Vianen, 1 March 2007

BLUE FOX SELLS NON-CORE ACTIVITY CARRIER TO CARRIER TELECOM

Blue Fox Enterprises N.V. (Blue Fox) announces the sale of its subsidiary Carrier to Carrier Telecom N.V. ("Carrier to Carrier"). For this transaction, the buyer has established a new entity, in which the current management of Carrier to Carrier participates. Carrier to Carrier has been non-core for Blue Fox since several years.

Carrier to Carrier is based in Biddinghuizen, the Netherlands, and employs 14 people. The company is a provider of international satellite communication services and has a leading position in this market. With the sale of this activity, Blue Fox will realise a book gain of approximately € 0.8 million. This book gain will be recognised in the results of the first half 2007.

The intention to sell this activity was announced in previous reporting periods. The sale is the result of a long negotiating process and fits within the framework of the turnaround that was announced during 2006. The divestment of Carrier to Carrier does not conclude the turn around process; the positions of the remaining subsidiaries is currently being studied, which will lead to the ultimate definition of the future core activities of the company.

Blue Fox will publish its Annual Results 2006 on Monday 19 March.

Note: The press release is sent by Blue Fox Enterprises. Blue Fox is the first and only supplier of completely integrated software solutions for the international textile- and apparel industry. Blue Fox also distributes CAD/CAM-software for engineering-applications and provides CAD/GIS-solutions on behalf of governmental institutions. Blue Fox is listed on Eurolist of Euronext Amsterdam N.V.
