in a continued decline in outstandings (-1.8%). These combined effects and in particular the impact of new regulations in France on margins drove revenues down 3.1% compared to 2011 at 4,982 million euros.

Operating expenses were down 1.4% compared to 2011, at 2,387 million euros. Excluding adaptation costs (95 million euros in 2012), they were 3.8% lower.

With risks under control, the cost of risk, which was 1,497 million euros, or 167 basis points of outstanding customer loans, was down 142 million euros compared to 2011.

Pre-tax income totalled 1,280 million euros, up 3.0% compared to last year, demonstrating the business unit's good profit-generation capacity in a challenging environment.

In the fourth quarter 2012, revenues were down 0.4% compared to the same period a year earlier as a result of new regulations in France and lower outstanding mortgages in connection with the adaptation plan, and despite good consumer loan growth in Germany and Belgium. Operating expenses decreased 10.8% compared to the fourth quarter 2011, and 7.3% excluding the impact of adaptation costs. Gross operating income was thus up 10.1%. With a 4.9% increase in the cost of risk compared to the fourth quarter 2011, including 33 million euros in exceptional adjustments

¹ At constant scope and exchange rates

this quarter, pre-tax income came to 353 million euros, up 13.1% compared to the same quarter a year earlier.

Retail Banking's 2013 Action Plan

Domestic Markets

In 2013, Domestic Markets will continue its strong commitment to its clients, invest in innovation and pursue its effort to streamline operations.

It will thus prepare the retail bank of the future. For individual customers, it will expand innovative online banking services, in particular for mobile phones and continue to develop new payment solutions. For corporate customers, it will continue to expand One Bank for Corporates in association with CIB whilst continuing to acquire new customers (already 2,600 new accounts by year-end 2012) and bolstering the service offering, in particular in Cash Management, leveraging on its leading position in the eurozone. With respect to VSEs & SMEs, Domestic Markets will capitalise on the network of Small Business Centres (59 in France, 42 in Italy) and focus on developing synergies with Leasing Solutions and Arval. Private Banking will leverage its leadership position in the eurozone to grow its business in Italy and to pursue synergies with corporates and small businesses.

In Domestic Markets as a whole, the business unit will upgrade its networks based on the needs of its customers with more advisory and less transaction related services and more diversified formats.

An ambitious plan was thus unveiled in Belgium in December 2012 (Bank for the Future) designed to anticipate new customer behaviours (mobile banking, customer relations centres, less in-branch teller business and increased commercial meetings with clients) and to improve operating efficiency.

International Retail Banking

The retail banking networks outside the eurozone will roll out the Group's integrated business model whilst adapting themselves to local specificities.

Europe-Mediterranean will continue its selected business development with the opening of branches in regions with fast-paced growth (such as Morocco); adapt the set up and offering to online banking; develop business with institutional customers and grow cash management. With respect to Turkey, TEB will continue to grow its business, in particular by continuing to step up cross-selling with Investment Solutions and CIB.

At BancWest, in a more favourable economic context, the commercial offering will be expanded, in particular by developing Private Banking, closer cooperation with CIB and enhancing the Cash Management offering. Lastly, BancWest will continue to upgrade and streamline the branch network.

Personal Finance

Personal Finance will continue to adapt to the new environment.

In France, the business unit will continue to transform its business model whilst growing Cetelem Banque's business (gathering of savings and sale of protection insurance products), implementing the process of assisting clients in a difficult position and leveraging its business alliance with BPCE (joint venture up and running on January 1, 2013) to share certain development costs.

In Italy, Personal Finance will roll out Findomestic Banca (marketing of deposit accounts and insurance products) and continue product innovation.

Lastly, the business unit will continue to develop engines of growth: in Russia by implementing the strategic alliance with Sberbank; in the automobile sector, through partnerships with European manufacturers and distributors; in the Group's retail banking networks in emerging countries, by rolling out PF Inside; and, lastly, by expanding the Internet offering.

