
FOR IMMEDIATE RELEASE

Sif announces the award for the production of pin piles for the Beatrice offshore wind farm.

**ROERMOND,
THE NETHERLANDS
16 JUNE 2016**

Sif Holding N.V. (“Sif or “the Company”), a leading manufacturer of large steel tubulars which are used as foundation components for the offshore wind and offshore oil & gas markets, announces today that it has been awarded the production of pin piles for the Beatrice offshore wind farm.

The Beatrice offshore wind farm will be located in the Outer Moray Firth in Scotland (UK). The 588 Megawatt offshore wind farm comprises 84 wind turbines on pre-piled jacket substructures. The power will be collected on two offshore transmission modules via 33 kilovolt array cables and associated equipment. The development, once fully constructed and operational, provides energy equivalent to the needs of approximately 470,000 homes.

The total volume of the project will amount to approximately 19.5 ktons and will be produced in the fourth quarter of 2016 and first half year 2017.

Sif

ABOUT SIF HOLDING N.V.

Sif is a leading manufacturer of large steel tubulars which are used as foundation components for the offshore wind and offshore oil & gas markets. The Company manufactures customised tubular components for offshore foundations, predominantly in the greater North Sea region. Sif combines a highly automated and flexible production facility with technology leadership in rolling and welding of heavy steel plates which is based on over 65 years of experience and innovative in-house developed techniques and processes. Sif primarily produces monopiles, transition pieces and piles that are used to anchor jacket foundations in the seabed for offshore wind turbines, as well as legs, pile sleeves and piles of the larger jackets for oil & gas as well as tubular structures for various uses such as jetties.
