

QIAGEN reports results for fourth quarter and full-year 2016

- Ongoing momentum in fourth quarter supports strong 2016 performance:
 - o Q4 2016:
 - Net sales \$366.5 million (+5% actual, +8% CER vs. +8% CER guidance)
 - EPS \$0.04; adjusted EPS \$0.15 (\$0.16 CER vs. \$0.15-0.16 CER guidance),
 adjusted EPS excl. charge \$0.39 (\$0.41 CER vs. \$0.38 CER guidance)
 - Full-year 2016:
 - Net sales \$1.34 billion (+4% actual, +6% CER vs. +6-7% CER guidance)
 - EPS \$0.34; adjusted EPS \$0.87 (\$0.90 CER vs. \$0.87-0.88 CER guidance),
 adjusted EPS excl. charge \$1.11 (\$1.14 CER vs \$1.10-1.11 CER guidance)
 - Free cash flow rises 22% to \$267 million
- QIAGEN reaffirms full-year 2017 outlook for 6-7% CER sales growth and adjusted EPS target before restructuring costs of \$1.25-1.27 CER

Venlo, the Netherlands, February 1, 2017 – QIAGEN N.V. (NASDAQ: QGEN; Frankfurt Prime Standard: QIA) announced results of operations for the fourth quarter and full-year 2016, delivering on goals for improvements in net sales and adjusted earnings.

"QIAGEN's performance during 2016 shows our transformation is building momentum thanks to the power of our Sample to Insight portfolio and we are moving ahead on a new growth trajectory," said Peer M. Schatz, Chief Executive Officer of QIAGEN N.V. "We have strengthened our position as a global leader in molecular testing, and we expect to make significant progress in 2017."

"All customer classes and regions grew in 2016, led by strong expansion in Molecular Diagnostics, apart from the expected headwinds from lower U.S. HPV test sales. The Academia, Pharma and Applied Testing customer classes also produced good organic growth, augmented by the acquisitions of MO BIO and Exigon, which further differentiate our Sample to Insight portfolio. Among the 2016 highlights, QuantiFERON-TB test sales rose to a new 25% CER growth pace, and we submitted the fourth-generation QuantiFERON-TB Gold Plus for U.S. approval. The GeneReader NGS System received enthusiastic reception from labs seeking a cost-effective, end-to-end solution for nextgeneration sequencing, and placements achieved a target of more than 10% of the market for new benchtop sequencers in oncology applications. We have begun rolling out system enhancements and new gene panels to create a full menu of oncology applications. The QIAsymphony system also exceeded our 2016 goal of 1,750 cumulative placements, with double-digit consumable growth. In Personalized Healthcare, QIAGEN signed additional co-development agreements for companion diagnostics, surpassing the milestone of 20 master collaboration agreements with pharma companies. QIAGEN's differentiated technologies in cutting-edge areas such as liquid biopsy, digital NGS and the microbiome also generated robust growth in 2016. Bioinformatics are increasingly integrated into our Sample to Insight solutions, and the recent acquisition of OmicSoft will further differentiate our capabilities for data management and analysis," Peer Schatz said.

"QIAGEN has created a differentiated market position that builds on our unique ability to support a broad range of customers along the continuum from basic research to clinical healthcare with a focused portfolio in molecular testing," said Peer Schatz. "Our growth trajectory through 2020 sets us on a path for solid sales growth, improved operating leverage and increased free cash flow, all of which will create greater value."

Full-year 2016 results

Net sales grew 4% at actual rates to \$1.34 billion compared to 2015 and 6% at constant exchange rates (CER), with two percentage points of adverse currency movements. Net sales rose 8% CER excluding U.S. HPV test sales, which created the expected two percentage points of headwind in the full-year results and represented 3% of total sales for 2016. Organic business expansion contributed a solid four percentage points to total CER growth, while nearly two percentage points of additional growth came from the December 2015 acquisition of MO BIO Laboratories Inc., a leader in sample technologies for metagenomics and microbiome analysis, and the June 2016 acquisition of Exiqon A/S, a leader in RNA analysis technologies.