*
* *

INVESTMENT SOLUTIONS

For the whole of 2012, Investment Solutions posted, in all of the business units, a good rise in assets under management¹, up 5.6% compared to 31 December 2011, at 889 billion euros (842 billion euros as at 31 December 2011). This growth comes primarily from a favourable performance effect driven by the rise in financial markets, especially in the second half of the year. Net asset outflows for the year were -6.1 billion euros, but was penalised in the third quarter by a client's (fund manager) decision to insource a distribution contract. Excluding this effect, net asset inflows were +5.2 billion euros in 2012.

Thus, asset flows were positive in all the business units in 2012, save Asset Management: Wealth Management had good asset inflows, especially in the domestic markets and in Asia, good contributions from Insurance outside of France, in particular in Asia (Taiwan, South Korea), as well as from Personal Investors, especially in Germany. Asset inflows into Asset Management's money market and bond funds were more than offset by asset outflows in all other asset classes.

As at 31 December 2012, Investment Solutions' assets under management¹ broke down as follows: 405 billion euros for Asset Management, 266 billion euros for Wealth Management, 170 billion euros for Insurance, 35 billion euros for Personal Investors, and 13 billion euros for Real Estate Services.

Investment Solutions' revenues, which totalled 6,204 million euros, were up 4.8% compared to 2011. Wealth and Asset Management's revenues were down 4.1% due in particular to Asset Management's lower average outstandings and despite good growth by Wealth Management. Insurance's revenues rose 21.2% (+13.4% at constant scope and exchange rates) due to the strong growth of protection insurance and savings outside of France. Securities Services' revenues grew by 4.4% compared to 2011 as a result of a rise in asset under custody and under administration.

Operating expenses, which totalled 4,319 million euros, were up 1.4% compared to 2011 but were down 0.6% at constant scope and exchange rates. Operating expenses were down 10.1%² in

¹ Including assets under advisory on behalf of external clients, distributed assets and Personal Investors

² At constant scope and exchange rates

Asset Management as a result of the adaptation plan whilst investments in the business development of Insurance, Wealth Management and Securities Services continued, especially in Asia. The business unit's cost/income ratio thus improved by 1.6 point¹ compared to last year, to 69.6%.

After receiving one-third of the net income of domestic private banking, the Investment Solutions division therefore generated 2,098 million euros in pre-tax income, up 16.3%² compared to 2011, reflecting very good overall performance and improved operating efficiency.

In the fourth quarter 2012, Investment Solutions' revenues grew by 13.9% compared to the fourth quarter 2011, driven by the good performance of Wealth Management and Insurance. Operating expenses were steady, the business development investments in Insurance and Securities Services being offset by Wealth and Asset Management's decline as a result of the adaptation plan. Given a one-off provision write-back for one specific loan, pre-tax income nearly doubled compared to last year², to 583 million euros.

Investment Solutions' 2013 Action Plan

In 2013, Investment Solutions will continue to strengthen its leadership positions in Europe with targeted clientele, in particular Ultra High Net Worth Individuals in Private Banking and institutional clients.

The business unit will continue to innovate and expand its product offering: in Securities Services, by capitalising on changes in regulations in the field of market infrastructure; in Asset Management, by developing high value added products; in all the business units, by rolling out the online banking service offering.

Investment Solutions will continue international business development in fast growing countries, in particular by bolstering platforms in Asia Pacific, Latin America and the Gulf countries. Lastly, Insurance will continue to be a powerful driver of growth within the business unit.

CORPORATE AND INVESTMENT BANKING (CIB)

For the whole of 2012, CIB held up well in the context of the adaptation plan, which the division completed ahead of the schedule announced. Thus, compared to mid-2011, CIB's funding needs in U.S. dollars were reduced by 65 billion dollars by April 2012 and risk-weighted assets by 45 billion euros by the end of September 2012. The total net cost of the sale of assets under the plan was substantially lower than expected, at about 250 million euros.

