

Stellantis Builds Global Network of Collaborative Projects to Foster Innovation Worldwide

- **Stellantis partners on more than 160 co-funded projects worldwide**
- **Engaging with one of the largest ecosystems in the automotive world: over 1,000 partners including public institutions, R&D centers, universities and other stakeholders**
- **Roster of collaborative projects aligns with Stellantis' strategic technical domains**
- **Open-minded approach and pioneering spirit boosting innovation within Stellantis and building the roadmap for the future of mobility**
- **Solutions to technical challenges will accelerate the transformation into a sustainable mobility tech company and help meet Dare Forward 2030 goals**

AMSTERDAM, Sept. 26, 2022 - [Stellantis](#) is collaborating with researchers, scientists and engineers around the world - one of the largest networks of cooperative innovation - to speed the development and implementation of ground-breaking technologies to help the Company deliver the goals of the Dare Forward 2030 strategic plan, including reaching carbon net zero emissions by 2038.

With more than three decades working with public institutions, other R&D centers, academies and various stakeholders, Stellantis is capitalizing on that experience by building one of the biggest and widest collaborative ecosystems in the world, which today numbers 164 running projects and over 1,000 different partners involved worldwide.

These projects can combine private and public funding, bringing together the expertise of Stellantis' extensive technical community and top-tier institutions with their highly skilled talent, to seek solutions to the most-challenging issues in global mobility. Together, Stellantis and its unprecedented collaborations are building the common roadmap to cutting-edge freedom of mobility.

"Addressing the complexity of tomorrow's mobility requires innovation. Our open approach, based on a global collaborative ecosystem, covering the most challenging technical topics, allows us to advance knowledge and focus on pre-competitive research that can eventually and positively impact the mobility world," said Ned Curic, Stellantis Chief Technology Officer. "We are stronger and more creative when we work together, especially when we join forces with some of the world's best partners and researchers. This pioneering spirit is key to the transformation of Stellantis into a well-recognized tech company and helps us find breakthrough answers to technical challenges, answers that help our customers, our company and our society."

Stellantis teams from Brazil, Canada, France, Germany, Italy, Portugal and Spain are working in cooperation with other stakeholders on common and harmonized goals. Each collaborative, co-funded project can last up to four years.

In addition, other Stellantis teams in Brazil, China, India and the United States are proactively involved in pre-competitive research with industry stakeholders, contributing in-kind resources to address technical issues. The roster of global collaborative projects is aligned with Stellantis' strategic technical domains, which include:

- Autonomous driving and connectivity
- Body, chassis and interior
- Electrification technologies and advanced propulsion
- Manufacturing
- Materials

Examples of current collaborative projects:

Hi-Drive (Autonomous driving and connectivity): Bringing together automakers, technology suppliers, universities and research institutes, Hi-Drive is the leading European project on automated driving. It is exploring and testing solutions for vehicle connectivity, high-precision vehicle positioning, cybersecurity and machine learning to cover a wide range of traffic environments.

Thermal Comfort Research (Body, chassis and interior): This collaboration aims to develop new systems and strategies for the management of heat inside vehicles while minimizing energy consumption, a key factor for extending the range of BEVs.

CEVOLVER (Electrification technologies and advanced propulsion): Project CEVOLVER (Connected Electric Vehicle Optimized for Life, Value, Efficiency and Range) takes a user-centric approach for optimizing the development and operation of electric vehicles and uses cutting edge technologies, components and systems. The project leverages opportunities of connectivity to the computational capabilities of big data.

ODIN (Manufacturing): To strengthen European Union production companies' confidence in using advanced robotics, ODIN brings technology from the latest groundbreaking research to demonstrate that novel robot-based production systems are technically feasible, efficient and sustainable for immediate introduction on the shop floor.

Forest-Comp (Materials): This research project evaluates the use of renewable and non-renewable forest resources to mass produce bio-composites, which could be used for interior trim or acoustic insulation in vehicles.

FORWARD-LOOKING STATEMENTS

This communication contains forward-looking statements. In particular, statements regarding future events and anticipated results of operations, business strategies, the anticipated benefits of the proposed transaction, future financial and operating results, the anticipated closing date for the proposed transaction and other anticipated aspects of our operations or operating results are forward-looking statements. These statements may include terms such as “may”, “will”, “expect”, “could”, “should”, “intend”, “estimate”, “anticipate”, “believe”, “remain”, “on track”, “design”, “target”, “objective”, “goal”, “forecast”, “projection”, “outlook”, “prospects”, “plan”, or similar terms. Forward-looking statements are not guarantees of future performance. Rather, they are based on Stellantis’ current state of knowledge, future expectations and projections about future events and are by their nature, subject to inherent risks and uncertainties. They relate to events and depend on circumstances that may or may not occur or exist in the future and, as such, undue reliance should not be placed on them.

Actual results may differ materially from those expressed in forward-looking statements as a result of a variety of factors, including: the impact of the COVID-19 pandemic, the ability of Stellantis to launch new products successfully and to maintain vehicle shipment volumes; changes in the global financial markets, general economic environment and changes in demand for automotive products, which is subject to cyclicity; changes in local economic and political conditions, changes in trade policy and the imposition of global and regional tariffs or tariffs targeted to the automotive industry, the enactment of tax reforms or other changes in tax laws and regulations; Stellantis’ ability to expand certain of their brands globally; its ability to offer innovative, attractive products; its ability to develop, manufacture and sell vehicles with advanced features including enhanced electrification, connectivity and autonomous-driving characteristics; various types of claims, lawsuits, governmental investigations and other contingencies, including product liability and warranty claims and environmental claims, investigations and lawsuits; material operating expenditures in relation to compliance with environmental, health and safety regulations; the intense level of competition in the automotive industry, which may increase due to consolidation; exposure to shortfalls in the funding of Stellantis’ defined benefit pension plans; the ability to provide or arrange for access to adequate financing for dealers and retail customers and associated risks related to the establishment and operations of financial services companies; the ability to access funding to execute Stellantis’ business plans and improve its businesses, financial condition and results of operations; a significant malfunction, disruption or security breach compromising information technology systems or the electronic control systems contained in Stellantis’ vehicles; Stellantis’ ability to realize anticipated benefits from joint venture arrangements; disruptions arising from political, social and economic instability; risks associated with our relationships with employees, dealers and suppliers; increases in costs, disruptions of supply or shortages of raw materials, parts, components and systems used in Stellantis’ vehicles; developments in labor and industrial relations and developments in applicable labor laws; exchange rate fluctuations, interest rate changes, credit risk and other market risks; political and civil unrest; earthquakes or other disasters; and other risks and uncertainties.

Any forward-looking statements contained in this communication speak only as of the date of this document and Stellantis disclaims any obligation to update or revise publicly forward-looking statements. Further information concerning Stellantis and its businesses, including factors that could materially affect Stellantis’ financial results, is included in Stellantis’ reports and filings with the U.S. Securities and Exchange Commission and AFM.