The Molecular Diagnostics and Life Sciences customer classes, as well as all regions, supported higher sales of consumables and related revenues (+6% CER / 87% of sales) and instruments (+5% CER / 13% of sales). Molecular Diagnostics (+7% CER / 50% of sales) advanced 10% CER excluding U.S. HPV test sales, while the Applied Testing, Pharma and Academia customer classes all showed solid single-digit CER growth trends complemented by the acquisitions. Among the regions, Asia-Pacific / Japan (+11% CER) had the fastest pace thanks to double-digit CER gains in China and South Korea, while Europe / Middle East / Africa (+8% CER) benefited from expansion in France, the UK, Turkey and the Middle East region, which more than offset softer trends in Germany. The Americas (+5% CER) grew 8% CER excluding headwinds from lower U.S. HPV test sales, with solid single-digit CER growth in the U.S. and double-digit CER gains in Brazil and Mexico.

Operating income was \$98.8 million in 2016 compared to \$179.5 million in 2015. Adjusted operating income, which excludes items such as business integration, acquisition-related costs and the amortization of intangible assets acquired in business combinations, declined to \$256.6 million in 2016 compared to \$318.4 million in 2015. In the fourth quarter of 2016, adjusted operating income includes a \$68.2 million pre-tax restructuring charge related to initiatives to support faster sales momentum while delivering margin gains. The adjusted operating income margin was 19% of sales in 2016 compared to 25% in 2015. However, excluding the restructuring charge, adjusted operating income rose 2% in 2016 to \$324.8 million compared to 2015, with the adjusted operating income margin at 24% of sales.

Net income attributable to owners of QIAGEN N.V. in 2016 was \$80.4 million, or \$0.34 per diluted share (based on 239.0 million diluted shares) compared to \$130.1 million, or \$0.55 per share (based on 238.6 million diluted shares) in 2015. Adjusted net income was \$207.9 million, or \$0.87 per share (\$0.90 CER), compared to \$252.6 million, or \$1.06 per share, in 2015. Excluding the \$79.1 million pretax (\$57.0 million after tax) restructuring charge, adjusted diluted EPS in 2016 was \$1.11 (\$1.14 CER).

Fourth quarter 2016 results

Net sales grew 5% at actual rates to \$366.5 million in the fourth quarter of 2016 over the year-ago period, rising 8% CER with three percentage points of adverse currency movements. The acquisitions of MO BIO and Exiqon provided three percentage points of total CER growth for the fourth quarter of 2016, while organic growth provided five percentage points. No meaningful headwind was created from the 4% CER decline in U.S. HPV test sales compared to the fourth quarter of 2015.

In line with the full-year trend, all customer classes and regions supported higher sales of consumables and related revenues (+8% CER / 86% of sales) and instruments (+6% CER / 14% of sales). Molecular Diagnostics (+11% CER / 50% of sales) advanced on sales of the QuantiFERON latent TB test growing well above the 25% CER annual growth rate target. In the Life Sciences customer classes, Applied Testing led with 10% CER growth, supported by single-digit CER gains in Pharma and Academia. Among the regions, Europe / Middle East / Africa (+10% CER) and Asia-Pacific / Japan (+14% CER) both saw robust trends, while the Americas (+5% CER) grew on gains in the U.S. and Brazil, but significantly weaker sales in Mexico due to the timing of national tenders.

Sample to Insight _______

Operating income was \$4.2 million in the fourth quarter of 2016 compared to \$57.2 million in the same period of 2015. Adjusted operating income, which excludes items such as business integration, acquisition-related costs and the amortization of intangible assets acquired in business combinations, declined 52% to \$44.5 million compared to \$92.8 million in the year-ago period. The adjusted operating income margin was 12% of sales compared to 27% in the same period of 2015. However, excluding the pre-tax restructuring charge taken in the fourth quarter of 2016, adjusted operating income rose 21% to \$112.7 million, and the adjusted operating income margin was 31% of sales.

Net income attributable to owners of QIAGEN N.V. was \$8.6 million, or \$0.04 per diluted share (based on 239.6 million diluted shares) compared to \$50.9 million, or \$0.21 per share (based on 238.6 million diluted shares) in the fourth quarter of 2015. Adjusted net income was \$36.5 million, or \$0.15 per share (\$0.16 CER), compared to \$76.2 million, or \$0.32 per share, in the year-ago period. Excluding the restructuring charge taken in the 2016 period, adjusted diluted EPS was \$0.39 (\$0.41 CER).