Against this backdrop, CIB's revenues were down 1.8% compared to 2011, at 9,715 million euros. Excluding the impact of losses from sales of assets and sovereign bonds (91 million euros in 2012 and 1,024 million euros in 2011), the decline was 10.2%, or a decrease of about 1.1 billion euros,

¹ At constant scope and exchange rates

² Excluding the impact of Greek sovereign debt provisions on the Insurance business unit

800 million euros of which was in Corporate Banking, which is in line with the announced impact of the adaptation plan.

Advisory and Capital Markets' revenues were resilient in a challenging environment. They totalled 6,182 million euros, down 5.4%¹ compared to 2011, due to an environment that was not very favourable in Europe, the adaptation to Basel 3 and low client business at the end of the year. In 2012, the average VaR remained very low.

Fixed Income's revenues, which were 4,554 million euros, rose 2.2%¹ compared to 2011, due to the good performance of flow business in Rate, Forex and Credit, with particularly strong growth in bond secondary markets. The business unit also maintained its leading positions on bond issues: number 1 in euro and number 8 for all international issues.

Equities and Advisory's revenues, at 1,628 million euros, decreased 21.6% compared to last year due in part to low transaction volumes and limited investor demand. The business did, however, maintain solid positions, ranking number 3 as bookrunner for equity-linked products in Europe.

Corporate Banking performed well this year amidst the process of adapting the business model. Revenues totalled 3,533 million euros, down 17.3%² compared to 2011, in line with the reduction of outstanding loans, which decreased by 18.2%, compared to the level as at 31 December 2011, to 106 billion euros.

In the field of financing, the process of adapting the business model continued with the implementation of the Originate to Distribute approach. Corporate Banking maintained solid positions in new loan production, positioning itself as the number 1 bookrunner for syndicated loans in Europe by number and number 2 by volume and ranking second best trade finance provider worldwide. The business unit's expertise was largely recognised, receiving this year, for example, IFR's Loan of the Year award.

The business unit grew its deposit base 18.2% at the end of 2012, compared to the level as at 31 December 2011, at 55 billion euros, thanks in particular to significant gathering of client deposits in all regions and the expansion of Cash Management which won several significant mandates, confirming its global position as number 5.

CIB's operating expenses, which were 6,272 million euros, rose 2.4% compared to 2011. At constant scope and exchange rates, they were down 1.1%, due in particular to the workforce adaptation (1,400 people) provided for in the plan and completed in full by the end of 2012, and despite selected investments in Cash Management and the gathering of deposits. The cost/income ratio thus came to 62.3%, excluding the adaption plan and the impact of sales of loans, illustrating the good level of operating efficiency.

The cost of risk was 493 million euros, up 418 million euros compared to 2011 when it was particularly low due to substantial write-backs.

CIB pre-tax income thus came to 2,986 million euros, down 20.9% compared to 2011.

In the fourth quarter 2012, CIB's revenues increased 17.7% compared to the same period in 2011, to 1,983 million euros. Excluding the impact of sales of sovereign bonds and sales of loans, CIB's revenues were down 14.2%, Advisory and Capital Markets' revenues declined 9.9%¹ in a context

¹ Excluding losses from the sale of sovereign bonds in 2011

² Excluding losses from the sale of loans: 152 million euros in 2011, 91 million euros in 2012

of low client business and Corporate Banking's revenues declined by 19.3%¹, in line with the deleveraging plan. Operating expenses were down 3.4% compared to the fourth quarter 2011. At constant scope and exchange rates, they were 6.0% lower due to the decline in adaptation costs (32 million euros this quarter compared to 184 million euros in the fourth quarter 2011) and selected investments in particular in Cash Management and in the commercial set up. The cost of risk totalled 206 million euros and, with the impact of a provision set aside for one specific loan, was up 134 million euros compared to the same period a year earlier when it was very low. Pre-tax income came to 266 million euros, a sharp rebound compared to the fourth quarter 2011 which was marked by the sovereign debt crisis.

CIB's 2013 Action Plan

In 2013, CIB will continue transforming the business model, whilst bolstering its operations in Asia and North America.

Advisory and Capital Markets will continue to expand the product offering whilst strengthening flow product platforms, developing market infrastructure access and collateral management services and continuing to grow the bond origination businesses.

