Johannes Meier new member of the Gasunie Supervisory board

Johannes Meier (58 years, German national) has been appointed as member to the Supervisory Board of Gasunie. He will take up his mandate starting 1 September 2021. He has a broad knowledge of both the energy transition and ICT. Previously he was director of the European Climate Foundation (ECF). Currently he holds various non-executive board positions at companies and foundations. Pieter Duisenberg chairman of the Supervisory Board: "Johannes Meier is a valuable contribution to the Supervisory Board of Gasunie, with regards to the transition of the company from natural gas transport to infrastructure for hydrogen, green gas, heat and CO2 in the Netherlands and Germany".

Gasunie is a European energy-infrastructure company. Gasunie's network is one of the largest high-pressure pipeline networks in Europe, comprising over 18,000 kilometres of pipeline in the Netherlands and northern Germany. Gasunie provides natural and green gas transport services through its subsidiaries, Gasunie Transport Services B.V. (GTS) in the Netherlands and Gasunie Deutschland in Germany. With its cross-border gas infrastructure and services, Gasunie facilitates TTF, which has become the leading European gas trading point. Gasunie also provides other gas infrastructure services, including gas storage and LNG. Gasunie wants to help accelerate the transition to a CO₂-neutral energy supply and believes that gas-related innovations, for instance in the form of renewable gases such as hydrogen and green gas, can make an important contribution. Both existing and new gas infrastructure play a key role here. Gasunie also plays an active part in the development of other energy infrastructure to support the energy transition, such as district heating grids.