Balance sheet and cash flows

At December 31, 2016, cash and cash equivalents rose to \$439.2 million from \$290.0 million at December 31, 2015. Net cash provided by operating activities was \$341.6 million in 2016, up from \$317.5 million in 2015. Purchases of Property, Plant and Equipment declined to \$74.5 million in 2016 from \$97.8 million, as free cash flow rose 22% to \$267.1 million from \$219.7 million. Net cash used in investing activities was \$179.1 million in 2016, including \$90.5 million for the Exiqon A/S acquisition, compared to \$146.2 million in 2015. Net cash used in financing activities was \$10.6 million compared to \$258.6 million in 2015, which included \$251.9 million for debt repayment.

"QIAGEN achieved our goals for 2016 in terms of sales, adjusted earnings and free cash flow while taking targeted actions to support future sales growth and deliver operating margin improvements after a period of investments," said Roland Sackers, Chief Financial Officer of QIAGEN N.V. "We see these results as an important step in setting the new growth trajectory toward 2020, and they support our top priority to increase shareholder returns and create value. We have an ongoing disciplined approach to capital allocation, using the synthetic share repurchase to further optimize our balance sheet while maintaining flexibility for targeted acquisitions, such as OmicSoft in early 2017, that are aligned with our strategy to strengthen QIAGEN's leadership in molecular testing."

In Q4 2016, QIAGEN changed to the "multiple attribution method" accounting principle for equity-based compensation. For full-year 2015, adjusted diluted EPS was revised to \$1.06 (previously \$1.05) due to a modest rounding difference from reduction in equity-based compensation versus increase in number of diluted shares. For the first nine months of 2016, adjusted diluted EPS remained at \$0.72 after the revision. This change had no impact on Q4 2016 results. See table accompanying this press release for further information.

Sustaining growth trajectory with Sample to Insight portfolio

QIAGEN is capturing opportunities with its Sample to Insight portfolio, enabling molecular testing across the continuum from basic research to clinical healthcare. Among recent developments:

- QIAGEN achieved the goal for 55-60 placements of the GeneReader® NGS System by the end of 2016, capturing more than 10% of the estimated global market for new placements of benchtop NGS sequencers used in oncology applications. New performance enhancements were announced in January 2017 to improve output and turnaround times, along with plans to launch at least five new GeneRead QIAact panels, including in-depth breast and lung cancer panels as well as a channel to create customized panels for specific customer needs. The new sequencing chemistry remains on track for full availability in the U.S. in the first quarter of 2017.
- QuantiFERON-TB Gold Plus (QFT-Plus), the fourth generation of QIAGEN's modern standard for detection of latent tuberculosis (TB) infection, was submitted to the U.S. Food and Drug Administration for pre-market approval. The submission follows the 2016 launch of QFT-Plus in more than 60 countries across Europe, the Middle East, Africa, Asia and Latin America. Most recently, QuantiFERON-TB Gold was selected by the Republic of Korea Armed Forces for the screening of recruits in 2017 as part of a national strategy to eliminate the disease.
- OmicSoft Corporation was acquired in January 2017 to expand QIAGEN's industry-leading portfolio of bioinformatics solutions. OmicSoft markets a suite of tools that allow customers to analyze and visualize data sets and compare them to large, publicly available multi-omics data sets, as well as scalable and flexible software architecture solutions that enable customers to effectively manage and share very large amounts of data. The OmicSoft solutions are highly synergistic with QIAGEN's analysis and interpretation solutions and will add utility to Sample to Insight solutions, in particular the GeneReader NGS workflow. Terms of the transaction with the privately held U.S. company were not disclosed.

Initiatives to sustain faster sales while delivering margin benefits

QIAGEN has a series of initiatives well underway to support faster sales momentum while improving efficiency and accountability to deliver margin gains. Key targeted actions were implemented in the fourth quarter of 2016 and will continue in 2017. A pre-tax restructuring charge of \$79.1 million (\$0.24 per share after taxes) was taken in the fourth quarter of 2016, including approximately \$42.4 million of non-cash items. As previously announced, pre-tax restructuring charges for these initiatives of approximately \$10 million (or about \$0.03 per share after taxes) are planned to be taken during 2017.