Corporate Banking will continue its transformation, further increasing client deposits by expanding Cash Management whilst developing a regional approach to be closer to clients.

The roll out of Originate to Distribute will be stepped up by leveraging on already strong positions in syndication, securitisation and bond issues and by developing innovative distribution channels (debt funds).

* *

CORPORATE CENTRE

For the whole of 2012, Corporate Centre revenues were -1,419 million euros compared to 2,204 million euros in revenues in 2011. They factor in -1,617 million of own credit adjustment (compared to +1,190 million euros in 2011), a purchase price accounting one-off amortisation of +427 million euro of a part of Fortis banking book due to early redemptions (compared to +168 million euros in 2011), a mechanical purchase price accounting amortisation of the Fortis and Cardif Vita banking books of +606 million euros (compared to +644 million euros in 2011), -232 million euros in losses from sales of sovereign bonds (negligible in 2011), the -68 million euros impact of the exchange of Convertible & Subordinated Hybrid Equity-linked Securities (CASHES) in the first quarter 2012 and the impact of the LTRO cost and of surplus deposits placed with Central Banks. The Corporate Centre's revenues in 2011 also included +516 million euros in revenues from BNP Paribas Principal Investment (+48 million euros in 2012) and a -299 million euro impairment of the equity investment in AXA.

Operating expenses rose to 1,093 million euros compared to 854 million euros in 2011, when there was a reversal of 253 million euro provision due to the favourable outcome of litigation. Excluding this effect, they were down 1.3%, the reduction of restructuring costs this year (409 million euros compared to 603 million euros) being almost offset by the increase in the French systemic tax (122

¹ Excluding the impact of sales of loans in connection with the adaptation plan

million euros), the increase in the corporate social contribution ("*forfait social*") (33 million euros) and increased tax on wages (19 million euros) as well as the accelerated 25 million euro depreciation of works on buildings.

The cost of risk reflects a net +3 million euros in write-backs compared to -3,093 million euros in 2011, which included a 3,161 million euros impairment of Greek sovereign debt.

Other items total 1,307 million euros (compared to -86 million euros in 2011) due, for the most part, to the 1,790 million euro capital gain from the sale of a 28.7% stake in Klépierre SA, a -406 million euros goodwill impairment (compared to -152 million euros in 2011), of which 298 million euros was an impairment of BNL bc's goodwill due to the expected increase in the Bank of Italy's capital requirements (local common equity Tier 1 ratio increased from 7% to 8%), and the -47 million euro depreciation of an equity investment. Separately, the Bank is continuing the internal review of certain transactions that could be subject to economic sanctions under U.S. law. It should be noted that similar reviews conducted by a number of other financial institutions have often resulted in settlements depending on the circumstances of each matter.

Pre-tax losses totalled -1,202 million euros compared to -1,829 million euros in losses in 2011.

In the fourth quarter 2012, Corporate Centre revenues totalled -362 million euros compared to 589 million euros during the same period a year earlier. They included own credit adjustment for -286 million euros (compared to +390 million euros in the fourth quarter 2011), a mechanical purchase price accounting amortisation of Cardiff Vita and the Fortis banking book of +124 million euros (compared to +165 million euros in the fourth quarter 2011), and the impact of the LTRO cost and of surplus deposits placed with Central Banks. The Corporate Centre's revenues in the fourth quarter 2011 also included one-off +148 million euro purchase price accounting amortisations of a part of Fortis banking book due to early redemptions.

The Corporate Centre's operating expenses rose to 374 million euros compared to 97 million euros in the fourth quarter 2011 when there was a reversal of a 253 million euro provision due to the favourable outcome of litigation. Excluding this effect, they grew by 24 million euros, the reduction of restructuring costs this quarter compared to the same period a year earlier (174 million euros compared to 213 million euros) being more than offset by the increase in the French systemic tax (30 million euros), the increase in the corporate social contribution ("*forfait social*") (8 million euros) and the booking this quarter of the annual impact of the increased tax on wages (19 million euros) as well as the accelerated 22 million euro depreciation of works on buildings.

