Record margin at 8.4% driven by favorable mix with lower volumes

- U.S. market share⁽⁴⁾ at 12.4% in line with Q1 2017, down 30 bps year over year, mainly reflecting discontinuance of Chrysler 200, Dodge Dart and Jeep Patriot
- Decrease in shipments primarily due to planned capacity realignment and the transition to the all-new Jeep Compass
- Decrease in Net revenues mainly due to lower shipments, partially offset by favorable vehicle mix and positive foreign exchange translation
- Decrease in Adjusted EBIT mainly due to lower Net revenues and prior year one-off residual values adjustment, substantially offset by lower warranty costs including supplier recoveries, purchasing savings and reduced advertising costs

New products driving higher volumes and improved mix

- Market share⁽⁶⁾ slightly down in Brazil at 17.6% with improvement in Argentina from 11.5% to 12.6%
- Increase in shipments mainly due to the all-new Jeep Compass
- Net revenues increase due to higher shipments, favorable vehicle mix and favorable foreign exchange translation effects
- Adjusted EBIT increase mainly as a result of higher Net revenues, partially offset by increased product cost driven by inflation
- Adjusted EBIT excludes total charges of €93 million, of which €40 million relates to workforce restructuring costs and €53 million of asset impairment charges primarily related to the early discontinuance of Fiat Novo Palio production and certain real estate assets in Venezuela

During the quarter, the Group reversed a liability of €895 million for Brazilian indirect taxes reflecting recent court decisions. As this liability related to the Group's Brazilian operations in multiple segments and given the significant and unusual nature of the item, it was not attributed to the results of the related segments and was excluded from Group Adjusted EBIT.

There was a corresponding €281 million decrease in deferred tax assets related to the release of the above liability. Additionally, due to increased political uncertainty in Brazil, a slower pace of economic recovery is anticipated. As a result, deferred tax assets of €453 million were written-off. These items are excluded from Group Adjusted net profit.