Sample to Insight — 5

⁽²⁾ Top 7 emerging markets: Brazil, Russia, India, China, South Korea, Mexico and Turkey.

Q4 and FY 2016: Rest of world represented less than 1% of net sales.

Synthetic share repurchase completed

In January 2017, QIAGEN completed a synthetic share repurchase that combined a direct capital repayment with a reverse stock split as part of a commitment to return \$300 million to shareholders. The transaction was announced in August 2016 and involved an approach used by various large, multinational Dutch companies to provide returns to all shareholders in a faster and more efficient manner than traditional open-market purchases. About \$245 million was returned to shareholders through the transaction, which reduced the total number of issued QIAGEN shares by approximately 3.7% to 230.8 million (of which 4.95 million in treasury) as of January 31, 2017, from 239.7 million (of which 5.144 million in treasury) immediately prior to the transaction. QIAGEN intends to return the balance of the commitment through open-market share repurchases during 2017.

Change in the Executive Committee

Dr. Thomas Schweins has been appointed Senior Vice President, Life Science Business Area, to lead QIAGEN's presence in the Academia, Pharma and Applied Testing customer classes in addition to his current role as a member of the Executive Committee with responsibilities for Corporate Strategy, Marketing Services and Human Resources. Dr. Schweins has been with QIAGEN since 2004 and was involved in leading QIAGEN's Life Science business as Vice President of Marketing & Strategy until taking on his current role in 2011. Dr. Schweins came to QIAGEN after assignments with The Boston Consulting Group and at Hoechst AG / Aventis S.A. He has a Ph.D.in Biochemistry from the Max Planck Society in Germany and an M.S. in Chemistry from the University of Southern California in the United States, where he also did post-doctorate research. He replaces Brad Crutchfield, who has stepped down from this role for personal reasons. QIAGEN would like to thank Mr. Crutchfield for his successful contributions and wish him all the best in his future endeavors.

Outlook

For full-year 2017, QIAGEN reaffirms the initial guidance provided in November 2016 for adjusted net sales growth of approximately 6-7% CER. This is based on approximately one percentage point from the acquisitions of Exiqon (acquired in June 2016) and OmicSoft (acquired in January 2017) and about 5-6 percentage points from the rest of the portfolio (including one percentage point of headwind from reduced U.S. HPV test sales). QIAGEN also reaffirms its guidance for adjusted diluted EPS of about \$1.25-1.27 CER per share based on operating and financial leverage, which includes benefits from completion of the \$300 million share repurchase commitment by the end of 2017 and efficiency actions taken in 2016, but excludes the expected \$0.03 per share of restructuring costs planned for 2017. Based on exchange rates as of January 31, 2017, currency movements against the U.S. dollar are expected to have an adverse impact on results of about two percentage points on full-year 2017 net sales, and about \$0.02 per share on adjusted diluted EPS. These expectations do not take into account any further acquisitions that could be completed in 2017.

For the first quarter of 2017, net sales are expected to rise approximately 4-5% CER, which includes an anticipated two percentage points of headwind from reduced U.S. HPV test sales. Adjusted diluted EPS is expected to be approximately \$0.21-0.22 CER on an underlying basis, and about \$0.18-0.20 CER including the anticipated restructuring charge of about \$0.02-0.03 per share. Based on exchange rates as of January 31, 2017, currency movements against the U.S. dollar are expected to have an adverse impact on results for the first quarter of 2017 of about two percentage points on net sales, and about \$0.01 per share on adjusted diluted EPS.

Quarterly results presentation, conference call and webcast details

A presentation with additional information can be downloaded at http://www.qiagen.com/de/about-us/investors/corporate-calendar/. A conference call will be held on Thursday, February 2, 2017, at 15:00 Central European Time (CET) / 14:00 GMT / 9:00 Eastern Standard Time (EST). A live webcast will be made available at this website, and a replay will also be made available after the event.