The cost of risk was -32 million euros compared to -533 million euros in the fourth quarter 2011 in which there was a 551 million euro impairment of Greek sovereign debt.

The other items come to -408 million euros (compared to -194 million euros in the fourth quarter 2011) and were due, for the most part, to goodwill impairments.

Pre-tax income was -1,176 million euros compared to -235 million euros during the same period a year earlier.

*
* *

LIQUIDITY AND FINANCING

The Group's liquidity position is very strong.

The Group's cash balance sheet¹ totalled 974 billion euros as at 31 December 2012. Equity, customer deposits and medium-and long-term resources represent a surplus of 69 billion euros (of which 52 billion dollars) compared to the funding needs of the client activity and tangible and intangible assets. This surplus more than doubled compared to what it was as at 31 December 2011 (31 billion euros) and is virtually flat compared to last quarter (71 billion euros). Stable resources amount to 110% of funding needs of customer activity, including tangible and intangible assets.

The Group's liquid and asset reserves immediately available totalled 221 billion euros (compared to 160 billion euros as at 31 December 2011), which equates to 119% of the short-term cash resources.

The Group's 2013 medium- and long-term funding programme amounts to 30 billion euros. By the end of January 2013, 11 billion euros have already been raised² from issues with an average maturity of 4.8 years and an average spread of 73 basis points above mid-swap (compared to 109 basis points on average for the 2012 programme). The Group therefore has a diversified medium- and long-term funding at good conditions, and which are improving.

*
* *

SOLVENCY

The Group's solvency is very high.

Common equity Tier 1 capital totalled 65.1 billion euros as at 31 December 2012, up 6.2 billion euros compared to what it was at 31 December 2011, thanks primarily to retaining most of the earnings.

Risk-weighted assets³ were 552 billion euros, down 62 billion euros compared to what it was as at 31 December 2011, primarily due to the adaptation plan.

Thus, as at 31 December 2012, the common equity Tier 1 ratio, which includes the European Capital Requirements Directive 3 (CRD3) regulatory regime that came into force at the end of 2011, was 11.8%, up 220 basis points compared to what it was as at 31 December 2011.

¹ Based on the banking prudential scope and after netting amounts for derivatives, repos, securities lending/borrowing and payables/receivables

² Including issues at the end of 2012 on top of the 34 billion euros completed under the 2012 programme

³ Basel 2.5

The Basel 3 common equity Tier 1 ratio, taking into account all the rules of the CRD4¹ with no transitory provisions (Basel 3 fully loaded that will come into force only on 1st January 2019) was 9.9% as at 31 December 2012 and up 40 basis points compared to what it was as at 30 September 2012 due to reduction of risk-weighted assets (+15 basis points), the impact of net income from the quarter (+10 basis points) as well as the appreciation of available for sale securities (+10 basis points). It illustrates the Group's high level of solvency within the new regulations, the 9% objective by the end of 2012 set during the launch of the adaptation plan therefore being largely surpassed.

*
* * *

THE GROUP'S ACTION PLAN

In 2013, the Group will prepare a 2014-2016 business development plan based on the road maps of the various divisions with the goal of unveiling a comprehensive plan early in 2014.

The first phase of the plan is the launch of Simple and Efficient, an ambitious initiative to simplify the way the Group functions and improve operating efficiency.

The second phase will include specific business development plans by region and business unit. The first unveiled plan covers the Asia Pacific region.

Simple & Efficient: an ambitious plan to simplify the way the Group functions and improve operating efficiency

In 2013, the Group will launch a 3-year 1.5 billion euro investment programme designed to simplify the way it functions and improve its operating efficiency.

The Group is aiming to improve operating efficiency in order to achieve cost savings starting in 2013 and which are expected to reach 2 billion euros a year as of 2015. About half of these savings will come from Retail Banking, a third from CIB and a sixth from Investment Solutions. This will be achieved without closing down any businesses and with the dedication of the entire Group.

In order to maximise the benefits, General Management will head the programme and a specially-dedicated team will provide across-the-board monitoring, facilitating project management across several business units and functions.

The programme will include 5 areas for transformation (process review, system streamlining, operating simplification, customer service and cost optimisation) and across-the-board approaches to improving operating efficiency (digitisation of business processes, increased delegation, simplified internal reporting, etc.). Over 1,000 initiatives have already been identified in the Group.

¹ CRD4 as anticipated by BNP Paribas. Since CRD4 is still being debated in the European Parliament, its directives remain subject to interpretation and can still be amended

Asia Pacific: a region for the Group to focus its business development

With a workforce of nearly 8,000 persons¹ working for CIB and Investment Solutions, and a presence in 14 markets, the Group is one of the international banks that is best positioned in Asia Pacific where it has had a long-standing presence. CIB and Investment Solutions currently make about 12.5% of their revenues there, or 2 billion euros.

In the fast-growing region, the Group has recognised franchises especially in Trade Finance (with 25 trade centres), Cash Management (number 5 in Asia), Fixed Income (number 1 for FX Derivatives and number 1 Interest Derivative Dealer), Equities and Advisory (number 2 Equity Derivatives Dealer), Private Banking (number 8 with 30 billion in assets under management in 2012), Insurance (7th amongst non Asian insurers), and has a strong presence in the petroleum and gas, metals and mining products sectors as well as air transport. The Group also has successful partnerships with a number of leading domestic players.

By leveraging its solid platforms, the Group's goal is to grow CIB's and Investment Solutions' revenues in Asia to over 3 billion euros by 2016, or a compounded annualised growth rate on the order of 12%.

The Group expects to grow its financed assets by the same magnitude and, likewise, to grow the gathering of deposits in the region. Within the next three years, the Group also expects to hire about 1,300 people in the region to work in Investment Solutions and CIB.

For corporate clients, the Group will bolster the commercial organisation geared to multinational corporations as well as local large and medium-sized businesses. Thereby, it will expand its domestic client base, service global clients in Asia Pacific and its Asian clients as they take their businesses global. It will hence step up the effort with respect to Trade Finance and Cash Management and, in Fixed Income, speed up the roll out of bonds, flow products, and hedging instruments. At the same time, the Group will heighten its presence with investors rolling out Originate to Distribute, developing Asset Management and Securities Management, expanding the Private Banking client base and stepping up cross-selling between CIB and Investment Solutions. Lastly, the Group will forge new partnerships, especially in Insurance with the objective of developing business in China and Indonesia.

A member of the Executive Committee, already based in the region, will oversee the Group's business and development.

*
* *

¹ Excluding partnerships

Commenting on these results, Chief Executive Officer Jean-Laurent Bonnafé stated:

“Thanks to its diversified business model committed to servicing needs of clients, BNP Paribas Group produced in 2012 solid results in a challenging economic environment.

The Group quickly managed to adapt its business model to the new regulations, thanks to the dedication of all our employees, enabling to actively pursue business development in 2013.

BNP Paribas is moreover in the process of preparing its 2014-2016 business development plan to be implemented by region and by business unit. The first phase is the launch of Simple & Efficient: an ambitious plan to simplify the way the Group functions and improve operating efficiency.

Dedicated to serve its clients all over the world, BNP Paribas is preparing the bank of the future and plays an active role in financing the economy.”

QUARTERLY SERIES	22

Figures included in this presentation are unaudited. On 18 April 2012, BNP Paribas issued a restatement of its quarterly results for 2011 reflecting, in particular, an increase of capital allocated to each business from 7% to 9% of risk-weighted assets, the creation of the "Domestic Markets" division and transfers of businesses between business units. In these restated results, data pertaining to 2011 has been represented as though the transactions had occurred on 1st January 2011. This presentation is based on the restated 2011 quarterly data.