Sample to Insight 6

Use of adjusted results

QIAGEN reports adjusted results, as well as results on a constant exchange rate (CER) basis, and other non-U.S. GAAP figures (generally accepted accounting principles), to provide additional insight into its performance. These results include adjusted net sales, adjusted gross profit, adjusted operating income, adjusted net income attributable to owners of QIAGEN N.V., adjusted diluted EPS and free cash flow. Adjusted results are non-GAAP financial measures that QIAGEN believes should be considered in addition to reported results prepared in accordance with GAAP, but should not be considered as a substitute. Free cash flow is calculated by deducting capital expenditures for Property, Plant & Equipment from cash flow from operating activities. QIAGEN believes certain items should be excluded from adjusted results when they are outside of ongoing core operations, vary significantly from period to period, or affect the comparability of results with competitors and its own prior periods. Furthermore, QIAGEN uses non-GAAP and constant currency financial measures internally in planning, forecasting and reporting, as well as to measure and compensate employees.

QIAGEN also uses adjusted results when comparing current performance to historical operating results, which have consistently been presented on an adjusted basis. For these reasons, we are also presenting adjusted results excluding the impact of the restructuring charge taken in the fourth quarter of 2016. Reconciliations are included in the tables accompanying this report.

Change in accounting principle for equity-based compensation

In the fourth quarter of 2016, QIAGEN made a change in accounting principle for equity-based compensation to the "multiple attribution method," which now aligns QIAGEN's U.S. GAAP (Generally Accepted Accounting Principles) and IFRS (International Financial Reporting Standards) reporting. QIAGEN believes this change is preferable since it provides better alignment of cost recognition over vesting periods. Results for previous years have been revised without any meaningful impact. For the first nine months of 2016, adjusted diluted EPS remained at \$0.72 per share after revision, as the reduction of \$2.1 million in after-tax equity-based compensation was offset by an increase of about 1.3 million in the weighted average number of diluted shares. For full-year 2015, adjusted diluted EPS was revised to \$1.06 from \$1.05 per share due to the rounding difference created by the reduction of \$3.0 million in after-tax equity-based compensation against an increase of about 1.5 million in the weighted average number of diluted shares. This change did not impact results for the fourth quarter of 2016. For more information, please see table accompanying this press release and filings with the U.S. Securities and Exchange Commission.

About QIAGEN

QIAGEN N.V., a Netherlands-based holding company, is the leading global provider of Sample to Insight solutions that enable customers to gain valuable molecular insights from samples containing the building blocks of life. Our sample technologies isolate and process DNA, RNA and proteins from blood, tissue and other materials. Assay technologies make these biomolecules visible and ready for analysis. Bioinformatics software and knowledge bases interpret data to report relevant, actionable insights. Automation solutions tie these together in seamless and cost-effective workflows. QIAGEN provides solutions to more than 500,000 customers around the world in Molecular Diagnostics (human healthcare), Applied Testing (forensics, veterinary testing and food safety), Pharma (pharma and biotech companies) and Academia (life sciences research). As of December 31, 2016, QIAGEN employed approximately 4,700 people in over 35 locations worldwide. Further information can be found at http://www.giagen.com.

⁽¹⁾ In Q4 2016, QIAGEN changed to the "multiple attribution method" accounting principle for equity-based compensation. For full-year 2015, adjusted diluted EPS was revised to \$1.06 (previously \$1.05) due to a modest rounding difference from reduction in equity-based compensation versus increase in number of diluted shares. For the first nine months of 2016, adjusted diluted EPS remained at \$0.72 after the revision. This change had no impact on Q4 2016 results. See accompanying table for further information.

⁽¹⁾ In Q4 2016, QIAGEN changed to the "multiple attribution method" accounting principle for equity-based compensation. For full-year 2015, adjusted diluted EPS was revised to \$1.06 (previously \$1.05) due to a modest rounding difference from reduction in equity-based compensation versus increase in number of diluted shares. For the first nine months of 2016, adjusted diluted EPS remained at \$0.72 after the revision. This change had no impact on Q4 2016 results. See accompanying table for further information.

QIAGEN N.V. CONDENSED CONSOLIDATED STATEMENTS OF CASH FLOWS⁽¹⁾

	Years ended December 31,	
(In \$ thousands)	2016	2015
Cash flows from operating activities:	(unaudited)

⁽¹⁾ In Q4 2016, QIAGEN changed to the "multiple attribution method" accounting principle for equity-based compensation. See accompanying table for further information.

⁽²⁾ Free cash flow is a non-GAAP financial measure and is calculated from cash provided by operations reduced by investments in fixed assets. QIAGEN believes this is a common financial measure useful to further evaluate the results of operations.