This presentation includes forward-looking statements based on current beliefs and expectations about future events. Forward-looking statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future events, operations, products and services, and statements regarding future performance and synergies. Forward-looking statements are not guarantees of future performance and are subject to inherent risks, uncertainties and assumptions about BNP Paribas and its subsidiaries and investments, developments of BNP Paribas and its subsidiaries, banking industry trends, future capital expenditures and acquisitions, changes in economic conditions globally or in BNP Paribas' principal local markets, the competitive market and regulatory factors. Those events are uncertain; their outcome may differ from current expectations which may in turn significantly affect expected results. Actual results may differ materially from those projected or implied in these forward-looking statements. Any forward-looking statement contained in this presentation speaks as of the date of this presentation. BNP Paribas undertakes no obligation to publicly revise or update any forward-looking statements in light of new information or future events.

The information contained in this presentation as it relates to parties other than BNP Paribas or derived from external sources has not been independently verified and no representation or warranty expressed or implied is made as to, and no reliance should be placed on the fairness, accuracy, completeness or correctness of, the information or opinions contained herein. None of BNP Paribas or its representatives shall have any liability whatsoever in negligence or otherwise for any loss however arising from any use of this presentation or its contents or otherwise arising in connection with this presentation or any other information or material discussed.

The following new paragraph “**Financial transaction tax**” will be added to the ITALIAN TAXATION section starting on page 538 of the Base Prospectus:

Financial transaction tax

Pursuant to Article 1(491 and followings) of Law No. 228 of 24 December 2012, a financial transaction tax (“**FTT**”) applies to (i) transfers of property rights on shares and other participating securities issued by Italian resident companies; (ii) transfer of property rights on financial instruments representing these shares and/or participating securities, whether issued by Italian resident issuers or not (together “**Relevant Instruments**”); and (iii) transactions on derivatives on the Relevant Instruments (i.e. having an underlying mainly represented by one or more of the Relevant Instruments or whose value is mainly linked to the Relevant Instruments) whether issued by Italian resident issuers or not.

With specific reference to the transactions on securitised derivatives on the Relevant Instruments (e.g. warrants, covered warrants and certificates) the FTT is due, as of 1 July 2013, regardless of the tax residence of the parties and/or where the transaction is executed. The FTT is levied at a fixed amount that varies depending on the features of the instruments and the notional value of the transaction in the range of EUR 0.01875 and EUR 200 per transaction. In the case of physical settlement, the FTT is also due upon transfer of ownership rights on the underlying Relevant Instruments. A reduced FTT (1/5 of the standard rate) is laid down for certain transactions executed on regulated markets or multilateral trading facilities of an EU Member States and of the SEE included in the list set out by the Ministerial Decree issued pursuant to Article 168-bis of TUIR.

The FTT on derivatives is due by each of the parties to the transactions. The FTT is not applied where one of the parties to the transaction is the European Union, the BCE, central banks of the EU Member States, foreign Central Banks or entities which manage the official reserves of a foreign State, or international bodies or entities set up in accordance with international agreements which have entered into force in Italy. Further specific exemptions exist, inter alia, for (i) subjects who carry on market making activities; (ii) mandatory social security entities and pension funds set up according to Legislative Decree No. 252 of 5 December 2005; and (iii) entities merely interposed in the execution of a transaction.

The FTT shall be levied, and subsequently paid, to the Italian Revenue by the subject (generally a financial intermediary) that is involved, in any way, in the execution of the transaction. If more than one subject is involved in the execution of the transaction, the FTT is payable by the subject who receives the order of execution by the purchaser of the Relevant Instruments or by the ultimate counterparty. Subjects not resident in Italy can appoint an Italian representative for the purposes of the FTT. If no other subject is involved in the execution of the transaction, the FTT must be paid by each relevant party to the transaction. The Italian Ministry of Economy and Finance will lay down in a specific Decree the practical details for the application of these taxes and relevant tax reporting obligations.

Copies of the Press Release and its slides published by BNP Paribas on 14 February 2013 are also available on BNPP's website: www.invest.bnpparibas.com.

Investors who have already agreed to purchase or subscribe Warrants or Certificates pursuant to the Programme before this Supplement is published have the right, exercisable within at least two working days after the publication of this Supplement, to withdraw their acceptances.
